PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Friday, July 15, 1977*

The House met at 10 o'clock a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Show me Thy ways, O Lord; teach me Thy paths.—Psalms 25: 4.

Our Father God, amid the tumult of trying times and the demands of daily duties we would pause in this quiet moment to commit ourselves and our troubled world to Thee. In this day of challenge and opportunity Thou hast given us tasks which call for courage, strength, and wisdom. Make us strong enough to do the things we ought to do and steady enough not to do the things we ought not to do. Grant us faith to walk in the ways of truth and love which alone lead to life.

O Thou Father of us all, draw the nations together that peace and justice and freedom may come to this planet and the Earth may form one brotherhood the wide world o'er. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 2502. An act to extend certain oil and gas leases by a period sufficient to allow the drilling of an ultradeep well.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5970) entitled "An act to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7552) entitled "An act making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1978, and for other purposes," and that the Senate agreed to the amendment of the House to the amendment of the Senate numbered 11, to the foregoing bill.

DEPOSITORS SAVINGS ASSOCIATION

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, yesterday was highly significant in the economic history of my State of Mississippi when the Bankers Trust Savings & Loan Association was reopened under the name of Depositors Savings Association. This event was made possible by the untiring efforts and excellent leadership of Mr. Robert Warren, who was named as conservator of Bankers Trust approximately a year ago. He turned what looked like a financial disaster into a sound thrift institution with membership in the Federal Home Loan Bank System and accounts insured by the Federal Savings and Loan Insurance Corporation.

This accomplishment was achieved only through the tireless work and dedication of Bob Warren; Allan D. Housley, special counsel to the conservator; officials of the Federal Home Loan Bank Board; and officials of the State of Mississippi.

I would also like to commend the some 60,000 depositors-stockholders of the former Bankers Trust for their patience and cooperation in seeing that the thrift institution was reopened on a sound financial footing.

Also under the leadership of Mr. Warren a number of other State savings and loans have been able to secure FSLIC insurance and we are hoping that other State associations will get the insurance in the near future.

Federal Government officials have given complete help and total cooperation.

REDUCTION OF 4-PERCENT FOUNDATION TAX

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, I would like my colleagues to know that with Mr. CORMAN of California I am today filing a bill to reduce the tax on foundations from 4 percent to 2 percent. After 5 years of experience, we can say with some confidence that this tax is producing more than twice enough money to cover the cost of auditing the nonprofit sector. While this money was not specifically earmarked for the purpose, the 1969 Tax Reform Act which imposed other obligations on foundations established the amount of the tax with such audit expenses in mind.

Unless the tax is cut, the fertile congressional mind will continue to cast about for ways of spending revenues from this tax outside the charitable field. This tax, in effect, reduces the charitable uses from foundation benefits, since mandatory payout requirements elsewhere in the law insure that foundations do not accumulate their income.

I would like to urge any other interested colleagues to join Mr. CORMAN and me, and some 24 other members of the Ways and Means Committee, in cosponsorship of this measure.

ANNUAL ROLL CALL CONGRESSIONAL BASEBALL GAME

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, there has been a lot of talk in the last few years that political parties no longer make a difference. But all the so-called "experts" who feel this way would be swayed, at least a little, by the event coming up on

the 25th of this month. I am, of course, referring to the Annual Roll Call Congressional Baseball Game, a contest drawn strictly along party lines. On our side of the aisle, we like to call this game "wine-making night," as we are used to stomping all over the Democrats.

For the freshmen in our midst, and for those of us who might need their memories refreshed, we Republicans have a great tradition in this annual classic. I feel it is only appropriate to review this illustrious history at this time. After splitting the first two games, the Grand Old Party went on a rampage, and owned the winner's trophy from 1964 to 1974. For 11 straight years, the trophy left its case but once each year, only to be returned to its rightful resting place on the following day. I am sure I do not need to remind anyone here that the last 2 years have been unusual. Early in 1975, we started hearing murmurs from across the aisle that there might be no more game if it continued to be no contest. Fearing that the Democratic Caucus would simply change the rules of the game, and declare its team the winners, we decided to ease up in the last 2 years.

But enough is enough. As far as we are concerned, the party is over, and the annual Republican wine-making, donkey-stomping party will go on as scheduled. Over the last month, our established stars have been toiling alongside three undiscovered talents. Our team has been up at the crack of dawn, has been under strict curfew, and has been through a training regimen so severe that even a marine would shudder.

And you talk about incentive. Our version of the human vacuum cleaner, shortstop LOU FREY, making one of his final appearances in the familiar Brooklyn uniform, has vowed to go out on top. Ace hurler, "Bean Ball" BILL COHEN has a new pitch, the SSP—supersonic pitch—ready for takeoff on the 25th. Residents around Baltimore's Memorial Stadium have cleared this superpitch for landing, but, unfortunately for our distinguished opponents, it will have zoomed into the catcher's mitt by the time they see it.

Last year, we were beaten by our own mistakes, and a freshman from Ohio who hit and pitched his way to stardom. Let this statement serve as notice to that gentleman, and to his manager, the distinguished gentleman from South Carolina (Mr. DAVIS) and the gentleman from Florida (Mr. CHAPPELL) that we will not be beaten by this Mottly crew again this year.

SOCIAL SECURITY BENEFITS DECOUPLING BILL

(Mr. WHALEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WHALEN. Mr. Speaker, on March 10, I introduced the social security benefits decoupling bill. This measure has received favorable comment from many sources, some of whom have produced additional information to revise and improve the proposal. Today I am pleased to be joined by my friend and colleague from Iowa, Mr. BEDELL, in introducing a revised version of that bill.

The need for "decoupling" is widely acknowledged by senior citizens' groups, by labor organizations, by the administration, and by everyone knowledgeable about social security financing. The big question is why Federal authorities have delayed so long after recognizing the need to correct a faulty benefit formula, one which "couples" payments for future retirees with automatic adjustments for present retirees—and one which, if not corrected, will eventually lead to workers receiving more after retirement than their wages before retirement.

In placing of the existing "coupled" benefits, the bill we are introducing today provides a progressive, three-step benefits formula based on the "high 10 years" of employment. It is weighted in favor of the low wage earner. The current ratio between benefits and the wages earned before retirement would be kept constant.

Most significantly, our bill does this in such a fashion as to make the system easier to understand, easier to administer, and more equitable for those who have contributed into the fund.

Finally, correction of the existing formula at this time will reduce the predicted future deficit by approximately one-half.

At this time I would like to make the section-by-section analysis of the bill a matter of record—the analysis appears in the Extensions of Remarks.

APPOINTMENT OF CONFEREES ON H.R. 1139, SCHOOL LUNCH ACT AND CHILD NUTRITION ACT AMENDMENTS OF 1977

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 1139) to amend the National School Lunch Act and the Child Nutrition Act of 1966 to revise and extend the summer food service program for children, to revise the nonfood assistance program, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky? The Chair hears none, and appoints the following conferees: Messrs. PERKINS, FORD of Michigan, ANDREWS of North Carolina, BLOUIN, SIMON, ZEFERETTI, MOTTL, MURPHY of Pennsylvania, LE FANTE, WEISS, HEFTEL, CORRADA, KILDEE, MILLER of California, QUIE, BUCHANAN, PRESSLER, GOODLING, Mrs. PETTIS, and Mr. PURSELL.

FEDERAL MINE SAFETY AND HEALTH ACT OF 1977

Mr. GAYDOS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 4287) to promote safety and health in the mining industry, to prevent recurring disasters in the mining industry, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Pennsylvania (Mr. GAYDOS).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SARASIN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 298, nays 3, not voting 132, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 4287, with Mr. GONZALEZ in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday, Thursday, July 14, 1977, the gentleman from Pennsylvania (Mr. GAYDOS) had consumed 12 minutes and the gentleman from Connecticut (Mr. SARASIN) had consumed 10 minutes.

The Chair recognizes the gentleman from Connecticut (Mr. SARASIN).

Mr. SARASIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, during the past 4½ years, I have supported strong Federal legislation in combination with the States to assure employee health and safety at the workplace. I will continue to support legislation I think most effective in assuring that health and safety. However, I cannot support the pending bill (H.R. 4287) since I believe the results of hearings over the last two Congresses call for more effectiveness than this bill offers our metal and nonmetallic miners.

During the 94th Congress, a bill (H.R. 13555) to amend the Metal and Nonmetallic Mine Safety Act of 1966 was before the House. That bill was lauded by the leadership of our committee. And, indeed, it should have been, since it substantially improved the provisions of the Metal Act by correcting the glaring inadequacies of that act. That bill also transferred the administration of enforcement activities—both coal and noncoal—from the Department of the Interior to the Department of Labor.

After 8 days of hearings, debate, and compromise that bill emerged with my support. Not only did I support that bill, but 308 other Members of this Chamber indicated their support. It was, and is, inexplicable to me why that bill or a similar bill is not offered before this House today by the same proponents of last year's bill. Since those proponents are not doing so, at the proper time I intend to offer as a substitute for the committee bill, a bill (H.R. 7979) which is substantially similar to last year's bill.

It is extremely important that Members understand that H.R. 4287 is not the House-passed bill of the last Congress. The bill of the last Congress amended the Metal and Nonmetallic Act. This year's bill repeals that act, and metal and nonmetal is rolled over into part of the existing provisions of the Coal Act. I object to that procedure and I object to the process which produced that result.

In regard to the latter objection, individuals affected by legislation should have an opportunity to address the issues. This is hardly the case with the Federal Mine Safety and Health Act of 1977, H.R. 4287. This legislation was hastily prepared the night before our subcommittee went to markup, and none of the witnesses who appeared before us had ever been given the opportunity to comment on its provisions. What we considered both this year and last was, first, legislation to amend and improve the Federal Metal and Nonmetallic Act of 1966 and, secondly, legislation which essentially rewrote the act but included both coal and metal and nonmetal within its provisions. Nowhere was any indication ever given that metal and nonmetal would ever be simply rolled over into the Coal Act—with absolutely no attention given to the problems that this could well entail, particularly given the diversities within the various mining industries.

As to the former objection—the provisions of the bill simply bringing metal and nonmetallic mines under the provisions of the Coal Act—I would like to focus on several of what I believe are its worst deficiencies.

The first is logic. Is it logical to lump together every industry that is connected to mining? There is no doubt but that there are vast differences. For instance, coal mines emit gas, methane, while only few nonmetallic mines contain methane. Coal seams are usually in flat, horizontal deposits or layers, and the engineering involved is very similar from seam to seam. On the other hand, metal and nonmetallic can be found in any formation. The extraction process of noncoal mining is unique, requiring different engineering in virtually every mineable deposit of valuable minerals.

Congressman UDALL, as chairman of the Interior and Insular Affairs Committee, understands these differences. In January he stated:

> I believe that geological circumstances are considerably different than fossil fuel extraction. . . . We started out four years ago to write a surface mining bill that would cover all minerals, and we soon discovered that the problems were quite different and that you can't include the same kind of provisions for both kinds of mining.

Yet, when H.R. 4287 was reported from our subcommittee, it did not even include a provision for separate standards for the industries involved. During full committee markup, an amendment offered by Mr. QUIE was adopted insuring that future standards would be promulgated as to metal and nonmetallic mines and coal mines, respectively. If something so basic to American mining was excluded, such as applicable separate standards, I really shudder at the thought of what else might be excluded from the bill.

In recognition of the differences within the overall mining industry, we have operated under two separate laws since 1966 and 1969, respectively. All of a sudden, we are throwing everything into one pot with no justification or rationalization. The issue here is not the inadequacies of the existing laws, both coal and noncoal, because we all agree with that. It is instead the fact that we are comparing apples to oranges. Because of this, we could well diminish the attention now paid to metal and nonmetallic miners by including them with coal miners.

This point is crucial to understanding the entire picture. First, there are approximately 2,500 underground coal mines in comparison to 666 underground metal and nonmetallic mines. There are 14,000 surface metal and nonmetallic mines of which 12,000 are sand and gravel pits and stone quarries, in comparison to 2,000 surface mines for coal. There are approximately 11 different metals and nonmetals mined underground and approximately 75 different metals and nonmetals mined at the surface. With coal, we are only dealing with anthracite or bituminous. These figures alone must raise doubts as to the applicability of one to the other, and certainly to the wisdom of putting sand and gravel pits and rock quarries under the Coal Act.

Proponents of this measure assert that the two acts result in discrimination against noncoal miners versus coal miners since the former have an admittedly weaker law. However, would we discriminate less putting them all together when

we consider that the different industries within metal and nonmetal will certainly not share the same interests or the same needs as will the coal miners? There are 274,500 hard rock miners and 212,000 coal miners. You can rest assured that there is relative unanimity as to safety and health in the coal industry, but nothing of the kind exists in metal and nonmetal because of the diversities.

The best example of the fact that metal and nonmetal mining is not really understood properly occurred during the debate on the floor last year. A significant portion of our time was devoted to the Scotia Mine disaster—which has absolutely nothing to do with the bill under consideration. To aggravate this even further, we are rolling both groups into advisory committees that are now strictly oriented toward coal. There is a very strong possibility that the divergent and more difficult needs of the metal and nonmetallic miner will take a back seat to the more or less uniform needs of the coal miners. We must not forget that the composition of the advisory committees are individuals with expertise in coal mine health and safety . . . not metal and nonmetal.

Beyond logic, there is also the question of safety. Is this legislation really in the best interests of metal and nonmetal miners? I think not. To begin with, this legislation does not contain a general duty clause—something essential if we are to truly insure the health and well-being of our metal and nonmetal miners. The bill does not contain the rulemaking provisions which drew so much comment by all witnesses. It does not provide for formal hearings—and this can be critical. An example of this occurred on our last day of hearings when the Trona mines testified before us. They cited one example where MESA proposed a standard which would have caused hazards to underground miners. Had it not been for the ability of industry to cross-examine the agency's witness, allowed only in formal hearings, potential disaster could have occurred. Instead, Interior changed its position and the possibility of deaths from an ill-conceived standard was averted.

In reference to the existing hearings provisions, let me give you an example of the types of problems that will arise. The Federal Coal Mine Health and Safety Act was passed by Congress in 1969, as a direct result of a coal mine disaster in Farmington, W. Va., in which 78 coal miners lost their lives. Congress recognized at that time that serious problems existed in the coal mining industry. In an effort to correct these deficiencies, Congress included in the Federal Coal Mine Health and Safety Act substantial mandatory health and safety standards. To guarantee that these standards were never reduced, Congress developed the rulemaking provisions presently found in the Coal Act. These mandatory health and safety standards, which are inapplicable to hard rock mining, are not included in H.R. 4287, and neither should the rulemaking provisions which were developed to protect those standards be included.

Finally, the ongoing oversight hearings on the Coal Act have revealed conflicts and inadequacies in that act. These hearings may still be in process, and the metal and nonmetallic mine owners have not been heard, even though they would be affected should H.R. 4287 pass. The Coal Act oversight hearings are in recognition of the fact that there are serious deficiencies within the Coal Act—deficiencies that threaten the flow of energy sources which are desperately needed by America, deficiencies that are revealed in the costly nitpicking of the act, and deficiencies that threaten the well-being of the miners.

The great majority of House Members represent States that have far more metal and nonmetal miners than they do coal miners. This bill is not going to help the coal miners. All H.R. 4287 really does is to add additional workers to a law that is in rather sorry shape, irrespective of their needs or interests. The real tragedy is that metal and nonmetal miners will now be included in a law that has a lower success rate of preventing fatalities and injuries. They will be losing a law that has resulted in constant improvements for them and that, with improvements, could rapidly enhance their chances to leave their jobs each day safe and healthy.

Mr. Chairman, it has been argued that this bill, H.R. 4287, "equalizes" the protections of both types of miners—coal and noncoal. I would like to elaborate on a few additional reasons why this is not necessarily so.

Titles II, interim health standards; III, interim safety standards; and IV, black lung benefits, of the Coal Act are not amended or touched by this bill. If we are to equalize the protections of metal and nonmetallic mines to coal mines by lumping all under one act, we should study the effect of the whole act under which we are lumping them. However, we, meaning the Education and Labor Committee, have not looked at those sections at all. Therefore, if amendments are offered to those sections, I, particularly, and we as members of the originating committee, would not be able to adequately insure that improved health and safety would be offered our Nation's miners by either accepting or rejecting amendments to those titles. Further, it is clear, that metal and nonmetallic miners are not offered the protection of legislated minimum mandatory health and safety standards, as are coal miners.

When titles II and III were originally written into the Coal Act, extensive study and investigation by the Committee on Education and Labor had been undertaken. At the present time, contrary to that enormous background work which produced the Coal Act, the Subcommittee on Compensation, Health and Safety has not even purviewed a single sentence of titles II and III of the Coal Act. In failing to do so, the committee bill has overlooked one of the most important aspects of the Coal Mine Health and Safety Act of 1969—that is, its "variance procedures," found in title III, section 301(c).

It is without doubt that mine operators need a variance procedure in order to operate. Not all mines can conform to all standards and the variance allows mines to continue to operate even if they do not comply, if they offer a guarantee that an alternate method of achieving compliance results in no less safety.

Under the bill, H.R. 4287, as reported, no variance procedure is offered metal and nonmetallic mines. It can be argued that there was no such legislative basis in the prevailing Metal and Nonmetallic Act; that the variance procedure under that act came by regulations; and that there is no need for a legislative basis for a variance procedure for metal and nonmetal mines under the Coal Act. However, that argument ignores the basis of the proponents' reasoning for rolling metal and nonmetallic mines under the Coal Act, that is, that it gives both equal protection. For if coal mines have the benefit of a legislated variance procedure, so should metal and nonmetallic mines. The variance procedure of the metal and nonmetallic industry should not be subject to the whim of the standards makers.

One interesting aspect of inclusion of metal and nonmetallic mining under the Coal Act, and an argument that it increases protection, is the fact the Coal Act mandates civil penalties. Alleged is the fact that penalties increase awareness of safety and will cause operators to come into compliance quickly.

That argument is apparently specious for two good reasons. One, the oversight hearings on the Coal Act have revealed that civil penalties create an adversary approach and do not create an atmosphere of voluntary compliance. The penalty assessment and collection procedure under the Coal Act has been severely criticized, and even the Department of the Interior has recommended legislative changes.

The second reason mandatory civil penalties are of questionable value is a June 1977 publication by MESA entitled "A Report on Civil Penalty Effectiveness," submitted at the coal oversight hearings, in which the effectiveness of civil penalties were analyzed. That report stated "only speculative conclusions may be drawn from the analysis." However, some statistical findings were of interest. Those were:

A comparison of underground mines in the coal industry and the metal and nonmetal industry, which does not have a civil penalty program, shows metal and nonmetal fatal and nonfatal injury frequency rates improving at a faster rate than coal's. However, many factors may have inhibited the reduction of coal's rate, such as improved injury reporting (no increase in injuries, but more injuries reported to MESA) and changes in the work force (inexperienced miners entering an expanding industry).

As measured in 1974–1975, the change in the disabling injury frequency rate at selected large underground coal mines has no practical statistical correlation with the various ratios of penalty amounts originally levied, currently assessed or paid, versus the numbers of violations issued or paid.

In evaluating the effectiveness of penalties, operator attitude would necessarily play an important role. What was

the report's conclusion on operator attitude? It was:

> Penalized producers saw no connection between penalties and safety. Only about 10 percent of the operators, all small, claimed to avoid violations because of fines.

However, a means of voluntary compliance may be more important than penalties. As the report states:

> Pride was a recurring issue. Operators perceived violations as "black marks" on their safety record, so violations were avoided not because of the associated penalty but for the sake of pride.

How did the miners themselves feel about penalties? The report states:

> The evaluation team visited several mines and found that most miners did not appear to know that penalties existed, or that companies paid fines; nor did they seem to care if the companies were fined. Those who did know about penalties were of the opinion that penalties do not increase miners health and safety.

Apparently, MESA inspectors were of similar views. The study team talked with a dozen MESA inspectors. Here is their conclusion:

> Those who knew the amounts assessed felt them too insignificant to contribute to health and safety. Some inspectors had no idea of the penalty assessed nor did most care to know; they felt this would be prejudicial in citing future violations. A few knew of penalty amounts from operator feedback, but most received no feedback on their Inspector's Statements and wanted to know what happened because of them.

Rather than now bringing metal and nonmetallic mines under an act with this critical penalty procedure, it would do us well to first amend and improve the Coal Act.

Finally, in rebutting the argument that equal rights and protections are now being given metal and nonmetallic miners, I must point out that they are not being included under title IV—the black lung benefits provision, a "special" compensation granted coal miners under the Coal Act. I am not asserting that we should extend these same type benefits to metal and nonmetallic miners at this time; I am simply pointing out that H.R. 4287 does not equalize rights and benefits of the different miners.

The House should also be aware that if the legislation passes as is, we will go to conference with a bill that simply places metal and nonmetal miners in with coal miners. The other body, on the other hand, has made significant changes in the Coal Act that we in the House have had absolutely no opportunity to consider, a circumstance which is unfair to Members of this House.

Again, I urge my colleagues to seriously consider the problems that will arise by inserting metal and nonmetallic mines into the Coal Act. The Coal Act was written with relatively big business in mind. The vast majority of metal and nonmetallic mines, sand and gravel pits, et cetera, are small businesses, some of only 1 or 2 workers, many with about 8 to 10 workers. As I have tried to emphasize, H.R. 4287 was hastily conceived, not well thought out, has resulted in anomalies unknown, and may not be in our miners' best interests.

Finally, a point that should be reemphasized is that this bill is not a "simple transfer bill." It is much more. It highly impacts on metal and nonmetallic mining, as I have previously stated. It is clearly much more than a mere transfer of enforcement from Interior to Labor. It is crucial that we understand the effects of this bill on the safety and health of our Nation's metal and nonmetallic miners. It is my opinion that the thoughtful analysis necessary to understand those effects have not been undertaken.

On the other hand, I believe such thoughtful analysis has been given to my substitute, H.R. 7979. My bill which will be offered as an amendment in the nature of a substitute, was addressed at our hearings in the last Congress and in this Congress. It has been favorably considered by the House.

Mr. GAYDOS. Mr. Chairman, I yield 2 minutes to the gentleman from West Virginia (Mr. RAHALL).

Mr. RAHALL. Mr. Chairman, I rise in opposition to the substitute amendment that has just been introduced and urge support for the Federal Mine Safety and Health Act of 1977.

In my opinion, the substitute that now is being offered is a much weaker bill, not only to the bill that is before us, but weaker than the bill that was passed last year.

I am also concerned about the discriminatory aspects of separating metal and nonmetal miners, as the substitute calls for. Besides this discriminatory treatment, there are also problems with penalties under the substitute. The substitute amendment would have discretionary rather than mandatory penalties. Mandatory penalties, as provided in H.R. 4287, are necessary to provide a strong incentive for the mine operators to comply with safety and health standards in the hazardous mining industry without waiting for a disaster to occur or until after being caught in a violation of law.

The maximum lower penalty that the substitute would set of $1,000 is also a less incentive to the coal operators to comply with coal mining health and safety laws.

Now, granted, under the present bill (H.R. 4287) it provides a $10,000 maximum and the fines are rarely going to reach that point. They are generally levied around the lower level of $1,000; but we still have to have that maximum capability in the law in order to provide for greater incentive for compliance.

Another aspect of the substitute that concerns me is the preemption of Federal enforcement. H.R. 4287, as presently written, provides for 80 percent Federal funding to the States to help them with the enforcement of this law. I think this is a vital, important part of the bill.

I urge rejection of the substitute.

Mr. Chairman, I am in support of the Federal Mine Safety and Health Act of 1977 (H.R. 4287).

First, it defines "mine" and adds "or other" after the word "coal" in most places where it appears in the Federal Coal Mine Health and Safety Act of 1969, thereby serving to bring metal and nonmetal mining and milling under the jurisdiction of the Coal Act.

Second, it repeals the Metal and Nonmetallic Mine Safety Act passed in 1966.

Third, it transfers the functions of the Secretary of the Interior under the Federal Coal Mine Health and Safety Act of 1969 to the Secretary of Labor. In addition all personnel, property, records, et cetera, within MEA are transferred to the Department of Labor, and proceedings before the Secretary of the Interior shall continue before the Secretary of Labor.

Additionally, the transfer of MESA to the Department of Labor will increase communications between MESA and OSHA, the two agencies that have the most responsibility for protecting the workers' health and will minimize jurisdictional disputes and bureaucratic buck passing.

I believe the transfer of MESA from a department whose mission is to increase coal production to a department whose mission is to protect the well-being of the American worker will be a big step toward ending a lot of bureaucratic squabbling and jurisdictional disputes.

President Carter's energy program calls for a massive expansion of coal mining, and if we intend to make coal our Nation's principal fuel, the 211,800 coal miners in this country must be protected against the hazards of their work. And the close to 30,000 members of the United Mine Workers of America in my congressional district can rest assured that we in the Congress hear their concerns and are taking action accordingly. Let us pass this legislation today for the well-being of our workers, energy policies, and our Nation.

Mr. GAYDOS. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey (Mr. LE FANTE).

Mr. LE FANTE. Mr. Chairman, I rise in support of H.R. 4287, the Federal Mine Safety and Health Act of 1977.

The need for one safety and health law to cover all mines has been well documented by the report of the Committee on Education and Labor.

Historically, there has been great disparity between the protection afforded coal miners and miners employed in other kinds of mines. Mine safety and health statistics bear witness to the fact that progress in improving safety and health in noncoal mines has lagged well behind that of coal.

From the standpoint of equal protection of coal and noncoal miners, there is no reasonable justification for continuing the separate legislation for each area which now exists. Different statutory bases inevitably lead to differences in levels of protection.

Arguments against a single law covering all mines are usually predicated on the need to address the differences between coal and noncoal mining. However, there are similarities which outweigh the differences. There are under-

ground coal mines and surface coal mines. There are underground mines in the noncoal area, and there are surface mines in the noncoal area. To the extent that there are differences, these differences should be addressed in the substance of specific standards. There is no need for variation in the statutory procedures for developing standards, for enforcement of miners' rights, for inspections, or for investigations. Even now, under the present Metal Act, vertical standards are applied to different types of mining—underground, surface, and sand and gravel.

In addition, one law covering all mines is desirable from the standpoint of effective administration.

If two different statutory structures remain in place, there will be inevitable divergence between them. Obviously, it is simpler and more efficient to administer one law than two. Administrative, enforcement, and standards-setting experience under a single law can be more effectively shared and transferred within the agency. To the contrary, if two laws are in place, experience under one may not be readily translatable or useful to the other. A single law broadens the administrative and enforcement base of the agency, facilitating interchange of personnel where this might be useful. A single law facilitates compliance; all operators must comply with the same basic duties and observe the same basic procedures, even though specific standards may vary somewhat in substance.

An additional factor in administering a single law is that precedents and court decisions in one area will ordinarily be applicable to the other area. With two laws, there will evolve two different sets of precedents and judicial interpretations, which will not be mutually supportive or even mutually consistent.

All in all, a single mine safety and health statute cannot help but make for greater administrative effectiveness in carrying out the mandate of the Congress. At the same time, nothing precludes an administrative division within the agency dealing with the coal and noncoal areas, respectively. Indeed, it would seem logical for such a division to be maintained. But, when the basic ground rules are the same, everybody benefits.

Finally, it should be noted that the time is right for a single mine safety and health statute. The enactment of legislation which continues the present disparate treatment of coal and noncoal miners would be counterproductive. The longer that two different statutes exist, the more embedded the differences between them will become, and the more difficult it will become to enact a comprehensive mine safety statute in the future. Two systems will continue to diverge and will continue to evolve along different paths. Therefore, the time to mold both existing laws into one is now and I urge my colleagues to support this all-important legislation.

Mr. MARRIOTT. Mr. Chairman, will the gentleman yield?

Mr. LE FANTE. I yield to the gentleman from Utah.

Mr. MARRIOTT. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask the gentleman a question, if I may. Coming from a State where we have Kennecott Copper's open pit mine, as well as a lot of underground coal mining, quarries, and everything else, I do not understand why we need all of these under one set of regulations.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. LE FANTE) has expired.

Mr. SARASIN. Mr. Chairman, I yield 1 minute to the gentleman from New Jersey (Mr. LE FANTE).

Mr. MARRIOTT. I cannot for the life of me understand how all of these mining operations are similar, have the same problems. So why do we need all of these under one set of regulations? They are not even in the same bsuiness, for broad general purposes.

Mr. LE FANTE. I do not think that matters much. When you are driving an automobile for recreation, the law is the same to you as for the truck driver who makes his living driving. It is safety. It is health and safety. It is as simple as that. I have attended many of these hearings. I have no mines in my State.

Mr. MARRIOTT. If the gentleman will yield further, the gentleman has no mines in his State?

Mr. LE FANTE. No, not in my district. We have no mines. Nevertheless, from my attendance at these public hearings and from hearing the testimony that was given before the committee, I think primarily what we are concerned with here is the safety and health of the individuals. To me, that takes priority. The business they are in is secondary at this point.

Mr. MARRIOTT. But the whole conditions of safety are different. In my opinion, H.R. 4287 makes no sense if it attempts to do this.

Mr. GAYDOS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me respond to the gentleman. We are talking about standards. I am sorry that I will not be able to yield at this time, but I will yield after I am finished with my statement. We are talking about standards. Even now, under the existing act which governs noncoal workers, that is, the Metallic and Nonmetallic Act, there are many, many diversified types of activity, such as gold mining, mining salt, fluorspar, uranium, silver, asbestos. The gentleman, I suggest, has not quite understood the distinction between promulgating and adopting standards on a vertical basis.

Mr. Chairman, I want to take this opportunity to express my sincere appreciation to all the members of the committee, all of those who worked so hard to bring this legislation to the floor.

The bill before us today, H.R. 4287, provides many changes in existing law by improving the safety and health conditions in the metal and nonmetal mines in three major ways.

Everyone has to understand that we are now operating under two distinct acts: No. 1, the 1966 act covers metal and nonmetal miners.

Then we have the 1969 Coal Act. The Coal Act is different. It is a different act, and it covers coal mines, both surface and underground. We have to understand that distinction.

What we are trying to do today is very simple. We are going to combine both of these acts under one act. We are going to repeal the Metal and Nonmetal Act. That is what this legislation is designed to do.

In repealing the act, we want to follow the format that has been laid out and time-tested by the 1969 Coal Act.

What am I referring to? I am referring to standards. In the Metal Act it is very difficult to develop standards. They are delayed standards. Some standards have laid around idle and have not been accepted for as long as 2 and 3 years.

Let me make a second point. What else are we doing? We are providing in this act for specific penalties.

Right now, under the Metal and Nonmetal Act, there is no penalty. How can we accept that? There is no mandatory penalty; there are only discretionary penalties. The Secretary may or may not assess a penalty. Under the Coal Act, they must put on a penalty, and they enforce the act. In order to be fair, we have to consolidate the two acts.

In this case, because of the lack of proper regulations in the existing Metal and Nonmetal Act, there is a basic unfairness between those miners who are covered under the Noncoal Act and those are covered under the Coal Act, because the Coal Act right now specifically provides walk-around rights for a miner. He has a right to walk around and inspect. Under the Metal Act, he has no such right. This is one area where we are trying to make a correction.

This is very simple. We are trying to make a case before the committee, and we say that separateness is not equality. These two acts do not give equal protection to both types of miners.

What difference does it make if a miner works in a gold mine or a silver mine and he gets hurt? What difference should there be? Why should he be subjected to more possibilities of an injury of a sustaining nature than if he worked in a coal mine? Why should there be a difference? Why should the standards be mandatory in the coal industry and not in the noncoal industries?

If the operator of a coal mine does not put the standards into effect, he is subject to a mandatory fine up to as high as $10,000 in some instances. Sometimes the fine is lower, down to $200 or $300, the average fine being around $300.

Why should a miner working in a silver mine not have at least that semblance of fairness and protection? It is just not logical, it is not fair, it is not equitable.

Mr. PATTEN. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from New Jersey.

Mr. PATTEN. Mr. Chairman, in one case recently, 17 cars went off the track in Metuchen, N.J. Some of the cars were loaded with fluorine, and nobody knew

what to do. The chief of police was thinking of evacuating the town.

In Tennessee just last week or perhaps this week, a town was evacuated. That involved a tank truck loaded with bromide—it is bromide or something like that. I think they use it for headaches.

Just listen to this. Are we here setting up priorities in operations where they carry these chemicals and materials like hydrochloric acid that affect health to educate everybody as to what to do in case we have more accidents involving trucks and railroads?

Mr. GAYDOS. Mr. Chairman, let me respond to the gentleman.

This is a Mine Safety Act. We are talking about the extraction of minerals below or above ground.

Mr. PATTEN. I know that.

Mr. GAYDOS. What the gentleman refers to would properly be under OSHA. That is where they would set up standards as far as that activity is concerned, relating to railroads and trucks. That would come under safety. We do have another Railroad Act, and under that we might bring in some set of standards.

Mr. PATTEN. Would this have anything to do with it under the mining operations, once they started to transport? Do I understand this will have nohing to do with that?

Mr. GAYDOS. No. This pertains only to extraction of materials from mines below or above ground.

Mr. PATTEN. May I ask the gentleman another question.

Mr. GAYDOS. Mr. Chairman, I cannot yield any further to the gentleman. I have a statement I would like to get in the RECORD.

Let me refer to the three things that this act does do. It joins all miners, both coal and noncoal, under one legislative authority. That is, it meets a long-standing need for equalizing health and safety protections for all miners.

No. 2, it transfers administration of all mine-enforcement activities from the Department of the Interior, over to the Department of Labor. The Department of Interior historically has always been the department that had as its primary concern making sure that in this Nation we extracted all the materials and metals we had and kept that business going.

Because of some unexplainable reason, back in 1966, the responsibility of enforcing the mine law was put in a department which was primarily given the responsibility of providing for the orderly extraction of materials from the earth.

Mr. Chairman, there is an obvious contradiction of duties; and we feel that the Department of Labor, which historically has been concerned with the rights of working people, should have the responsibility of enforcing this safety and health law.

No. 3, H.R. 4287, as proposed by this House, repeals the Metal and Nonmetallic Act and upgrades the protections afforded metal and nonmetal workers, regardless of what the gentleman from Connecticut (Mr. SARASIN) is suggesting.

It is a better act. It does correct the insufficiencies of the act as we know it now.

We must remember, when we are considering this legislation, that mining has always been recognized as one of this country's most hazardous occupations. In 1975, for example, the death rate for all mining was more than four times as great as the average for all other industries; a miner's chance of being killed on the job today is eight times greater than that of a laborer working in manufacturing.

Now, for every working day, even today as we discuss this legislation, at least 1 miner is being killed; and 66 miners are being maimed or injured. Those are telling and, I think, very, very significant statistics.

Mr. Chairman, we know that in the coal mining industry, explosions get much notoriety. We know that they get talked about a lot, but I want the Members to know that the frequency rates for fatalities and injuries in the non-coal-mining area are greater underground.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. Mr. Chairman, I do not have any time. I will respond to the gentleman at the end if I do have time.

With respect to the general statistics—those are what I think the gentleman wants me to refer to—the general statistics in the coal and noncoal areas are about equal, as far as percentage rates are concerned.

Why do I mention those figures? I mention those figures because I am certain that the existing Coal Act passed in 1969 is a stronger act. It requires more than the act passed in 1966, which pertains to what we call the hard-rock mining. There is no question about it.

Why is it stronger? No. 1, it provides mandatory penalties. There are no discretionary penalties as they have in the existing Hard-Rock Mine Act, where they may or may not get fined. Under that act, they have a system whereby they put a red tag on a piece of machinery that malfunctions.

Mr. Chairman, I urge my colleagues to pay specific attention to the debate this morning and to support this bill wholeheartedly.

Mr. SARASIN. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I would point out to the gentleman from Pennsylvania (Mr. GAYDOS) that we obviously have a disagreement over the best method to resolve the problem and maintain health and safety for the noncoal miners in this country.

I feel very strongly that the answer to the problem is not to simply dump the noncoal miners into the Coal Act.

Mr. Chairman, we have never even looked at the Coal Act in our committee. I think that is a disaster.

The gentleman from Pennsylvania (Mr. GAYDOS) just made the statement in the RECORD that more miners are killed underground in metal and nonmetal mines than are killed in coal mines. That is patently untrue. In 1976, 109 coal miners were killed and 37 nonmetal and metal miners were killed.

In 1977, 111 coal miners were killed and 43 metallic and nonmetallic miners were killed. So the statement made by the gentleman from Pennsylvania (Mr. GAYDOS) that more miners are killed underground than are metal and nonmetallic miners is patently wrong.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. It is true that my reference in the well mistakenly was to the number of men killed, but I am talking about the fatality and injury frequency rates. The gentleman from Connecticut (Mr. SARASIN) knows that the statistics indicate that the rate of death in underground coal mines is less than in hardrock mines.

Mr. SARASIN. The statement made by the gentleman from Pennsylvania (Mr. GAYDOS) in the well was erroneous and I appreciate the gentleman admitting that it was erroneous.

But the fact is, as I said, that the metallic and nonmetallic fatal and injury frequency rates are improving at a faster rate than coal, and that is in the report on civil penalties effectiveness. And in the recommendations dated June 1977, put out by MESA, they show that the mandatory penalties, which have been described so glowingly by the gentleman from Pennsylvania (Mr. GAYDOS) did not work. That there is no correlation between the penalties and the safety in the mine. And what we are talking about in this matter, is the health and safety of the miners in this country. And here we can point to the experience in the metal and nonmetallic mines, where you do not have mandatory penalties, where you can get a cooperative situation existing between the inspection force, the laborers, and the operator to try and resolve the problem of maintaining safety and health at the workplace. In terms of the accident frequency rates, such rates are dropping faster there than they are under the Coal Act, where you have mandatory penalties, which the Department of Interior said did not work. The Department further stated that there is no correlation between the two: frequency rate and penalties. And, in fact, we are creating simply an adversary process we had back with the mandatory penalties, and exactly the same situation with OSHA where we have witnessed a nitpicking process. We will be faced with the requirement to go out and find something wrong, and we will find operators who will no longer be willing to work with the inspectors. In contrast, the cooperative relationship existing in the metal and nonmetallic mines would continue to exist if my substitute is adopted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SARASIN. Mr. Chairman, I yield myself 3 additional minutes.

Mr. Chairman, I believe that it is most important that we read the bottom line. The bottom line of both bills here is on mine safety and the health of the miners, and we are not going to be able to do this by using methods that have been disproved and that are inadequate, and that are punitive rather than the methods that will help to solve the problem.

I think it is extremely important that we remember we are going to create this continuing adversary situation which will work to the detriment and not for the betterment of the miners. If we could agree and describe what a great success the Coal Act is, that would be one thing. But we cannot do that. The argument which has been made in this well today, yesterday, and last year when we were talking about the improvement of the metallic and nonmetallic mines—which discloses as I pointed out earlier the major activities and the effectiveness of the metallic and nonmetallic law—is that let us improve the other act. But we do not do that in this bill. Let us also improve the Metallic and Nonmetallic Act. We do that with my substitute. The substitute also provides for the transfer.

Mr. GAYDOS. Mr. Chairman, if the gentleman will yield still further, does not the gentleman from Connecticut feel that the penalty rule is very worthwhile? Does the gentleman think we would be able to collect our income taxes if we did not have penalties? Penalties serve as practical means of enforcing the laws, and penalties have been proven successful under the Coal Act.

To do what the gentleman says is illogical and contradictory.

Mr. SARASIN. I would suggest to the gentleman from Pennsylvania that he certainly will not justify the mandatory penalties on that basis.

It seems to me that the gentleman in the well and a few others who took the well said mandatory penalties are necessary for safety and health, and if we do not care about safety and health, just throw the whole thing out.

Mr. GAYDOS. I would say safety and health are much more important.

Mr. SARASIN. Then we should be looking at the effectiveness of those penalties. I assume the gentleman agrees with me, we are not worrying about the revenue. The gentleman says they are effective. The Department of the Interior says they are not. The Department of the Interior says the mandatory penalty is not effective.

Mr. GAYDOS. I have an article right before me that states that mandatory penalties do result in less violations. That is a matter of record.

Mr. SARASIN. The 1977 report of civil penalty effectiveness—that is what they studied. Civil penalty effectiveness. It is not an add-on to another report. That is what they looked at. The report states, at page 5:

> As measured in 1974–1975, the change in the disabling injury frequency rate at selected large underground coal mines has no practical statistical correlation with the various ratios of penalty amounts originally leveled, currently assessed, or paid, versus the numbers of violations issued or paid.

It just does not work. The gentleman cannot show that this great big threat, this great big penalty, is effective. The thing that is effective is a closure order. That is what costs the operator money. That is what improves safety and health in the mines, and that is what H.R. 7979 would also do. That part works. The gentleman is going to destroy this and throw it out.

Mr. GAYDOS. Will the gentleman yield further?

Mr. SARASIN. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. The gentleman attended the same hearing I did, and the gentleman knows very well we talked about closure orders, the number and the frequency, and determined that efficacy did not exist. The gentleman heard witnesses time after time repeat and state that a closure order amounts to putting a red tag on a piece of machinery. For instance, let me set up a hypothetical situation.

Mr. SARASIN. Let me just recapture my time.

Mr. GAYDOS. The gentleman knows well the inefficiency of the closure order.

Mr. SARASIN. I was at every one of those hearings. I listened to the witnesses. I heard the claim made, but when MESA went out to specifically ask that question to put a report together on the effectiveness, it said:

> It appears that the civil penalty collections themselves have not been the dominant factor in reducing accident frequency rates, for without them, metal/nonmetal rates came down even faster than coal's.

The system is better under Metal and Nonmetallic than it is under Coal with the mandatory penalties. When one asks the operators, which MESA did, when one asks the miners, which MESA did, when one asks the inspectors, which MESA did, we learn the fines have nothing to do with what we ought to be looking at here, and that is safety and health. If we do not care about safety and health and we want to raise a little revenue, fine, but if we are worrying about safety and health, Metal and Nonmetallic is a better system than Coal. Yet what we are doing here is simply adding the words "or other" every time the word "coal" appears in the Coal Act so we can dump these people into it without even studying the effect the Coal Act would have. As I mentioned earlier, we do not care about safety variances any more; we do not care that the standards that may be written may not be applicable and that there is a better and safer way to do it. We are ignoring that.

Mr. GAYDOS. If the gentleman will yield further, I am going to make this a matter of record. I have a letter from the Secretary of Labor to the effect that the existing Coal Act does provide for variances. It is a matter of law, and the Secretary of Labor says under the existing Coal Act, which is now incorporated in part in this act, under H.R. 4287, the Secretary has the right to issue and grant a variance. It is going to be a procedure that they are going to follow, and for which we have already an established procedure.

In fact under the Metal and Nonmetallic Mine Safety Act, which says nothing about variance procedures, the Secretary of the Interior today grants variances.

Mr. SARASIN. Let me reclaim my time. I know the gentleman has made his point. The gentleman said originally this is an equalization, that it will bring everybody up to the same standards. It will not. Under the Coal Mine Act as it is written into the statute that variances will be allowed for safety. In the Metal and Nonmetallic Act, there is no statutory language, and there is nothing in H.R. 4287, so we are going to leave that to the Secretary to set that law, unlike we do under the coal. It is unequal treatment.

Mr. GAYDOS. In H.R. 4287 there is a provision which states that all existing regulations, pronouncements, writings, and findings are transferred.

Mr. SARASIN. They will go over until the Secretary decides, without the ability of this Congress to make a decision, but until the Secretary decides that he may want to adjust those things a little bit more. We are not treating the miners' safety.

Mr. GAYDOS. On that point, I am willing to enter into a colloquy with any of the Members to show how we do provide for variances under the Metal and Nonmetallic Act and how we are going to do that under H.R. 4287.

Mr. SARASIN. And the gentleman will be creating a situation that is automatically unequal and that is the tragedy of this bill H.R. 4287. In this quick effort to put a bill together without testimony and without hearing or without discussion, we have overlooked maintaining the variance of the coal to make it available to hard coal miners. I do not care what the gentleman says we can do by regulation. We did not do it by regulation for the coal miners. We should not be changing it now.

These are just a couple of the problems with this cut-and-paste job of trying to transfer all the miners to the coal instead of trying to come up with a bill to do something for both of them. This bill H.R. 4287 does not do that.

Mr. SANTINI. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from Nebraska.

Mr. SANTINI. Mr. Chairman, I would like to say I am concerned particularly with the nonfuel minerals. I am concerned that we look before we leap. I just take that to be part of the thrust of the gentleman's message.

I ask the Members of the majority side and those carrying the responsibility for the bill today as well: Can they advise this Member as to the prospective administrative structure within the Department of Labor assuming this bill is adopted today?

Mr. SARASIN. I yield to the gentleman from Pennsylvania (Mr. GAYDOS) to explain his bill, this terrible bill he has put together.

Mr. GAYDOS. I thank my colleague for being so kind.

It is very simple and concrete and exact. In our bill we provide that the transfer shall occur and that all the regulations and all the findings and standards shall remain and be transferred over to the Department of Labor under an Assistant Secretary of Labor and he shall have a separate budget.

Mr. LEDERER. Mr. Chairman, one of the most important features of H.R. 4287 is that for the first time coal miners and hard rock miners will be covered by a single mine safety and health law with

a single structure for enforcement and administration.

For too long the hard rock segment of the industry has suffered under inadequate and inferior safety health laws. The committee bill will provide the equal protection of the law which our Nation's hard rock miners are entitled to.

However, it is important to note that H.R. 4287 does not require that all standards be the same for hard rock miners and for coal miners. There is nothing in this bill that requires that standards be universally applicable throughout the mining industry.

What H.R. 4287 does do is establish uniformity in how these standards will be developed, administered and enforced. Indeed, section 301(b) of H.R. 4287 clearly indicates that current standards under the Coal and Metal Acts are to be carried over as standards for coal mines or metal and nonmetallic mines respectively, under this act. Moreover, there is nothing in H.R. 4287 that suggests that the Secretary should not continue to promulgate separate standards for the separate segments of the industry.

I have heard it argued that because coal mines are different from hard rock mines that different standards should apply to these different mines. I will not dispute that.

However, in some respects, hard rock miners may face some of the same hazards as coal miners. There have been fires in hard rock mines as well as in coal mines. For example, in the Sunshine Silver mine in Idaho, 91 miners lost their lives in a tragic fire in a mine that, incidentally, had only recently been inspected and found to be in substantial compliance with the weak requirements of the Metal Act. There have been dust explosions in hard rock mines as well as in coal mines. Indeed, our hearings on this legislation revealed that Trona miners sometimes face the same hazards as coal miners from the dangers of methane gas explosions. On the other hand, we are aware that our Nation's hard rock miners may face much different hazards from those faced by coal miners. Hard rock miners confront radioactive elements and asbestos dust to a much greater extent than coal miners. So, as you can see, there are similarities and there are differences between coal mines and a wide variety of hard rock mines. What is needed are standards that are geared to deal with the specific hazards that a miner is exposed to, whether he be a lead miner, a Trona miner or a bituminous coal miner.

Under H.R. 4287 we accommodate these concerns. Under H.R. 4287 separate standards would apply to separate segments of the industry to no less an extent than separate standards apply to separate segments of the industry under current law. And I will note that even now vastly different kinds of hard rock mines are governed by a single statute, just as they would be governed by a single statute under the committee bill.

I cannot agree with the position that differences among various types of mines supports the conclusion that there should be entirely separate acts for hard rock and coal mines, with different enforcement and administrative structures. There is no good reason why a hard rock miner in a lead mine should receive unequal protection and inferior enforcement of a standard applicable to him. The lead miner has every right to expect that he will receive just as committed a Federal enforcement of the standard applicable to him as the coal miner receives. There is no argument for why different enforcement should apply to different segments of the industry. A hard rock miner deserves the same feeling of confidence in his job safety and health as a coal miner does.

As long as there are two separate mine safety and health laws, which provide for different enforcement and administration, our miners will not be equally treated. The time to merge both existing laws into one and provide equal protection to all our Nation's miners has come.

Mr. UDALL. Mr. Chairman, on page 72 of the report I am quoted in the minority views, from a statement of last January dealing with the Interior Committee decision to take up coal surface mining legislation separately from noncoal surface mining problems. The implication is that I oppose the structure and purpose of H.R. 4287. This is not the case. I intend to vote for the bill and against the Sarasin substitute and other attempts to weaken it.

Environmental questions are quite separate from the question of safety. We were faced with a serious, ongoing problem of environmental damage from strip mining. The damage from surface mining minerals other than coal is more complex, lesser in scope and under some measure of control. Safety is safety in either kind of mining, and safety cannot wait, and ought to be uniform.

I would have liked to write a comprehensive, all-minerals kind of surface mining bill. We faced a practical set of problems and could not do so. This has nothing to do with my support for this bill's goal: a single, uniform, centrally administered program of safety for all mines.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will now read by titles the committee amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 4287

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Mine Safety and Health Amendments Act of 1977".

TITLE I—AMENDMENTS TO THE GENERAL PROVISIONS OF THE FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969

SHORT TITLE

SEC. 101. The first section of the Federal Coal Mine Health and Safety Act of 1969 is amended to read as follows: "That this Act may be cited as the 'Federal Mine Safety and Health Act of 1977' ".

DEFINITIONS AND APPLICABILITY

SEC. 102. (a)(1) Section 2 of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting "or other" immediately after "coal" wherever it appears.

(2) Section 2(g)(1) of such Act is amended by striking out "the Interior" and inserting in lieu thereof "Labor".

(b)(1) Section 3(a) of such Act is amended by striking out "the Interior" and inserting in lieu thereof "Labor".

(2) Section 3(h) of such Act is amended to read as follows:

"(h)(1) 'coal or other mine' means (A) an area of land from which minerals are extracted in nonliquid form or, if in liquid form, are extracted with workers underground, (B) private ways and roads appurtenant to such area, and (C) lands, excavations, underground passageways, shafts, tunnels and workings, structures, facilities, equipment, machines, tools, or other property including impoundments, retention dams, and tailings ponds, on the surface or underground, used in, or to be used in, or resulting from, the work of extracting such minerals from their natural deposits in nonliquid form, or if in liquid form, with workers underground, or used in the milling of such minerals, or the work of preparing coal, and includes custom coal preparation facilities, except that with respect to protection against radiation hazards such term shall not include property used in the milling of source minerals defined in the Atomic Energy Act of 1954, as amended. In making a determination of what constitutes mineral milling for purposes of this Act the Secretary shall give due consideration to the convenience of administration resulting from the delegation to one Assistant Secretary of all authority with respect to the health and safety of miners employed at one physical establishment;

"(2) For purposes of titles II, III, and IV, 'coal mine' means an area of land and all structures, facilities, machinery, tools, equipment, shafts, slopes, tunnels, excavations, and other property, real or personal, placed upon, under, or above the surface of such land by any person, used in, or to be used in, or resulting from, the work of extracting in such area bituminous coal, lignite, or anthracite from its natural deposits in the earth by any means or method, and the work of preparing the coal so extracted, and includes custom coal preparation facilities;".

(3) Sections 3(d), (e), (g), and (j) of such Act are each amended by inserting "or other" immediately after "coal" wherever it appears.

(4) Section 3 of such Act is amended by striking out the word "and" at the end of paragraph (l), by striking out the period at the end of paragraph (m) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(n) 'Administration' means the Mine Safety and Health Administration in the Department of Labor."

(c) Section 4 of such Act is amended by inserting "or other" immediately after "coal".

TITLE II—MINE SAFETY AND HEALTH STANDARDS AMENDMENTS

AMENDMENTS TO TITLE I

SEC. 201. (a) Title I of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting "or other" immediately after "coal" wherever that term occurs.

(b) Section 101(g) of such Act is amended by adding at the end thereof the following new paragraph:

"The Secretary of Health, Education, and Welfare, as soon as possible after the date of enactment of the Federal Mine Safety and Health Amendments Act of 1977 but in no event later than three years after such date, and on a continuing basis thereafter, shall, for each toxic material or harmful physical agent which is used or found in a coal or other mine, determine whether such material

or agent is potentially toxic at the concentrations in which it is used or found in a coal or other mine. The Secretary of Health, Education, and Welfare shall submit such determination to the Secretary, together with all pertinent criteria, and a proposed standard.".

TITLE III—MISCELLANEOUS PROVISIONS

TRANSFER MATTERS

SEC. 301. (a) Except with respect to the functions assigned to the Secretary of the Interior pursuant to section 501 of the Federal Coal Mine Health and Safety Act of 1969, the functions of the Secretary of the Interior under the Federal Coal Mine Health and Safety Act of 1969, as amended, and the Federal Metal and Nonmetallic Mine Safety Act are transferred to the Secretary of Labor.

(b) (1) The mandatory standards relating to mines, issued by the Secretary of the Interior under the Federal Metal and Nonmetallic Mine Safety Act and standards and regulations under the Federal Coal Mine Health and Safety Act of 1969 which are in effect on the date of enactment of this Act shall remain in effect as standards applicable to metallic and nonmetallic mines and to coal mines respectively under the Federal Mine Safety and Health Act of 1977 until such time as the Secretary shall issue new or revised standards applicable to metal and nonmetallic mines and new or revised standards applicable to coal mines.

(2) Within sixty days after the effective date of this Act, the Secretary shall establish an advisory committee which shall, within one hundred and eighty days after the date of the establishment of such advisory committee, review the advisory health and safety standards issued by the Secretary of the Interior under the Federal Metal and Nonmetallic Mine Safety Act and recommend to the Secretary which of those standards (or any modification of such standards which does not substantially diminish the health and safety of miners) should be promulgated as health and safety standards under the Federal Mine Safety and Health Act of 1977. The Secretary shall publish, within sixty days after any recommendations of the advisory committee under this paragraph, each of the standards so recommended for adoption with or without modification as a health and safety standard under such Act by publication of such standard in the Federal Register, and afford interested persons a period of twenty-five days after publication to submit written data or comment. Within thirty days after the close of the comment period specified in the preceding sentence, the Secretary shall promulgate by publication in the Federal Register a standard based upon the advisory committee recommended with or without modification, and the data and comments received thereon, unless the Secretary determines that such a standard will not promote the health and safety of miners and publishes an explanation of that determination in the Federal Register.

(3) All interpretations, regulations, and instructions of the Secretary of the Interior or the Director of the Bureau of Mines, in effect on the date of enactment of this Act and not consistent with any provision of this Act or any amendment made by this Act, shall be published in the Federal Register and shall continue in effect until modified or superseded in accordance with the provisions of this Act.

(c) (1) All unexpended balances of appropriations, personnel, property, records, obligations, and commitments which are used primarily with respect to any function transferred under the provisions of subsection (a) of this section to the Secretary shall be transferred to the Department of Labor. The transfer of personnel pursuant to this paragraph shall be without reduction in classification or compensation for one year after such transfer, except that the Secretary of Labor shall have full authority to assign personnel during such one-year period in order to efficiently carry out functions transferred to him under this Act.

(2) All orders, decisions, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges (A) which have been issued, made, granted, or allowed to become effective in the exercise of functions which are transferred under this section by any department or agency, any functions of which are transferred by this section, and (B) which are in effect at the time this section take effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary of Labor, by any court of competent jurisdiction, or by operation of law

(3) The provisions of this section shall not affect any proceedings pending at the time this section takes effect before any department or agency, functions of which are transferred by this section; except that such proceedings, to the extent that they relate to functions so transferred, shall be continued fore the Secretary of Labor. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this section had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary of Labor, by a court of competent jurisdiction, or by operation of law.

(4) The provisions of this section shall not affect suits commenced prior to the date this section takes effect and in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this section had not been enacted; except that if before the date on which this section takes effect, any department or agency (or officer thereof in his official capacity) is a party to a suit involving functions transferred to the Secretary, then such suit shall be continued by the Secretary of Labor. No cause of action, and no suit, action, or other proceeding, by or against any department or agency (or officer thereof in his official capacity) functions of which are transferred by this section, shall abate by reason of the enactment of this section. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or the Secretary as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this paragraph.

(d) For purposes of this section, (1) the term "function" includes power and duty, and (2) the transfer of a function, under any provision of law, of an agency or the head of a department shall also be a transfer of all functions under such law which are exercised by any officer or officer of such agency or department.

MINE SAFETY AND HEALTH ADMINISTRATION

SEC. 302. (a) There is established in the Department of Labor a Mine Safety and Health Administration to be headed by an Assistant Secretary of Labor for Mine Safety and Health appointed by the President, by and with the advice and consent of the Senate. The Secretary is authorized and directed, except as specifically provided otherwise, to carry out his functions under the Federal Mine Safety and Health Act of 1977 through the Mine Safety and Health Administration.

(b) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following paragraph:

"(114) Assistant Secretary of Labor for Mine Safety and Health.".

AMENDMENTS WITH RESPECT TO MINE SAFETY AND ADMINISTRATION

SEC. 303. (a) (1) Section 501(a) of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting "or other" immediately after "coal" wherever it appears therein, and by striking out "The Secretary and" and inserting in lieu thereof "The Secretary of the Interior and".

(2) Section 501(b) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein and by inserting after "Welfare" the following: through the National Institute for Occupational Safety and Health established under the Occupational Safety and Health Act of 1970"; and by striking out the period at the end thereof and inserting in lieu thereof "of the Interior in coordination with the Secretary".

(3) Section 501(d) of such Act is amended by inserting "or other" immediately after "coal".

(b) Section 502 of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein.

(c) (1) Section 503(a) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein.

(2) Section 503(b) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein.

(d) (1) Section 503(f) of such Act is amended by inserting "or other" immediately after "coal".

(2) Section 503(g) of such Act is amended by inserting "or other" immediately after "coal".

(e) (1) Section 505 of such Act is amended by striking out "the mining of coal" and inserting in lieu thereof "in mining".

(2) Section 505 of such Act is further amended by striking out the period at the end of the second sentence thereof and inserting in lieu thereof "; *Provided, however,* That, to the maximum extent feasible, in the selection of persons for appointment as mine inspectors, no person shall be so selected unless he has the basic qualifications of at least five years practical mining experience and in assigning mine inspectors to the inspection and investigation of individual mines, due consideration shall be given to the extent possible to their previous experience in the particular type of mining operation where such inspections are to be made."

(f) Section 506(b) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein.

(g) (1) Section 511(a) of such Act is amended by inserting "or other" immediately after "coal".

(2) Section 511(b) of such Act is amended by inserting "or other" immediately after "coal".

(h) Section 502 of such Act is amended by adding at the end thereof the following new subsection (c):

"(c) (1) The National Mine Health and Safety Academy shall be maintained as an agency of the Department of the Interior. The Academy shall be responsible for the training of mine safety and health inspectors under section 505 of this Act, and in training of technical support personnel of the Mine Safety and Health Administration established under section 302 of the Federal Mine Safety and Health Amendments Act of 1977; and for any other training programs for mine inspectors, mining personnel, or other persons as the Secretaries of Labor and Interior shall designate. In performing this function, the Academy shall have the authority to enter into cooperative educational and training agreements with educational institutions, State governments, labor organizations, and mine operators and related industries. Such training shall be conducted by the Academy in accordance with curricu-

lum needs and assignment of instructional personnel established by the user.

"(2) In performing its function pursuant to this section, the National Mine Health and Safety Academy shall use the facilities and personnel of the Department of the Interior, and such other personnel as shall be mutually agreed upon by the Secretaries of Labor and Interior. The Secretary of the Interior, upon request by the Academy, shall appoint or assign to the Academy such officers and employees as the Director of the Academy deems necessary for the performance of the duties and functions of the Academy.

"(3) The Secretary of the Interior shall conduct his safety research responsibilities under section 501 of this Act in coordination with the Secretary of Labor, and the Secretaries of Labor and the Interior are authorized to enter into contractual or other agreements for the performance of such safety related research.".

SAVINGS PROVISION

SEC. 304. Nothing contained in this Act or any amendment made by this Act shall be construed to reduce the number of inspectors engaged in enforcement of the Federal Coal Mine Health and Safety Act of 1969 and the Federal Metal and Nonmetallic Mine Safety Act as in effect prior to the effective date of this Act or to reduce the number of inspectors engaged in the enforcement of the Occupational Safety and Health Act of 1970.

BUDGET PROVISION

SEC. 305. In the preparation of the Budget message required under section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11), the President shall set forth as separate appropriation accounts amounts required for appropriation for mine health and safety pursuant to the Federal Mine Health and Safety Act of 1977 and for occupational safety and health pursuant to the Occupational Safety and Health Act of 1970.

REPEALER

SEC. 306. The Federal Metal and Nonmetallic Mine Safety Act is repealed.

EFFECTIVE DATE

SEC. 307. This Act and the amendments made by this Act shall take effect 90 days after the date of the enactment of this Act except that the Secretary of Labor is authorized to establish such rules and regulations as may be necessary for the efficient transfer of functions provided under this Act.

Mr. GAYDOS (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

AMENDMENTS OFFERED BY MR. GAYDOS

Mr. GAYDOS. Mr. Chairman, I offer 3 conforming amendments, which were printed in the RECORD on July 12 at page 22581, and I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. GAYDOS: On page 80, immediately following line 23, insert the following:

"(b) Section 101(c) of such Act is amended by striking out 'Labor' and inserting in lieu thereof, 'the Interior'.

On page 80, line 24, strike out "(b)" and insert in lieu thereof, "(c)".

On page 87, line 15, strike the period following the word "therein", and insert the following: ", and by striking 'Labor' and inserting in lieu thereof, 'the Interior'."

Mr. GAYDOS (during the reading). Mr. Chairman, I ask unanimous consent that these amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GAYDOS. Mr. Chairman, the purpose of these amendments is to correct errors in the printed text. They have been distributed to the minority, and to my information they have received approval.

Mr. Chairman, these technical amendments are offered to eliminate a redundancy in the bill as written. Sections 101(c) and 503(a) of the Coal Act, which H.R. 4287 makes applicable to "coal or other" mines, refer to the Secretary of Interior, the Secretary of Health, Education, and Welfare, and the Secretary of Labor. Because of the transfer of administration and enforcement activities to the Department of Labor from the Department of Interior, the bill as written refers to the Secretary of Labor, the Secretary of Health, Education, and Welfare, and the Secretary of Labor. The technical amendments correct this redundant reference by amending the bill to read "the Secretary of Labor, the Secretary of Health, Education, and Welfare, and the Secretary of Interior.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Pennsylvania (Mr. GAYDOS).

The amendments were agreed to.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SARASIN

Mr. SARASIN. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. SARASIN:

That this Act may be cited as the "Federal Metal and Nonmetallic Mine Safety and Health Act Amendments of 1977".

SEC. 2. The Federal Metal and Nonmetallic Safety Act is amended to read as follows:

"SHORT TITLE

"SECTION 1. This Act may be cited as the 'Federal Metal and Nonmetallic Mine Safety and Health Act'.

"CONGRESSIONAL FINDINGS AND PURPOSES

"SEC. 2. (a) Congress finds and declares that—

"(1) the first priority and concern of all in the metal and nonmetallic mining industry must be the health and safety of its most precious resource—the miner;

"(2) deaths and serious injuries from unsafe and unhealthful conditions and practices in metal and nonmetallic mines cause grief and suffering to the mines and to their families;

"(3) there is an urgent need to provide more effective means and measures for improving the working conditions and practices in the Nation's metal and nonmetallic mines in order to prevent death and serious physical harm, and in order to prevent occupational diseases originating in such mines;

"(4) the existence of unsafe and unhealthful conditions and practices in the Nation's metal and nonmetallic mines is a serious impediment to the future growth of the mining industry and cannot be tolerated;

"(5) the operators of such mines, with the assistance of the miners, have the primary responsibility to prevent the existence of such conditions and practices in such mines; and

"(6) the disruption of production and the loss of income to operators and miners as a result of metal and nonmetallic mine accidents or occupationally caused disease unduly impedes and burdens commerce.

"(b) The Congress therefore declares it to be its purpose and policy—

"(1) to encourage employers and employees in their efforts to reduce the number of occupational safety and health hazards in metal and nonmetallic mines and to stimulate employers and employees to institute new and to perfect existing programs for providing safe and healthful working conditions;

"(2) to provide that employers and employees have separate but dependent responsibilities and rights with respect to achieving safe and healthful working conditions;

"(3) to authorize the Secretary of Labor to set mandatory safety and health standards applicable to metal and nonmetallic mines affecting interstate commerce;

"(4) to authorize the Secretary of Health, Education, and Welfare and the Secretary of the Interior to conduct research in the field of metal and nonmetallic mine safety and health, and to develop innovative methods, techniques, and approaches for dealing with metal and nonmetallic mine safety and health problems;

"(5) to explore ways to discover latent diseases, establishing causal connections between diseases and work in environmental conditions, and conducting other research relating to health problems, in recognition of the fact that mine health standards present problems often different from those involved in mine safety;

"(6) to provide medical criteria which will assure insofar as practicable that no metal or nonmetallic mine employee will suffer diminished health, functional capacity, or life expectancy as a result of his work experience;

"(7) to provide an effective enforcement program which shall include a prohibition against giving advance notice of any inspection and protection from discrimination against any miner instituting or testifying in any proceeding involving an alleged violation of this Act; and

"(8) by providing for appropriate reporting procedures with respect to metal and nonmetallic mine safety and health, which procedures will help achieve the objectives of this Act and accurately describe the nature of the metal and nonmetallic mine safety and health problem.

"DEFINITIONS AND COVERAGE

"SEC. 3. (a) For the purposes of this Act:

"(1) The term 'commerce' means trade, traffic, commerce, transportation, or communication among the several States, or between a State and any place outside thereof, or within the District of Columbia, the Commonwealth of Puerto Rico, or a possession of the United States (other than the Trust Territory of the Pacific Islands), or between points in the same State but through a point outside thereof.

"(2) The term 'mine' means (1) an area of land from which minerals (other than coal or lignite) are extracted in nonliquid form or, if in liquid form, are extracted with workers underground, (2) private ways and roads appurtenant to such area, and (3) land, excavations, underground passageways, and workings, structures, facilities, equipment, machines, tools, or other property, on the surface or underground, used in the work of extracting such minerals (other than coal or lignite) from their natural deposits in nonliquid forms, or if in liquid form, with workers underground, or used in the

milling of such minerals, except that with respect to protection against radiation hazards such term shall not include property used in the milling of source material as defined in the Atomic Energy Act of 1954, as amended.

"(3) The term 'operator' means any person, partnership, association, or corporation, or subsidiary of a corporation operating a mine, and owning the right to do so, and includes any independent contractor therewith and any agent thereof in cases where such contractor or agent is charged with responsibility for the operation of such mine or for the supervision of the miners in such mine.

"(4) The term 'Secretary' means the Secretary of Labor.

"(5) The term 'Commission' means the Federal Metal and Nonmetallic Mine Safety and Health Commission established under section 18.

"(6) The term 'State' includes a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands.

"(7) The term 'miner' means any individual working in a mine.

"(8) The term 'injury' means (A) any harmful change in the human organism which can be determined to be work related, whether or not the result of an accident, and includes any occupational disease, and (B) any damage to or loss of prosthetic and orthotic devices.

"(9) The term 'imminent danger' means danger which could reasonably be expected to cause death or serious injury immediately or before the imminence of such danger can be eliminated through the enforcement procedures otherwise provided by this Act, and includes such danger resulting from exposure of miners to toxic materials or harmful physical agents.

"(b) Each mine the products of which regularly enter commerce, or the operations of which affect commerce, shall be subject to this Act.

"(c) Nothing in this Act shall be construed to supersede or in any manner affect any workmen's compensation law or to enlarge or diminish or affect in any other manner the common law or statutory rights, duties, or liabilities of operators and miners under any law with respect to injuries, diseases, or death of miners arising out of, or in the course of, employment.

"DUTIES

"SEC. 4. (a) Each operator of a mine—

"(1) shall furnish to each of his miners employment and a place of employment which are free from recognized hazards that are causing or are likely to cause death or serious injury to his miners;

"(2) shall comply with health and safety standards promulgated under this Act.

"(b) Each miner shall comply with health and safety standards promulgated under this Act and all rules, regulations, and orders issued pursuant to this Act which are applicable to his own actions and conduct.

"HEALTH AND SAFETY STANDARDS

"SEC. 5. (a)(1) The health and safety standards promulgated and designated as mandatory by the Secretary of the Interior under section 6 (as such section existed immediately prior to the effective date of section 2 of the Mine Safety and Health Act of 1977) shall be deemed, as of the effective date of section 2 of the Mine Safety Health Act of 1977, to be health and safety standards promulgated under this section.

"(2) The Secretary shall establish an advisory committee under subsection (d) which shall, within six months after the date of the establishment of such advisory committee, review the health and safety standards promulgated by the Secretary of the Interior (but not designated as mandatory) under section 6 (as such section existed immediately prior to the effective date of section 2 of the Mine Safety and Health Act of 1977) of this Act, and recommend to the Secretary which of those standards (or any modification of such standards which does not substantially diminish the health and safety of miners) should be promulgated as health and safety standards under this section. The Secretary shall publish each of the standards recommended for adoption with or without modification by that advisory committee as a health and safety standard under this section in the Federal Register and afford interested persons a period of forty-five days after publication to submit written data or comments. Within thirty days after the close of the comment period specified in the preceding sentence, the Secretary shall promulgate by publication in the Federal Register a standard based upon the standard recommended with or without modification by the advisory committee and the data and comments received thereon, unless the Secretary determines that such a standard will not promote the health and safety of miners and publishes an explanation of that determination in the Federal Register.

"(3) Within six months after the effective date of section 2 of the Mine Safety and Health Act of 1977, the Secretary shall determine which of the occupational safety and health standards promulgated under section 6 of the Occupational Safety and Health Act of 1970 pertain to miners employed in the milling of minerals in mines subject to this Act. The Secretary shall publish in the Federal Register each such standard so determined, unless the Secretary determines that such standard does not promote the health and safety of miners employed in the milling of minerals in mines subject to this Act. The Secretary shall afford interested persons a period of forty-five days after publication to submit written data or comments. Unless the Secretary determines, on the basis of such data and comments, that a standard does not promote the health and safety of such miners, the Secretary shall promulgate by publication in the Federal Register, within thirty days after the close of the comment period specified in the preceding sentence, a standard based upon the standard published under the second sentence of this paragraph and the data and comments received thereon, together with an explanation of the reasons such standard is pertinent to such miners. Any health and safety standard deemed under the preceding sentence to be a health and safety standard promulgated under this section shall supersede any corresponding standard in effect under paragraph (1) or (2) of this subsection with respect to miners employed in the milling of minerals in mines subject to this Act, if such standard under the preceding sentence provides substantially as effective protection to miners as the standard it would supersede.

"(4) Within one year after the effective date of section 2 of the Mine Safety and Health Act of 1977, the Secretary shall review all occupational safety and health standards promulgated under section 6 of the Occupational Safety and Health Act of 1970 and shall commence proceedings for promulgation of those standards which are appropriate for miners in accordance with subsection (b).

"(b) The Secretary shall by rule promulgate any health or safety standard under this section, and modify, or revoke any health and safety standard promulgated under this section, in the following manner, but any such modification or revocation of any such health and safety standard shall be accompanied by an explanation, to be published in the Federal Register, of how that modification or revocation provides substantially as effective protection to the health or safety of miners:

"(1) Whenever the Secretary, upon the basis of information submitted to him in writing by an interested person, a representative of any organization of operators or miners, a nationally recognized standards-producing organization, the Secretary of Health, Education, and Welfare, the National Institute for Occupational Safety and Health, the Director of the Bureau of Mines, or a State or political subdivision, or on the basis of information developed by the Secretary or otherwise available to him, determines that a rule should be promulgated in order to serve the objectives of this Act, the Secretary may request the recommendations of an advisory committee appointed under subsection (d), but the Secretary shall request the recommendation of an advisory committee when considering the standards under (a)(4) of this section. Whenever the Secretary receives in writing from any person a proposal for the promulgation, modification, or revocation of any health and safety standard under this section, the Secretary shall review such proposal, and respond, within sixty days after receipt of such proposal, as to whether or not proceedings with respect to such proposal will be initiated under this subsection. The Secretary shall provide such an advisory committee with any proposals of his own or of the Secretary of Health, Education, and Welfare, together with all pertinent factual information developed by the Secretary or the Secretary of Health, Education, and Welfare, or otherwise available, including the results of research, demonstrations, and experiments. An advisory committee shall submit to the Secretary its recommendations regarding the rule to be promulgated within ninety days from the date of its appointment or within such longer or shorter period as may be prescribed by the Secretary, but in no event for a period which is longer than two hundred and seventy days.

"(2) The Secretary shall publish a proposed rule promulgating, modifying, or revoking health and safety standards in the Federal Register and shall afford interested persons a period of sixty days after publication to submit written data or comments. Where an advisory committee is appointed and the Secretary determines that a rule should be issued, he shall publish the proposed rule within sixty days after the submission of the advisory committee's recommendations or the expiration of the period prescribed by the Secretary for such submission.

"(3) On or before the last day of the period provided for the submission of written data or comments under paragraph (2), any interested person may file with the Secretary written objections to the proposed rule, stating the grounds therefor and requesting a public hearing on such objections: *Provided*, That any hearing held pursuant to this section shall conform to the provisions of section 554 of title 5, United States Code. Within thirty days after the last day for filing such objections the Secretary shall publish in the Federal Register a notice specifying the health and safety standard to which objections have been filed and a hearing requested, and specifying a time and place for such hearing.

"(4) Within sixty days after the expiration of the period provided for the submission of written data or comments under paragraph (2), or within sixty days after the completion of any hearing held under paragraph (3), the Secretary shall issue a rule promulgating, modifying, or revoking a health and safety standard or make a determination that a rule should not be issued which shall be published in the Federal Register, together with an explanation of the reasons for such determination. Such a rule may contain a provision delaying its effective date for such period (not in excess of ninety days) as the Secretary determines may be

necessary to insure that affected operators and miners will be informed of the existence of the standard and of its terms and that operators affected are given an opportunity to familiarize themselves and their miners with the existence of the requirements of the standard.

"(5)(A) The Secretary, in promulgating standards dealing with toxic materials or harmful physical agents under this subsection, shall set the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no miner will suffer material impairment of health or functional capacity even if such employee has regular exposure to the hazard dealt with by such standard for the period of his working life. Development of standards under this subsection shall be based upon research, demonstrations, experiments, and such other information as may be appropriate. In addition to the attainment of the highest degree of health and safety protection for the miner, other considerations shall be the number of miners exposed to the hazard, the latest available scientific data in the field, the feasibility of the standard, experience gained under this Act, the Occupational Safety and Health Act of 1970, the Federal Coal Mine Health and Safety Act of 1969, and the Atomic Energy Act of 1954, and experience gained by appropriate Federal agencies with expertise relating to conditions and practices in mines subject to this Act. Whenever practicable, the standard promulgated shall be expressed in terms of objective criteria and of the performance desired.

"(B) Any standard dealing with toxic materials or harmful physical agents promulgated under this section shall provide for miners or their representatives the opportunity to observe monitoring and measuring of miner exposures to toxic materials or harmful physical agents required to be monitored or measured under such standard and the opportunity for access to the records thereof required to be maintained under section 8(b)(3). Such standard shall provide that each miner or former miner shall have access to such records of medical examinations and other tests as will indicate his own exposure to such toxic materials or harmful physical agents, and each operator shall promptly notify any miner who has been or is being exposed to such toxic materials or harmful physical agents in concentrations or at levels which exceed those prescribed by the standard, and shall inform any miner who is thus being exposed of the corrective action being taken. Where appropriate, the standard shall provide that where a determination is made that a miner may suffer a material impairment of health or functional capacity by reason of exposure to the hazard covered by the standard, that miner shall be removed from such exposure and reassigned. In such event, the standard shall also provide that there shall be no loss of earnings, seniority, or status to the miner as a result of such removal and reassignment.

"(6) Any standard promulgated under this section shall prescribe the use of labels or other appropriate forms of warning as are necessary to insure that miners are appraised of all hazards to which they are exposed, relevant symptoms and appropriate emergency treatment, and proper conditions and precautions of safe use or exposure. Such standard shall also prescribe suitable protective equipment and control and technological procedures to be used in connection with such hazards and shall provide for monitoring and measuring miner exposure at such locations and intervals, in such manner as may be necessary for the protection of miners. In addition, where appropriate, any such standard shall prescribe the type and frequency of medical examinations and other tests which shall be made available by the operator or at his cost, to miners exposed to such hazards in order to most effectively determine whether the health of such miners is adversely affected by such exposure. In the event such medical examinations are in the nature of research, as determined by the Secretary of Health, Education, and Welfare, such examinations may be furnished at the expense of the Secretary of Health, Education, and Welfare. The results of such examinations and tests shall be furnished only to the Secretary, the Secretary of Health, Education, and Welfare, the operator or his authorized agent (except in the case of examinations furnished by the Secretary of Health, Education, and Welfare), and, at the request of the miner, to himself, his authorized representative, or his physician. The Secretary, in consultation with the Secretary of Health, Education, and Welfare, may by rule promulgated pursuant to section 553 of title 5, United States Code, make appropriate modifications in the foregoing requirements relating to the use of labels or other forms of warning, monitoring or measuring, and medical examinations, as may be warranted by experience, information, or medical or technological developments acquired subsequent to the promulgation of the relevant standard.

"(7) As soon as possible after the date of enactment of the Mine Safety and Health Act of 1977, but in no event later than three years after such date, the Secretary of Health, Education, and Welfare shall, for each toxic material or harmful physical agent which is on the list required under section 23(h) and which is not covered by a health and safety standard promulgated under this section, determine under such section 23(h) whether such material or agent is potentially toxic at the concentrations in which it is used or found in a mine, and shall immediately submit such determination to the Secretary, together with all pertinent criteria. Within ninety days after receiving any determination together with criteria in accordance with the preceding sentence, the Secretary shall either appoint an advisory committee to make recommendations with respect to a health and safety standard covering such material or agent in accordance with paragraph (1) or publish a proposed rule promulgating such a health and safety standard in accordance with paragraph (2).

"(8) In determining the priority for establishing standards under this section, the Secretary shall give due regard to the urgency of the need for mandatory health and safety standards, including the recommendations of the Secretary of Health, Education, and Welfare regarding such need.

"(c)(1) The Secretary shall provide, without regard to the requirements of chapter 5, title 5, United States Code, for an emergency temporary standard to take immediate effect upon publication in the Federal Register if he determines (A) that miners are exposed to grave danger from exposure to substances or agents determined to be toxic or to cause injury or from other hazards, and (B) that such emergency standard is necessary to protect miners from such hazard: *Provided*, That the Secretary may not propose a civil penalty under section 16 of this Act for a violation of an emergency temporary standard.

"(2) Such standard shall be effective until superseded by a standard promulgated in accordance with the procedures prescribed in paragraph (3).

"(3) Upon publication of such standard in the Federal Register the Secretary shall commence a proceeding in accordance with subsection (b) of this section, and the standard as published shall also serve as a proposed rule for the proceeding. The Secretary shall promulgate a standard under this paragraph no later than nine months after publication of the emergency standard as provided in paragraph (2).

"(d) The Secretary may establish an advisory committee to assist him in his standard-setting functions under this section. Each such committee shall consist of not more than fifteen members, including as members designees of the Secretary of Health, Education, and Welfare and of the Secretary of the Interior, and including among its members an equal number of persons qualified by experience and affiliation to present the viewpoint of the employers involved, and of persons similarly qualified to present the viewpoint of the workers involved, as well as one or more representatives of mine health and safety agencies of the States. Any such advisory committee may also include such other persons as the Secretary may appoint who are qualified by knowledge and experience to make a useful contribution to the work of such committee, including one or more representatives of professional organizations of technicians or professionals specializing in mine safety or health, and one or more representatives of nationally recognized standards-producing organizations, but the number of persons so appointed to any such advisory committee shall not exceed the number appointed to such committee as representatives of Federal and State agencies. Persons appointed to advisory committees from private life shall be compensated in the same manner as consultants or experts under section 3109 of title 5, United States Code. The Secretary shall pay to any State which is the employer of a member of such a committee who is a representative of the mine health or safety agency of that State reimbursement sufficient to cover the actual cost of the State resulting from such representative's membership on such committee. Any meeting of such committee shall be open to the public and an accurate record shall be kept and made available to the public. No member of such committee (other than representatives of employers and employees) shall have an economic interest in any proposed rule.

"(e) Any person who may be adversely affected by a standard issued under this section may at any time prior to the sixtieth day after such standard is promulgated file a petition challenging the validity of such standard with the United States court of appeals for the circuit wherein such person resides or has his principal place of business, for a judicial review of such standard. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary. The filing of such petition shall not, unless otherwise ordered by the court, operate as a stay of the standard. The determinations of the Secretary shall be conclusive if supported by substantial evidence in the record considered as a whole.

"VARIANCES

"SEC. 6. (a) Any affected operator may apply to the Secretary for a rule or order for a variance from a standard promulgated under section 5. Affected miners shall be given notice of each such application and an opportunity to participate in a hearing. The Secretary shall issue such rule or order if he determines on the record, after opportunity for an inspection where appropriate and a hearing, that the proponent of the variance has demonstrated by a preponderance of the evidence that the conditions, practices, means, methods, operations, or processes used or proposed to be used by an operator will provide employment and places of employment to his miners which are as safe and healthful as those which would prevail if he complied with the standard. The rule or order so issued shall prescribe the conditions the operator must maintain, and the practices, means, methods,

operations, and processes which he must adopt and utilize to the extent they differ from the standard in question. Such a rule or order may be modified or revoked upon application by an affected operator or miner, or by the Secretary on his own motion, in the manner prescribed for its issuance under this subsection at any time after six months from its issuance.

"(b) The Secretary may grant a variance from any standard or portion thereof whenever he determines, or the Secretary of Health, Education, and Welfare or the Secretary of the Interior certifies, that such variance is necessary to permit an operator to participate in an experiment approved by him or by the Secretary of Health, Education, and Welfare or the Secretary of the Interior designed to demonstrate or validate new and improved techniques to safeguard the health or safety of miners, if the Secretary determines that adequate protection is afforded to the health and safety of miners.

"(c)(1) Any operator may apply to the Secretary for a temporary order granting a variance from a standard or any provision thereof promulgated under section 5. Such temporary order shall be granted only if the operator files an application which meets the requirements of paragraph (2) and establishes that (A) he is unable to comply with a standard by its effective date because of unavailability of professional or technical personnel or of materials and equipment needed to come into compliance with the standard or because necessary construction or alteration of facilities cannot be completed by the effective date, (B) he is taking all available steps to safeguard his miners against the hazards covered by the standard, and (C) he has an effective program for coming into compliance with the standard as quickly as practicable. Any temporary order issued under this subsection shall prescribe the practices, means, methods, operations, and processes which the operator must adopt and use while the order is in effect and state in detail his program for coming into compliance with the standard. Such a temporary order may be granted only after notice to miners and an opportunity for a hearing: *Provided*, That the Secretary may issue one interim order to be effective until a decision is made on the basis of the hearing. No temporary order may be in effect for longer than the period needed by the operator to achieve compliance with the standard or one year, whichever is shorter, except that such an order may be renewed not more than twice as long as the requirements of this subsection are met and if an application for renewal is filed at least ninety days prior to the expiration date of the order. No interim renewal of an order may remain in effect for longer than one hundred and eighty days.

"(2) An application for a temporary order under this subsection shall contain—

"(A) a specification of the standard or portion thereof from which the operator seeks a variance;

"(B) a representation by the operator, supported by representations from qualified persons having first-hand knowledge of the facts represented, that he is unable to comply with the standard or portion thereof and a detailed statement of the reasons therefor;

"(C) a statement of the steps he has taken and will take (with specific dates) to protect miners against the hazard covered by the standard;

"(D) a statement of when he expects to be able to comply with the standard and what steps he has taken and what steps he will take (with dates specified) to come into compliance with the standard; and

"(E) a certification that he has informed his miners of the application by giving a copy thereof to their authorized representative, posting a statement giving a summary of the application and specifying where a copy may be examined at the place or places where notices to miners are normally posted, and by other appropriate means.

A description of how miners have been informed shall be contained in the certification. The information to employees shall also inform them of their rights to petition the Secretary for a hearing.

"(d) The Secretary, on the record, after notice and opportunity for a hearing, may provide such reasonable limitations and may make such rules and regulations allowing reasonable variations, tolerances, and exemptions to and from any or all provisions of this Act as he may find necessary and proper to avoid serious impairment of the national defense. Such action shall not be in effect for more than six months without notification to affected miners and an opportunity being afforded for a hearing.

"(e) Whenever the Secretary grants any variance, variation, tolerance, or exception under this section, he shall include a statement of the reasons for such action, which shall be published in the Federal Register.

"INSPECTIONS

"SEC. 7. (a) In order to carry out the purposes of this Act; the Secretary or an authorized representative upon presenting appropriate credentials to the owner, operator, or agent in charge, and for the purposes of developing improved mandatory health standards the Secretary of Health, Education, and Welfare, or an authorized representative, are authorized—

"(1) to enter without delay, and at reasonable times, any mine subject to this Act, and

"(2) to inspect and investigate, during regular working hours and at other reasonable times, within reasonable limits, and in a reasonable manner, any such and all pertinent conditions, structures, machines, apparatus, devices, equipment, and materials therein, and to consult privately with any such employer, owner, operator, agent, or miner. In carrying out the requirements of this section in each mine, the Secretary shall make inspections of each entire underground mine at least four times a year and inspections of each entire surface mine and each milling operation of a mine at least two times a year. No advance notice shall be given for any inspection or investigation under this section except upon the authorization of the Secretary.

"(b) In making his inspections and investigations under this Act the Secretary may require the attendance and testimony of witnesses and the production of evidence under oath. Witnesses shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In case of a contumacy, failure, or refusal of any person to obey such an order, any district court of the United States or the United States courts of any territory or possession, within the jurisdiction of which such person is found, or resides or transacts business, upon the application by the Secretary, shall have jurisdiction to issue to such person an order requiring such person to appear to produce evidence if, as, and when so ordered, and to give testimony relating to the matter under investigation or in question, and any failure to obey such order of the court may be punished by said court as a contempt thereof.

"(c) Subject to regulations issued by the Secretary, a representative of the operator and a representative authorized by his miners shall be given an opportunity to accompany the Secretary or his authorized representative during the inspection of any mine under subsection (a). Where there is no authorized miner representative, the Secretary or his authorized representatives shall consult with a reasonable number of miners concerning matters of health and safety in the mine. To the extent that the inspector determines that more than one representative from each party would further aid the inspection, he can permit each party to have an equal number of such additional representatives. Any representative of miners who is also an employee of the operator shall suffer no loss of pay as a result of his participation in the inspection made under this subsection.

"(d)(1) Any miner or representative of miners who believes that a violation of section 4(a) exists which may cause injury, or that an imminent danger exists, may request an inspection by giving notice to the Secretary or his authorized representative of such violation or danger. Any miner or representative of miners who requests such an inspection on the grounds that an imminent danger exists shall notify the operator of such request. Upon such notification the Secretary shall make a special inspection in accordance with the provisions of this section as soon as practicable, to determine if such violation or danger exists, unless the Secretary determines there are no reasonable grounds to believe that a violation or danger exists, in which case he shall notify the miners or representative of the miners in writing of such determination. The Secretary shall make an inspection or give notification under the preceding sentence within thirty days after receipt by the Secretary of a notification of violation or imminent danger under the first sentence of this paragraph.

"(2) Prior to or during any inspection of a mine, any miners or representative of miners employed in such mine may notify the Secretary or any representative of the Secretary responsible for conducting the inspection of any violation of this Act which they have reason to believe exists in such mine. The Secretary shall inspect such alleged violation as soon as practicable after, but in no event later than ten days after, receipt of such notification, except as provided under the following sentence. The Secretary shall, by regulation, establish procedures for informal review of any refusal by a representative of the Secretary to conduct an inspection or issue a citation with respect to any such alleged violation and shall furnish the miners or representatives of miners requesting such review a written statement of the reasons for the Secretary's final disposition of the case within thirty days after the request for informal review.

"(3) Upon the request of any individual giving notice under this subsection, his name and the names of individual miners referred to in such notice shall not appear on any record published, released, or made available under this Act. A copy (subject to the requirement of the preceding sentence) of any notice given under this subsection shall be given, at the time of the inspection, to the operator.

"REQUIREMENTS IN CASES OF ACCIDENTS; RECORDS AND REPORTS

"SEC. 8. (a)(1) For purposes of this section, the term 'accident' includes any mine explosion, ignition, fire, unintentional roof fall, or inundation, whether or not resulting in the death or injury of any miner, and includes any other accident which results in the death or injury (other than a minor injury requiring only first aid treatment and which does not involve medical treatment, loss of consciousness, restriction of work or motion, or transfer to another job) of any miner.

"(2) Each accident in a mine shall be investigated by the operator or his agent to determine the cause and the means of preventing a recurrence. Records of such accidents and investigations, together with a description of any conditions similar to those which caused the accident which exist in other areas of the mine, and a description of the actions taken by the operator to prevent a similar accident in the same or another area of the mine, shall be kept by the operator and made available to the Secretary or

his authorized representative. Such records shall be open for inspection by miners or representatives of miners who are accompanying the Secretary or his authorized representative pursuant to section 7(c).

"(3) In the event of any accident occurring in a mine, the operator shall promptly notify the Secretary thereof and shall take appropriate measures to prevent the destruction of any evidence which would assist in investigating the cause or causes thereof. In the event of any accident occurring in a mine where rescue and recovery work is necessary, the Secretary or an authorized representative of the Secretary shall take whatever action he deems appropriate to protect the life of any person, and he may, if he deems it appropriate, supervise and direct the rescue and recovery activity in such mine.

"(4) During any inspection in accordance with section 7, the Secretary or his authorized representative shall investigate all conditions relating to accidents which have occurred in such mine, shall review records pertaining to accidents required to be maintained under this section, and shall determine whether actions have been taken by the operator to prevent accidents similar to any such accidents so recorded, and whether any failure to take preventive action violates any health and safety standard promulgated under section 5.

"(b)(1) Each operator shall keep and make available to the Secretary or the Secretary of Health, Education, and Welfare, or Secretary of Health, Education, and Welfare regarding his activities relating to this Act as the Secretary, after consultation with the Secretary of Health, Education, and Welfare and the Secretary of the Interior, may prescribe by regulation as necessary or appropriate for the enforcement of this Act or for developing information regarding the causes and prevention of accidents and illnesses in the mines subject to this Act. In order to carry out the provisions of this subsection such regulations may include provisions requiring operators to conduct periodic inspections.

"(2) The Secretary, in cooperation with the Secretary of Health, Education, and Welfare and the Secretary of the Interior, shall prescribe regulations requiring operators to maintain accurate records of, and to make prompt reports on, work-related deaths and injuries (other than minor injuries requiring only first aid treatment and which do not involve medical treatment, loss of consciousness, restriction of work or motion, or transfer to another job). The Secretary shall forward to the Secretary of Health, Education, and Welfare records of such deaths and injuries which are caused by disease.

"(3) The Secretary, in cooperation with the Secretary of Health, Education, and Welfare, shall issue regulations requiring operators to maintain for an appropriate length of time accurate records of miner exposures to potentially toxic materials or harmful physical agents which are required to be monitored or measured under section 5, and shall develop and maintain an effective program of collection, compilation, and analysis of statistics relating to health and safety in mines subject to this Act, including accurate statistics on all disabling, serious, or significant work injuries, whether or not involving loss of time from work, other than minor injuries requiring only first aid treatment and which do not involve medical treatment, loss of consciousness, restriction of work or motion, or transfer to another job.

"MINIMUM BURDEN ON SMALL BUSINESS

"SEC. 9. (a) Any information obtained by the Secretary, the Secretary of Health, Education, and Welfare, or a State agency under this Act shall be obtained with a minimum burden upon operators of small mines subject to this Act. Unnecessary duplication of efforts in obtaining information shall be reduced to the maximum extent feasible.

"(b) The Secretary shall provide to each operator of a mine subject to this Act an accurate and complete copy of the health, and safety standards promulgated under section 5 including any emergency temporary standard under subsection (d) of such section, together with any regulations under this Act which affect such operator, at the first inspection in accordance with section 7 which occurs after (1) the commencement of operations in such mine or (2) the effective date of section 2 of the Mine Safety and Health Act of 1977, whichever is later, and at least once each year after that inspection. In addition, at each inspection of a mine in accordance with section 7, the Secretary shall furnish the operator with current copies of any such standards and regulations which have been changed since the previous inspection of such mine. Compliance with this subsection shall not be a jurisdictional prerequisite to the enforcement of any provision of this Act.

"MINER EDUCATION AND ACCESS TO INFORMATION

"SEC. 10. (a) Copies of records of miners' exposures to toxic materials or harmful physical agents required to be maintained under section 8(b)(3) shall be furnished to the Director of the National Institute for Occupational Safety and Health established under section 22 of the Occupational Safety and Health Act of 1970 upon request. The Director of the National Institute for Occupational Health and Safety shall advise miners (or their authorized representatives) and the operator (or his agent) on any injury or risk of injury indicated by such records, as he deems appropriate.

"(b)(1) The Secretary, in cooperation with the Director of the National Institute for Occupational Safety and Health, and in cooperation with any State program of education and training in the field of mine safety and health, shall carry out a program of education and training for miners employed in mines subject to this Act. Such program shall include publications to be made available to such miners and regular visits by health experts to such mines, for the purpose of improving the health and safety of such mines, and assistance to miners (or their authorized representatives) in evaluating their exposures to toxic materials or harmful physical agents.

"(2) As part of the program of education and training for miners under this subsection, the Secretary shall develop, publish, and disseminate to miners manuals, and annual supplements to or revisions of such manuals, which contain an explanation of all health and safety standards promulgated under section 5 and all regulations under this Act which affect the health and safety of miners, and an explanation of personal protective equipment and the use of such equipment. Such manuals shall be designed so as to assist miners to become more knowledgeable with respect to health and safety in mines.

"(c) The Secretary shall issue regulations requiring that operators, through posting of notices or other appropriate means, keep their miners informed of their protections and obligations under this Act, including the provisions of applicable standards. Such regulations shall provide for the posting, at conspicuous locations, of notices (to be provided to operators by the Secretary) which shall advise miners of such protections and obligations together with the address and telephone number of the nearest regional office of the Department of Labor. Copies of the health and safety standards promulgated under section 5 and regulations under this Act which affect such operators which are furnished to such operators under section 10(b) shall be available in a location in or about each mine subject to this Act which is easily accessible by miners and at which miners check in and out on a daily basis.

"CITATIONS

"SEC. 11. (a) If, upon inspection or investigation, the Secretary or his authorized representative determines that an operator of a mine subject to this Act has violated a requirement of section 4 of this Act, of any standard, rule, or order promulgated pursuant to section 5 of this Act, or of any regulations prescribed pursuant to this Act, he shall with reasonable promptness issue a citation to the operator. Each citation shall be in writing and shall describe with particularity the nature of the violation, including a reference to the provision of the Act, standard, rule, regulation, or order alleged to have been violated. In addition, the citations shall fix a reasonable time for the abatement of the violation. The Secretary may prescribe procedures for the issuance of a notice in lieu of a citation with respect to de minimis violations which have no substantial direct or immediate relationship to safety or health.

"(b) Each citation issued under this section or a copy or copies thereof, shall be prominently posted, as prescribed in regulations issued by the Secretary, at or near each place a violation referred to in the citation occurred, and at a location on or about the mine in which the violation occurred at which miners check in and out on a daily basis.

"(c) No citation may be issued under this section after the expiration of six months following the occurrence of any violation.

"CLOSURE PROCEDURES

"SEC. 12. (a)(1) If, upon any inspection or investigation of a mine which is subject to this Act, an authorized representative of the Secretary finds that conditions or practices in such mine are such that an imminent danger exists, such representative shall determine the extent of the area of such mine throughout which the danger exists, and issue an order requiring the operator of such mine to cause all persons, except those referred to in subsection (a)(2), to be withdrawn from, and to be prohibited from entering, such area until an authorized representative of the Secretary determines that such imminent danger no longer exists. The issuance of an order under this subsection shall not preclude the issuance of a citation under section 11 or the proposing of a penalty under section 16.

"(2) Persons who shall not be prohibited from entering an area of a mine under an order issued under paragraph (1) are:

"(A) any person whose presence in such area is necessary, as determined jointly by the operator of the mine and an authorized representative of the Secretary, or as determined by an authorized representative of the Secretary, to eliminate the danger described in the order;

"(B) any public official whose official duties required him to enter such area; or

"(C) any legal or technical consultant, or any representative of the employees of the mine, who is a certified person qualified to make mine examinations, or is accompanied by such a person, and whose presence in such area is necessary, as determined jointly by the operator of the mine and an authorized representative of the Secretary, or as determined by an authorized representative of the Secretary, for the proper investigation of the conditions described in the order.

"(3) Whenever and as soon as an inspector concludes that conditions or practices described in paragraph (1) exist in any mine, he shall inform the affected miners and operators of the danger and that he is issuing an order under this subsection.

"(b) If the Secretary arbitrarily or ca-

priciously fails to take appropriate action under subsection (a), any miner who may be injured by reason of such failure, or the representative of such miners, may bring an action against the Secretary in the United States district court for the district in which the imminent danger is alleged to exist or the operator has its principal office, or for the District of Columbia, for an order to compel the Secretary to issue such an order and for such further relief, as may be appropriate.

"(c) If, upon any inspection or investigation of a mine which is subject to this Act, an authorized representative of the Secretary finds that there has been a failure to correct a violation for which a final order is in effect under section 13, within the time period specified pursuant to a citation under section 11(a), he shall also find the extent of the area which is affected by such violation. Thereupon, he may promptly make an order requiring the operator of such mine to cause all persons in such area, except those referred to in subsection (a)(2), to be withdrawn from, and to be prohibited from entering, such area until an authorized representative of the Secretary determines that such violation has been corrected. The issuance of an order under this subsection shall not preclude the issuance of a citation under section 11 or the proposing of a penalty under section 16.

"(d) Orders issued pursuant to this section shall contain a detailed description of the conditions or practices which cause and constitute an imminent danger or a violation of any health or safety standard promulgated under section 5 or a violation of section 4, as the case may be, and, where appropriate, a description of the area of the mine from which persons must be withdrawn and prohibited from entering.

"(e) Each order issued under this section shall be given promptly to the operator or his agent by an authorized representative of the Secretary issuing such order, and all such orders shall be in writing and shall be signed by such representative.

"(f) The Secretary shall by regulation establish a procedure for informal review of any closure order issued under this subsection (c), and the Secretary may, in modifying or setting aside such order, order that the operator shall not be obligated for part of, or all of, the compensation to which miners are entitled under section 24, and shall furnish any operator requesting such review a written statement of the reasons for the Secretary's final disposition of the matter within three days after the request for informal review.

"(g) Any person adversely affected or aggrieved by an order issued under this section may obtain a review of such order in the United States district court for the district in which the danger or violation is alleged to exist or in which the operator has its principal office by filing in such court within sixty days following the issuance of such order a written petition praying that the order be modified or set aside, and the court may, in modifying or setting aside such order, order that the operator shall not be obligated for part of, or all of, the compensation to which miners are entitled under section 24. The modification or setting aside of such an order by any court shall not preclude the issuance of a citation under section 11 or the proposing of a penalty under section 16.

"PROCEDURES FOR ENFORCEMENT

"SEC. 13. (a) If, after an inspection or investigation, the Secretary issues a citation under section 11(a), he shall, within a reasonable time after the termination of such inspection or investigation, notify the operator by certified mail of the penalty, if any, proposed to be assessed under section 16 and that the operator has thirty working days within which to notify the Secretary that he wishes to contest the citation or proposed assessment of penalty. If, within thirty working days after the receipt of the notice issued by the Secretary the operator fails to notify the Secretary that he intends to contest the citation or proposed assessment of penalty, and no notice is filed by any miner or representative of miners under subsection (c) within thirty working days after the citation is posted under section 11(b), the citation and the assessment, as proposed, shall be deemed a final order of the Commission and not subject to review by any court or agency.

"(b) If the Secretary determines that an operator has failed to correct a violation for which a citation has been issued within the period permitted for its correction (which period shall not end until the entry of a final order by the Commission, in the case of any review proceedings under this section initiated by the operator wherein the Commission orders, after an expedited hearing, the suspension of the abatement requirements of the citation after determining that the operator will suffer irreparable loss or damage from the application of those requirements), the Secretary shall notify the operator by certified mail of such failure and of the penalty proposed to be assessed under section 16 by reason of such failure, and that the operator has thirty working days within which to notify the Secretary that he wishes to contest the Secretary's notification of the proposed assessment of penalty. If within thirty working days after the receipt of notification issued by the Secretary, the operator fails to notify the Secretary that he intends to contest the notification or proposed assessment or penalty, the notification and assessment, as proposed, shall be deemed a final order and not subject to review by any court or agency.

"(c) If an operator notifies the Secretary that he intends to contest a citation issued under section 11(a) or notification issued under subsection (a) or (b) of this section, or if, within thirty working days after a citation is posted under section 11(b), any miner or representative of miners files a notice with the Secretary alleging that the period of time fixed in the citation for the abatement of the violation is unreasonable, the Secretary shall immediately advise the Commission of such notification, and the Commission shall afford an opportunity for a hearing (in accordance with section 554 of title 5, United States Code, but without regard to subsection (a)(3) of such section). The Commission shall thereafter issue an order, based on findings of fact, affirming, modifying, or vacating the Secretary's citation or proposed penalty or directing other appropriate relief, and such order shall become final thirty days after its issuance. Upon a showing by an operator of a good faith effort to comply with the abatement requirements of a citation, and that abatement has not been completed because of factors beyond his reasonable control, the Secretary, after an opportunity for a hearing as provided in this subsection, shall issue an order affirming or modifying the abatement requirements in such citation. The rules of procedure prescribed by the Commission shall provide affected miners or representatives of affected miners an opportunity to participate as parties to hearings under this subsection. Commencement of proceedings under this subsection shall not operate as a stay of the abatement requirements of any citation issued under section 11(a) unless the Commission, after determining that the operator will suffer irreparable loss or damage from the application of those requirements, so orders, after an expedited hearing.

"(d)(1) No person shall discharge or in any manner discriminate against or interfere with the exercise of the statutory rights of any miner because such miner has filed or made a complaint under or related to this Act, including a complaint notifying his labor or safety representative of an alleged danger or safety or health violation in the mine, or because such miner has instituted or caused to be instituted any proceeding under or related to this Act or has testified or is about to testify in any such proceeding, or because of the exercise by such miner on behalf of himself or others of any statutory right afforded by this Act, or because the miner has refused to work in any area of a mine from which persons must be withdrawn and prohibited from entering pursuant to an order under section 12.

"(2) Any miner who believes that he has been discharged, interfered with, or otherwise discriminated against by any person in violation of paragraph (1) of this subsection, or any miner who has not received compensation due under section 24 or who has been deprived of any right created by or under sections 5(b)(5)(B), 5(b)(6), and 7(c) may, within thirty days after such violation occurs, file a complaint with the Secretary alleging such discrimination or deprivation. Upon receipt of such complaint, the Secretary shall cause such investigation to be made as the Secretary deems appropriate. If, upon such investigation, the Secretary determines that there is probable cause to believe that the provisions of paragraph (1) of this subsection have been violated, or that a miner has not received compensation due under section 24 or has been deprived of a right created by or under sections 5(b)(5)(B), 5(b)(6), and 7(c), as the case may be, the Secretary shall file a complaint with the Commission within ninety days after such determination of probable cause, and the Commission shall immediately serve upon the alleged violator and the miner notice of the allegation of such discrimination or deprivation and a proposed order granting appropriate relief. The Commission shall afford an opportunity for a hearing (in accordance with section 554 of title 5, United States Code, but without regard to subsection (a)(3) of such section) and thereafter shall issue an order, based upon findings of fact, affirming, modifying, or vacating the proposed order, or directing other appropriate relief; and such order shall become final thirty days after its issuance. The Commission shall have authority in such proceedings to require a person committing a violation of this subsection to take such affirmative action to abate the violation as the Commission deems appropriate, including, but not limited to, the rehiring or reinstatement of the miner to his former position with back pay and interest.

"(3) Within ninety days of the receipt of a complaint filed under paragraph (2) of this subsection, the Secretary shall notify the miner in writing of the Secretary's determination as to whether a violation has occurred. If the Secretary, upon investigation, determines that the provisions of paragraph (1) of this subsection have not been violated, or that there has been no failure to provide compensation due under section 24, or that there has been no deprivation of a right created by or under sections 5(b)(5)(B), 5(b)(6), and 7(c), as the case may be, the complainant shall have the right, within thirty days of notice of the Secretary's determination, to request a hearing before the Commission, and the Commission shall conduct a hearing, in accordance with the provisions of paragraph (2) pertaining to the conduct of a hearing, on such complainant's charges. Whenever an order is issued sustaining the miner's charges under this paragraph, a sum equal to the aggregate amount of all costs and expenses (including attorney's fees) as determined by the Commission to have been reasonably incurred by the miner for, or in connection with, the institution and prosecution of such proceedings, shall be assessed against the person

committing such violation. Proceedings under this section shall be expedited by the Commission. Any order issued by the Commission under this paragraph shall be subject to judicial review in accordance with section 14. Violations by an operator of paragraph (1) of this subsection or deprivation by an operator of any right of any miner created by or under section 5(b)(5)(B), 5(b)(6), 7(c), or 24 shall be a violation for which a penalty may be assessed under section 16(a).

"JUDICIAL REVIEW

"SEC. 14. (a)(1) Any person adversely affected or aggrieved by an order of the Commission issued under subsection (c) or (d) of section 13 may obtain a review of such order in any United States court of appeals for the circuit in which the violation is alleged to have occurred or where the operator has its principal office, or in the Court of Appeals for the District of Columbia Circuit, by filing in such court within sixty days following the issuance of such order a written petition praying that the order be modified or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the Commission or to the Secretary, whichever is appropriate, and to the other parties, and thereupon the Commission or the Secretary, whichever is appropriate, shall file in the court the record in the proceeding as provided in section 2112 of title 28, United States Code. Upon such filing, the court shall have jurisdiction of the proceeding and of the question determined therein, and shall have power to grant such temporary relief or restraining order as it deems just and proper, and to make and enter upon the pleadings, testimony, and proceedings set forth in such record a decree affirming, modifying, or setting aside in whole or in part, the order of the Commission or the Secretary, as the case may be, and enforcing the same to the extent that such order is affirmed or modified. The commencement of proceedings under this subsection shall not, unless ordered by the court, operate as a stay of the order of the Commission or the Secretary, as the case may be.

"(2) In the case of an order of the Commission, no objection that has not been urged before the Commission shall be considered by the court, unless the failure or neglect to urge such objection shall be excused because of extraordinary circumstances. The findings of the Commission with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive. If any party shall apply to the court for leave to adduce additional evidence and shall show to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the hearing before the Commission, the court may order such additional evidence to be taken before the Commission and to be made a part of the record. The Commission may modify its findings as to the facts, or make new findings, by reason of additional evidence so taken and filed, and it shall file such modified or new findings, which findings with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive, and its recommendations, if any, for the modification or setting aside of its original order.

"(3) Upon the filing of the record with it, the jurisdiction of the court shall be exclusive and its judgment and decree shall be final, except that the same shall be subject to review by the Supreme Court of the United States, as provided in section 1254 of title 28, United States Code. Petitions filed under this subsection shall be heard expeditiously.

"(b) The Secretary may also obtain review of any final order of the Commission by filing a petition for such relief in the United States court of appeals for the circuit in which the alleged violation occurred or in which the operator has its principal office, and the provisions of subsection (a) shall govern such proceedings to the extent applicable. If no petition for review, as provided in subsection (a), is filed within sixty days after service of the Commission's order, the Commission's findings of fact and order shall be conclusive in connection with any petition for enforcement which is filed by the Secretary after the expiration of such sixty-day period. In any such case, as well as in the case of a noncontested citation or notification by the Secretary which has become a final order of the Commission under subsection (a) or (b) of section 13, the clerk of the court, unless otherwise ordered by the court, shall forthwith enter a decree enforcing the order and shall transmit a copy of such decree to the Secretary and the operator named in the petition. In any contempt proceeding brought to enforce a decree of a court of appeals entered pursuant to this subsection or subsection (a), the court of appeals may assess the penalties provided in section 16, in addition to invoking any other available remedies.

"(c) The Secretary may institute a civil action for relief, including a permanent or temporary injunction, restraining order, or any other appropriate order in the district court of the United States for the district in which a mine is located or in which the operator of such mine has his principal office, whenever such operator or his agent (1) violates or fails or refuses to comply with any order issued under section 12, or (2) interferes with, hinders, or delays the Secretary or his authorized representative, of the Secretary of Health, Education, and Welfare or his authorized representative, in carrying out the provisions of the Act, or (3) refuses to admit such representatives to the mine, or (4) refuses to permit the inspection of the mine, or the investigation of an accident or occupational disease occurring in, or connected with, such mine, or (5) refuses to furnish any information or report requested by the Secretary or the Secretary of Health, Education, and Welfare in furtherance of the provisions of this Act, or (6) refuses to permit access to, and copying of, such records as the Secretary or the Secretary of Health, Education, and Welfare determines necessary in carrying out the provisions of this Act. The court shall have jurisdiction to provide such relief as may be appropriate. Temporary restraining orders shall be issued in accordance with rule 65 of the Federal Rules of Civil Procedure except that the time limit in such orders, when issued without notice, shall be seven days from the date of entry. Except as otherwise provided herein, any relief granted by the court to enforce an order under clause (1) of this subsection shall continue in effect until the completion or final termination of all proceedings for review of such order under this Act, unless, prior thereto, the district court granting such relief sets it aside or modifies it. In any action instituted under this subsection to enforce an order issued by the Secretary after a public hearing in accordance with section 551 of title 5 of the United States Code, the findings of the Commission or the Secretary, as the case may be, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

"REPRESENTATION IN CIVIL LITIGATION

"SEC. 15. Except as provided in section 518(a) of title 28, United States Code, relating to litigation before the Supreme Court, the Solicitor of Labor may appear for and represent the Secretary in any civil litigation brought under this Act but all such litigation shall be subject to the direction and control of the Attorney General.

"PENALTIES

"SEC. 16. (a) Any operator who violates a safety or health standard prescribed by or under this Act, or any of the requirements of section 8, or any rule, order, or regulation promulgated pursuant to this Act, may be assessed a civil penalty of not more than $1,000 for each such violation.

"(b) Any operator who fails to correct a violation for which a citation has been issued under section 11(a) within the period permitted for its correction (which period shall not end until the entry of a final order by the Commission, in the case of any review proceedings under section 13 initiated by the operator wherein the Commission orders, after an expedited hearing, the suspension of the abatement requirements of the citation after determining that the operator will suffer irreparable loss or damage from the application of those requirements, or until the entry of an order of the court, in the case of any review proceedings under section 14 initiated by the operator wherein the court orders the suspension of the abatement requirements of the citation) shall be assessed a civil penalty of not more than $1,000 for each day during which such failure or violation continues.

"(c) Whenever a corporate operator violates a safety or health standard prescribed by or under this Act, or any rule, order, or regulation promulgated pursuant to this Act, any director, officer, or agent of such corporation who knowingly authorized, ordered, or carried out such violation shall be subject to the same civil penalties, fines, and imprisonment that may be imposed upon a person under subsection (a), (b), (d), (e), (f), or (g) of this section.

"(d) Any operator who willfully violates a safty or health standard prescribed by or under this Act, or any rule, order, or regulation promulgated pursuant to this Act, shall be assessed a civil penalty of not more than $10,000.

"(e) Any operator who willfully violates a safety or health standard prescribed by or under this Act, or any rule, order, or regulation promulgated pursuant to this Act, and that violation causes death to any individual, shall, upon conviction, be punished by a fine of not more than $25,000 or imprisonment for not more than one year, or both.

"(f) Any person who gives unauthorized advance notice of any inspection to be conducted under this Act shall, upon conviction, be punished by a fine of not more than $1,000 or by imprisonment for not more than six months, or both.

"(g) Whoever knowingly makes any false statement, representation, or certification in any publication, record, report, plan, or other document filed or required to be maintained pursuant to this Act shall, upon conviction, be punished by a fine of not more than $1,000, or by imprisonment for not more than six months, or by both.

"(h) Any operator who violates any of the posting requirements, as prescribed under the provisions of this Act, shall be assessed a civil penalty of up to $500 for each violation.

"(i) Any miner who willfully violates the mandatory safety standards relating to smoking or the carrying of smoking materials, matches, or lighters shall be subject to a civil penalty assessed by the Commission of not more than $250 for each occurrence of such violation.

"(j) The Commission shall have authority to assess all civil penalties provided in this Act. In assessing civil monetary penalties the Commission shall give due consideration to the gravity of the violation, the good faith of the person charged, the history of previous violations, and the appropriateness of the penalty with respect to the size of the business of any mine operator being charged: *Provided*, That, in proposing civil penalties under this Act, the Secretary may rely upon a summary review of the information available to him and shall not be required to make findings of fact concerning the above factors.

"(k) Civil penalties owed under this Act shall be paid to the Secretary for deposit into the Treasury of the United States and shall accrue to the United States and may be recovered in a civil action in the name of the United States brought in the United States district court for the district where the violation is alleged to have occurred or where the employer resides or maintains a place of business.

"EFFECT ON STATE LAWS

"SEC. 17. (a) Nothing in this Act shall prevent any State agency or court from exercising enforcement or other authority under the State law to protect the public health and welfare.

"(b) Nothing in this Act shall prevent any State from carrying out a program (independent of or in conjunction with the program developed under section 10(b)) of education and training in the field of safety and health in mines subject to this Act, or any program of consultation, gathering and compilation of statistics, or research and development of technology in such field.

"THE FEDERAL METAL AND NONMETALLIC MINE SAFETY AND HEALTH COMMISSION

"SEC. 18. (a) The Federal Metal and Nonmetallic Mine Safety and Health Commission is hereby established. The Commission shall consist of three members, appointed by the President by and with the advice and consent of the Senate, from among persons who by reason of training, education, or experience are qualified to carry out the functions of the Commission under this Act. The President shall designate one of the members of the Commission to serve as Chairman.

"(b) The terms of the members of the Commission shall be six years, except that—

"(1) members of the Commission, first taking office after the date of enactment of the Mine Safety and Health Act of 1977, shall serve, as designated by the President at the time of appointment, one for a term of two years, one for a term of four years, and one for a term of six years; and

"(2) a vacancy caused by the death, resignation, or removal of any member prior to the expiration of the term for which he was appointed shall be filled only for the remainder of such unexpired term.

Any member of the Commission may be removed by the President for inefficiency, neglect of duty, or malfeasance in office.

"(3) The Chairman shall be responsible on behalf of the Commission for the administrative operations of the Commission. The Commission shall appoint such employees as it deems necessary to assist in the performance of the Commission's functions and to fix their compensation in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification and general pay rates. The Commission shall appoint such hearing examiners as it deems necessary to carry out the functions of the Commission. Assignment, removal, and compensation of hearing examiners shall be in accordance with sections 3105, 3344, 5362, and 7521 of title 5, United States Code.

"(c) Two members of the Commission shall constitute a quorum and official action can be taken only on the affirmative vote of at least two members.

"(d) A hearing examiner appointed by the Commission to hear matters under this Act shall hear, and make a determination upon, any proceeding instituted before the Commission and any motion in connection therewith, assigned to such hearing examiner by the Commission, and shall make a report of any such determination which constitutes his final disposition of the proceedings. The report of the hearing examiner shall become the final order of the Commission within thirty days after its issuance, unless within such period any member of the Commission has directed that such report shall be reviewed by the Commission.

"(e)(1) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"'(64) Chairman, Federal Metal and Nonmetallic Mine Safety and Health Commission'.

"(2) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"'(108) Members, Federal Metal and Nonmetallic Mine Safety and Health Commission'.

"(3) The principal office of the Commission shall be in the District of Columbia. Whenever the Commission deems that the convenience of the public or of the parties may be promoted, or delay or expense may be minimized, it may hold hearings or conduct other proceedings at any other place.

"(4) Every official act of the Commission shall be entered of record, and its hearings and records shall be open to the public. The Commission is authorized to make such rules as are necessary for the orderly transaction of its proceedings. Unless the Commission has adopted a different rule, its proceedings shall be in accordance with the Federal Rules of Civil Procedure.

"(5) The Commission may order testimony to be taken by deposition in any proceeding pending before it at any stage of such proceeding. Any person may be compelled to appear and depose, and to produce books, papers, or documents, in the same manner as witnesses may be compelled to appear and testify and produce like documentary evidence before the Commission. Witnesses whose depositions are taken under this paragraph, and the persons taking such depositions, shall be entitled to the same fees as are paid for like services in the courts of the United States.

"(6) For the purpose of any proceeding before the Commission, the provisions of section 11 of the National Labor Relations Act (29 U.S.C. 161) are hereby made applicable to the jurisdiction and powers of the Commission.

"ASSISTANT SECRETARY FOR MINE SAFETY AND HEALTH

"SEC. 19. (a) There is established in the Department of Labor an office of the Assistant Secretary for Mine Safety and Health, which shall be filled by appointment by the President, by and with the advice and consent of the Senate. The Secretary shall carry out his functions under this Act (except section 5(a)(3) and section 22(c)) through the Assistant Secretary for Mine Safety and Health.

"(b) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"'(109) Assistant Secretary for Mine Safety and Health.'

"ADVISORY COMMITTEE

"SEC. 20. (a)(1) There is hereby established a National Advisory Committee on Metal and Nonmetallic Mine Safety and Health consisting of twelve members appointed by the Secretary, four of whom are to be designated by the Secretary of Health, Education, and Welfare and the Secretary of the Interior, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and composed of representatives of management, labor, metal and nonmetallic mine health and safety professions, and of the public. The Secretary shall designate one of the public members as Chairman. The members shall be selected upon the basis of their experience and competence in the field of metal and nonmetallic mine health and safety.

"(2) The Committee shall advise, consult with, and make recommendations to the Secretary, the Secretary of Health, Education, and Welfare, and the Secretary of the Interior on matters relating to the administration of this Act. The Committee shall hold no fewer that two meetings during each calendar year. All meetings of the Committee shall be open to the public and a transcript shall be kept and made available for public inspection.

"(3) The members of the Committee shall be compensated in accordance with the provisions of section 3109 of title 5, United States Code.

"(4) The Secretary shall furnish to the Committee an executive secretary and such secretarial, clerical, and other services as are deemed necessary to the conduct of its business.

"PUBLICATION, ANNUAL REPORT, AND REGULATIONS

"SEC. 21. (a) The Secretary, the Secretary of Health, Education, and Welfare, and the Secretary of the Interior are authorized to compile, analyze, and publish, either in summary or detailed form, all reports or information obtained under this Act.

"(b) The Secretary shall transmit to the Congress no later than February 1 of each year a report on the administration of this Act, including the progress toward achieving the purposes of this Act, the needs and requirements in the field of metal and nonmetallic mine safety, any other relevant information (including information regarding health and safety standards established under section 5, and a summary of inspection and enforcement activity undertaken, and analysis and evaluation of research activities), and recommendations for additional legislation.

"(c) The Secretary, the Secretary of Health, Education, and Welfare, and the Secretary of the Interior shall each prescribe such rules and regulations as he may deem necessary to carry out his responsibilities under this Act, including rules and regulations dealing with the inspection of a mine subject to this Act.

"TRANSFER MATTERS

"SEC. 22. (a) The functions of the Secretary of the Interior under this Act (as this Act was in effect immediately prior to the effective date of section 2 of the Mine Safety and Health Act of 1977) are transferred to the Secretary, except those which are transferred to the Commission or to the Secretary of Health, Education, and Welfare or which remain as functions of the Secretary of the Interior under this Act (as in effect on the effective date of section 2 of the Mine Safety and Health Act of 1977).

"(b)(1) All unexpended balances of appropriations, personnel property, records, obligations, and commitments which are used primarily with respect to any function transferred under the provisions of subsection (a) of this section to the Secretary shall be transferred to the Department of Labor. The transfer of personnel pursuant to this paragraph shall be without reduction in classification or compensation for one year after such transfer, except that the Secretary shall have full authority to assign personnel during such one-year period in order to efficiently carry out functions transferred to him under this section.

"(2) All orders, decisions, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges (A) which have been issued, made, granted, or allowed to become effective in the exercise of functions which are transferred under this section by any department or agency, any functions of which are transferred by this section, and (B) which are in effect at the time this section takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary, the Commission,

the Secretary of Health, Education, and Welfare, by any court of competent jurisdiction, or by operation of law.

"(3) The provisions of this section shall not affect any proceedings pending at the time this section takes effect before any department or agency, functions of which are transferred by this section; except that such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Secretary or the Commission. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this section had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary, the Commission, by a court of competent jurisdiction, or by operation of law.

"(4) The provisions of this section shall not affect suits commenced prior to the date this section takes effect and in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this section had not been enacted; except that if before the date on which this section takes effect, any department or agency (or officer thereof in his official capacity) is a party to a suit involving functions transferred to the Secretary, then such suit shall be continued by the Secretary. No cause of action, and no suit, action, or other proceeding, by or against any department or agency (or officer thereof in his official capacity) functions of which are transferred by this section, shall abate by reason of the enactment of this section. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or the Secretary as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this paragraph.

"(c) In making a determination under section 5(a)(3) of this Act of which of the occupational health and safety standards promulgated under section 6 of the Occupational Safety and Health Act of 1970 pertain to the milling of minerals in mines subject to this Act, including a determination of what constitutes mineral milling for purposes of section 3(a)(2), the Secretary shall give due consideration to the convenience of administration resulting from the delegation to one Assistant Secretary of all authority with respect to the health and safety of miners employed at one physical establishment.

"(d) For purposes of this section, (1) the term 'function includes power and duty, and (2) the transfer of a function, under any provision of law, of any agency or the head of a department shall also be a transfer of all functions under such law which are exercised by any officer or officer of such agency or department.

"RESEARCH AND RELATED ACTIVITIES

"SEC. 23. (a)(1) The Secretary of Health, Education, and Welfare and the Secretary of the Interior, as appropriate, after consultation with the Secretary and with other appropriate Federal departments or agencies, shall conduct (directly or by grants or contracts) research, experiments, and demonstrations relating to safety and health in mines subject to this Act including studies of lung and respiratory diseases and carcinogenic substances, and studies of psychological factors involved, and relating to innovative methods, techniques, and approaches for dealing wtih safety and health problems associated with mines subject to this Act.

"(2) The Secretary shall coordinate, as he deems appropriate, any research, experiments, or demonstrations under this Act conducted by the Secretary of Health, Education, and Welfare and the Secretary of the Interior.

"(b) Activities under subsection (a) in the field of mine health, including research related to the development of personal protective equipment, shall be carried out by the Secretary of Health, Education, and Welfare, and activities under subsection (a) in the field of mine safety shall be carried out by the Secretary of the Interior.

"(c) Within two years after the date of enactment of the Mine Safety and Health Act of 1977, and annually thereafter, the Secretary of Health, Education, and Welfare shall conduct and publish industrywide studies of the effect of chronic or low-level exposure to mine materials, processes, and stresses on the potential for illness, disease, or loss of functional capacity in aging adults.

"(d) The Secretary of Health, Education, and Welfare shall from time to time consult with the Secretary in order to develop specific plans for such research, demonstrations, and experiments as are necessary to produce criteria, including criteria identifying toxic substances, enabling the Secretary to meet his responsibilities for the formulation of safety and health standards under this Act; and the Secretary of Health, Education, and Welfare, on the basis of such research, demonstrations, and experiments and any other information available to him, shall develop and publish at least annually such criteria as will effectuate the purposes of this Act.

"(e) The Secretary of Health, Education, and Welfare, on the basis of research, demonstrations, and experiments, and any other information available to him, shall develop criteria dealing with toxic materials and harmful physical agents and substances which will describe exposure levels that are safe for various periods of employment in mines subject to this Act, including but not limited to the exposure levels at which no miner will suffer impaired health or functional capacities or diminished life expectancy as a result of his work experience.

"(f) The Secretary of Health, Education, and Welfare shall also conduct special research, experiments, and demonstrations relating to safety and health in mines subject to this Act as are necessary to explore new problems, including those created by new technology in mine safety and health, which may require ameliorative action beyond that which is otherwise provided for in the operating provisions of this Act. The Secretary of Health, Education, and Welfare shall also conduct research into the motivational and behavioral factors relating to the field of mine safety and health.

"(g) The Secretary of Health, Education, and Welfare, in order to comply with his responsibilities under subsection (d), and in order to develop needed information regarding potentially toxic substances or harmful physical agents, may prescribe regulations requiring employers to measure, record, and make reports on the exposure of miners to substances or physical agents which the Secretary of Health, Education, and Welfare reasonably believes may endanger the health or safety of miners. The Secretary of Health, Education, and Welfare also is authorized to establish such programs of medical examinations and tests as may be necessary for determining the incidence of occupational illnesses and the susceptibility of miners to such illnesses. Nothing in this or any other provision of this Act shall be deemed to authorize or require medical examination, immunization, or treatment for those who object thereto on religious grounds, except where such is necessary for the protection of the health or safety of others. Upon the request of any operator who is required to measure and record exposure of miners to substances or physical agents as provided under this Act, the Secretary of Health, Education, and Welfare shall furnish full financial or other assistance to such employer for the purpose of defraying any additional expense incurred by him in carrying out the measuring and recording as provided in this subsection.

"(h) The Secretary of Health, Education, and Welfare shall publish within six months after the enactment of the Mine Safety and Health Act of 1977 and thereafter as needed but at least annually a list of all known toxic substances and physical agents occurring or found in mines subject to this Act by generic family or other useful grouping, and the concentrations at which such toxicity is known to occur. He shall determine following a written request by any operator or authorized representative of miners, specifying with reasonable particularity the grounds on which the request is made, whether any substance or agent normally found in the mine has potentially toxic effects in such concentrations as used or found; and shall submit such determination both to operators and affected miners as soon as possible. Upon request of any individual for such determination under this subsection, his name and the names of individual miners referred to in such request shall not appear on any record published, released, or made available under this Act. If the Secretary of Health, Education, and Welfare determines that any substance is potentially toxic or harmful at the concentrations in which it is used or found in a mine, and such substance is not covered by a safety or health standard promulgated under section 5, the Secretary of Health, Education, and Welfare shall immediately submit such determination to the Secretary, together with all pertinent criteria.

"(i) The Secretary of Health, Education, and Welfare is authorized to make investigations and question operators and miners as provided in section 7 of this Act, and have access to all records pertaining to employee exposures, and to make medical examinations available to miners exposed to health and safety hazards in mines subject to this Act, in order to carry out his functions and responsibilities under this section. The results of such medical examinations shall be made available to the miner and his authorized representative.

"(j) The Secretary is authorized to enter into contracts, agreements, or other arrangements with appropriate public agencies or private organizations for the purpose of conducting studies relating to his responsibilities under this Act. In carrying out his responsibilities under this subsection, the Secretary shall cooperate with the Secretary of Health, Education, and Welfare, the Secretary of the Interior, and any other appropriate administrative head of any agency of the United States, in order to avoid any duplication of efforts under this section.

"(k) In carrying out his responsibilities under this Act, the Secretary is authorized to—

"(1) use, with the consent of any Federal agency, the services, facilities, and personnel of such agency, with or without reimbursement, and with the consent of any State or political subdivision thereof, accept and use the services, facilities, and personnel of any agency of such State or subdivision with reimbursement; and

"(2) employ experts and consultants or organizations thereof as authorized by section 3109 of title 5, United States Code, except that contracts for such employment may be renewed annually; compensate individuals so employed at rates not in excess of the rate specified at the time of service for grade GS–18 under section 5332 of title 5, United States Code, including traveltime, and allow them while away from their homes or regular places of business, travel expenses (including per diem in lieu of subsistence) as authorized by section 5703 of

title 5, United States Code, for persons in the Government service employed intermittently, while so employed.

"(l) Information obtained by the Secretary, the Secretary of Health, Education, and Welfare, and the Secretary of the Interior under this section shall be disseminated by the Secretary to operators of mines subject to this Act and miners and organizations thereof.

"(m) The functions of the Secretary of Health, Education, and Welfare under this Act shall, to the extent feasible, be delegated to the Director of the National Institute for Occupational Safety and Health established by section 22 of the Occupational Safety and Health Act of 1970.

"ENTITLEMENT OF MINERS

"SEC. 24. If a mine or area of a mine is closed by an order issued under section 12, all miners who are idled as a result of such order including any miner who refuses to work in any area of a mine from which persons must be withdrawn and prohibited from entering pursuant to such an order, in cases where the operator fails or refuses to comply with such order, shall be entitled (except as provided in section 12(f) and section 12(g)) to full compensation by the operator at their regular rates of pay for the period they are idled, but for not more than one week.

"CONFIDENTIALITY OF TRADE SECRETS

"SEC. 25. All information reported to or otherwise obtained by the Secretary or his representative in connection with any inspection or proceeding under this Act which contains or which might reveal a trade secret referred to in section 1905 of title 18 of the United States Code shall be considered confidential for the purpose of that section, except that such information may be disclosed to other officers or employees concerned with carrying out this Act or when relevant in any proceeding under this Act. In any such proceeding the Secretary, the Commission, or the court shall issue such orders as may be appropriate to protect the confidentiality of trade secrets.

"REPORT OF COMMENCEMENT OF OPERATION OF A MINE

"SEC. 26. Each operator of a mine subject to this Act who employs three or more miners shall report any commencement, after the effective date of section 2 of the Mine Safety and Health Act of 1977, of operations in such mine to the Secretary.

"ECONOMIC ASSISTANCE TO SMALL MINE OPERATORS

"SEC. 27. (a) Section 7(b) of the Small Business Act (15 U.S.C. 636(b)) is amended—

"(1) by striking out the period at the end of paragraph (8) and inserting in lieu thereof '; and'; and

"(2) by adding after paragraph (8) a new paragraph as follows:

"'(9) to make such loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) as the Administration may determine to be necessary or appropriate to assist any small business concern, which is an operator of a mine as defined in the Federal Metal and Nonmetallic Mine Safety Act and which is subject to that Act; in effecting additions to or alterations in the equipment, facilities, or methods of operation of such business in order to comply with the applicable standards promulgated pursuant to section 5 of the Federal Metal and Nonmetallic Mine Safety Act, if the Administration determines that such concern is likely to suffer substantial economic injury without assistance under this paragraph.'

"(b) The third sentence of section 7(b) of the Small Business Act (15 U.S.C. 636(b)) is amended by striking out 'or (8)' and inserting in lieu thereof '(8), or (9)'.

"(c) Section 4(c)(1) of the Small Business Act (15 U.S.C. 633(c)(1)) is amended by inserting '7(b)(9),' after '7(b)(8),'.

"(d) Loans may also be made or guaranteed for the purposes set forth in section 7(b)(9) of the Small Business Act (as added by the amendments made by subsection (a)) pursuant to the provisions of section 202 of the Public Works and Economic Development Act of 1965.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 28. (a) There are hereby authorized to be appropriated to the Secretary and the Commission for any fiscal year such sums as may be necessary to carry out the provisions of this Act.

"(b) There are hereby authorized to be appropriated to the Secretary of Health, Education, and Welfare and to the Secretary of the Interior for any fiscal year such sums as may be necessary to carry out functions under this Act.

"QUALIFICATIONS OF MINE INSPECTORS

"SEC. 29. To the maximum extent feasible, in the selection of persons for appointment as mine inspectors, no person shall be so selected unless he has the basic qualification of at least five years practical mining experience or three years practical mining experience and appropriate mining education and in assigning mine inspectors to the inspection and investigation of individual mines, due consideration shall be given to their previous practical experience in the State, district, or region, and in the particular type of mining operation where such inspections are to be made.

"STATE PLANS

"SEC. 30. (a) In order to promote sound and effective coordination in Federal and State activities within the field covered by this Act, the Secretary shall cooperate with the official mine inspection or safety agencies of the several States.

"(b) Any State which, at any time, desires to develop and enforce health and safety standards in mines located in the State which are subject to this Act shall submit, through a State mine inspection or safety agency, a State plan for the development of such standards and their enforcement.

"(c) The Secretary shall approve the plan submitted by a State under subsection (b), or any modification thereof, whenever the State gives evidence satisfactory to the Secretary that under such plan—

"(1) the State agency submitting such plan is the sole agency responsible for administering the plan throughout the State and contains satisfactory evidence that such agency will have the authority to carry out the plan: *Provided*, That the Secretary may, upon request of the Governor or other appropriate executive or legislative authority of the State responsible for determining or revising the organizational structure of State government, waive the single State administrative structure or arrangement if the Secretary determines that the objectives of this Act will not be endangered by the use of such other State structure or arrangement,

"(2) such agency has adequate legal authority to enforce existing health and safety standards for the purpose of the protection of life, the promotion of health and safety, and the prevention of accidents in mines in the State that are subject to this Act, which are, in his judgment, substantially as effective for such purposes as the mandatory standards designated under section 5 and which provide for inspection at least four times annually of all underground mines, other than quarries and sand and gravel pits,

"(3) the agency has adequate qualified personnel necessary for the enforcement of the plan,

"(4) the State will devote adequate funds to the administration and enforcement of such standards,

"(5) reasonable safeguards exist against loss of life or property arising from mines which are closed or abandoned after the effective date of this Act, and

"(6) the agency shall make such reports to the Secretary, in such form and containing such information, as the Secretary shall from time to time require.

"(d) The Secretary shall, on the basis of reports submitted by the State agency and his own inspection of mines, make a continuing evaluation of the manner in which each State having a plan approved under this section is carrying out such plan. Whenever the Secretary finds, after affording due notice and opportunity for a hearing, that in the administration of the State plan there is a failure to comply substantially with any provision of the State plan (or any assurance contained therein), he shall notify the State agency of his withdrawal of approval of such plan and upon receipt of such notice such plan shall cease to be in effect.

"(e) The provisions of sections 12(c) and 12(g) of this Act shall not be applicable in any State in which there is in effect a State plan approved under subsection (c).".

SEC. 3. (a) There are hereby transferred to and vested in the Secretary of Labor all functions of the Secretary of the Interior and of other offices and officers of the Department of the Interior under title I, title II, title III, and so much of title V as pertains to the field of coal mine health and safety (except for research with respect thereto), of the Federal Coal Mine Health and Safety Act of 1969 (as such Act was in effect immediately before the effective date of this section), except that all such functions of authorized representatives of the Secretary of the Interior are hereby transferred to and vested in authorized representatives of the Secretary of Labor. The Secetary shall carry out such functions and duties through the Assistant Secretary for Mine Safety and Health established by section 2 of this Act.

(b)(1) All unexpended balances of appropriations, personnel, property, records, obligations, and commitments which are used primarily with respect to any function transferred under the provisions of subsection (a) of this section to the Secretary of Labor shall be transferred to the Department of Labor. The transfer of personnel pursuant to this paragraph shall be without reduction in classification or compensation for one year after such transfer, except that the Secretary of Labor shall have full authority to assign personnel during such one-year period in order to efficiently carry out functions transferred to him under this section.

(2) All orders, decisions, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges (A) which have been issued, made, granted, or allowed to become effective in the exercise of functions which are transferred under this section by any department or agency, any functions of which are transferred by this section, and (B) which are in effect at the time this section takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary of Labor, by any court of competent jurisdiction, or by operation of law.

(3) The provisions of this section shall not affect any proceedings pending at the time this section takes effect before any department or agency, functions of which are transferred by this section; except that such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Secretary of Labor. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this section had not been enacted; and orders issued in

any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary of Labor, by a court of competent jurisdiction, or by operation of law.

(4) The provisions of this section shall not affect suits commenced prior to the date this section takes effect and in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this section had not been enacted; except that if before the date on which this section takes effect, any department or agency (or officer thereof in his official capacity) is a party to a suit involving functions transferred to the Secretary of Labor, then such suit shall be continued by the Secretary of Labor. No cause of action, and no suit, action, or other proceeding, by or against any department or agency (or officer thereof in his official capacity) functions of which are transferred by this section, shall abate by reason of the enactment of this section. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or the Secretary of Labor as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this paragraph.

(c) For purposes of this section, (1) the term "function" includes power and duty, and (2) the transfer of a function, under any provision of law, of an agency or the head of a department shall also be a transfer of all functions under such law which are exercised by any officer or officer of such agency or department.

(d) Section 3(a) of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting immediately before the semicolon: ", except where the functions, powers, and duties vested in the Secretary of the Interior under this Act are transferred to and vested in the Secretary of Labor under section 3 of the Mine Safety and Health Act of 1977".

SUNSHINE IN GOVERNMENT

SEC. 4. (a) Each officer or employee of the Secretary of the Interior, Secretary of Labor, and the Secretary of Health, Education, and Welfare who—

(1) performs any function or duty under this Act or the Federal Coal Mine Health and Safety Act of 1969 and the Federal Metal and Nonmetallic Mine Safety Act which are amended by this Act; and

(2) has any known financial interest (A) in any operator or mine subject to such Acts or (B) in any person who applies for or receives any grant, contract, or other form of financial assistance pursuant to such Acts, shall, beginning on February 1, 1978, annually file with appropriate Secretary a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) The appropriate Secretary shall—

(1) act within ninety days after the date of enactment of this Act—

(A) to define the term "known financial interest" for purposes of subsection (a) of this section; and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the appropriate agency head of such statements.

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the action taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, each Secretary may identify specific positions within each agency which are of a nonregulatory or nonpolicy-making nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section, shall be fined not more than $2,500 or imprisoned not more than one year, or both.

SEC. 5. Sections 2 and 3 of this Act shall take effect July 1, 1978, and all transfers of functions under the amendment made by section 2 and under section 3 shall be completed not later than September 30, 1978.

SEC. 6. Nothing contained in this Act or any amendment made by this Act shall be construed to reduce the number of inspectors engaged in enforcing the provisions of the Federal Coal Mine Health and Safety Act of 1969 (as such Act was in effect immediately before the effective date of section 3 of this Act), and the Federal Metal and Nonmetallic Mine Safety Act (as such Act was in effect immediately before the effective date of section 2 of this Act), or to reduce the number of inspectors engaged in the enforcement of the Occupational Safety and Health Act of 1970.

Mr. SARASIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Essentially, H.R. 7979, strengthens the existing Metal and Nonmetallic Act, thereby keeping coal and noncoal separate. It contains a "general duty" clause; omitted from either H.R. 4287 or the Coal Act. It upgrades the standards setting process by: First, setting time limitations on standards setting procedures; second, quickly bringing OSHA standards as to milling to the forefront for promulgation; third, considering all OSHA standards applicable to miners within 1 year; fourth, provides for issuance of emergency temporary standards; fifth, provides for health standards; and sixth, allows miners to observe monitoring and measuring of miner exposures to possibly harmful substances—a right that is denied metal and nonmetallic miners under the Coal Act.

A variance procedure is legislated under H.R. 7979; inspections are mandated; inspectors are to have minimum qualifications; reports and records are required, and there are strict procedures for enforcement, including civil penalties and citations. Additionally, miner entitlements are provided as a result of a closure. The substitute, as well, provides for the transfer of the administration of enforcement of both the Coal and Noncoal Acts from the Secretary of the Interior to the Secretary of Labor.

Additionally, my substitute provides for State plans, a provision now existing in the Metal and Nonmetallic Act.

Mr. Chairman, the following section-by-section analysis will explain the details of H.R. 7979:

SECTION-BY-SECTION ANALYSIS OF H.R. 7979

1. Definitions and Coverage (Section 3):

A. The term operator includes independent contractors.

2. Duties (Section 4): A. A general duty clause is provided whereby the operator must furnish to each of his employees . . . a place of employment which is free from recognized hazards that are causing or are likely to cause death or serious injury to his miners.

3. Health and Safety Standards (Section 5):

A. The Secretary is required to establish an Advisory Committee within 6 months to review the health and safety standards promulgated by the Secretary of the Interior as advisory standards under the Federal Metal and Nonmetallic Mine Safety Act, and determine which standards should be promulgated.

B. The Secretary, with the assistance of an advisory committee, is required to determine within 6 months which of the occupational safety and health standards promulgated under the Occupational Safety and Health Act pertain to miners employed in the milling of minerals in mines subject to this Act. The Secretary must then publish such determination in the Federal Register.

(1) A comment period of 45 days is provided.

(2) A similar procedure is provided for review and promulgation of OSHA standards applicable to all miners except that this determination can be made by the Secretary within 1 year.

C. Informal procedures for promulgation of standards is provided, with optional consultation with an advisory committee, except that all hearings held under section 5 shall conform to 5 USC 554 (Formal Hearings).

D. Where a miner is reassigned to a new position because it has been determined that he may suffer a material impairment of health or functional capacity by reason of exposure to a hazardous or toxic material, he shall suffer no loss of earnings, seniority or status.

E. The Secretary is authorized to promulgate "emergency temporary standards" which become law by publication in the Federal Register without any rulemaking procedures. Such standards may remain in effect for up to 9 months and shall serve as a proposed rule for the rulemaking proceeding. No civil penalty may be proposed for violation of an emergency temporary standard.

F. In promulgating standards dealing with toxic materials or harmful physical agents, the Secretary must set the standard which most adequately assures, to the extent feasible on the basis of the best available evidence, that no miner will suffer material impairment of health or functional capacity even if the employee has regular exposure for the period of his working life.

G. Miners or their representatives are to have the right to observe monitoring and measuring of miner exposures to substances required to be monitored and measured. Miners shall also have access to records that will indicate their own exposure to such substances.

H. Any person adversely affected by a standard may within 60 days challenge the validity of such standard in the U.S. Court of Appeals.

4. Variances (Section 6):

A. Variance procedures are provided, as well as procedures for seeking a temporary order granting a variance from a standard.

B. The temporary order can be for up to 1 year with opportunities for two renewals not to exceed 180 days each.

5. Inspections (Section 7):

A. The Secretary must inspect each underground mine at least 4 times a year, and each surface mine and milling operation at least 2 times a year.

B. The Secretary of HEW is authorized to make investigations for the purpose of improving mandatory health standards.

C. The Secretary, in making his inspections,

may require the attendance and testimony of witnesses under oath and the production of evidence.

D. A walk-around provision (with pay) is included for one or more miners, at the discretion of the inspector, or a representative of the miners.

E. A miner may request an inspection on the grounds that an imminent danger exists, or that there is a violation of section 4(a) (General Duty Clause). Any request for an inspection on the grounds that an imminent danger exists necessitates immediate notification of the operator.

F. If a miner has reason to believe that a violation of any provision of this Act exists, he can request an inspection. There is no requirement here that he notify the operator.

6. Requirements in Cases of Accidents; Records and Reports (Section 8):

A. All accidents in mines must be investigated by the operator, and records of investigations . . . must be kept by the operator.

B. Accidents are defined to include any mine explosion, ignition, fire, unintentional rooffall, or inundation, whether or not resulting in the death or injury of any miner. Would also include any other accident resulting in death or medical treatment of a miner.

C. The operator is required to notify the Secretary promptly of all accidents.

D. The Secretary is authorized to supervise and direct any rescue and recovery operations made necessary by the occurrence of any accident in a mine.

7. Miner Education and Access to Information (Section 10): A. The Director of the National Institute for Occupational Health and Safety shall upon request be privy to records of miner exposures to toxic materials or harmful physical agents required to be maintained by the operator under section 8.

8. Citations (Section 11):

A. A citation may be issued if an inspector "determines" that a violation has occurred.

B. All citations must be prominently posted according to regulations to be promulgated by the Secretary.

9. Closure Procedures (Section 12):

A. Closure orders will lie for imminent danger determinations and for failure to abate a violation within the time provided.

B. A procedure for the review of closure orders in the U.S. District Courts is provided.

10. Procedures for Enforcement (Section 13):

A. Operators have 30 working days to notify the Secretary if they intend to contest a citation or proposed assessment of penalty.

B. If within 30 days of receipt of the notice of the proposed assessment, an operator does not notify the Secretary of his intent to contest the citation or the penalty, the citation and proposed assessment shall be deemed a final order of the Commission.

C. No person may discriminate by discharging or otherwise discriminating against a miner because such miner has filed or made a complaint under or related to this Act.

11. Judicial Review (Section 14):

A. Any person adversely affected or aggrieved by an order of the Commission may obtain a review of such order in the U.S. Court of Appeals.

B. Any petition for review must be filed within 60 days of the issuance of the order.

12. Penalties (Section 16): A. Penalties of up to $1000 per violation may be assessed, depending on their seriousness, and whether they were committed willfully.

13. The Federal Metal and Nonmetallic Mine Safety and Health Commission (Section 18): A. Review of an Administrative Law Judge's decision is descretionary with members of the Commission.

14. Advisory Committees (Section 20): A. A National Advisory Committee on Metal and Nonmetallic Mine Safety and Health is established to advise and consult with the Secretary.

15. Transfer Matters (Section 22): A. Basically enforcement of the Federal Metal and Nonmetallic Mine Safety Act and the Federal Coal Mine Health and Safety Act is transferred from the Secretary of the Interior to the Secretary of Labor.

16. Research and Related Activities (Section 23): A. All research in the field of mine health is designated as the responsibilities of the Secretary of HEW.

17. Entitlement of Miners (Section 24): A. All miners who are idled as a result of a closure order are entitled to full compensation by the operator at their regular rates of pay for the period they are idled, but for not more than one week.

18. Qualifications of Mine Inspectors (Section 29): A. Mine inspectors must have, to the extent feasible at least five years practical mining experience and appropriate mining education.

19. State Plans (Section 30): A. State plans are retained from the existing Federal Metal and Nonmetallic Mine Safety Act.

There are some differences between the bill I offer as a substitute and the House-passed bill of last year (H.R. 13555).

The memorandum follows:

DIFFERENCES BETWEEN SARASIN SUBSTITUTE AND H.R. 13555

Sarasin substitute is basically similar to H.R. 13555 which passed the House overwhelmingly in the 94th Congress. The substitute amends and upgrades the Metal and Nonmetallic Mine Safety Act of 1966. It provides for a "general duty" clause, provides for development of standards, will, hopefully work out the problems of separate jurisdiction over milling operations, allows issuance of emergency temporary standards, provides for variances, mandates inspections underground four times a year, provides for citations and permissive penalties, in addition to closure orders and walkaround rights and other special rights for miners. My substitute also includes transfer to DOL.

The changes from H.R. 13555 as it passed the House written into my substitute include:

1. coverage of independent contractors under the definition of "operator." H.R. 13555 only covered "owner-operators," while my substitute will cover them as well as non-owner operators. (Page 6)

2. provides that an Advisory Committee must be established to consider OSHA standards applicable to mining. The mandatory Advisory Committee has been requested and recommended by most witnesses, and even the Senate bill, S. 717, rejected the Administration's suggestion to do away with Advisory Committees in mining. (Page 11)

3. explicates the reason that the Department of HEW is allowed to enter and inspect a mine as "for the purposes of developing improved mandatory health standards." Otherwise, the language would indicate that both the Labor and HEW Departments could inspect, cite, and propose penalties, which was not the intent of the bill. (Page 25)

4. in issuing a citation, an inspector must "determine" that an operator has violated the Act or regulations rather than just "believe" a violation occurred. (Page 35)

5. in a similar manner, the Secretary must "determine" that an operator has failed to correct a violation before the Secretary may propose a penalty for such failure, instead of just "believing" the operator has failed to correct. (Page 41)

6. allows 30 working days to contest a citation or a failure to correct, instead of only 15 days. (Pages 40, 41 and 42)

7. strikes "or repeatedly" from penalty provisions for two reasons:

(a) an operator can be "repeatedly" in violation if he operates more than one mine; and

(b) conditions in mines are constantly changing, thereby affording an opportunity for numerous "repeated" violations. (Page 53)

8. provides that where a miner requests an inspection because of "imminent danger" conditions, that it is mandatory that the miner notify the operator. If there is possibly an imminent danger, it should be corrected immediately if possible (Page 28).

9. adds a new section 29, entitled "Qualifications of Mine Inspectors," which requires inspectors to have five years practical experience or three years experience and appropriate mining education (Page 73).

10. provides for formal hearings (Page 13).

11. adds a new section 30 preserving State plans as they exist under the present Federal Metal and Nonmetallic Mine Safety Act (Page 75).

12. prohibits the issuance of fines in conjunction with emergency temporary standards until such time as those standards become permanent. Allows closure orders in those circumstances (Pages 18–19).

13. removes Congressional veto of administrative regulation.

Mr. SARASIN. Mr. Chairman, there is a reason for separation. The reason is specific and the reason for having a bill especially designed for the hard-rock miners and a bill especially designed for coal is that there is a tremendous difference. I pointed out earlier that this was recognized by the gentleman from Arizona (Mr. UDALL) when he attempted to put together a surface-mining bill and cover all surface miners. It could not be done, because of the differences between the surface mining of coal and the surface mining of other minerals.

This bill does everything the bill in the last session did, all the things we talked about that were important, all the things that the labor unions insisted had to be included in the piece of legislation. This was the bill they fought and died for last year and suddenly, while I am consistent, they are inconsistent; suddenly they no longer like the piece of legislation they wanted so badly last year and they are looking for something else which denies the hard-rock miners of today their rights.

Again, when we remember that there are only 666 underground metal and nonmetal mines, and 14,000 surface mines, 12,000 of which are sand and gravel and quarry operations, and that most of the Members in this body have sand and gravel and quarry operations—I cannot imagine any State without them—I wonder what they are going to tell those operators and workers when they find out that they are subject to the jurisdiction of the Coal Act. It just does not seem to make any sense.

I have seen so many loopholes existing in H.R. 4287 that the best way to control them is to adopt H.R. 7979. This is the bill which was studied; this is the bill on which hearings were held; this is the bill which was supported by 308 Members in the last session. H.R. 4287, unlike the comments of the chairman yesterday, is not just a simple transfer bill. I agree with those who support the transfer and I agreed last year. That is in H.R. 7979.

We will retain MESA, lock, stock, and barrel. I agree with all the reasons for doing that, and it is done in this bill. I also agree that State plans which are as good as or better than the Federal plans should be allowed to exist. That is denied under H.R. 4287. I know I am not alone in this strong feeling for State plans.

The general duty clause is in here. The requirement that a safe and healthful workplace be maintained as a general obligation is not even in H.R. 4287.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

(By unanimous consent, Mr. SARASIN was allowed to proceed for 30 additional seconds.)

Mr. SARASIN. Mr. Chairman, I take this additional few seconds only to urge support of H.R. 7979 again, because we are talking about a very, very important bottom line. That bottom line is the health and safety of the miners which, frankly, has been overlooked with the possible enactment of H.R. 4287 by its lack of the general duty clause and the other points I have mentioned, which are extremely important.

I urge support of my substitute, H.R. 7979.

Mr. LE FANTE. Mr. Chairman, I rise in opposition to the substitute amendment.

Mr. Chairman, my colleagues on the committee, I rise in opposition to the Sarasin substitutes. I think we need to address the penalties provisions of this legislation. The suggestion that penalties should be discretionary rather than mandatory as they are currently in the Coal Act and in H.R. 4287 would represent a retreat from our fundamental commitment to make mining as safe as humanly possible.

The bill follows the present Coal Act in requiring mandatory civil penalties where there has been a violation of the act or any standard, rule, order, or regulation issued under the act. Civil monetary penalties are essential as a part of a wider range of enforcement tools. Without them, there is only a limited incentive for compliance before inspection. The Supreme Court recently recognized this, in discussing the provisions of the Coal Act, when it held that—

> A major objective of Congress was prevention of accidents and disasters; the deterrence provided by monetary sanctions is essential to that objective.—(*National Independent Coal Operators Association* v. *Kleppe*, 423 U.S. 388, 401, January, 1976.)

Mandatory civil penalties remove any uncertainty in that if you violate the act, you will receive a civil penalty. Accompanying that certainty is the deterrence that is essential to assure compliance with standards. Mining is an area where even so-called minor violations of the act's provisions could result in death or serious physical injury. Given the Congress overriding objective of preventing accidents and disasters, there is no such thing as a nonserious violation. That is why civil penalties must be mandatory under this bill.

SERIOUS VERSUS NONSERIOUS

In promulgating the Coal Act of 1969 Congress recognized that even minor violations of health or safety standards can result in catastrophic accidents. In view of the serious stake our miners have in the safety of their mines, it is unreasonable to attempt to distinguish among the dangers and hazards that they face. How do you draw the line between a violation that should be penalized and one that should not? You have to resort to some sort of awkward legalistic hairsplitting about whether a violation is "serious" or "nonserious" or some such formula. Moreover, you multiply the number of people involved in the administration of the law who are trying to decide whether a violation could have killed a miner or only seriously maimed him. The arguments that making penalties discretionary will somehow simplify the law, or release personnel now involved with penalty setting functions for violations are misguided.

Violations of standards in the exceptionally hazardous working environments associated with mining should not be subject to complicated distinctions between what is serious and what is not serious between what is subject to a monetary penalty and what is not. Compliance with the law must be mandatory. The deterrence effect of a definite monetary penalty is obvious. In discussing the importance of the mandatory civil penalty structure of section 109 of the Coal Act, the Supreme Court noted the incentive effect of mandatory civil penalties:

> The importance of section 109 in the enforcement of the Act cannot be overstated. Section 109 provides a strong incentive for compliance with the mandatory health and safety standards. That the violations of the Act have been abated or miners withdrawn from the dangerous area before section 109 comes into effect is not dispositive; if a mine operator does not also face a monetary penalty for violations, he has little incentive to eliminate dangers until directed to do so by a mine inspector.—(*National Independent Coal Operators Associations* v. *Kleppe*, 423 U.S. 388, 401 (January, 1976))

Mr. Chairman, I can think of nothing that would so confuse the enforcement of this act as discretionary civil penalties in an industry that is so hazardous that even violations of housekeeping standards can kill miners.

I urge the rejection of this substitute.

Mr. SARASIN. Will the gentleman yield?

Mr. LE FANTE. I yield to the gentleman from Connecticut (Mr. SARASIN).

Mr. SARASIN. I thank the gentleman for yielding.

Mr. Chairman, I would really go back to the colloquy that the gentleman from Pennsylvania (Mr. GAYDOS) and I had here earlier when we talked about this very issue and the fact that Interior, through MESA, has published a report indicating mandatory penalties do not work; that there is no correlation between mandatory fines and health and safety. That ought to be something we are concerned about. In fact, metal and nonmetallic is doing better even under the present law, which is not as adequate as it should be, but they have discretionary penalties in nonserious violations. That is important.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. LE FANTE) has expired.

(On request of Mr. SARASIN and by unanimous consent, Mr. LE FANTE was allowed to proceed for 3 additional minutes.)

Mr. SARASIN. If the gentleman will yield further, I would simply go back to that point, in spite of what the Supreme Court said. They were not deciding this issue on the basis of investigation. They held as a matter of law that it is an incentive, but as a matter of fact it is not. I think that is what we ought to look at, that as a matter of fact you do not establish a correlation.

Are we going to allow such things as the horrendous situation in the application of the Coal Act, where an unsanitary toilet outside the mine caused the closure of the mine? Is that what we are looking for? Or are we looking for an incentive to try to solve the problem? It seems to me there has been criticism of OSHA as being a terrible law because of the nitpicking, arbitrary attitude of the inspectors.

Mr. GAYDOS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment in the nature of a substitute.

First, Mr. Chairman, let me respond to my good friend, the gentleman from Connecticut (Mr. SARASIN), and say again that our bill does not have the general duty clause.

The general duty clause is a catchall. We have been using every effort we can to provide specific standards so that if they violate standards they are fined. That is fair. That is just what we are talking about.

The general duty clause catches them for a violation of practically anything an inspector may consider a serious violation. So in responding to individuals who have been critical of standards and how they are met and enforced, we say specifically, "Forget about the general duty clause." That standard is now a positive standard. It is exacting and it is accurate. That is what we have been talking about, and I do not know why there has been so much to do about the general duty clause.

In reference to the gentleman from Arizona (Mr. UDALL) and what he said and the interpretation placed on that by my good friend, let me say this: I spoke personally to the gentleman from Arizona (Mr. UDALL) about this. He would insert his explanation in the RECORD, and he would be on the floor of the House now if he were not tied up somewhere else. He would explain to us that somebody is misinterpreting what he said.

When he said the chief sponsor and the chairman were dealing with the surface mine bill on this point—and he told me this specifically, and I have been authorized to quote him—that was not his intention. If anybody interpreted him when he made those remarks as substantiating or supporting the position of

the gentleman from Connecticut (Mr. SARASIN), that is completely erroneous.

Mr. Chairman, let us just take a look at the Sarasin substitute. I think I must point out that the Sarasin substitute was not the substitute my good friend, the gentleman from Connecticut, offered before the subcommittee when we marked the bill up and finally passed the bill out of the subcommittee, nor was his bill the same as the substitute that he offered before the full committee. He has been playing around with that bill a little bit; he has been adding some things to it.

In fact, the day we first went to the Committee on Rules, which was June 23, the gentleman from Connecticut (Mr. SARASIN) introduced his present substitute as H.R. 7979. In the meantime, what has he done to this bill?

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, obviously we are talking not about the introduction of the substitute but the date of the filing of the bill in the hopper here as a regular bill. Is that not correct?

Mr. GAYDOS. The gentleman is correct.

Mr. SARASIN. Mr. Chairman, I thank the gentleman.

Mr. GAYDOS. Mr. Chairman, the gentleman from Connecticut made some changes to it. It was a different bill than the one that was presented before the committee.

The three changes the gentleman placed in it are very revealing. The three changes are these: No. 1, it provides that the Secretary of Labor in this legislation is obliged in promulgating standards to follow the adjudicatory provisions of the Administrative Procedures Act. What that means in layman's language is that every time they make a standard or try to get a standard adopted, they are having all kinds of lawyers taking up time day after day and submitting all kinds of formal objections. Thus they delay the setting up of standards, just as standards have been delayed under the existing Metal and Nonmetal Act. They have been delayed as long as 2, 4, and 5 years.

That is what the adjudicatory process means. Under that process we depart from commonsense. Commonsense dictates this: Yes, we should give people—all kinds of people, operators, workers, and everybody interested, including public service groups—an opportunity to appear and to make their views known. But we should not clutter this up with some kind of formal proceedings whereby we destroy the actual standard-making process.

There is another little area in the bill where we are talking about making a provision for emergency temporary standards, but, on the other hand, the bill would prohibit the Secretary of Labor from imposing any civil penalties against the operator for violation of a temporary standard. Those two things are contradictory.

The one big thing in this addition involves preempting the Federal Government. What is included in this substitute is a provision that says that the Federal Government can be preempted in insuring the health and safety of miners in the metal and nonmetal mines of this Nation. We have certain States that have mine health and safety acts, States which have adopted plans that are acceptable to the Federal Government, and they do enforce the act in those States. They have enacted legislative acts for coal.

They do enforce them. They have personnel.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. GAYDOS) has expired.

(By unanimous consent, Mr. GAYDOS was allowed to proceed for 5 additional minutes.)

Mr. GAYDOS. To continue, Mr. Chairman, as a practical matter, what happens? These 12 States produce roughly 93 percent of all of the coal produced in the United States. As a practical matter, when these 12 States enforce their legislative enactments, they have inspectors who go into a mine. In fact, I just went to one out in Pennsylvania, and at this hearing we had the Federal people there; we had the State people there; and we had some of their department secretaries. They were there and they were making inquires. Therefore, the State law complements the Federal law.

H.R. 4287 provides funds for the States to do this. We encourage that the States enact legislation. We teach them how to do it. We provide funds to enable them to do it. We even provide training funds for them to help them set up educational programs, all of which is to help them in the enforcement of the health and safety acts.

We do this for them. We expect the States to support us and to inspect along with the Federal Government, but we do not allow the Federal Government to be preempted, as is provided in the substitute amendment, under which the State comes in, and if it is a weak State, that weak State has exclusive jurisdiction in enforcing their act providing health and safety for miners. The Federal Government is left out in the cold.

Mr. Chairman, that is exactly what they want. Presently we have the Metal and Nonmetal Act of 1966. We have presently six States that have taken advantage of that provision which allows States to do exactly that which we do not allow in our act. When we allow the States to do that, out of these six States, five States have records which are worse than we have under the Coal Acts.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. In a State such as North Carolina, which has a plan approved by the present Department of the Interior as being superior to the Federal act or legislation, what would happen under the terms of this bill to the State of North Carolina?

Mr. GAYDOS. Two things would happen. No. 1, North Carolina would now qualify for funding up to 80 percent of what it is costing them to continue on with the enforcement of that act. No. 2, with respect to all provisions which are superior in their act to the provisions of the Federal act, if adopted here, North Carolina would have exclusive jurisdiction over those provisions because its regulations are superior; and North Carolina would get Federal funding to continue. Furthermore the North Carolina legislative enactments would prevail because they would fill in that void that is there. Therefore, I think it is a good thing as far as North Carolina is concerned.

Mr. JONES of North Carolina. I thank the gentleman very much, Mr. Chairman.

Mr. GAYDOS. Mr. Chairman, I want to thank the gentleman for bringing up a very important point, which clearly shows how a State activity can supplement, can fortify, and can work along with what our concept is as far as Federal jurisdiction is concerned.

I think if for no other reason but that reason alone, the substitute should be soundly defeated.

I also want to point out, Mr. Chairman, that in this legislation we are talking about separation. There is no question, that the time has come to put all mining legislation in one department. We have to put it in the one department in which it belongs. We have to get rid of that Metal and Nonmetal Act. We have to have one act.

Mr. Chairman, we have done this in H.R. 4287, and we have a good act. We have an act which, if it is enacted—and I am sure it will be—is going to finally recognize that all miners, regardless of what they are mining are going to be protected.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman for yielding.

I strongly support his position. I strongly oppose the Sarasin substitute amendment.

We know what we are talking about here. Let us make this an accomplished fact. Let us strengthen metal mining protection.

Let us not dress up last year's Christmas trees with old, wornout ornaments, let us take a brandnew tree, let us make a brandnew program and give it the strength of the provisions of the Coal Safety Act that the gentleman has so well described, and move ahead and defeat this substitute amendment.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I was interested in hearing the comments made by the gentleman from Minnesota (Mr. OBERSTAR) about the Christmas tree, and so forth. But, may I point out that when the gentleman was in the well of the House last year, he was strongly planting that tree, and, oh, it was so good,

then, and, suddenly, it is not all that good today.

It was not a qualified endorsement, it was a good one.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. SARASIN and by unanimous consent, Mr. GAYDOS was allowed to proceed for 5 additional minutes.)

Mr. SARASIN. Mr. Chairman, will the gentleman yield further?

Mr. GAYDOS. I yield further to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I would like to refer back to the earlier comment of the gentleman about the terrible things that are in this bill. The adjudicatory procedure under the formal rulemaking process of H.R. 7979—yes, it is there, it is there, and I state that as a fact, it is there—to allow the mining community to come in and cross-examine witnesses rather than allow this arbitrary selection of standards without the opportunity of cross-examination to be sure that the law is a good law and not a bad one.

The gentleman will recall that I pointed out the incident where the miners had pointed out that under the Metallic and Nonmetallic Act, that does have formal rulemaking, that they were able to prevent a disastrous standard from going into effect because they had the ability to cross-examine the witnesses, and the administrative law judge was in a better position, then, to judge the facts. But that situation does not exist in the provisions in this bill.

Again, when we look at the decrease in the accident rate, when we look at the success of the metallic and nonmetallic situation today, in spite of its shortcomings, then I see no reason to destroy what has worked so well in these areas, and the emergency, temporary standards, we are talking about temporary standards providing for a situation that develops and it can only last for 9 months. And the biggest threat and the most effective threat to the metallic and nonmetallic mines today is closure, not the dollar amount of the fines.

I believe that what MESA has done in their studies of this is to put to bed the fact that there is a correlation between dollar fines and the health and safety of the miners.

Mr. GAYDOS. If closure is so important, if closure has been proven to be so effective, then why in your substitute do you only have two areas for closure, while in the bill we have before us we have at least five areas? If you are talking about closure being so magical and so all-important, then why have you only put in closure orders covering two areas; why did you not put in more?

Mr. SARASIN. I am sure the gentleman is aware that there are three.

Mr. GAYDOS. We have five.

Mr. SARASIN. What is so magic about five or six?

Mr. GAYDOS. I would not want to put three more in if they are identical. I submit that they are separate and apart, but fit together.

Mr. Chairman, let me respond to argument that took place last year when we passed H.R. 1355, which was handled by Dominick Daniels. We passed it. Most of us supported it. But it was passed under a threat of veto. Something was better than nothing at that time. It was all we could get then. And personally I had some reservations. I also believe that many of the Members at that time knew that we wanted to do it at that time, to bring the two together so as to amalgamate the laws into one law.

Mr. SARASIN. If the gentleman will yield further, let me say that I have reread the hearings, the arguments and the debate in the CONGRESSIONAL RECORD of last year, and I did not see one qualifying statement by the gentleman now in the well, or anyone else, including myself, who supported that bill. They supported it enthusiastically. They said many times, especially in answer to questions by our former colleague, the gentleman from West Virginia, Mr. Hechler, that, oh, yes, we will maintain the separation, because it was so important and now here we are, throwing it out the window.

Mr. GAYDOS. Mr. Chairman, I would like to conclude my remarks by saying that I think that it is commonsense, that it is a natural conclusion of analytical people to have the two put together. If we want fairness and if we want quality for all, it should emanate from one act. You cannot have this act split up, because when we have two jurisdictions split, two separate acts, then it is obvious what has happened with the metallic and nonmetallic mines, where standards have difficulty in being adopted, where they are not as enforceable.

Why would anybody refuse to defend the proposition that when a man is mining coal in a coal mine that there are penalties, there are standards that are mandatory, there are fines, while over here, on the other hand, if a man is mining asbestos then he does not have that protection and those penalties?

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Is not the answer simple? Just change the law.

Mr. GAYDOS. That is what we are doing.

Mr. KAZEN. Put the penalties in there, but keep them where they are.

Mr. GAYDOS. We are changing the law.

Mr. KAZEN. There are two different types of mining. There are two different jurisdictions, and do not put them together. Just change the law. Make it fair.

Mr. GAYDOS. There are two different types of mining. There are around 650 different types of mining presently covered in the Metal and Nonmetallic Act.

Mr. Chairman, I yield back the remainder of my time.

Mr. Chairman, in continuation of the colloquy that got cut short in our efforts during general debate, I would continue to share my concerns with the Members. Safety is certainly a laudable objective. I doubt within recent history on this House floor that any Member has taken to the well to advocate unsafety. But this issue we are looking at is what legislative vehicle should we put on track in order to arrive at the destination of the laudable objective of safety. In one instance we have allowed the Department of the Interior through its subagency, MESA, to serve as the implementing entity for this responsibility. The very dedicated Committee on Education and Labor has come forward and suggested no, it should be all under the Department of Labor.

With regard to proposition No. 1, I have been continually troubled, as a member of the Committee on Interior and Insular Affairs, and as a member who is very much concerned with issues related to nonfuel minerals, with whether or not the Department of the Interior was in fact the entity that should be fulfilling this responsibility. I have been troubled by the question of whether or not this responsibility is a logical extension of the general statutory mandate creating the Department of the Interior. I am not sure it is.

Conversely, I have experienced some very distressed constituents voicing their objections to the fairness and efficiencies found within OSHA. Some have suggested that they would have been better off being accused of homicide, criminal homicide, than they would have been being accused of an infraction of an OSHA rule or regulation.

I would assume that each member of the Labor Committee would concede that there have been problems of administrative excess and abuse. My reservations and concerns enunciate themselves in this context. Do we solve the need for safety in our mines by compounding the problems that have inhered in the general administration at the street and business level of the OSHA? Are we creating a baby OSHA? Are we creating and compounding the problems that have occurred because of the judge-jury-executioner general authority that has been implanted within OSHA by bringing that judge-jury-executioner authority and putting it in our mines?

Mr. Chairman, I think that there has been a measured improvement in some of the administrative activities OSHA has taken over the last year or year and a half. But I cannot concur with or subscribe to the general proposition so well enunciated by the gentleman who just preceded me in the well, that all these apples and all these oranges are of precisely the same definition and dimension and we can throw them all into the same basket and come out with exactly the same solution.

That strikes me as inherently illogical in implementation because there is a world of difference between a copper mine and a coal mine and between a sand and gravel pit and a coal mining strip.

I think if we fail at the legislative beginning we could in a very real sense

compound the negatives that have characterized some aspects of the operation of OSHA. In doing so we would resolve nothing in terms of the laudable objectives of mine safety. We would merely compound, confuse and conflict with the inevitable administrative potential for bureaucratic excess that is inherent in any governmental department action or activity.

I know that certainly is not the intent of the gentleman.

The CHAIRMAN. The time of the gentleman from Nevada has expired.

(By unanimous consent, Mr. SANTINI was allowed to proceed for 3 additional minutes.)

Mr. SANTINI. Mr. Chairman, I yield to the gentleman to afford him an opportunity to respond to my observations.

Mr. GAYDOS. Mr. Chairman, in response to the gentleman from Nevada, I know he is sincere in raising the point. I just want to point out we are talking about the enforcement of standards, and we are providing that standards presently in existence in the metal and nonmetallic field, will be maintained.

Nowhere in the present language of this legislation or in any projected interpretations would we have any difficulty in that area of standards, because the standards are vertical. There will be standards for salt mines, there will be standards for the coal industry, there will be standards for the gravel mines, and there will be standards for other mines. That is how it works. I do want to point that out to the gentleman.

Mr. SANTINI. Do we throw the baby out with the bath with this bill?

Mr. GAYDOS. No, we do not.

Mr. SANTINI. Do we do that in the sense that we paint too broadly with the legislative brush? Could we not reach the inequities we have clearly suggested exist without transferring the responsibility altogether.

Mr. GAYDOS. The proof of the pudding is that we are doing just that. We have standards that provide for coal mining and for silver mining and for other mining. Those standards are there. I can assure the gentleman in all good conscience that will not be a problem, real or imagined.

Mr. SANTINI. If that problem develops, will the gentleman assist me in explaining to my constituents?

Mr. GAYDOS. Unqualifiedly yes.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, as far as the transfer is concerned, in my bill H.R. 7979 and in the gentleman's bill, H.R. 4287, they are identical. They take over the regulations, lock, stock, and barrel, but separately.

But as to new standards, when we talk about lumping hard-rock miners with coal miners we have a mess and a problem that would not exist if H.R. 7979 were adopted as a substitute.

Mr. GAYDOS. If the gentleman will yield further, I have complete disagreement with that observation. It does not create that problem at all because the language states they shall be separate.

In fact, the gentleman from Minnesota (Mr. QUIE), by the gentleman's authority on that side, in the full committee made us put in that amendment and we accepted it, that there will be separate standards.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I yield to the gentleman from Texas.

Mr. Chairman, does the gentleman mean they will be different and separate standards?

Mr. GAYDOS. Mr. Chairman, if the gentleman will yield, yes, as they exist, and all future standards. The Quie amendment says that the promulgation of all future standards shall be separate. It is in the bill.

Mr. KAZEN. I would hope that they would be different. That is what concerned me.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I listened with great interest to my colleague, the gentleman from Pennsylvania, the chairman of the subcommittee (Mr. GAYDOS). When the gentleman was speaking from the well a few minutes ago, the gentleman argued for equal treatment, that we should put the metalic and nonmetallic into the same act as the coal miners, because it is only fair to treat them equally.

I hope the gentleman will remember that and act consistent with that argument next week when we have the black lung bill on the floor of the House, as I am advised we will, because I think that is a good principle for treating those who are disabled as a result of having pneumoconiosis from working in the coal mines. I think they should be treated equally, given the same amount of compensation, the same chance to get compensation as workers who are disabled through other industrial diseases in other industries.

Now, I do know that the gentleman from Pennsylvania has supported the black lung compensation law that is on the books today, as I did initially, that was in the Coal Mining Health and Safety Act of 1969. I was the ranking Republican on the subcommittee that wrote that bill, so I am somewhat familiar with both the safety and health and the compensation provisions of that legislation. It was argued at that time that the Federal program was necessary to take care of old claims, but in the future everybody would be treated alike under workers compensation. It is time that that promise was fulfilled and next week I am going to offer an amendment to the black lung bill in the nature of a substitute that will put the black lung sufferers in the same position as others who are entitled to compensation for industrial disease. I hope the gentleman from Pennsylvania will be on the floor in the well arguing for equal treatment next week, as the gentleman was today. I rather doubt that the gentleman will be, of course, because what he will be trying to do next week is give black lung compensation to people who are not ill. They want to give black lung compensation to all ex-coal miners, calling it compensation, but it will, in reality, be a Federal pension for this particular industry and I hope we do not do that.

Now, as far as the substitute is concerned, I rise in support of the substitute amendment offered by the gentleman from Connecticut. I see no reason why we should treat metallic and nonmetallic the same as coal. I think the gentleman from Connecticut has pointed out we have gassy mines. We have an altogether different situation in the coal mine areas.

I think the gentleman is quite consistent in offering this substitute amendment and those who would oppose it today are being quite inconsistent, because as the gentleman pointed out repeatedly, the same bill that they championed last year was a good idea then and it is a good idea today. I did not champion it then. I did not think it was a good idea to put enforcement over in the Department of Labor. I think it is being done for the sake of satisfying organized labor, because they think the Department of Labor is their own captive Department in the hierarchy of Government. The opposition seems to have dissipated to that transfer. Let us go ahead and make that transfer, but let us not, as the gentleman who preceded me in the well said, "Throw the baby out with the bathwater." Let us keep the separate acts, and recognize that these are totally different types of endeavors, mining fuel coal in highly dangerous combustible situations and mining other metals and nonmetals that are of a totally different nature.

So I again repeat, I hope the gentleman from Pennsylvania (Mr. GAYDOS) will show us the gentleman's consistency next week by taking the well in support of my substitute bill, as I am supporting the substitute amendment offered by the gentleman from Connecticut, and I hope it will be adopted.

Mr. CORNELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it seems obvious from the debate today that some of our colleagues are concerned about the question of whether the same standards would be applicable for all types of mining. This is certainly not true under the provisions of H.R. 4287.

I would like to refer my colleagues to page 10 of the committee report, at the top of that page, which states:

> The new act distinguishes between statutory provisions which empower the Labor Department with enforcement authority to protect all miners, and statutory standards, which the Congress enacted in 1969 to correct specific workplace conditions in coal mines. It is only the statutory provisions of the Coal Act which are made applicable to all mines, and not the statutory standards. In addition, promulgated standards, which evolved through the rule-making process of the Coal Act and the Metal and Non-metallic Act, and which apply to specific workplace conditions, respectively, in coal and noncoal mines are not made universally applicable to all mines. Promulgated standards will retain the same scope of coverage as they did before the passage of this bill.

That quotation makes it very clear that there will be different standards for different types of mines, just as they exist today.

AMENDMENT COVERED BY MR. GUDGER TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. SARASIN

Mr. GUDGER. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. GUDGER to the amendment in the nature of a substitute offered by Mr. Sarasin: Page 6, line 8, strike out the word "Labor" and insert the word "Interior".

Page 31, lines 24 and 25, delete the words "And the Secretary of Interior".

Page 59, lines 23 and 24, delete the words "And the Secretary of Interior".

Page 60, lines 10, 11, and 25, delete the words "and the Secretary of Interior".

Page 61, line 15, delete the words "the Secretary of Interior".

Page 65, line 18, delete the words "the Secretary of Interior".

Page 70, line 4, delete the words "the Secretary of Interior".

Page 80, line 7, delete the word "Labor" and insert the word "Interior".

Page 81, line 3, delete the words "Secretary of Labor".

Mr. GUDGER. Mr. Chairman, I am very impressed with the arguments advanced by the gentleman from Connecticut, and by his suggesting that there is a great deal of disharmony between the administration of mine safety and health standards in three different areas which have such distinct characteristics. Coal mining, to me, is vastly different from the mining in my part of western North Carolina, where we have a great deal of feldspar, mica and other surface extraction. Certainly I see equally singular disparities between coal mining and metal mining at depth.

I have studied the dissenting opinion of Congressman SARASIN. I think he has well developed those points. However, in his argument, he has pointed out that the Department of the Interior has done reasonably well, and MESA has served a useful purpose in the administration of those responsibilities which have been allocated to it. As a matter of fact, on page 75 of the report, commenting from his remarks, he states:

In the past, there have been compelling arguments for opposing transfer of MESA from the Department of Interior to the Department of Labor, and there have been substantial arguments supporting the case for transfer. The transfer, in this Congress, is supported by the present administration, aware of the issues that have been raised in the past.

In not opposing the transfer, since some of us have opposed transfer in the past, we wish to make it clear that we do not cast any aspersions upon the Department of Interior or MESA. The statistics supplied show that fatalities and disabling injuries in mines have shown an encouraging downward trend. We hope that trend will continue at an accelerating rate, no matter which Department enforcement is located.

My point is this: Where a department has discharged its responsibilities well; where it has developed new processes and new methods of safety and health direction; where it is not shown to have failed in the discharge of its duties in administering those new standards, I see little occasion for justifying a transfer of the functions of that department into another department.

Therefore, I feel that the gentleman's substitute is validated, in that he submits that we should address this year what was addressed last year, that is, changes in existing law, not the elimination of two substantial propositions in our law. But I see no justification in eliminating the responsibility of Interior when it has been doing a good job. Therefore, I feel that we would be remiss if we did not allow this body to pass upon the proposition of retaining in Interior the very authority which it has exercised in the past and the authority under which the Sarasin amendment, in effect, finds its basis, because it has been the Interior Department which has developed most of these changes of the law which he is advocating in his substitute.

I, therefore, generally support the substitute, but I do so subject to the amendment which I have set forth.

Mr. GAYDOS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, in response to the gentleman's amendment, first, let me say that I assume that the amendment provides for negating the transfer over from the Department of the Interior to the Department of Labor. And I say that assumptively because I do not have a copy of the amendment. So with that assumption, I will proceed to make my argument.

Am I correct, is that what the gentleman's amendment does?

Mr. GUDGER. If the gentleman will yield, that is correct. It deletes the word "Labor" and substitutes the word "Interior," and deletes the Department of the Interior in those instances where that Department has concurrent responsibility with the Department of Labor. Where "Secretary" is used in the act, it refers to the Secretary of the Interior under my amendment. It refers to the Secretary of Labor under the Sarasin substitute.

Mr. GAYDOS. Mr. Chairman, there are several reasons why I oppose such a transfer. The primary reason is that it is a conflict of mission. The Interior Department, which is now responsible for MESA, is hampered by the conflicting mission of working with mine operators to enhance production of the natural resources of this Nation. Everybody knows the accident rate goes up, particularly since the President now has called for increased production of things like coal and other energy-producing materials, and this Department stands in a conflicting position. It has always been the conclusion held by those people who know the inner workings of the Department.

Secondly, we have maintained MESA's enforcement function which is not inextricably linked with Interior's mining and research function. Therefore, we do allow and provide for safety research in MESA. They have the experience. They will be doing research. That will be made avaailable to the Secretary of Labor, and the ultimate adoption of and promulgation and enforcement of standards. So the Department of Interior's expertise is not overlooked. It is going to be utilized in the future. And, in addition, all of the personnel are going to be transferred from the Department of the Interior over to the Department of Labor in bulk. We cannot change that. So we are not destroying anything. We are going to move it over in an orderly fashion.

If the legislation is supported and ultimately passes, we are going to have enforcement of the mining rights where it should be, in the Department of Labor. Secretary Andrus has testified before the committee that he is in support of this transfer. Secretary Marshall is in support of the transfer. The President is in support of the transfer. All knowing labor union leaders are in support of the transfer. And, yes, some of the employers and people in the industry are in support of the transfer, and the substitute is in support of the transfer.

Mr. HANSEN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I think this is a very, very serious amendment in the sense that we are talking about who can best look after the safety of those who are gainfully occupied in the mines and the mining processes of the industry of the United States.

I think it is a very glib thing we are doing when we talk about transferring MESA into an area where OSHA has gained such disrepute.

The Occupational Safety and Health Administration is something about which I have for a long time made a great deal of study, and I can tell the Members that OSHA's track record is so lousy that if we really want to have problems in the mine inspection area, we can just transfer this authority over to the Department of Labor with OSHA.

We talk about conflicts of interest, and we really have conflict of interest when we talk about bringing MESA over into an area with OSHA where we have all the types of known harassments that could happen because of the fact that anybody can pull the plug on the mine owners or anyone else as the result of irresponsible complaints. That is what they are doing under OSHA in too many instances.

I understand we are talking about results, and I know that the gentleman from Kentucky (Mr. PERKINS) has been very concerned about problems in mine safety, but I can say this: that when we look at the kepone record of OSHA and the record it has had in many other respects, any inadequacy of MESA will not be solved in the Department of Labor. If we look at the safety record of industry in the past 30 or 40 years, we find that before OSHA we had good progress, and since OSHA we have had virtually no progress in the general area of safety as far as American industry is concerned. At least if there is progress, it is not discernible.

The point is that we have wastefully spent a lot of money. I think there are a number of areas where we could have worked out something for the increased safety of the workingman, but OSHA has not worked effectively for the working-

man's safety. In fact we seem to be losing ground because many safety programs have sat back and said, "Well, OSHA will take care of these things." But OSHA has not done it.

The way this OSHA complex has operated reminds me of a scene in a ballpark where two or three fielders are running after a high fly ball and they all stop and the ball falls between them. Other safety programs have waited for OSHA and OSHA dropped the ball—kepone being the prime example.

Let me say this also. OSHA is in deep trouble. It is in trouble in the courts resulting from the way it has been operating. They have lost court case after court case, both Federal and State.

In fact, they have not won a case on the fourth amendment basis involving inspections without warrant in the last 18 months. One of these cases is before the Supreme Court now for final decision which is expected next spring.

To bring MESA into OSHA under the Department of Labor at a time when OSHA is in very questionable circumstances seems to me to be really jeopardizing the well-being of the MESA program. More than this, let me say that the Carter administration itself is actually circulating a memo that is supposed to have gone to the President from high levels of the administration, and in that they advocate backing off from OSHA and giving more enhanced responsibilities to the workmen's compensation law and a better system of fines against those who have bad accident records.

So, Mr. Chairman, I would say that this is absolutely the wrong time for a transfer of MESA, and it is the wrong thing to be doing. I support the amendment fully.

I might bring to the attention of the Members the fact that just this week the U.S. District Court for the Southern District of California ruled that the OSHA provisions providing for warrantless inspections violate the fourth amendment. This is the second Federal case holding section 8(a), which is the inspection provision of OSHA, unconstitutional as written, and not interpreting it to authorize a warrant procedure.

So I would say that OSHA is in so much trouble that we should not jeopardize the MESA program by taking this transfer action. OSHA will not be clarified until the Supreme Court finally decides the case which they are scheduled to hear this fall. No decision is expected until next year.

Mr. Chairman, I think these facts make it absolutely premature to put MESA in Labor with OSHA particularly at this time.

Mr. PERKINS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment and in opposition to the amendment in the nature of a substitute.

Mr. Chairman, first let me state that I am not up here defending OSHA. In many respects OSHA has not done a good job, especially in some instances, involving nondangerous situations.

But in instances, such as the steel mills, where OSHA has conducted inspections, and in other more dangerous situations, OSHA has done a good job. However, there are so many little things that the people are complaining about that we forget about all the good they have done. This has come about because of OSHA's messing around with so many little operations where its enthusiasm has overreached its judgment.

If we recall something about the history of mine safety, we know that in 1952 for the first time we gave the Secretary of the Interior the police power to close down mine operations that were found to be unsafe. That was exercised for the first time after the Centralia disaster, after more than 119 people lost their lives.

We authorized Interior to close title II Mines and withdraw workers if conditions amounted to imminent danger of accidents.

They did just that throughout eastern Kentucky. I can name dozens and dozens of mines that MESA closed down pursuant to that 1952 act in eastern Kentucky, West Virginia, and south West Virginia. We further strengthened the imminent danger section in the 1966 amendments.

Then we came to the Farmington disaster of 1968, in which some 78 people lost their lives. We tried to write a strong act, hoping that Interior would keep up with the most dangerous mines in the country, especially the most gassy mines, in which explosions were likely to take place. Legislative history clearly shows our intention that they would not permit those mines to operate until those dangerous conditions were corrected.

We gave Interior that authority. It did not use it.

There were other cases. After MESA was established in 1973 there was the case of the Scotia mine disaster in which 26 lives were lost. That was in March, a year ago. That was wholly unnecessary and inexcusable.

However, Mr. Chairman, the problem here is that MESA commenced to hide behind the claim that it did not have authority, when it did have authority. The top echelons of Interior just did not want to use it. What was wrong with the situation? They were not looking after the most dangerous mine in eastern Kentucky. It was not being properly inspected. MESA did not keep up with the rigorous inspection that one of the most dangerous mines in the Nation should have had. If those inspections had been sufficiently stringent, Scotia mine would have been shut down.

Mr. Chairman, if a condition like that exists, we should transfer the enforcement agency to a department that has the welfare of the working people in mind. We have no other department other than the Department of Labor. MESA is responsible for this transfer. It is because of its own dilatoriness insofar as inspections are concerned.

We cannot afford to go any further with an agency that has not had sufficient departmental backing to enforce the stringent safety requirements that Congress voted. MESA must be transferred to the Labor Department.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. PERKINS) has expired.

(By unanimous consent, Mr. PERKINS was allowed to proceed for 2 additional minutes.)

Mr. PERKINS. We can no longer accept the excuse that they do not have authority in face of the fact that hundreds of mines were closed down when we first gave Interior police power in 1952, and broadened it in 1966. Apparently they thought that people had forgotten all about what had taken place over a period of years, and they never could give us the inspection service that was needed. The Interior Department has substantially more authority today than it had in the early 1950, when it was closing down dangerous mines routinely.

Mr. Chairman, this enforcement agency needs to be transferred to the Department of Labor. Transfer MESA to save human lives.

I am hopeful, Mr. Chairman, that the amendment to the substitute amendment will be voted down, and that, likewise, the substitute amendment will be voted down.

Mr. GAYDOS. Mr. Chairman, I rise in opposition to the amendment.

I have only two very fast observations. No. 1, the bill provides that MESA will not be merged with OSHA. That is in response to the question of the gentleman who raises that problem. The bill specifically sets aside a separate budget for OSHA and MESA and for separate Assistant Secretaries for OSHA and MESA. I conclude by suggesting to the gentleman that he need have no fears that that is going to occur.

Mr. GUDGER. Mr. Chairman, I wonder if the gentleman from Pennsylvania would yield for a question.

Mr. GAYDOS. I yield for one question, and then I will yield back the remainder of my time.

Mr. GUDGER. I thank the gentleman for yielding.

The question is this: Is it not true that when the Secretary of the Interior spoke not in opposition to the transfer, did he not say that he was personally opposed to the transfer but would not take a departmental position against it?

Mr. GAYDOS. He did not say that. It is obvious he would not say that because the Secretary did have a meeting with the President of the United States and other Cabinet members. This was discussed, but the Secretary absolutely did not state that before the committee. I think I am accurate, and I think I have other members of the committee here who will so verify.

Mr. MILLER of California. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from California.

Mr. MILLER of California. I thank the gentleman for yielding.

I think the statement by the Secretary was that it was his personal position that

he did not favor the transfer from the Department of the Interior. He felt that the Department of the Interior had done a very good job of enforcement, but the position of the administration was to make the transfer, and he was in support of that as a member of the administration, although his personal view was something other than that.

Mr. GAYDOS. I could understand the man's personal view. He has the Department. He is a new Secretary. He would like to have everything under it. He wants a bigger budget. Sure, that is a natural conclusion, and I would do the same thing. But the fact of the matter is the administration has analyzed this. They have taken a position. The President has spoken, and the Secretary has spoken as the Secretary and has taken a formal position on the record. The formal position is that he favors the transfer.

Mr. HANSEN. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Idaho.

Mr. HANSEN. I thank the gentleman for yielding.

I am perfectly aware that there is no merging of the two in the Department of Education and Labor but that they are very close. But the point I want to make is that the gentleman referred to, the Secretary of the Interior, is from my State of Idaho. There are big mines there, and we have had problems, and I think that he speaks more from a position of authority than from a position of empire building. I would like that clear for the record.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. GUDGER) to the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. SARASIN).

The question was taken; and on a division (demanded by Mr. GUDGER) there were—ayes 10, noes 19.

Mr. HANSEN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Idaho (Mr. HANSEN) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 112, noes 227 answered "present" 1, not voting 93, as follows:

Mr. HUBBARD and Mr. LONG of Maryland changed their vote from "aye" to "no."

Mr. BROOMFIELD changed his vote from "no" to "aye."

So the amendment to the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

Mr. BUCHANAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment in the nature of a substitute.

Mr. Chairman, when we voted in the subcommittee I followed the leadership of my leader on the Republican side of our subcommittee and supported his substitute. At this time I rise, however, in opposition to that substitute for several reasons, but I will discuss one that I believe to be important.

I call the attention of the committee to page of our committee report in which we point out that while much attention is quite rightly focused on the harsh safety statistics in mining, little attention has been directed to the dangerous health conditions existing in many noncoal mines.

Mr. Chairman, I do invite the attention of the Members to this, because I

think this to be an important subject. That is what are we going to do to protect miners and those who work in mines from the health hazards that are part of their jobs in many cases. NIOSH testified:

Metal miners extract about 50 commodities including copper, mercury, gold, silver, lead, zinc, uranium, and asbestos. These miners are exposed to perhaps an additional 50 potentially toxic substances and harmful physical agents during mining processes. Adequate information does not exist on the levels at which most of these substances are present in mines. As a group, workers in metal mines and mills are also exposed to an even wider range of pneumoconioses-producing dusts than are coal miners. They are also exposed to a number of carcinogens, including asbestos, arsenic, uranium and beryllium.

The point is that the committee accepted an amendment which I offered when this matter was before the full committee which did direct that the Secretary of Health, Education, and Welfare, as soon as possible after the date of the enactment of this bill, but in no event later than 3 years thereafter, and on a continuing basis thereafter, shall, for each toxic material or harmful physical agent which is used or found in the mines, determine whether such material or agent is potentially toxic at the concentrations in which they are used or found in the mines, and to submit such determination to the Secretary of Labor, together with all pertinent criteria, and a proposed standard.

What the committee bill does is direct that research be immediately made and such standards be prepared to protect many thousands of miners from many dangers and health hazards in terms of exposure to toxic or carcinogenic substances about which not enough is known by our Government to presently enforce. This is contained in the committee bill.

Indeed, the Metal and Nonmetallic Mining Act does not even include the word "health" in its title.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Connecticut.

Mr. SARASIN. I certainly appreciate the gentleman's yielding and would thank him for offering the amendment in the full committee which took care of this very, very important aspect dealing with toxic material. But I would refer the gentleman to page 17 of H.R. 7979, section 7, which has exactly the same language which he offered in committee as an amendment to H.R. 4287. So the concern of the gentleman, which is a very good concern—and it was an excellent amendment—is already addressed in H.R. 7979. It is not left out, and it was not overlooked in my substitute.

Mr. BUCHANAN. I thank the gentleman for his answer.

There would, however, be a substantial difference in enforcement and implementation under the circumstances created by the committee bill. Procedurally, the differences could be important toward prompt attention to this vital problem. Also, in the committee bill, we find not only protection for health but we find a needed addition of protection for safety as well. While there has been debate on the statistics, I am convinced from the testimony of MESA and other witnesses that if we want to do that which is necessary to protect the health and safety of miners, then it is clear the thing to do is to adopt this committee position.

May I say the question has been raised as to whether differing kinds of mines will receive unreasonable restrictions or actions from MESA because of the differences between coal and metal mines.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. SARASIN, and by unanimous consent, Mr. BUCHANAN was allowed to proceed for 3 additional minutes.)

Mr. BUCHANAN. I would say that MESA has testified, and I am convinced, that they will deal appropriately with this difference in underground and surface operations and the distinctions between coal and other mines. I believe we ought to defeat this substitute and stick with the committee bill.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Connecticut.

Mr. SARASIN. I thank the gentleman for yielding.

I would point out to the gentleman, my colleague from Alabama, that MESA never testified on this bill, the committee bill. No one testified on the committee bill. We never held hearings on the committee bill. It was cut and pasted and put together an hour before the subcommittee met. We held hearings on the bill that would revise Coal and Metal and Nonmetallic and combine them. We never held hearings on anything that simply takes the Coal Act and dumps the noncoal people into it. That is the reason for the substitute which I offered, which has had hearings held on it, and witnesses have testified on my substitute.

Mr. BUCHANAN. As my friend is aware, however, they have testified on the substance and the content of this bill.

I urge defeat of this amendment.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to address a question to my colleague, the gentleman from Connecticut, who I know is an active member of this committee.

Let us review again. The gentleman means the bill that is before this Congress was tacked together in about an hour's time?

Mr. SARASIN. Mr. Chairman, if the gentleman will yield, the gentleman is absolutely correct.

Mr. ROUSSELOT. So this bill is not much different from the bill we had yesterday, the so-called consumer cooperative bank bill, which was tacked together in our committee in about a half hour. This seems to be a new practice, to rapidly tack bills together in committee and bring them to the floor without much understanding of what the provisions really are.

Mr. SARASIN. I cannot compare the two bills, but I would agree with the characterization of H.R. 4287. It was cut and pasted together and there was never a hearing on it. We keep talking about the Scotia mine and the tragedy. This bill does not touch the coal mine safety at all except to dump the coal miners and all others together.

Mr. ROUSSELOT. No wonder people are losing confidence in the Congress when we legislate in this way.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Connecticut (Mr. SARASIN).

The question was taken; and on a division (demanded by Mr. GAYDOS) there were—ayes 47, noes 47.

RECORDED VOTE

Mr. SARASIN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 151, noes 188, answered "present" 1, not voting 93, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Burke of Massachusetts against.

Mr. Jenkins for, with Mr. Addabbo against.

Mr. Young of Missouri for, with Mr. Zeferetti against.

Mr. Cunningham for, with Mr. Cleveland against.

Mr. Dornan for, with Mr. Tucker against.

Mr. Frenzel for, with Mr. Horton against.

Mr. Frey for, with Mr. Brademas against.

Mr. Goldwater for, with Mr. Ford of Michigan against.

Mr. Hyde for, with Mr. McEwen against.

Mr. Leach for, with Mr. Cotter against.

Mr. Lott for, with Mr. Mitchell of New York against.

Mr. Skubitz for, with Ms. Chisholm against.

Mr. Symms for, with Mr. Snyder against.

Mr. Wiggins for, with Mr. Gammage against.

Mr. Winn for, with Mr. Shipley against.

Mr. DERRICK changed his vote from "no" to "aye."

Mr. LLOYD of California changed his vote from "aye" to "no."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. MICHAEL O. MYERS

Mr. MICHAEL O. MYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MICHAEL O. MYERS: Page 87, immediately after line 22, insert the following:

"(3) Section 503(h) of such Act is amended by deleting '$5,000,000' and by inserting in lieu thereof, '$10,000,000', and by inserting before the final period the following: '*Provided*, That no less than one-half of such sums shall be allocated to coal producing States'."

Mr. MICHAEL O. MYERS. Mr. Chairman, section 16 of the Federal Metal and Nonmetallic Mine Safety Act, entitled "State Plans," provides that States may develop and implement plans setting forth mine safety and health standards. Such State plans, if approved by the Secretary of the Interior, would govern in lieu of federally approved and enforced safety and health standards. Currently, six States have approved plans in place, and these States bear the full financial burden of administrative and enforcement costs associated with their plans.

Section 503 of the Coal Act, entitled "Assistance to States," with the passage of H.R. 4287 will apply to coal, metal, and nonmetallic mining States. This section provides for grants to States which wish to develop and implement mine health and safety standards concurrently with Federal standards. Such States having safety and health standards approved by the Secretary of the Interior are eligible for matching-funds grants of up to 80 percent of funds they expend in carrying out such a program. There is $5 million appropriated for each fiscal year to carry out the provisions of section 503.

With the inclusion of metal/nonmetal mining States under the State assistance provisions of the Coal Act, the number of States which could become eligible for such grants is thereby increased. It is obvious that additional funding will be required.

This amendment stipulates, however, that of the increased appropriation of $10 million, half of that amount must be allocated to coal-producing States which wish to take advantage of these provisions.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. MICHAEL O. MYERS. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Chairman, I wish to commend the gentleman for his perceptiveness. The amendment he has offered is a good amendment, as far as we are concerned on this side. The committee finds the amendment acceptable.

It is my understanding that the minority also finds it acceptable.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. MICHAEL O. MYERS. I will be glad to yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I want to be sure that I understand the gentleman's amendment.

As I understand it, under the Coal Act now $5 million is already available for this purpose, and we are doubling that amount to $10 million because the Coal Act now has new responsibilities for metal and nonmetal mining?

Mr. MICHAEL O. MYERS. The gentleman is correct.

Mr. SARASIN. And the gentleman is saying that that $5 million will remain protected for the coal-producing States?

Mr. MICHAEL O. MYERS. Yes, that is right.

Mr. SARASIN. My question is this: What happens to the metal and nonmetal miners in those coal-producing States? Are they also going to share in that $5 million the gentleman is grandfathering in?

Mr. MICHAEL O. MYERS. I understand they would. It is my understanding they would be able to apply for that, and they would set up two separate procedures for enforcement.

Mr. SARASIN. Mr. Chairman, if the gentleman will yield further, may I ask this question: Would there be the possibility of having additional funds out of that remaining $5 million flowing into those coal-producing States for the purpose of taking care of metal and nonmetal miners?

Mr. MICHAEL O. MYERS. Yes, I would say to the gentleman.

Mr. SARASIN. Mr. Chairman, I thank the gentleman.

I agree with the majority with respect to the gentleman's amendment. I have no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. MICHAEL O. MYERS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MURTHA

Mr. MURTHA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURTHA: Page 87, immediately below line 10, insert the following:

(4) Section 501(e) of such Act is amended by inserting immediately before the period at the end of the first sentence thereof the following: "ending prior to October 1, 1977, and $60,000,000 for the fiscal year ending September 30, 1978, and for each succeeding fiscal year thereafter".

Mr. MURTHA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MURTHA. Mr. Chairman, I am offering an amendment to raise the authorization ceiling for coal mine health and safety research from $30 million to $60 million under the Bureau of Mines.

In my work on the Interior Subcommittee of the Appropriations Committee, I have reviewed in careful detail the work being done by the Bureau of Mines, MESA, ERDA, and other agencies with roles in stimulating coal production and use. I believe we have a great deal to accomplish in technological improvements and mining development and training if we hope to reach President Carter's coal production goals for the next decade.

I asked the Bureau of Mines for a list of some of the work they would be able to accomplish with the proposed increase in funds. Here are just a few of the more significant projects from a list of 22 they indicate need research, but are impossible within present funding levels:

Determining the accuracy and reliability of present dust measurements in the mines;

Developing a reliable rotary water seal for ripper-type continuous miners which would produce about a 25 percent dust reduction compared to conventional water spray systems;

Demonstrating safety techniques to protect against coal dust explosions;

Developing innovative rescue team equipment;

Creating new roof support evaluation methods;

Improving design for noise control of major types of underground electric face equipment;

Completing new work in toxic product criteria for explosives; and

Developing controlled surface blasting techniques for improved highwall stability.

Projections indicate the Nation will need 200,000 new miners by 1985 to meet the President's coal production goals. We are not going to attract young men into the mines unless safety is improved, and unless we give them the technological means to do the quickest, most productive, safest job. The work these funds can produce at the Bureau of Mines can be extremely significant in taking steps to reach production goals.

Economically, I would like to add that the present $30 million authorization ceiling has effectively been reduced by inflation to purchasing power of $18 million. Certainly our efforts to increase coal production in the United States justifies this funding.

I believe this is a very important amendment which will significantly help the Nation's coal efforts.

Mr. GAYDOS. Mr. Chairman, I rise in support of the amendment.

The committee has analyzed the amendment. Needless to say, we find it most acceptable; and the committee is willing to accept the amendment.

Mr. SARASIN. Mr. Chairman, I move to strike the last word.

I would ask the gentleman, the author of the amendment, whether the amount requested here is already in the budget or already appropriated.

Mr. MURTHA. Mr. Chairman, if the gentleman will yield, there is only $10 million of the additional money that has been appropriated. We had requests for more, but we felt it would be inappropriate until we got a higher authorization. If there is a supplemental appropriation, which we feel there will be, we are going to consider the additional requests at that time for additional money. I might add that we have had detailed hearings on this matter.

Mr. SARASIN. Mr. Chairman, I thank the gentleman for his explanation, and I would have no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. MURTHA).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ANDREWS OF NORTH CAROLINA

Mr. ANDREWS of North Carolina. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDREWS of North Carolina: Page 8, after line 12, insert the following:

STATE PLANS AND LAWS

SEC. 202. Title I of the Federal Coal Mine Health and Safety Act of 1969 is amended by adding at the end thereof the following new section:

"STATE PLANS AND LAWS RELATING TO METAL AND NONMETALLIC MINES

"SEC. 112. (a) In order to promote sound and effective coordination in Federal and State activities relating to mines (other than coal mines as defined in section 3(h)(2)) subject to the provisions of this Act, the Secretary shall cooperate with the official mine inspection or safety agencies of the several States.

"(b) Any State which, at any time, desires to develop and enforce health and safety standards in mines (other than coal mines as defined in section 3(h)(2) located in the State which are subject to this Act shall submit, through a State mine inspection or safety agency, a State plan for the development of such standards and their enforcement.

"(c) The Secretary shall approve the plan submitted by a State under subsection (b), or any modifications thereof, whenever the State gives evidence satisfactory to the Secretary that under such plan—

"(1) the State agency submitting such plan is the sole agency responsible for administering the plan throughout the State and contains satisfactory evidence that such agency will have the authority to carry out the plan: *Provided*, That the Secretary may, upon request of the Governor or other appropriate executive or legislative authority of the State responsible for determining or revising the organizational structure of State government, waive the single State agency provision hereof and approve another State administrative structure or arrangement if the Secretary determines that the objectives of this Act will not be endangered by the use of such other State structure or arrangement.

"(2) such agency has adequate legal authority to enforce existing health and safety standards for the purpose of the protection of life, the promotion of health and safety, and the prevention of accidents in mines (other than coal mines as defined in section 3(h)(2)) in the State that are subject to this Act, which are, in his judgment, substantially as effective for such purposes as the mandatory standards under section 101 and which provide for inspection at least annually of all such mines, other than coal mines, as defined in section 3(h)(2), quarries, and sand and gravel pits.

"(3) the agency has adequate qualified personnel necessary for the enforcement of the plan.

"(4) the State will devote adequate funds to the administration and enforcement of such standards.

"(5) reasonable safeguards exist against loss of life or property arising from mines (other than coal mines as defined in section 3(h)(2)) which are closed or abandoned after the effective date of this Act, and

"(6) the agency shall make such reports to the Secretary, in such form and containing such information, as the Secretary shall from time to time require.

"(d) The Secretary shall, on the basis of reports submitted by the State agency and his own inspection of mines (other than coal mines as defined in section 3(h)(2)), make a continuing evaluation of the manner in which each State having a plan approved under this section is carrying out such plan. Whenever the Secretary finds, after affording due notice and opportunity for a hearing, that in the administration of the State plan there is a failure to comply substantially with any provision of the State plan (or any assurance contained therein), he shall notify the State agency of his withdrawal of approval of such plan and upon receipt of such notice such plan shall cease to be in effect.

"(e) The provisions of sections 104(c), (h), and (i) of this Act shall not be applicable in any State in which there is in effect a State plan approved under subsection (c) of this section.

"(f) No State or territorial law which relates to mines (other than coal mines as defined in section 3(h)(2)) subject to this Act and which is in effect upon the effective date of this section or which may become effective thereafter, shall be superseded by any provision of this Act, except insofar as such State or territorial law is in conflict with this Act, or with orders issued pursuant to this Act.

"(g) Provisions in any State or territorial law which relates to mines (other than coal mines as defined in section 3(h)(2)) subject to this Act and which is in effect upon the effective date of this section, or which may become effective thereafter, which provide for greater safety of persons in a mine (other than a coal mine as defined in section 3(h)(2)) subject to this Act, than do provisions of this Act, which relate to the same phrase of operations, shall not be construed or held to be in conflict with this Act. Provisions in any State or territorial law which relates to mines (other than coal mines as defined in section 3(h)(2)) subject to this Act and which is in effect upon the effective date of this section, or which may become effective thereafter, which provide for the safety of persons in a mine (other than a coal mine as defined in section 3(h)(2)) subject to this Act concerning which no provision is contained in this Act, shall not be construed or held to be suspended by this Act.

"(h) To the extent that provisions of this Act apply to mines other than coal mines as defined in section 3(h)2), nothing in such provisions as applicable to such mines shall be construed or held to supersede or in any manner affect the workmen's compensation laws of any State or territory, or to enlarge or diminish or affect in any other manner the common law or statutory rights, duties, or liabilities of employers and employees under State or territorial laws in respect of injuries, occupational or other diseases, or death of employees arising out of, or in the course of, employment."

Mr. ANDREWS of North Carolina (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. ANDREWS of North Carolina. Mr. Chairman, the amendment I offer is a relatively simple one, but it is very important. It preserves a relatively small portion of the current law.

Mr. Chairman, as I presume is known, we are now dealing with two acts. One of these acts relates to safety and health, inspection, et cetera, with respect to coal mines. The other deals with the same subject matter with respect to noncoal mines, for lack of a more appropriate term.

Under the noncoal mine act—the Metal and Nonmetallic Act—States are permitted to submit their own plans to the Secretary of the Interior. That would be changed now in this act, I believe, to the Secretary of Labor.

The Secretary may permit each of such States to adopt its own plan with regard to these matters, to perform their own inspections with respect to those plans.

This has been the law since the Metal and Nonmetallic Act was first adopted and, as I understand it, the current law is.

We are now in the circumstance where the current act, without making any reference to that portion of the current law, without any testimony that it is or is not good or should or should not be permitted, simply by merging the Metallic and Nonmetallic Act into the Coal Act, we do away with the permission for these individual States, of which there are now six, to promulgate their own plans, again only if the Secretary, in this case the Secretary of Labor, finds that such State plan adequately complies with his and the Federal guidelines.

My amendment would simply permit these States to promulgate their own safety plans and perform their own inspections.

I might say this is a rather important matter to our States and there is considerable unanimity among them, to permit this to be handled by those certain States, and they have asked for the adoption of my amendment, so as to make it certain that these States do have the privilege to continue to exercise their States' rights in the manner that they have been doing, insofar as the plan to turn all of the 50 States into a uniform system of plan and enforcement under the Department of Labor, without any opportunity for individual States for input into the matter.

Mr. NEAL. Mr. Chairman, I support the amendment offered by my colleague, Mr. ANDREWS. It seems illogical to me that those States which took the initiative in establishing State mine and quarry safety programs for non-coal-producing mines should be penalized by having their role suddenly preempted by the Federal Government. These States, including my own North Carolina, have the expertise as well as the organization, already at work, to do the best job of enforcing this new law.

The Occupational Safety and Health Act which passed in 1970 contained this kind of provision for State administration of Federal law. This concept should be the aim of this Congress, if we mean what we say about reducing the interference from Washington. This amendment would not in any way lessen the increased protection which this bill will give workers, but it would be an important action for the States which already have safety programs and for those Americans who do not buy the supposition that "the Federal Government always can do it better." I commend my most distinguished colleague from North Carolina for offering this much-needed amendment and urge my colleagues to vote for it.

Mr. GAYDOS. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from North Carolina (Mr. ANDREWS).

Mr. Chairman, to state the problem accurately and succinctly, the Members should know that there is presently under the metallic and nonmetallic laws a provision which does allow the various States, if they so choose, to pass statutes which would enforce their own particular safety and health regulations pertaining to metallic and nonmetallic mining. Also under the Coal Act of 1969 there is a similar provision but the similar provision has one limitation. You cannot preempt the Federal jurisdiction.

So for all purposes, those States, and there are six of them presently carrying on this type of procedure, with their own State plans, will be taken care of in two ways. First, under the act submitted to the committee, we will make money available for the first time to those six States which they can use to carry out their plans. That money will be made available to them, which has not been made available to them under the existing metallic and nonmetallic law.

Second, under title V, section 506 of the Coal Act, and I believe it very clearly explains the problem, it states:

SEC. 506. (a) No State law in effect on the date of enactment of this Act or which may become effective thereafter shall be superseded by any provision of this Act or order issued or any mandatory health or safety standard, except insofar as such State law is in conflict with this Act or with any order issued or any mandatory health or safety standard.

The second section in (b) goes on to state that the provisions of any State law or regulation in effect upon the operative date of this act, or which may become effective thereafter, which provide for more stringent health and safety standards applicable to mines than do the Federal regulations shall continue in effect. If the Federal statute is silent, the State law governs, or if the State law is more stringent as far as requirements are concerned, State law governs.

So, Mr. Chairman, the problem as pointed out by the gentleman from North Carolina (Mr. ANDREWS) in offering his amendment is well taken care of in the existing Coal Act, which, in turn, is part of this act, H.R. 4287 which is before the committee.

I urge a vote against the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. ANDREWS).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ANDREWS of North Carolina. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 165, noes 169, answered "present" 1, not voting 98, as follows:

[Roll No. 422]

Frenzel	Mitchell, N.Y.	Wydler
Frey	Mottl	Young, Mo.
Gammage	Murphy, Ill.	Young, Tex.
Giaimo	Murphy, N.Y.	Zeferetti
Gibbons	Myers, John	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Burke of Massachusetts against.

Mr. Gammage for, with Mr. Addabbo against.

Mr. Beard of Tennessee for, with Mr. Zeferetti against.

Mr. Cleveland for, with Mr. Brademas against.

Mr. Dornan for, with Mr. Cotter against.

Mr. Frenzel for, with Mr. Badillo against.

Mr. Frey for, with Mr. Koch against.

Mr. Goldwater for, with Mrs. Chisholm against.

Mr. Hyde for, with Mr. Ford of Michigan against.

Mr. Lott for, with Mr. Diggs against.

Mr. Wiggins for, with Mr. Carney against.

Messrs. GLICKMAN, MOLLOHAN, and ASHLEY changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. PEASE

Mr. PEASE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PEASE: On page 81, insert after line 12 the following new subsection:

(c) Section 101 of such Act is further amended by adding after subsection (k) the following new subsection:

"(l) Subsection (c) of section 301 (relating to modification of application of mandatory safety standards to mines) shall apply to application of any mandatory safety standard to a coal or other mine.".

Mr. PEASE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. PEASE. Mr. Chairman, first, I would like to make it clear that I am a supporter of this bill. This amendment is offered in an effort to make it even more workable. I do not wish to sabotage the bill in any way. I would like to direct the attention of the members of the committee to the subject of variances from the mandatory safety standards.

Mr. Chairman, current law and regulations establish procedures for having variances from the mandatory safety standards for mines, so long as those variances do not in any way reduce the safety of those mines. There are two points to be made about the variances. One is that such variances are allowed for both coal mines and metal and nonmetallic mines currently. There is no change. Second, the committee intent clearly is that such variances should be allowed to continue. Furthermore, it is clear that there is a statutory basis for allowing variances in coal mines.

Section 301(c) of title III of the Federal Coal Mine Health and Safety Act of 1969 provides that procedure. What is not clear is whether there will be under H.R. 4287 a statutory basis for variances in metal and nonmetallic mines. There may be in section 301(c), but it is not clear. My amendment would do nothing more and nothing less than make it clear that the statutory basis for variances already in existence for coal mines would continue for metal and nonmetallic mines, as is the intent of the committee which reported this bill.

Mr. Chairman, I ask support for the amendment.

Mr. GAYDOS. Mr. Chairman, I rise in reluctant opposition to the amendment.

Mr. Chairman, the amendment is well directed. However, it is redundant. The amendment is unnecessary at this time, and in support of that conclusion let me read first a letter from the United States Department of Labor. In part, this is what the letter states:

It is our view that under the legislation—

That is H.R. 4287—

the variance procedure would be applicable in the same manner to metal and nonmetallic mine standards as to coal mine standards. The language of section 301(c) broadly covers the granting of variances respecting "any mandatory safety standard to a mine." This language is not limited in any way to coal mines.

Mr. Chairman, I also call the Committee's attention to the Code of Federal Regulations. These regulations are promulgated by the Secretary of the Interior, and in this Code of Federal Regulations we have stated variance procedures which have been allowed and granted for the metal and nonmetallic mines.

In conjunction with that, this happens to be a regulation of the Secretary of the Interior. That regulation is saved on page 83, subsection (3) in the existing bill, and this is how the bill saves it: "All interpretations, regulations,"—and this is a regulation—"and instructions of the Secretary of the Interior or the Director of the Bureau of Mines * * * not inconsistent with any provision of this Act or any amendment made by this Act, shall be published in the Federal Register" and shall become, for all purposes, law.

The natural and proper conclusion to draw therefrom is that since there are variances that have been allowed in the Code of Federal Regulations of the Metal and Nonmetal Act and since this section of the bill before the House saves and perpetuates that section and all those rules and regulations, the amendment is unnecessary. It can properly be assumed, therefore, that the amendment as proposed is superfluous and that the Act takes care of the problem that is properly raised by the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Ohio.

Mr. PEASE. Mr. Chairman, I am very happy to have those comments of the distinguished chairman of the subcommittee, because this makes clear that the intent of the committee, as well as my own intent, is to allow for that variance procedure, and I think that is important to have in the record.

I would only say that the law for coal mines spells out clearly in black and white that there is a variance procedure. That is not true for metal and nonmetal mines. My amendment would seek to make it clear so that any court who ever has to interpret this point will come to the obvious conclusion that the Congress did intend to have a variance procedure.

Mr. Chairman, I thank the gentleman for yielding.

Mr. GAYDOS. Mr. Chairman, I ask that the amendment be rejected.

Mr. SARASIN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think clearly the amendment offered by the gentleman from Ohio (Mr. PEASE) indicates, before we even come to the point of final passage, that this is not a bill that provides equality for miners. In fact, we have rules in the statute that apply to coal mines which do not apply to metal and nonmetal mines.

I believe the amendment is a good amendment, and that the amendment

should be supported and adopted so that we will establish very clearly that this Congress does intend to allow the safety standard procedures to exist for metal and nonmetal miners as they do for coal miners. H.R. 4287 simply does not provide that.

Mr. Chairman, I raised this point earlier. I had an amendment that was prepared with a slightly different perspective to accomplish the same thing. I think it is absolutely essential that this be done, and I urge support of the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. PEASE).

The question was taken; and on a division (demanded by Mr. PEASE) there were—ayes 32, noes 58.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. HANSEN

Mr. HANSEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HANSEN: On page 78, strike lines 15, 16, 17 and 18.

On page 79, strike lines 21 through 25.

On page 80, strike lines 1, 2, and 6.

On pages 80 through 85, strike section 301.

On page 85, strike section 302.

On page 86, strike lines 3 through 10.

On pages 87, 88, and 89, strike section 303(h).

On page 90, insert a period after the word "Act" on line 4 and strike the word "except" on line 4 and all that follows through line 6.

Mr. HANSEN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. SARASIN. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Idaho (Mr. HANSEN).

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Idaho (Mr. HANSEN) for the same reasons that I objected to the earlier amendment to the Sarasin amendment in the nature of a substitute.

The amendment offered by the gentleman from Idaho (Mr. HANSEN) would prevent the transfer of MESA. As I pointed out earlier, I am not convinced as to the arguments that have been made concerning an inherent conflict of interest, but I do believe that there are valid reasons to transfer MESA into the Department of Labor because of their expertise and their responsibility for safety and health in the workplace of the American worker, and thus it does make sense to me to put those all in one place.

I agree with many of the gentleman's statements concerning occupational safety and health.

I would hope we can inspire the implementation of this act, and I would most certainly hate to see it destroyed. By the same token I do not want to see the enforcement of the safety features destroyed. I think we can make sure that MESA will continue to do the good job they are doing and will enable them to do a better job if we place them within responsibility of the Secretary of Labor.

There will be a separation, in fact, we are not talking about combining the Occupational Safety and Health Act in MESA and we are not talking about commingling of funds. We are talking about trying to be sure that there is an agency in our Government that does pertain to the safety and health of the American worker and that is the responsibility of the Department of Labor.

So, in that manner it makes inherently good sense to me to allow this transfer to take place and to defeat the amendment offered by the gentleman from Idaho (Mr. HANSEN).

Mr. GAYDOS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I ask that the amendment offered by the gentleman from Idaho (Mr. HANSEN) be defeated. We have already voted on this amendment. It is certainly clear in the legislation that we have separate funds, a separate budget, and separate Secretaries and the proposed amendment would do nothing.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho (Mr. HANSEN).

The question was taken; and on a division (demanded by Mr. HANSEN) there were—ayes 28, noes 76.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. SARASIN

Mr. SARASIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SARASIN: Page 81, after line 12, insert the following new subsection (c):

(c) Section 101 of such Act is amended by adding at the end thereof the following new subsection (1):

"(1) Upon petition by the operator or the representative of miners, the Secretary may modify the application of any mandatory safety standard to a coal or other mine if the Secretary determines that an alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard, or that the application of such standard to such mine will result in a diminution of safety to the miners in such mine. Upon receipt of such petition the Secretary shall publish notice thereof and give notice to the operator or the representative of miners in the affected mine, as appropriate, and shall cause such investigation to be made as he deems appropriate. Such investigation shall provide an opportunity for a public hearing, at the request of such operator or representative or other interested party, to enable the operator and the representative of miners in such mine or other interested party to present information relating to the modification of such standard. Before granting any exception to a mandatory safety standard, the findings of the Secretary or his authorized representative shall be made public and shall be available to the representative of the miners at the affected mine. The Secretary shall issue a decision incorporating his findings of fact therein, and send a copy thereof to the operator or the representative of the miners, as appropriate. Any such hearing shall be of record and shall be subject to section 554 of title 5 of the United States Code."

Mr. SARASIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. SARASIN. Mr. Chairman, the Committee on Education and Labor has stated in its report to accompany H.R. 4287 that the purpose of this measure is to bring the same measure of health and safety protection to the noncoal miners of this country, which is presently enjoyed by the coal miners of this country. Yet, while H.R. 4287 attempts to do this by placing mandatory civil penalties on the operators, and streamlining the rulemaking provision, H.R. 4287 would not provide operators, and in some cases workers, the protection afforded by the Federal Coal Mine Health and Safety Act of 1969.

The effort to bring noncoal miners to the same level as coal miners insofar as health and safety is concerned falls well short in that the variance procedure from a mandatory safety standard established in title III of the Federal Coal Mine Health and Safety Act, does not apply to noncoal mine operators. Only titles I and V of the Federal Coal Mine Health and Safety Act apply to noncoal mines. Just as the working environment changes in coal mines so does it change in noncoal mines. With each passing day the working place may be totally different from the previous day. With these unique circumstances, it is certainly inappropriate to grant to one segment of the mining industry a variance procedure while prohibiting the other segment of that same industry from enjoying the same rights established by a health and safety law common to both.

A variance procedure is not only a right to be enjoyed by operators, but also affords to the mine workers one means of protection which cannot be gained by any other method. For instance, in an underground mine where the strata may vary from day to day or week to week, in an effort to guarantee that the overhead strata is controlled it may be necessary to vary from the approved roof control plan. A variance from an approved roof control plan could not be accomplished without the establishment of a variance procedure in the statute.

The argument will be raised that a variance procedure presently exists in 30 CFR for the noncoal mining industry. This argument will be followed by the assertion that no statutory variance procedure is necessary. This is totally incorrect. After passage of any law, which would require administration such as either of the two under consideration today, the executive branch of the Government is given full responsibility to administer that law. The Congress seldom has an opportunity to amend that law; however, the secretary of the executive branch department, in this case the Secretary of Labor, can make amendments to the regulations at any point in which he chooses to do so. I point this out in an effort to make all of you aware of the fact that the Secretary of Labor, once this measure is passed, can eliminate the variance procedure through the streamlined rulemaking procedure of title I of the Coal Act. In an effort to guarantee that these variance procedures are never reduced, I hereby propose my amendment H.R. 4287, which would establish only a statutory variance procedure from

safety standards. There would be no variance procedure for health standards. I should further point out that this is the same procedure afforded the coal industry in title III of the Federal Coal Mine Health and Safety Act.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. I thank the gentleman for yielding.

The committee has closely examined the gentleman's amendment. I would like to ask one question. Can he assure the committee that the amendment is identical to and provides the same as section 301(c) of the current Coal Act?

Mr. SARASIN. I point out to the gentleman that "Yes," it mentions the language from sections 301 (c) and (d) which require publication in the Federal Register, which was not taken care of.

Mr. GAYDOS. The committee accepts the amendment and has no objection.

Mr. SARASIN. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. SARASIN).

The amendment was agreed to.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. GONZALEZ, Chairman of the Committe of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4287) to promote safety and health in the mining industry, to prevent recurring disasters in the mining industry, and for other purposes, pursuant to House Resolution 682, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SARASIN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 244, nays 88, answered "present" 1, not voting 100, as follows:

Mr. Runnels with Mr. Gibbons.
Mr. Patterson of California with Mr. Flynt.
Mr. Flippo with Mr. Edwards of Alabama.
Mr. Dicks with Mr. Brown of California.
Mrs. Collins of Illinois with Mr. Brooks.

Mr. WAGGONNER and Mr. HALL changed their vote from "yea" to "nay."

Mr. FINDLEY changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. GAYDOS. Mr. Speaker, pursuant to House Resolution 682, I call up from the Speaker's table the Senate bill (S. 717) to promote safety and health in the mining industry, to prevent recurring disasters in the mining industry, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

AMENDMENT OFFERED BY MR. GAYDOS

Mr. GAYDOS. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GAYDOS: Strike out all after the enacting clause of S. 717 and insert in lieu thereof the text of H.R. 4287, as passed by the House, as follows:

That this Act may be cited as the "Federal Mine Safety and Health Amendments Act of 1977".

TITLE I—AMENDMENTS TO THE GENERAL PROVISIONS OF THE FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969

SHORT TITLE

SEC. 101. The first section of the Federal Coal Mine Health and Safety Act of 1969 is amended to read as follows: "That this Act may be cited as the 'Federal Mine Safety and Health Act of 1977' ".

DEFINITIONS AND APPLICABILITY

SEC. 102. (a) (1) Section 2 of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting "or other" immediately after "coal" wherever it appears.

(2) Section 2(g) (1) of such Act is amended by striking out "the Interior" and inserting in lieu thereof "Labor".

(b) (1) Section 3(a) of such Act is amended by striking out "the Interior" and inserting in lieu thereof "Labor".

(2) Section 3(h) of such Act is amended to read as follows:

"(h) (1) 'coal or other mine' means (A) an area of land from which minerals are extracted in nonliquid form or, if in liquid form, are extracted with workers underground, (B) private ways and roads appurtenant to such area, and (C) lands, excavations, underground passageways, shafts, slopes, tunnels and workings, structures, facilities, equipment, machines, tools, or other property including impoundments, retention dams, and tailings ponds, on the surface or underground, used in, or to be used in, or resulting from, the work of extracting such minerals from their natural deposits in nonliquid form, or if in liquid form, with workers underground, or used in the milling of such minerals, or the work of preparing coal, and includes custom coal preparation facilities, except that with respect to protection against radiation hazards such term shall not include property used in the milling of source minerals defined in the Atomic Energy Act of 1954, as amended. In making a determination of what constitutes mineral milling for purposes of this Act the Secretary shall give due consideration to the convenience of administration resulting from the delegation to one Assistant Secretary of all authority with respect to the health and safety of miners employed at one physical establishment;

"(1) For purposes of titles II, III, or IV, 'coal mine' means an area of land and all structures, facilities, machinery, tools, equipment, shafts, slopes, tunnels, excavations, and other property, real or personal, placed upon, under, or above the surface of such land by any person, used in, or to be used in, or resulting from, the work of extracting in such area bituminous coal, lignite, or anthracite from its natural deposits in the earth by any means or method, and the work of preparing the coal so extracted, and includes custom coal preparation facilities;".

(3) Sections 3 (d), (e), (g), and (j) of such Act are each amended by inserting "or other" immediately after "coal" wherever it appears.

(4) Section 3 of such Act is amended by striking out the word "and" at the end of paragraph (l), by striking out the period at the end of paragraph (m) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(n) 'Administration' means the Mine Safety and Health Administration in the Department of Labor."

(c) Section 4 of such Act is amended by inserting "or other" immediately after "coal".

TITLE II—MINE SAFETY AND HEALTH STANDARDS AMENDMENTS

AMENDMENTS TO TITLE I

SEC. 201. (a) Title I of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting "or other" immediately after "coal" wherever that term occurs.

(b) Section 101(c) of such Act is amended by striking out "Labor" and inserting in lieu thereof, "the Interior".

(c) Section 101(g) of such Act is amended by adding at the end thereof the following new paragraph:

"The Secretary of Health, Education, and Welfare, as soon as possible after the date of enactment of the Federal Mine Safety and Health Amendments Act of 1977 but in no event later than three years after such date, and on a continuing basis thereafter, shall, for each toxic material or harmful physical agent which is used or found in a coal or other mine, determine whether such material or agent is potentially toxic at the concentrations in which it is used or found in a coal or other mine. The Secretary of Health, Education, and Welfare shall submit such determination to the Secretary, together with all pertinent criteria, and a proposed standard.".

(d) Section 101 of such Act is amended by adding at the end thereof the following new subsection (1):

"(1) Upon petition by the operator or the representative of miners, the Secretary may modify the application of any mandatory safety standard to a coal or other mine if the Secretary determines that an alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard, or that the application of such standard to such mine will result in a diminution of safety to the miners in such mine. Upon receipt of such petition the Secretary shall publish notice thereof and give notice to the operator or the representative of miners in the affected mine, as appropriate, and shall cause such investigation to be made as he deems appropriate. Such investigation shall provide an opportunity for a public hearing, at the request of such operator or representative or other interested party, to enable the operator and the representative of miners in such mine or other interested party to present information relating to the modification of such standard. Before granting any exception to a mandatory safety standard, the findings of the Secretary or his authorized representative shall be made public and shall be available to the representative of the miners at the affected mine. The Secretary shall issue a decision incorporating his findings of fact therein, and send a copy thereof to the operator or the representative of the miners, as appropriate. Any such hearing shall be of record and shall be subject to section 554 of title 5 of the United States Code."

TITLE III—MISCELLANEOUS PROVISIONS

TRANSFER MATTERS

SEC. 301. (a) Except with respect to the functions assigned to the Secretary of the Interior pursuant to section 501 of the Federal Coal Mine Health and Safety Act of 1969, the functions of the Secretary of the Interior under the Federal Coal Mine Health and Safety Act of 1969, as amended, and the Federal Metal and Nonmetallic Mine Safety Act are transferred to the Secretary of Labor.

(b) (1) The mandatory standards relating to mines, issued by the Secretary of the Interior under the Federal Metal and Nonmetallic Mine Safety Act and standards and regulations under the Federal Coal Mine Health and Safety Act of 1969 which are in effect on the date of enactment of this Act shall remain in effect as standards applicable to metallic and nonmetallic mines and to coal mines respectively under the Federal Mine Safety and Health Act of 1977 until such time as the Secretary shall issue new or revised standards applicable to metal and nonmetallic mines and new or revised standards applicable to coal mines.

(2) Within sixty days after the effective date of this Act, the Secretary shall establish an advisory committee which shall, within one hundred and eighty days after the date of the establishment of such advisory committee, review the advisory health and safety standards issued by the Secretary of the Interior under the Federal Metal and Nonmetallic Mine Safety Act and recommend to the Secretary which of those standards (or any modification of such standards which does not substantially diminish the health and safety of miners) should be promulgated as health and safety standards under the Federal Mine Safety and Health Act of 1977. The Secretary shall publish, within sixty days after any recommendations of the advisory committee under this paragraph, each of the standards so recommended for adoption with or without modification as a health and safety standard under such Act by publication of such standard in the Federal Register, and afford interested persons a period of twenty-five days after publication to submit written data or comment. Within thirty days after the close of the comment period specified in the preceding sentence, the Secretary shall promulgate by publication in the Federal Register a standard based upon the advisory committee recommended with or without modification, and the data and comments received thereon, unless the Secretary determines that such a standard will not promote the health and safety of miners and publishes an explanation of that determination in the Federal Register.

(3) All interpretations, regulations, and instructions of the Secretary of the Interior or the Director of the Bureau of Mines, in effect on the date of enactment of this Act

and not inconsistent with any provision of this Act or any amendment made by this Act, shall be published in the Federal Register and shall continue in effect until modified or superseded in accordance with the provisions of this Act.

(c)(1) All unexpended balances of appropriations, personnel, property, records, obligations, and commitments which are used primarily with respect to any function transferred under the provisions of subsection (a) of this section to the Secretary shall be transferred to the Department of Labor. The transfer of personnel pursuant to this paragraph shall be without reduction in classification or compensation for one year after such transfer, except that the Secretary of Labor shall have full authority to assign personnel during such one-year period in order to efficiently carry out functions transferred to him under this Act.

(2) All orders, decisions, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges (A) which have been issued, made, granted, or allowed to become effective in the exercise of functions which are transferred under this section by any department or agency, any functions of which are transferred by this section, and (B) which are in effect at the time this section takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary of Labor, by any court of competent jurisdiction, or by operation of law.

(3) The provisions of this section shall not affect any proceedings pending at the time this section takes effect before any department or agency, functions of which are transferred by this section; except that such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Secretary of Labor. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this section had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary of Labor, by a court of competent jurisdiction, or by operation of law.

(4) The provisions of this section shall not affect suits commenced prior to the date this section takes effect and in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this section had not been enacted; except that if before the date on which this section takes effect, any department or agency (or officer thereof in his official capacity) is a party to a suit involving functions transferred to the Secretary, then such suit shall be continued by the Secretary of Labor. No cause of action, and no suit, action, or other proceeding, by or against any department or agency (or officer thereof in his official capacity) functions of which are transferred by this section, shall abate by reason of the enactment of this section. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or the Secretary as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this paragraph.

(d) For purposes of this section, (1) the term "function" includes power and duty, and (2) the transfer of a function, under any provision of law, of an agency or the head of a department shall also be a transfer of all functions under such law which are exercised by any officer or officer of such agency or department.

MINE SAFETY AND HEALTH ADMINISTRATION

SEC. 302. (a) There is established in the Department of Labor a Mine Safety and Health Administration to be headed by an Assistant Secretary of Labor for Mine Safety and Health appointed by the President, by and with the advice and consent of the Senate. The Secretary is authorized and directed, except as specifically provided otherwise, to carry out his functions under the Federal Mine Safety and Health Act of 1977 through the Mine Safety and Health Administration.

(b) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following paragraph:

"(114) Assistant Secretary of Labor for Mine Safety and Health.".

AMENDMENTS WITH RESPECT TO MINE SAFETY AND HEALTH ADMINISTRATION

SEC. 303. (a)(1) Section 501(a) of the Federal Coal Mine Health and Safety Act of 1969 is amended by inserting "or other" immediately after "coal" wherever it appears therein, and by striking out "The Secretary and" and inserting in lieu thereof "The Secretary of the Interior and".

(2) Section 501(b) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein and by inserting after "Welfare" the following: "through the National Institute for Occupational Safety and Health established under the Occupational Safety and Health Act of 1970"; and by striking out the period at the end thereof and inserting in lieu thereof "of the Interior in coordination with the Secretary".

(3) Section 501(d) of such Act is amended by inserting "or other" immediately after "coal".

(4) Section 501(e) of such Act is amended by inserting immediately before the period at the end of the first sentence thereof the following: "ending prior to October 1, 1977, and $60,000,000 for the fiscal year ending September 30, 1978, and for each succeeding fiscal year thereafter".

(b) Section 502 of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein.

(c)(1) Section 503(a) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein, and by striking "Labor" and inserting in lieu thereof, "the Interior".

(2) Section 503(b) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein.

(d)(1) Section 503(f) of such Act is amended by inserting "or other" immediately after "coal".

(2) Section 503(g) of such Act is amended by inserting "or other" immediately after "coal".

(3) Section 503(h) of such Act is amended by deleting "$5,000,000" and by inserting in lieu thereof, "$10,000,000", and by inserting before the final period the following: *"Provided,* That no less than one-half of such sums shall be allocated to coal producing States".

(e)(1) Section 505 of such Act is amended by striking out "the mining of coal" and inserting in lieu thereof "in mining".

(2) Section 505 of such Act is further amended by striking out the period at the end of the second sentence thereof and inserting in lieu thereof ": *Provided, however,* That, to the maximum extent feasible, in the selection of persons for appointment as mine inspectors, no person shall be so selected unless he has the basic qualification of at least five years practical mining experience and in assigning mine inspectors to the inspection and investigation of individual mines, due consideration shall be given to the extent possible to their previous experience in the particular type of mining operation where such inspections are to be made."

(f) Section 506(b) of such Act is amended by inserting "or other" immediately after "coal" each time it appears therein.

(g)(1) Section 511(a) of such Act is amended by inserting "or other" immediately after "coal".

(2) Section 511(b) of such Act is amended by inserting "or other" immediately after "coal".

(h) Section 502 of such Act is amended by adding at the end thereof the following new subsection (c):

"(c)(1) The National Mine Health and Safety Academy shall be maintained as an agency of the Department of the Interior. The Academy shall be responsible for the training of mine safety and health inspectors under section 505 of this Act, and in training of technical support personnel of the Mine Safety and Health Administration established under section 302 of the Federal Mine Safety and Health Amendments Act of 1977; and for any other training programs for mine inspectors, mining personnel, or other persons as the Secretaries of Labor and Interior shall designate. In performing this function, the Academy shall have the authority to enter into cooperative educational and training agreements with educational institutions. State governments, labor organizations, and mine operators and related industries. Such training shall be conducted by the Academy in accordance with curriculum needs and assignment of instructional personnel established by the user.

"(2) In performing its function pursuant to this section, the National Mine Health and Safety Academy shall use the facilities and personnel of the Department of the Interior, and such other personnel as shall be mutually agreed upon by the Secretaries of Labor and Interior. The Secretary of the Interior, upon request by the Academy, shall appoint or assign to the Academy such officers and employees as the Director of the Academy deems necessary for the performance of the duties and functions of the Academy.

"(3) The Secretary of the Interior shall conduct his safety research responsibilities under section 501 of this Act in coordination with the Secretary of Labor, and the Secretaries of Labor and the Interior are authorized to enter into contractual or other agreements for the performance of such safety related research.".

SAVINGS PROVISIONS

SEC. 304. Nothing contained in this Act or any amendment made by this Act shall be construed to reduce the number of inspectors engaged in enforcement of the Federal Coal Mine Health and Safety Act of 1969 and the Federal Metal and Nonmetallic Mine Safety Act as in effect prior to the effective date of this Act or to reduce the number of inspectors engaged in the enforcement of the Occupational Safety and Health Act of 1970.

BUDGET PROVISION

SEC. 305. In the preparation of the Budget message required under section 207 of the Budget and Accounting Act, 1921 (31 U.S.C. 11), the President shall set forth as separate appropriation accounts amounts required for appropriation for mine health and safety pursuant to the Federal Mine Health and Safety Act of 1977 and for occupational safety and health pursuant to the Occupational Safety and Health Act of 1970.

REPEALER

SEC. 306. The Federal Metal and Nonmetallic Mine Safety Act is repealed.

EFFECTIVE DATE

SEC. 307. This Act and the amendments made by this Act shall take effect 90 days after the date of the enactment of this Act except that the Secretary of Labor is authorized to establish such rules and regulations as may be necessary for the efficient transfer of functions provided under this Act.

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 5287) was laid on the table.

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that the House insist on its amendments to the Senate bill (S. 717) to promote safety and health in the mining industry, to prevent recurring disasters in the mining industry, and for other purposes, and request a conference with the Senate thereon.

The SPEAKER pro tempore (Mr. GLICKMAN). Is there objection to the request of the gentleman from Pennsylvania? The Chair hears none, and, without objection, appoints the following conferees: Messrs. DENT, MURPHY of Pennsylvania, CORNELL, ZEFERETTI, LE FANTE, MICHAEL O. MYERS, MILLER of California, PERKINS, SARASIN, BUCHANAN, SHUSTER, and QUIE.

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on H.R. 4287, Federal Mine Safety and Health Act of 1977.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 5400, UNIVERSAL VOTER REGISTRATION ACT OF 1977

Mr. DELANEY, from the Committee on Rules, submitted a privileged report (Rept. No. 95–502) on the resolution (H. Resolution 685) providing for consideration of H.R. 5400, to establish a universal voter registration program, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERSONAL EXPLANATION

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GILMAN. Mr. Speaker, on Monday, July 11, 1977, I attended, in my capacity as a member of the congressional delegation to the Law of the Sea Conference, several meetings held in New York at the United Nations. I was unavoidably detained at these meetings, thus missing part of Monday's legislative session. Had I been present, I would have voted in the following fashion: House Joint Resolution 24, to provide for the designation of a week as "National Lupus Week," roll 403: "yes;" H.R. 2960, providing for a memorial in honor of the Signers of the Declaration of Independence, roll 404: "yes;" and House Resolution 642, the rule for H.R. 5023, Indian claims statute of limitations amendments, roll 405: "yes."

JOINT REFERRAL OF H.R. 8280, RESTRICTING ACCESS BY FEDERAL GOVERNMENT TO CONSUMER REPORTS AND FINANCIAL, CREDIT, AND INSURANCE RECORDS MAINTAINED BY THIRD PARTIES TO THE COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS AND THE COMMITTEE ON THE JUDICIARY

Mr. GONZALEZ. Mr. Speaker, I ask unanimous consent that the bill (H.R. 8280) to restrict access by the Federal Government to consumer reports, and to financial, credit, and insurance records which are maintained by third parties be jointly referred to the Committee on Banking, Finance and Urban Affairs and the Committee on the Judiciary.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, can the gentleman from Texas (Mr. GONZALEZ) tell us the necessity for this request?

Mr. GONZALEZ. Mr. Speaker, if the gentleman will yield, I will be delighted to do so.

The Privacy Study Commission has made recommendations, and its recommendations have recently come out. One of these bills involved in that privacy area is H.R. 8280, which has been introduced by two Members of the House, and it would restrict Government action to individual records held by third parties. While this bill covers records held by institutions within this committee's jurisdiction, it also includes records held by other entities. Even though it has been referred to the Committee on Banking, Finance and Urban Affairs, we feel the bill should also go to the Committee on the Judiciary because of this aspect contained in the bill.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman for his explanation, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

CONFERENCE REPORT ON H.R. 6884, INTERNATIONAL SECURITY ASSISTANCE ACT OF 1977

Mr. ZABLOCKI submitted the following conference report and statement on the bill (H.R. 6884) to amend the Foreign Assistance Act of 1961 to authorize international security assistance programs for fiscal year 1978, to amend the Arms Export Control Act to make certain changes in the authorities of that act, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–503)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6884) to amend the Foreign Assistance Act of 1961 to authorize international security assistance programs for fiscal year 1978, to amend the Arms Export Control Act to make certain changes in the authorities of that Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective House as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "International Security Assistance Act of 1977".

CONTINGENCY FUND

SEC. 2. Section 451(a) of the Foreign Assistance Act of 1961 is amended by striking out "for the fiscal year 1976 not to exceed $5,000,000 and for the fiscal year 1977 not to exceed $5,000,000" and inserting in lieu thereof "for the fiscal year 1978 not to exceed $5,000,000".

INTERNATIONAL NARCOTICS CONTROL

SEC. 3. Section 482 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 482. AUTHORIZATION.—To carry out the purposes of section 481, there are authorized to be appropriated to the President $39,000,000 for the fiscal year 1978. Amounts appropriated under this section are authorized to remain available until expended.".

ASSISTANCE TO PORTUGAL

SEC. 4. Chapter 10 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 497. BALANCE OF PAYMENTS LOAN FOR PORTUGAL.—(a) In recognition of the established interest of the United States in fostering a democratic government in Portugal, in maintaining the strength of the North Atlantic Treaty Organization alliance, and in supporting European economic recovery, the purpose of this section is to provide essential balance of payments assistance to Portugal.

"(b) The President is authorized to make balance of payments support loans to Portugal as part of a special international effort to assist that country in the development and implementation of a program to gain financial stability and economic recovery.

"(c) There are authorized to be appropriated to the President not to exceed $300,000,000 for the fiscal year 1978 to carry out the purposes of this section, which amount is authorized to remain available until expended.".

MILITARY ASSISTANCE

SEC. 5. (a) Section 504(a) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(a)(1) There are authorized to be appropriated to the President to carry out the purposes of this chapter not to exceed $228,900,000 for the fiscal year 1978. Not more than the following amounts of funds available to carry out this chapter may be allocated and made available for assistance to each of the following countries for the fiscal year 1978:

"Greece	$33,000,000
Portugal	25,000,000
Spain	15,000,000
Turkey	48,000,000
Jordan	55,000,000
Indonesia	15,000,000
Philippines	19,600,000
Thailand	8,000,000

The amount specified in this paragraph for military assistance to any such country for the fiscal year 1978 may be increased by not more than 10 per centum of such

amount if the President deems such increase necessary for the purposes of this chapter.

"(2) Except with respect to costs incurred under the authority of section 516(b) or as otherwise specifically authorized by law, none of the funds available for assistance under this chapter may be used to provide assistance to any recipient other than the countries specified in paragraph (1).

"(3) The authority of section 610(a) and of section 614(a) may not be used to increase any amount specified in paragraph (1) or to waive the limitations of paragraph (2).

"(4) Amounts appropriated under this subsection are authorized to remain available until expended.".

(b) Section 516(b) of the Foreign Assistance Act of 1961 is amended by striking out "paragraphs (2) and (3)" and inserting in lieu thereof "paragraph (2)".

STOCKPILING OF DEFENSE ARTICLES FOR FOREIGN COUNTRIES

SEC. 6. Section 514(b)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$93,750,000 for the period beginning July 1, 1975, and ending September 30, 1976, and $125,000,000 for the fiscal year 1977" and inserting in lieu thereof "$270,000,000 for the fiscal year 1978".

INTERNATIONAL MILITARY ASSISTANCE AND SALES PROGRAM MANAGEMENT

SEC. 7. (a) Section 515 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 515. OVERSEAS MANAGEMENT OF ASSISTANCE AND SALES PROGRAMS.—(a) No military assistance advisory group, military mission, or other organization of United States military personnel performing similar military advisory functions under this Act or the Arms Export Control Act may operate in any foreign county unless specifically authorized by the Congress. The prohibition contained in this subsection does not apply to regular units of the Armed Forces of the United States engaged in routine functions designed to bring about the standardization of military operations and procedures between the Armed Forces of the United States and countries which are members of the North Atlantic Treaty Organization or other defense treaty allies of the United States.

"(b)(1) In order to carry out his responsibilities for the management during the fiscal year 1978 of international security assistance programs conducted under this chapter, under chapter 5 of this part, or under the Arms Export Control Act, the President may assign members of the Armed Forces of the United States to perform necessary functions with respect to such programs in the countries specified in section 504(a)(1) and in the Republic of Korea, Panama, Brazil, Morocco, Iran, Kuwait, and Saudi Arabia. Members of the Armed Forces assigned under this subsection shall have as their primary functions logistics management, transportation, fiscal management, and contract administration of country programs. It is the sense of the Congress that advisory and training assistance in the countries specified above shall primarily be provided by personnel who are not assigned under this subsection and who are detailed for limited periods to perform specific tasks.

"(2) The total number of members of the Armed Forces assigned under this subsection to each country specified in paragraph (1) of this subsection may not exceed the number justified to the Congress in the congressional presentation materials, unless the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives are so notified.

"(3) Members of the Armed Forces authorized to be assigned to Iran, Kuwait, and Saudi Arabia by paragraph (1) of this subsection may only be assigned to such countries on a fully reimbursable basis under section 21(a) of the Arms Export Control Act, except that this requirement shall apply only to the extent that the number of members of the Armed Forces assigned to each country exceeds six.

"(c) The President may assign not to exceed three members of the Armed Forces to any country not specified in subsection (b)(1) to perform accounting and other management functions with respect to international security assistance programs conducted under this chapter, chapter 5 of this part, or under the Arms Export Control Act, except that not to exceed three additional members of the Armed Forces may be assigned to a country to perform such functions when specifically requested by the Chief of the Diplomatic Mission as necessary to the efficient operation of the Mission.

"(d) The total number of members of the Armed Forces assigned to foreign countries under subsections (b) and (c) may not exceed 865 for the fiscal year 1978.

"(e) Members of the Armed Forces assigned to a foreign country under subsection (b) or (c) shall serve under the direction and supervision of the Chief of the United States Diplomatic Mission in that country.

"(f) Defense attachés may perform overseas management functions described in this section only if the President determines that the performance of such functions by defense attachés is the most economic and efficient means of performing such functions. The President shall promptly report each such determination to the Speaker of the House of Representatives and to the chairman of the Senate Committee on Foreign Relations and the chairman of the Senate Committee on Armed Services, together with a description of the number of personnel involved and a statement of the reasons for such determination. The number of defense attachés performing overseas management functions in a country under this subsection may not exceed the number of defense attachés authorized to be assigned to that country on December 31, 1976.

"(g) The entire costs (including salaries of United States military personnel) of overseas management of international security assistance programs under this section shall be charged to or reimbursed from funds made available to carry out this chapter, including any such costs which are reimbursed from charges for services collected from foreign governments pursuant to sections 21(e) and 43(b) of the Arms Export Control Act. The prohibition contained in subsection (a) of this section and the numerical limitations contained in subsections (b), (c), and (d) of this section shall not apply to members of the Armed Forces performing services for specific purposes and periods of time on a fully reimbursable basis under section 21(a) of the Arms Export Control Act."

(b) Section 516(a) of the Foreign Assistance Act of 1961 is amended by striking out "515(b)(2)" and inserting in lieu thereof "515".

(c) Section 631(d) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "this Act" and inserting in lieu thereof "part I of this Act"; and

(2) by striking out all that follows after "economic officer of the mission" and inserting a period in lieu thereof.

(d) Section 43(b) of the Arms Export Control Act is amended to read as follows:

"(b) Charges for administrative services calculated under section 21(e)(1)(A) of this Act shall include recovery of administrative expenses incurred by any department or agency of the United States Government, including any mission or group thereof, in carrying out functions under this Act when—

"(1) such functions are primarily for the benefit of any foreign country; and

"(2) such expenses are not directly and fully charged to, and reimbursed from amounts received for, sale of defense services under section 21(a) of this Act.".

SECURITY SUPPORTING ASSISTANCE

SEC. 8. (a) Section 531 of the Foreign Assistance Act of 1961 is amended—

(1) by striking out in the last sentence thereof "The" and inserting in lieu thereof "Except for programs in southern Africa, the"; and

(2) by adding at the end thereof the following new sentence: "In planning security supporting assistance programs intended for economic development, the President shall take into account to the maximum extent feasible the policy directions set forth in chapter 1 of part I of this Act.".

(b) Section 532 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 532. AUTHORIZATION.—(a)(1) There are authorized to be appropriated to the President to carry out the purposes of this chapter for the fiscal year 1978 not to exceed $1,890,000,000, of which not less than the following amounts shall be available only for the following countries:

"Israel	$785,000,000
Egypt	750,000,000
Jordan	93,000,000
Syria	90,000,000
Lebanon	20,000,000
Cyprus	15,000,000

"(2) Of the amount authorized to be appropriated by paragraph (1) for the fiscal year 1978 which is available for Israel, not less than $300,000,000 shall be available only for budgetary support on a grant basis.

"(b) Amounts appropriated under this section are authorized to remain available until expended.".

(c) Chapter 4 of part II of such Act is amended by adding at the end thereof the following new section:

"SEC. 533. SOUTHERN AFRICAN SPECIAL REQUIREMENTS FUND.—(a)(1) Of the funds authorized to be appropriated by section 532 for the fiscal year 1978, $80,000,000 shall be available only for the countries of southern Africa to address the problems caused by the economic dislocation resulting from the conflict in that region, and for education and job training assistance for Africans from Namibia and Zimbabwe (Southern Rhodesia). Such funds may be used to provide assistance to African refugees and persons displaced by war and internal strife in southern Africa, to improve transportation links interrupted or jeopardized by regional political conflicts and to provide trade credits for the purchase of United States products to those countries in the region adversely affected by blocked outlets for their exports and by the overall strains of the world economy.

"(2) Of the funds made available under this section, not more than the following amounts may be made available for the following:

"Botswana	$15,000,000
Lesotho	15,000,000
Swaziland	5,000,000
Regional programs for education, training, and refugee assistance	45,000,000

"(3) To the extent practicable consistent with the purposes specified in paragraph (1), assistance under this section should be used to meet the objectives set forth in sections 102 (c) and (d) and in other sections of chapter 1 of part I of this Act.

"(4) Before obligating any funds under this section, the President shall notify the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate with respect

to the specific projects and programs for which such funds will be used.

"(b) Of the funds made available under subsection (a) of this section for regional programs, not to exceed $1,000,000 may be used by the President for the preparation of a comprehensive analysis of the development needs of southern Africa to enable the Congress to determine what contribution United States foreign assistance can make.

"(c)(1) None of the funds made available under this section may be used for military, guerrilla, or paramilitary activities in any country.

"(2) No assistance may be furnished under this section in Mozambique, Angola, Tanzania, or Zambia, except that the President may waive this prohibition with respect to any such country if he determines (and so reports to the Congress) that furnishing such assistance to that country would further the foreign policy interests of the United States.

"(d) It is the sense of the Congress that the United States should support an internationally recognized constitutional settlement of the Rhodesian conflict leading promptly to majority rule based upon democratic principles and upholding basic human rights. The Congress declares its intent to support United States participation in a Zimbabwe Development Fund. The Congress intends to authorize the necessary appropriation when progress toward such an internationally recognized settlement would permit establishment of the Fund."

REVIEW OF SECURITY SUPPORTING ASSISTANCE PROGRAM FOR EGYPT

SEC. 9. (a) It is the sense of the Congress that the security supporting assistance program for Egypt plays an important role in the Middle East peace effort and that the Executive branch should concentrate its efforts in order to make the program a success.

(b) In furtherance of the policy expressed in subsection (a), the Secretary of State shall convene a Special Interagency Task Force (hereafter in this section referred to as the "Task Force") to review and prepare a study on the security supporting assistance program for Egypt. The Task Force may employ consultants for the purpose of carrying out such study.

(c)(1) The Task Force shall review planned United States economic assistance to Egypt and shall suggest alternatives to such assistance. In carrying out this paragraph, the Task Force shall consider—

(A) the interrelationship of United States and Egyptian economic and political interests;

(B) the possibility of emphasizing programs designed to enhance the opportunities in Egyptian private business and agriculture sectors, with special emphasis on low-cost approaches to expedite development; and

(C) to the extent appropriate, the reviews of Egyptian economists and government officials.

(2) Based on an analysis of the considerations described in paragraph (1) and on such other considerations as it may find to be relevant, the Task Force shall develop a plan for the use of future United States economic assistance to Egypt. Such plan shall include, where necessary, suggestions for revising legislation, for specific development projects, and for the staff requirements of the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961.

(d)(1) In carrying out its responsibilities under paragraphs (1) and (2) of subsection (c), the Task Force shall consult, on a regular basis, with the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives.

(2) The Task Force shall transmit the plan developed pursuant to subsection (c)(2) to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate not later than February 15, 1978.

(e) Not to exceed $750,000 of the funds authorized and earmarked for security supporting assistance to Egypt in the fiscal year 1977 shall be available to carry out this section.

INTERNATIONAL MILITARY EDUCATION AND TRAINING

SEC. 10. Section 542 of the Foreign Assistance Act of 1961 is amended by striking out "$27,000,000 for the fiscal year 1976 and $30,200,000 for the fiscal year 1977" and inserting in lieu thereof "$31,000,000 for the fiscal year 1978".

PROHIBITION AGAINST ASSISTANCE AND SALES TO ARGENTINA

SEC. 11. Chapter 1 of part III of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 620B. PROHIBITION AGAINST ASSISTANCE AND SALES TO ARGENTINA.—After September 30, 1978—

"(1) no assistance may be furnished under chapter 2, 4, or 5 of part II of this Act to Argentina;

"(2) no credits (including participation in credits) may be extended and no loan may be guaranteed under the Arms Export Control Act with respect to Argentina;

"(3) no sales of defense articles or services may be made under the Arms Export Control Act to Argentina; and

"(4) no export licenses may be issued under section 38 of the Arms Export Control Act to or for the Government of Argentina.".

NUCLEAR ENRICHMENT AND REPROCESSING TRANSFERS; NUCLEAR DETONATIONS

SEC. 12. Chapter 3 of part III of the Foreign Assistance Act of 1961 is amended by striking out section 669 and inserting in lieu thereof the following new sections:

"SEC. 669. NUCLEAR ENRICHMENT TRANSFERS.—(a) Except as provided in subsection (b), no funds authorized to be appropriated by this Act or the Arms Export Control Act may be used for the purpose of providing economic assistance, providing military or security supporting assistance or grant military education and training, or extending military credits or making guarantees, to any country which, on or after the date of enactment of the International Security Assistance Act of 1977, delivers nuclear enrichment equipment, materials, or technology to any other country, or receives such equipment, materials, or technology from any other country, unless before such delivery—

"(1) the supplying country and receiving country have reached agreement to place all such equipment, materials, or technology, upon delivery, under multilateral auspices and management when available; and

"(2) the recipient country has entered into an agreement with the International Atomic Energy Agency to place all such equipment, materials, technology, and all nuclear fuel and facilities in such country under the safeguards system of such Agency.

"(b)(1) Notwithstanding subsection (a) of this section, the President may furnish assistance which would otherwise be prohibited under such subsection if he determines and certifies in writing to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate that—

"(A) the termination of such assistance would have a serious adverse effect on vital United States interests; and

"(B) he has received reliable assurances that the country in question will not acquire or develop nuclear weapons or assist other nations in doing so.

Such certification shall set forth the reasons supporting such determination in each particular case.

"(2) Any joint resolution which would terminate or restrict assistance described in subsection (a) with respect to a country to which the prohibition in such subsection applies shall, if introduced within thirty days after the transmittal of a certification under paragraph (1) of this subsection with respect to such country, be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

"SEC. 670. NUCLEAR REPROCESSING TRANSFERS AND NUCLEAR DETONATIONS.—(a) Except as provided in subsection (b), no funds authorized to be appropriated by this Act or the Arms Export Control Act may be used for the purpose of providing economic assistance, providing military or security supporting assistance or grant military education and training, or extending military credits or making guarantees, to any country which on or after the date of enactment of the International Security Assistance Act of 1977—

"(1) delivers nuclear reprocessing equipment, materials, or technology to any other country or receives such equipment, materials, or technology from any other country (except for the transfer of reprocessing technology associated with the investigation, under international evaluation programs in which the United States participates, of technologies which are alternatives to pure plutonium reprocessing); or

"(2) is not a nuclear-weapon state as defined in article IX(3) of the Treaty on the Non-Proliferation of Nuclear Weapons and which detonates a nuclear explosive device.

"(b)(1) Notwithstanding subsection (a) of this section, the President may furnish assistance which would otherwise be prohibited under such subsection if he determines and certifies in writing to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate that the termination of such assistance would be seriously prejudicial to the achievement of United States nonproliferation objectives or otherwise jeopardize the common defense and security. The President shall transmit with such certification a statement setting forth the specific reasons therefor.

"(2) Any joint resolution which would terminate or restrict assistance described in subsection (a) with respect to a country to which the prohibition in such subsection applies shall, if introduced within thirty days after the transmittal of a certification under paragraph (1) of this subsection with respect to such country, be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.".

MIDDLE EAST PEACE

SEC. 13. Section 903 of the Foreign Assistance Act of 1961 is amended—

(1) in subsection (a), by striking out "for the fiscal year 1976 not to exceed $50,000,000 and for the fiscal year 1977 not to exceed $35,000,000" and inserting in lieu thereof "for the fiscal year 1978 not to exceed $25,000,000, of which not less than $12,200,000 shall be available only for the Sinai support mission,";

(2) in subsection (b)—

(A) in paragraph (1)—

(i) by striking out "and" at the end of clause (B), and

(ii) by inserting immediately before the semicolon at the end thereof ", and (D) the reasons why the President has determined

that it is in the national interest to use funds appropriated under this section for such purpose rather than (i) using funds available for such purpose under part I, or (ii) if no funds are available for such purpose under part I, awaiting the enactment of legislation making funds specifically available for such purpose"; and

(B) in paragraph (2), by striking out "provided by clauses (A), (B), and (C) of" and inserting in lieu thereof "required by"; and

(3) in subsection (e), by striking out "1977" and inserting in lieu thereof "1978".

PROHIBITION ON ASSISTANCE FOR NUCLEAR POWERPLANTS

SEC. 14. None of the funds made available to carry out the Foreign Assistance Act of 1961 for the fiscal year 1978 may be used to finance the construction of, the operation or maintenance of, or the supply of fuel for, any nuclear powerplant under an agreement for cooperation between the United States and any other country.

REPEAL OF PROHIBITION RELATING TO THE TWELVE-MILE FISHING LIMIT

SEC. 15. Section 3(b) of the Arms Export Control Act is repealed.

CONGRESSIONAL DISAPPROVAL OF THIRD COUNTRY TRANSFERS

SEC. 16. Section 3(d) of the Arms Export Control Act is amended—

(1) by striking out ", 30 days prior to giving such consent," in the text preceding paragraph (1);

(2) by redesignating such section as section 3(d)(1) and redesignating paragraphs (1) through (5) thereof as subparagraphs (A) through (E), respectively; and

(3) by adding the following new paragraph at the end thereof:

"(2) Unless the President states in the certification submitted pursuant to this subsection that an emergency exists which requires that consent to the proposed transfer become effective immediately in the national security interests of the United States, such consent shall not become effective until 30 calendar days after the date of such submission and such consent shall become effective then only if the Congress does not adopt, within such 30-day period, a concurrent resolution disapproving the proposed transfer.".

TRANSFERS OF DEFENSE ARTICLES AND DEFENSE

SEC. 17. Section 3(d) of the Arms Export Control Act, as amended by section 16 of this Act, is further amended by adding the following new paragraph at the end thereof:

"(3) This subsection shall not apply—

"(A) to transfers of maintenance, repair, or overhaul defense services, or of the repair parts or other defense articles used in furnishing such services, if the transfer will not result in any increase, relative to the original specifications, in the military capability of the defense articles and services to be maintained, repaired, or overhauled;

"(B) to temporary transfers of defense articles for the sole purpose of receiving maintenance, repair, or overhaul; or

"(C) to cooperative cross servicing arrangements among members of the North Atlantic Treaty Organizations.".

PROHIBITION AGAINST SALES, CREDITS, AND GUARANTIES TO COUNTRIES WHICH GRANT SANCTUARY TO INTERNATIONAL TERRORISTS

SEC. 18. Section 3 of the Arms Export Control Act is amended by adding at the end thereof the following new subsection:

"(f)(1) Unless the President finds that the national security requires otherwise, he shall terminate all sales, credits, and guaranties under this Act to any government which aids or abets, by granting sanctuary from prosecution to, any individual or group which has committed an act of international terrorism. The President may not thereafter make or extend sales, credits, or guaranties to such government until the end of the one year period beginning on the date of such termination, except that if during its period of ineligibility for sales, credits, and guaranties pursuant to this section such government aids or abets, by granting sanctuary from prosecution to, any other individual or group which has committed an act of international terrorism, such government's period of ineligibility shall be extended for an additional year for each such individual or group.

"(2) If the President finds that the national security justifies a continuation of sales, credits, or guaranties to any government described in paragraph (1), he shall report such finding to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate.".

FOREIGN MILITARY SALES AUTHORIZATION AND AGGREGATE CEILING

SEC. 19. Section 31 of the Arms Export Control Act is amended—

(1) in subsection (a), by striking out all in the first sentence after "not to exceed" the first time it appears and inserting in lieu thereof "$667,000,000 for the fiscal year 1978.";

(2) in subsection (b), by striking out all after "shall not exceed" the first time it appears and inserting in lieu thereof "$2,102,350,000 for the fiscal year 1978, of which not less than $1,000,000,000 shall be available only for Israel."; and

(3) in subsection (c)—

(A) in the first sentence, by striking out "the fiscal years 1976 and 1977" and inserting in lieu thereof "the fiscal year 1978"; and

(B) in the last sentence, by striking out "each".

LICENSES FOR THE EXPORT OF CERTAIN MAJOR DEFENSE EQUIPMENT

SEC. 20. Section 38(b)(3) of the Arms Export Control Act is amended by adding at the end thereof the following new sentence: "The prohibition contained in the first sentence of this paragraph shall not apply to the issuance of licenses under this section for the export of major defense equipment to Australia, Japan, or New Zealand, or major defense equipment sold commercially in implementation of an agreement between the United States Government and the government of a foreign country for the production of the major defense equipment to which such licenses relate if the President has submitted a certificate with respect to such proposed agreement, prior to its signature, to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate in the same form as the certification required under section 36(b) of this Act and subject to the requirements of such section.".

FISCAL YEAR 1977 AUTHORIZATIONS AND LIMITATIONS

SEC. 21. Authorizations of appropriations and limitations of authority applicable to the fiscal year 1977 contained in provisions of law amended by this Act shall not be effected by enactment of this Act.

ASSISTANCE AND SALES TO GREECE AND TURKEY

SEC. 22. (a) In addition to any amounts authorized to be appropriated by any amendment made by this Act which may be available for such purpose, there are authorized to be appropriated such sums as may be necessary for the fiscal year 1978 to carry out international agreements relating to defense cooperation with Greece and Turkey.

(b) No funds appropriated under this section may be obligated or expended to carry out any agreement described in subsection (a) until legislation has been enacted approving such agreement.

(c) Funds appropriated for the fiscal year 1978 may not be obligated for assistance to Turkey under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961, other than in accordance with section 620(x) of such Act.

(d) Section 620(x)(1) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out "for the fiscal year 1976, the period beginning July 1, 1976, and ending September 30, 1976, and the fiscal year 1977," and inserting in lieu thereof "for the fiscal year 1978";

(2) by striking out "(A) during the fiscal year 1976 and the period beginning July 1, 1976, and ending September 30, 1976, the total value of defense articles and defense services sold to Turkey under such Act, either for cash or financed by credits and guaranties, shall not exceed $125,000,000, and (B) during the fiscal year 1977," and inserting in lieu thereof "during the fiscal year 1978"; and

(3) by striking out "$125,000,000" the second place it appears and inserting in lieu thereof "$175,000,000".

ARMS SALES AND UNITED STATES DEFENSE READINESS

SEC. 23. The President shall prepare and submit to the Congress not later than March 15, 1978, a report on the impact of United States foreign arms sales and transfers on United States defense readiness and national security. The report should focus on arms sales since 1972 and discuss the impact of such sales on United States troops stationed overseas. The report shall also include an analysis of United States foreign arms sales and transfers which have involved agreements entered into by the United States for the purchase or acquisition by the United States of defense articles, services, or equipment, or other articles, services, or equipment of any foreign country or international organization in connection with or as consideration for such United States foreign arms sales and transfers, including—

(1) an analysis of the impact such agreements have had upon United States business concerns which might otherwise have provided such articles, services, or equipment to the United States;

(2) an estimate of the costs incurred by the United States in connection with such agreements compared with the costs which would otherwise have been incurred;

(3) an estimate of the economic impact and unemployment which have resulted from such agreements; and

(4) an analysis of whether such costs and such domestic economic impact have justified entering into such agreements.

STUDY OF TECHNOLOGY TRANSFERS

SEC. 24. (a) The President shall conduct a comprehensive study of the policies and practices of the United States Government with respect to the national security and military implications of international transfers of technology in order to determine whether such policies and practices should be changed. Such study shall examine—

(1) the nature of technology transfer;

(2) the effect of technology transfers on United States technological superiority;

(3) the rationale for transfers of technology from the United States to foreign countries;

(4) the benefits and risks of such transfers;

(5) trends in technology transfers by the United States and other countries;

(6) the need for controls on transfers of technology, including controls on the use of transferred technology, the effectiveness of existing end-use controls, and possible unilateral sanctions if end-use restrictions are violated;

(7) the effectiveness of existing organizational arrangements in the Executive branch in regulating technology transfers from the United States;

(8) the adequacy of existing legislation and regulations with respect to transfers of technology from the United States; and

(9) the possibilities for international agreements with respect to transfers of technology.

(b) In conducting the study required by subsection (a), the President shall utilize the resources and expertise of the Arms Control and Disarmament Agency, the Department of State, the Department of Defense, the Department of Commerce, the National Science Foundation, the Office of Science and Technology Policy, and such other entities within the Executive branch as he deems necessary.

(c) Not later than the end of the one-year period beginning on the date of enactment of this section, the President shall submit to the Congress a report setting forth in detail the findings made and conclusions reached as a result of the study conducted pursuant to subsection (a), together with such recommendations for legislation and administrative action as the President deems appropriate.

POLICY OF ZAIRE

SEC. 25. No assistance of any kind may be furnished for the fiscal year 1978 for the purpose, or which would have the effect, or promoting or augmenting, directly or indirectly, any military or paramilitary operations in Zaire unless and until the President determines that such assistance should be furnished in the national security interests of the United States and submits to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate a report containing—

(1) a detailed description of the assistance proposed to be furnished, including the amounts of such assistance, the categories and specific kinds of assistance proposed, and the purposes for which such assistance will be used; and

(2) a certification that the President has determined that the furnishing of such assistance is important to the national security interests of the United States and a detailed statement, in unclassified form, of the reasons supporting such determination.

POLICY STATEMENT ON UNITED STATES ARMS SALES TO ISRAEL

SEC. 26. In accordance with the historic special relationship between the United States and Israel and previous agreements and continuing understandings, the Congress joins with the President in reaffirming that a policy of restraint in United States arms transfers, including arms sales ceilings, shall not impair Israel's deterrent strength or undermine the military balance in the Middle East.

REVIEW OF ARMS SALES CONTROLS ON NON-LETHAL ITEMS

SEC. 27. The President shall undertake a review of all regulations relating to arms control for the purpose of defining and categorizing lethal and non-lethal products and establishing the appropriate level of control for each category.

REPUBLIC OF KOREA

SEC. 28. (a)(1) It is the sense of the Congress that the President should take all effective measures to assure that the Republic of Korea is cooperating fully with the investigation (including any resulting prosecutions) being conducted by the Department of Justice with respect to allegations of improper activity in the United States by agents of the Republic of Korea.

(2) Accordingly, the President is requested to report to the Congress, within ninety days after the date of enactment of this Act and once during each ninety-day period thereafter while such investigation (including any resulting prosecutions) is underway, with respect to the extent to which the Republic of Korea is cooperating with such investigation.

(b) It is the further sense of the Congress that the President should take all effective measures to assure that the Republic of Korea is cooperating fully with the investigations being conducted by committees of Congress.

PIASTER CONVERSION

SEC. 29. No provision of law shall be construed to prevent payment of claims of former and present Vietnamese employees of the Agency for International Development, who presently reside in the United States, for the conversion of Vietnamese piasters to dollars because such conversion cannot take place in the territory of the former Republic of Vietnam or because the official with whom such piasters were deposited was not a United States disbursing officer.

And the Senate agree to the same.

Additional Information Requirements for Section 36(b) Reports to Congress.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6884), to amend the Foreign Assistance Act of 1961 to authorize international security assistance programs for fiscal year 1978, to amend the Arms Export Control Act to make certain changes in the authorization of that Act, and for other purposes, submit the following joint statement to the House and to the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The committee of conference recommends a substitute for both the House bill and the Senate amendment.

The differences between the two Houses and the adjustments made in the committee of conference are noted below except for clerical corrections, necessary conforming changes and minor drafting and clarifying changes.

The committee of conference agreement contained authorizations for appropriations for international security assistance for fiscal year 1978 of $3,195,900,000 which represents a reduction of $6,950,000 in the House figure, an increase of $1,200,000 in the Senate figure and a reduction of $53,050,000 in the amount requested by the executive branch.

The amounts approved by the committee of conference compared to the amounts requested by the executive branch and recommended by the House and Senate follow:

[In millions of dollars]

	Executive request	House recommendation	Senate recommendation	Conference agreement
Military assistance programs:				
Grant military assistance	230.0	228.9	230.0	228.9
International military education and training	35.0	31.4	30.0	31.0
Foreign military sales credits	707.75	675.85	678.5	677.0
FMS aggregate ceiling	[1] (2,217.5)	[1] (2,098.5)	[1] (2,104.5)	[1] (2,102.35)
Economic assistance programs:				
Security supporting assistance	[2 3 4] 1,907.2	[3 4] 2,214.7	[3 4] 1,875.0	1,890.0
Loan to Portugal	[3] 300.0	(5)	[3] 300.0	[3] 300.0
Middle East Special Requirements Fund	[4] 25.0	8.0	[4] 37.2	[4] 25.0
Other programs:				
International narcotics control	39.9	39.0	39.0	39.0
Contingency fund	5.0	5.0	5.0	5.0
Total	3,248.95	3,202.85	3,194.7	3,195.9

[1] The FMS aggregate ceiling represents the total program which could be funded under FMS credit authorization of $677,000,000. The aggregate ceiling is not an authorization of funds.

[2] This figure includes $20,000,000 which the executive branch requested be authorized as disaster relief assistance for Lebanon for fiscal year 1978. Both the House bill and the Senate amendment authorize $20,000,000 in security supporting assistance for Lebanon for fiscal year 1978.

[3] The executive branch requested and the Senate authorized $300,000,000 for a balance of payments loan for Portugal. The House included $300,000,000 in its authorization for security supporting assistance for economic development loan on nonconcessional terms for Portugal.

[4] The executive branch requested and the House authorized $12,200,000 in security supporting assistance for the Sinai support mission. The Senate included $12,200,000 for Sinai support mission in its authorization for the Middle East Special Requirements Fund. Of the $25,000,000 agreed to by the conference committee for the Middle East Special Requirements Fund, $12,200,000 is earmarked for the Sinai support mission.

SHORT TITLE

The short title of the House bill was the "International Security Assistance Act of 1977".

The short title of the Senate amendment was the "International Security Assistance and Arms Export Control Act of 1977".

The committee of conference adopted the House title.

NARCOTICS CONTROL ASSISTANCE EARMARKING FOR MEXICO

The Senate amendment amended Section 482 of Foreign Assistance Act of 1961 to provide that not less than $12,500,000 of the International Narcotics Control authorization will be expended for narcotics control programs in Mexico.

The House bill did not contain a comparable provision for this account.

The committee of conference accepted the House position with the understanding that, barring unforeseen circumstances, $12,500,000 of the amount authorized for narcotics control assistance in fiscal year 1978 would be made available for programs in Mexico. In addition, the committee of conference questions the advisability of providing four fixed-wing aircraft to Burma under the narcotics control assistance program. Given the terrain in eastern Burma, helicopters are much more effective than fixed-wing aircraft. The Department of State should review the narcotics control assistance program for Burma. In the event that the decision is made to proceed with the program as presented to the Congress, every assurance should be obtained that the aircraft will be used for narcotics control purposes and not against those insurgents that are not involved in the illegal production of or trafficking in narcotics and other dangerous drugs.

STOCKPILING

The House bill amended section 514 of the Foreign Assistance Act of 1961 and established a ceiling of $255 million on the value of fiscal year 1978 additions to "War Reserve Stocks—Allies".

The Senate amendment established a ceiling of $270 million.

The committee of conference adopted the Senate provision.

INTERNATIONAL MILITARY ASSISTANCE AND SALES MANAGEMENT

A. Prohibition on military assistance advisory groups

The House bill retained the provisions of section 515 of the Foreign Assistance Act of 1961 which provides that no military assistance advisory groups, including missions or other organizations of U.S. military personnel performing military advisory functions may operate in any foreign country unless specifically authorized by the Congress.

The Senate amendment amended section 515 of the Foreign Assistance Act of 1961 to authorize the assignment of members of the Armed Forces to perform necessary functions with respect to military assistance and sales programs.

The committee of conference adopted the House version. The committee of conference supports the continued phase-out of military assistance advisory groups and expects the executive branch to review thoroughly the need for such groups in fiscal year 1979.

B. Authorization for management teams

The House bill authorized the assignment for fiscal year 1978 of overseas management teams in Greece, Portugal, Spain, Turkey, Jordan, Indonesia, Philippines, Thailand, Korea, and Panama to perform necessary functions relating to the management of military assistance, international military education and training and foreign military sales programs.

The Senate amendment amended the same section to authorize the assignment of overseas management teams in the same countries specified in the House bill and also in Brazil, Iran, Kuwait, Liberia, Morocco, Saudi Arabia, and Zaire. The primary functions are to be procurement, logistics, management, transportation, fiscal management, and contract administration of country programs.

The committee of conference adopted the House provision, but amended it to authorize additional management teams in Kuwait Iran, Saudi Arabia (on a fully reimbursable basis) and in Brazil and Morocco.

Furthermore, the committee of conference adopted Senate language which states that the primary functions of such management teams shall be logistics management, transportation, fiscal management and contract administration of country programs. Procurement is not a primary function and foreign governments should be encouraged, to the maximum extent possible, to establish their own procurement offices in the United States. It is the conference committee's intent that the management teams for Korea, Panama, Brazil, and Morocco will be authorized for 1 year only. Since currently the United States maintains in Liberia and Zaire respectively 9 and 10 military personnel, a reduction to a maximum of 6 such personnel is viewed as imposing no undue obstacle to efficient management and continued close cooperation with these two countries.

C. Limitation on size of management teams

The House bill provided that the aggregate number of Armed Forces personnel assigned to perform military assistance management functions in the countries designated above may not exceed 400.

The Senate amendment provided that the number of Armed Forces personnel assigned under subsection (b)(1) to each designated country may not exceed the number proposed in the congressional presentation materials unless the appropriate congressional committees are notified. The Senate amendment also provided that the total number of Armed Forces personnel authorized either to the overseas management teams or as members of the 3/6 member teams (see item D below) performing similar functions may not exceed 900.

The committee of conference accepted the Senate version with an amendment to specify that the House International Relations Committee and Senate Foreign Relations Committee are the appropriate congressional committees. The committee of conference also accepted a compromise limit on the total number of personnel authorized of 865.

D. Authorization for three/six member teams

The House bill authorized the President to assign three members of the Armed Forces to perform "accounting and similar management" functions in countries other than those for which a specific authorization has been made. This provision also authorized the President to assign three additional members when requested by the Chief of the Diplomatic Mission and when judged by the President to be in the national interest and so reported to the Congress.

The Senate amendment was similar except that it allowed these teams to perform procurement, logistics management, transportation, fiscal management, and contract administration of country programs with respect to military assistance, training, and sales programs. The Senate amendment did not require a Presidential determination of national interest for the assignment of three additional members.

The committee of conference adopted the House version with an amendment changing "similar" to "other" management functions. It also eliminated the Presidential determination requirement. The committee of conference interprets other management functions to include limited security assistance and advisory services.

E. Defense attachés

The House bill prohibited defense attachés from performing security assistance management functions in the countries having an overseas management team or a 3/6 member team. In countries not having such a team, defense attachés could perform accounting and similar management functions if the President determined that it was in the national interest and so reported to Congress.

The Senate amendment provided that defense attachés may not perform security assistance functions unless the President determined such performance is the "most economic and efficient means of performing such functions" and so reported to Congress. The number of attachés assigned by Presidential determination to perform management function in a country could not exceed the number authorized to be so assigned to that country as of December 31, 1976. The Senate amendment also provided that mem-

bers of the Armed Forces assigned to overseas management teams or to 3/6 member teams may not serve concurrently as defense attachés.

The committee of conference adopted a compromise version that allows attachés to perform overseas management functions with respect to security assistance programs if the President determines that attaché performance is the "most economic and efficient means of performing such functions" and so reports to Congress. The committee of conference retained the Senate provision limiting the number of attachés assigned to perform security assistance functions to the number authorized to be assigned on December 31, 1976.

F. Performance of advisory and training functions

The House bill stated that the prohibitions relating to performance of military advisory functions do not apply to personnel performing services on a fully reimbursable basis under the Arms Export Control Act.

The Senate amendment stated that the limitations on the number of personnel assigned to perform security assistance functions do not apply to personnel performing services "for specific purposes and periods of time" on a fully reimbursable basis under section 21 of the Arms Export Control Act.

The Senate amendment also stated that it is the sense of the Congress that advisory and training assistance overseas shall primarily be provided by personnel not assigned pursuant to this authorization and who are detailed for limited periods to perform specific tasks.

The committee of conference adopted the Senate amendment, but interprets "specific purposes and periods of time" to mean, generally, that personnel of the armed forces overseas under this section have as their mission a single definable task to be completed in a period of time not to exceed two years.

G. Charges for administrative services

The Senate amendment amended section 43(b) of the Arms Export Control Act to clarify accounting procedures relating to foreign military sales of defense services.

The House bill did not contain a comparable provision.

The committee of conference accepted the Senate provision.

PURPOSE OF SECURITY SUPPORTING ASSISTANCE

The House bill amended section 531 of the Foreign Assistance Act of 1961 to provide that to the extent possible, consistent with the primary purposes of security supporting assistance to promote economic and political stability, such assistance should be used to meet the "New Directions" objectives—that is—involve the poor in development. In particular, such assistance should avoid large scale projects requiring substantial capital such as highway building and improvement.

The Senate amendment directed the President, in planning Security Supporting Assistance programs intended for economic development, to take into account to the maximum extent feasible the "New Directions" policy directives.

The committee of conference adopted the Senate provision, with the understanding that the executive branch is to be strongly encouraged to avoid to the extent practical using Security Supporting Assistance for large scale projects requiring substantial capital such as highway building and improvement. The committee of conference notes that the security supporting assistance program is increasing. It is, therefore, essential that funds authorized and appropriated to finance such programs not be obligated or expended without taking into consideration the long term consequences to the economic well being of the recipient country.

EARMARKINGS FOR SECURITY SUPPORTING ASSISTANCE

A. Budgetary support for Israel

The House bill amended section 532 of Foreign Assistance Act of 1961 to provide that not less than $300 million of the amount authorized for Israel shall be available only for budgetary support on a grant basis.

The Senate amendment did not have a comparable provision, but the Foreign Relations Committee report stated that the committee intended that not less than $300 million of the amount appropriated for Israel be provided as a cash grant.

The committee of conference adopted the House provision.

B. Grant assistance for Egypt

The House bill amended section 532 of the Foreign Assistance Act of 1961 to provide that not less than 60% of the funds authorized for assistance to Egypt shall be on a grant basis.

The Senate amendment did not contain a comparable provision.

The committee of conference adopted the Senate provision. It is the intent of the committee of conference, however, that the executive branch will consider providing a greater percentage of security supporting assistance to Egypt in the form of grant rather than on a loan basis.

C. Assistance for Cyprus

The House bill amended section 532 of Foreign Assistance Act of 1961 to provide that not less than $7.5 million of the funds authorized for security supporting assistance shall be available for Cyprus.

The Senate amendment amended the same section to provide that not less than $15 million of the funds authorized for security supporting assistance shall be available for Cyprus.

COUNTRY LIMITATIONS ON SECURITY SUPPORTING ASSISTANCE

The House bill amended section 532 of Foreign Assistance Act of 1961 to provide that Cyprus, Lebanon, and Portugal shall not be counted in fiscal year 1978 for purposes of the 12-country limitation established under section 531 of the Foreign Assistance Act of 1961.

The Senate amendment did not contain a comparable provision.

The committee of conference adopted the Senate position.

ASSISTANCE FOR SOUTHERN AFRICA

A. Southern Africa Special Requirements Fund

The House bill:

(1) Earmarked $100 million of Security Supporting Assistance for a Southern Africa Special Requirements Fund for the countries of Southern Africa. [In addition, the worldwide Security Supporting Assistance program approved by the House included but did not earmark the following amounts for the following recipients, $10 million for Zaire, $10.5 million for Swaziland, $3 million for Botswana, $5 million for Lesotho, and $6.5 million for regional programs in southern Africa.]

(2) Provide that the money in the Southern African Special Requirements Fund be used to address the problems caused by the economic dislocation resulting from the conflict in that region, and for education and job training assistance for Africans from Namibia and Zimbabwe (Southern Rhodesia). Such funds could be used to provide assistance to African refugees and persons displaced by war and internal strife in southern Africa, to improve transportation links interrupted or jeopardized by regional political conflicts, and to provide trade credits for the purchase of United States products to those countries in the region adversely affected by blocked outlets for their exports and by the overall strains of the world economy. To the extent practicable, consistent with the above purposes, assistance should be furnished to meet the "New Directions" objectives.

(3) Also provide that the President shall notify the Congress before obligating money in the Southern African Special Requirements Fund, specifying the specific projects and programs to be funded.

The Senate amendment had no comparable provision, but amended section 532 of the Foreign Assistance Act of 1961 to provide that not more than the following amounts of Security Supporting Assistance shall be available for the following countries: $10 million for Zaire, $17.5 million for Zambia, $17.5 million for Swaziland, $17.5 million for Botswana, and $12.5 million for Lesotho, and that no security assistance funds shall be used in countries of southern Africa for military, guerrilla, or paramilitary activities.

The committee of conference adopted the House provision with an amendment reducing the amount for the Southern African Special Requirements Fund from $100 million to $80 million. Of this amount, the committee of conference authorized not more than $15 million for Botswana, $15 million for Lesotho, $5 million for Swaziland, and $45 million for regional programs in countries in southern Africa for purposes specified in A(2) above, and for a study of the development needs of southern Africa. The committee of conference also retained the prohibition on the use of funds in countries of southern Africa for military, guerrilla, or paramilitary activities.

Although no funds are earmarked for Zaire it is the understanding of the committee of conference that not more than $10 million of Security Supporting Assistance will be used for programs in that country in fiscal year 1978. Furthermore, although no funds have been specifically earmarked for Zambia, in either the overall security supporting assistance program authorization or the Southern African Special Requirements Fund, the committee of conference intends that up to $30 million of the overall program funds be spent on Zambia.

B. Study of development needs of Southern Africa

The Senate amendment amended Section 532 of the Foreign Assistance Act of 1961 to provide that not to exceed $1 million of the security supporting assistance authorization may be used for the preparation of a comprehensive analysis of the development needs of Southern Africa.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision with an amendment providing that the study will be funded out of funds for regional programs in the Southern African Special Requirements Fund.

The committee of conference supported the language in the Senate report relating to the use of funds for the Southern Africa study and in addition suggested that the following guidance would be helpful to the executive branch. The close cooperation of the State Department and AID with leading African scholars and nationals from Southern Africa is vital to the success of the project. U.S. objectives in Southern Africa should be clearly defined, and U.S. assistance should be coordinated with other donors and international agencies. It is important to examine the development needs of an independent Zimbabwe in order to determine the extent and type of U.S. participation in the proposed Zimbabwe Development Fund, but a parallel effort is required to develop an overall coordinated foreign assistance strategy for the independent countries in Southern Africa to which assistance is being provided under this legislation.

C. Assistance to Mozambique, Angola, Tanzania, or Zambia

The House bill added a new section 533 to the Foreign Assistance Act of 1961 to prohibit the use of money in the Southern African Special Requirements Fund for Mozambique, Angola, Tanzania, or Zambia. The President could waive the prohibition if he determined that furnishing assistance would further U.S. foreign policy interests.

The Senate amendment prohibited the use of any assistance under this act for the same countries with the same waiver provision.

The committee of conference adopted the House provision.

D. Zimbabwe development fund

The House bill added a new section 533 to the Foreign Assistance Act of 1961 to state that the Congress supports the President's efforts to bring about a negotiated transition to majority rule in Zimbabwe (southern Rhodesia) and encourages the President upon the conclusion of a firm agreement on majority rule in Zimbabwe (southern Rhodesia) to take the initiative in mounting an international effort to develop and support a special fund for Zimbabwe (southern Rhodesia) to further economic justice and development under the new government.

The Senate amendment amended section 532 of the Foreign Assistance Act of 1961 to provide that it is the sense of the Congress that the United States should support an internationally recognized constitutional settlement of the Rhodesia conflict leading promptly to majority rule based upon democratic principles and upholding basic human rights, that the Congress intends to support United States participation in a Zimbabwe Development Fund as a means of promoting these objectives, with the understanding that the initial United States contribution to this Fund would be $100 million, and that the Congress intends to authorize the necessary appropriation when progress toward such an internationally recognized settlement would permit establishment of the Fund.

The committee of conference adopted the Senate provision with an amendment to delete the specific amount of the Fund.

BALANCE OF PAYMENTS LOAN FOR PORTUGAL

The House bill amended section 532 of the Foreign Assistance Act of 1961 to authorize $300 million in security supporting assistance for economic development loans on nonconcessional terms for Portugal. It also added a new section 534 to the Foreign Assistance Act of 1961 to provide that not more than $200 million may be used for such purpose unless the President (1) certifies that other countries will contribute at least $300 million, or (2) explains to the House International Relations Committee and Senate Foreign Relations Committee why more than $200 million should be used for this purpose and the respective committees approved such use.

The Senate amendment added a new section 497 to the Foreign Assistance Act of 1961 to authorize the appropriation of $300 million for "balance of payment support loans to Portugal as part of a special international effort to assist that country in the development and implementation of a program to gain financial stability and economic recovery." The Senate amendment also had the following statement explaining why such assistance was being authorized: "In recognition of the established interest of the United States in fostering a democratic government in Portugal, in maintaining the strength of the NATO alliance and in supporting European economic recovery, the purpose of this section is to provide essential balance of payments assistance to Portugal."

The committee of conference adopted the Senate provision.

REVIEW OF SECURITY SUPPORTING ASSISTANCE PROGRAMS FOR EGYPT

The Senate amendment added a new section 534 to the Foreign Assistance Act of 1961 to direct the Secretary of State to convene a special Interagency Task Force to review the security supporting assistance program for Egypt. The task force was to be advised by and to report (not later than February 15, 1978) to an advisory board consisting of four Members of Congress. Not to exceed $1 million of security supporting assistance funds for Egypt was to be available to finance the study.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision with an amendment which deleted the provision creating an advisory board made up of Members of the Congress. Instead, the task force would be required to consult with the Foreign Relations Committee of the Senate and the Committee on International Relations of the House, and to report to the Speaker of the House and the Foreign Relations Committee of the Senate. The amount available to fund the study was reduced from $1 million to $750,000.

PROHIBITION ON USE OF FOREIGN ASSISTANCE ACT FUNDS FOR NUCLEAR POWERPLANTS

The House bill added a new subsection (4) to Section 620 of the Foreign Assistance Act of 1961 to prohibit the use of funds authorized under the Foreign Assistance Act of 1961, to finance the construction, operation or maintenance of, or the supply of fuel for, any nuclear powerplant.

The Senate amendment did not contain a comparable provision.

The committee of conference adopted the House provision with an amendment limiting the prohibition on the use of such funds for nuclear powerplants to fiscal year 1978 only.

PROHIBITION AGAINST MILITARY ASSISTANCE AND SALES TO ETHIOPIA AND ARGENTINA

A. Ethiopia

The Senate amendment added a new section 620B to the Foreign Assistance Act of 1961 to prohibit—

(1) grant military assistance, international military education and training, security supporting assistance, and foreign military sales financing for Ethiopia;

(2) foreign military sales to Ethiopia; and

(3) deliveries to Ethiopia of any military equipment financed under grant military assistance or foreign military sales programs.

This provision also permitted the President to waive the provisions prohibiting further military sales and deliveries of military equipment if he determined such sales and deliveries to be in the national interest and so reported to Congress.

The House bill did not contain a comparable provision although funding for Ethiopia was deleted from the military assistance program, international military education and training program and foreign military sales authorizations in the provision of the bill authorizing funds for such programs.

The committee of conference adopted the House position with the intention that no funds would be used for programs to Ethiopia. It is also the understanding of the committee of conference that the current policy of the United States is not to provide defense articles and defense services to Ethiopia. Should this policy change because of political changes in Ethiopia it is expected that the executive branch will consult with the Congress in advance of any such policy change.

B. Argentina

The Senate amendment also added a new section 620C to the Foreign Assistance Act of 1961 to prohibit after fiscal year 1978—

(1) grant military assistance, military education and training, security supporting assistance, and foreign military sales financing to Argentina; and

(2) foreign military sales and the issuance of export licenses to Argentina.

The House bill did not contain a comparable provision although funds which were programed for foreign military sales financing for Argentina were deleted from the provision of the House bill authorizing funds for the worldwide foreign military sales program.

The committee of conference adopted the Senate provision with an amendment specifying that the prohibition on granting of export licenses is intended to apply only to licensed sales of defense articles or services to or for the Government of Argentina (which would include any agency or representative of the Government of Argentina).

NUCLEAR ENRICHMENT AND REPROCESSING TRANSFERS: FOREIGN ASSISTANCE CUTOFF FOR NUCLEAR DETONATION

The House bill makes no changes in existing law (section 669 of the Foreign Assistance Act) which prohibits economic, military, international military education, and training security supporting assistance, and foreign military sales credits or guaranties to any country which delivers or receives nuclear reprocessing or nuclear enrichment equipment, materials, or technology unless it will be placed under multilateral auspices and management when available subject to International Atomic Energy Agency safeguards. The President may, by Executive order effective 30 days after issuance, waive this prohibition if he determines (1) it would have a serious adverse effect on vital U.S. interests, and (2) he has received reliable assurances that the recipient country will not acquire or develop nuclear weapons or assist other countries in doing so. A waiver must be reported to Congress, setting forth the reasons supporting the determination. The Congress may by joint resolution terminate or restrict assistance, or take any other action with respect to such assistance, for a country subject to the prohibition. If such a resolution is introduced within 30 days of a waiver, it is considered in the Senate under an expedited procedure.

The Senate amendment amended section 669 of the Foreign Assistance Act and added a new section 670 to do the following:

(1) Exempt from the prohibition transfers which occur before enactment of this bill.

(2) Eliminate the requirement that waivers be by Executive order.

(3) Eliminate the 30-day delay in the effectiveness of a waiver.

(4) Eliminate the statement that a joint resolution might take action with respect to assistance other than terminate or restrict it. The effect being that a joint resolution which did something other than terminate or restrict assistance could not be considered in the Senate under an expedited procedure.

(5) Exempt from the prohibition transfers of nuclear reprocessing equipment, materials, or technology which are associated with the investigation of technologies which are alternatives to pure plutonium reprocessing under international evaluation programs with U.S. participation.

(6) Prohibit (subject to waiver) economic, military, international military training assistance, security supporting assistance and foreign military sales credits or guarantees to any non-nuclear weapons state which detonates a nuclear explosive device after enactment of this bill.

(7) Makes the standard to be applied for a Presidential waiver, in cases of nuclear detonation and nuclear reprocessing transfers, whether cessation of assistance would be seriously prejudicial to the achievement of U.S. nonproliferation objectives or other-

wise jeopardize the common defense and security.

(8) Require that if the President uses the waiver authority described in paragraph (7), he must state the "specific" reasons for the waiver.

The committee of conference adopted the Senate provision.

REPORT ON MIDDLE EAST SPECIAL REQUIREMENTS FUND

The House bill amended Section 903 of the Foreign Assistance Act of 1961 to require that reports on the use of funds from the Middle East Special Requirements Fund include the reasons why the President has determined it is in the national interest to use such funds rather than using funds available under part I of the Foreign Assistance Act of 1961 or, if no part I funds were available, awaiting the enactment of legislation making funds specifically available for the project to be funded.

The Senate amendment did not contain a comparable provision.

The committee of conference adopted the House provision.

REPEAL OF PROHIBITIONS RELATING TO THE 12-MILE FISHING LIMIT

The Senate amendment repealed section 3 (b) of the Arms Export Control Act which provides that no sales, credits, or guaranties be made to any country that seizes or fines a U.S. fishing vessel operating outside the 12-mile limit.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision.

CONGRESSIONAL DISAPPROVAL OF THIRD COUNTRY TRANSFERS

The House bill amended section 3(d) of the Arms Export Control Act to allow Congress to preclude executive branch consent to any proposed third party transfer of defense articles, related training or other defense services acquired under the military assistance or sales programs by adoption of a concurrent resolution of disapproval at any time within 30 calendar days after the proposed transfer is notified to the Congress, unless the President certified that an emergency existed which required immediate consent in the national security interests of the United States.

The Senate amendment did not contain a comparable provision.

The committee of conference adopted the House provision.

TRANSFERS OF DEFENSE ARTICLES AND SERVICES FOR MAINTENANCE AND REPAIR

The House bill amended section 3(d) of the Arms Export Control Act to remove the requirement to report to Congress proposed third party transfers of defense articles and services when the transfer is for purposes of maintenance, repair, and overhaul that do not result in any increase in the original military capability of such articles and services, temporary transfers for the same purposes and cases of third party transfers involving cooperative cross-servicing arrangements among NATO countries.

Th Senate amendment to section 3(d) differed in two respects. It made no reference to increases in military capability and it removed the reporting requirement in cases of minor modification.

The committee of conference adopted the House provision with the understanding that proposed transfers which result in minor modifications because of circumstances making it difficult to maintain the original specifications, need not be reported when there is no intention to deliberately increase the military capability of such articles and services.

COPRODUCTION LICENSES FOR MAJOR DEFENSE EQUIPMENT

The Senate amendment amended section 38(b)(3) of the Arms Export Control Act to exempt from the prohibition on the licensing of commercial exports involving major defense equipment valued at more than $25 million to countries other than NATO countries, Japan, New Zealand, and Australia those sales implementing bilateral coproduction agreements.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision. The committee of conference notes that such export sales agreements would be reported to the Congress under the provisions of section 36(b) of the Arms Export Control Act.

STUDY OF EFFECTS OF ARMS EXPORT CONTROL REFORMS

The Senate amendment amended section 218(b) of the International Security Assistance and Arms Export Control Act of 1976 to extend from June 30, 1977, to January 15, 1978, the deadline for submission of the report on the effects of the arms control reforms enacted in security assistance legislation for fiscal years 1976 and 1977.

The House bill did not contain comparable provision.

The committee of conference accepted the House position.

FISCAL YEAR 1977 AUTHORIZATIONS AND LIMITATIONS

The House bill provided that the authorizations and limitations applicable to fiscal year 1977 remain in effect notwithstanding the changes in law made by this legislation.

The Senate amendment did not contain a comparable provision.

The committee of conference adopted the House provision.

LIMITATIONS ON MILITARY ASSISTANCE AND TRAINING TO TURKEY

The House bill provided that funds appropriated for assistance and sales to the Government of Turkey and international military education and training programs for fiscal year 1978 may be obligated only in accordance with section 620(x) of the Foreign Assistance Act of 1961.

The Senate amendment contained a similar provision but included the limitations of section 620(x) in the section of the bill authorizing funds for grant military assistance and did not include a reference to fiscal year 1978.

The committee of conference adopted the House provision.

STUDY OF TECHNOLOGY TRANSFERS

The House bill contained a provision that directed the President to conduct a comprehensive review of the implications of international transfers of technology, with the assistance of the Arms Control and Disarmament Agency, the Departments of State, Defense and Commerce, the National Science Foundation, the Office of Science and Technology Policy, and such other entities in the executive branch as he deems necesary. The results were to be reported to Congress within 1 year.

The Senate amendment did not contain a comparable provision.

The committee of conference adopted the House provision. It is the understanding of the committee of conference that the study called for by this provision will be done in conjunction with the studies mandated in Public Law 95-52.

PROHIBITION ON ASSISTANCE FOR REPRESSION

The House bill amended section 502 of the Foreign Assistance Act of 1961 to prohibit military assistance and sales for the purpose of, or which would have the effect of, aiding directly or indirectly the efforts of foreign governments to repress the legitimate rights of the population in such countries contrary to the Universal Declaration of Human Rights.

The Senate amendment did not contain a comparable provision.

The committee of conference accepted the Senate position. While the committee of conference firmly believes that no military assistance or sales should go to any country which engages in a consistent pattern of gross violations of fundamental human rights, the deleted language would have had an application so broad as to be impractical and impossible to implement. In addition, the provisions of section 502B of the Foreign Assistance Act of 1961, already provide for serious consideration of the relationship between security assistance and human rights in the formulation and implementation of security assistance programs worldwide. The Executive Branch is urged to provide U.S. military assistance advisory groups and trainees with adequate guidance and training so that section 502B can be properly implemented.

REVIEW OF ARMS SALES CONTROLS ON NONLETHAL ITEMS

The House bill contained a provision that directed the President to undertake a review of all arms control regulations for the purpose of defining and categorizing lethal and nonlethal products and establishing appropriate levels of controls for each category.

The Senate amendment contained a provision that directed the President to develop definitions of lethal and nonlethal products and to establish procedures for the expeditious consideration of requests to export nonlethal products and to report to Congress within 120 days on the regulations and procedures to be applied to those systems determined to be nonlethal.

The committee of conference adopted the House provision. The committee of conference understands that the purpose of this review is to determine the feasibility of establishing a distinction between lethal and nonlethal products and appropriate levels of control and procedure for each. Further, the explanation of the purpose of the review in the provision is not intended to presuppose the results of the review. Although the committee of conference dropped the Senate provision with respect to the 120-day reporting requirement, it did so with the expectation that the President would make every effort to submit a report within that time period.

REPUBLIC OF KOREA INVESTIGATION

The House bill contained a provision that expressed the sense of Congress that the President take effective measures to assure that Korea is cooperating with the investigation of the Department of Justice and report on the degree of cooperation every 90 days. The House bill also expressed the sense of Congress that the President take effective measures to assure that Korea is cooperating with Congressional investigations.

The Senate bill did not contain a comparable provision.

The committee of conference adopted the House provision.

POLICY STATEMENT ON ARMS SALES TO ISRAEL

The Senate amendment contained a provision that reaffirmed that the U.S. policy of restraint in U.S. arms transfers shall not impair Israel's deterrent strength or undermine the military balance in the Middle East.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision.

ARMS SALES AND U.S. DEFENSE READINESS

The Senate amendment amended section 21(h) of the Foreign Assistance Act of 1961 to require a report by March 15, 1978, on the impact of U.S. arms sales and transfers to U.S. defense readiness and national security. This provision also required the President to analyze agreements for the purchase or acquisition by the United States of defense articles, services or equipment from any foreign country or international organization in connection with U.S. arms sales and transfers including an analysis of the impact such agreements have had on United States business concerns.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision.

SANCTUARY FOR TERRORISTS

The Senate amendment amended section 3 of the Arms Export Control Act to terminate the sale of defense articles and defense services for 1 year to any country granting sanctuary to international terrorists unless the President found (and so reported to Congress) that U.S. national security justified a continuation of sales.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision.

REPORT ON ARMS SALES TO IRAN AND SAUDI ARABIA

The Senate amendment contained a provision which directed the President to report to Congress by February 15, 1978, on past, current, and projected arms sales to Iran and Saudi Arabia and the need for such sales.

The House bill did not contain a comparable provision.

The committee of conference adopted the House position.

PIASTER CONVERSION FOR AID EMPLOYEES

The Senate amendment contained a provision which allowed for the conversion of piasters to dollars for certain Vietnamese employees of the Agency for International Development.

The House bill did not contain a comparable provision.

The committee of conference adopted the Senate provision.

The committee of conference understands that this provision would also apply to cover Vietnamese employees in other U.S. agencies.

ADDITIONAL INFORMATION REQUIREMENTS FOR SECTION 36(b) REPORTS TO CONGRESS

The Senate amendment amended section 36(b) of the Arms Export Control Act to make mandatory the submission of certain information, now available on committee request, with respect to proposed letters of offer reported to Congress under section 36 (b) of the Arms Export Control Act when the sale would be to a non-NATO country.

The House bill did not contain a comparable provision.

The committee of conference adopted a House position but expressed dissatisfaction with the inadequate policy justifications which accompany current section 36(b) reports of letters of offer to sell defense articles or defense services. The committee of conference expressed the firm desire to have more comprehensive and thoughtfully prepared reports accompanying advance notifications and letters of offer submitted under the provisions of section 36(b) of the Arms Export Control Act.

APPOINTMENT OF CONFEREES ON S. 1377, EXTENDING TIME FOR COMMENCING ACTIONS ON BEHALF OF AN INDIAN TRIBE, BAND, OR GROUP

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1377) to extend the time for commencing actions on behalf of an Indian tribe, band, or group, with the House amendments thereto, insist on the House amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California? The Chair hears none, and, without objection, appoints the following conferees: Mr. DANIELSON, Mr. UDALL, Miss JORDAN, and Messrs. MAZZOLI, HARRIS, MOORHEAD of California, and COHEN.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I have asked for this time to inquire of the distinguished acting majority leader as to the program for the balance of the week and for the following week.

Mr. FOLEY. Mr. Speaker, will the distinguished minority leader yield?

Mr. RHODES. I yield to the distinguished acting majority leader.

Mr. FOLEY. Mr. Speaker, the schedule for the week of July 18, 1977, is as follows:

On Monday the House will meet at noon for the call of the Consent Calendar. There are no bills scheduled. There are 14 bills on the Suspension Calendar for Monday, as follows:

First. H.R. 6936. Amend Election Campaign Act of 1971.

Second. House Joint Resolution 372, National Family Week.

Third. H.R. 7012. Paperwork reduction in agricultural census.

Fourth. H.R. 2387. Salary adjustments for OMB Director and Deputy.

Fifth. H.R. 6974. Increase in supergrades for Federal Court Administration.

Sixth. H.R. 6975. Increase in number of hearing examiners.

Seventh. H.R. 4319. Retention of Federal life and health benefits during retirement.

Eighth. H.R. 3755. Restoration of certain annuities.

Ninth. H.R. 1550. Reduce tariffs on spark plug insulators.

Tenth. H.R. 2849. Suspend tariffs on rubber mattress blanks.

Eleventh. H.R. 2850. Suspend tariffs on latex sheets.

Twelfth. H.R. 3387. Continue tariff suspension on synthetic rutile.

Thirteenth. H.R. 5263. Suspend tariffs on certain bicycle parts.

Fourteenth. H.R. 5285. Clarify tariff treatment of acrylic resin sheets.

Mr. Speaker, following the bills considered under suspension of the rules, there are 15 unanimous-consent bills from the Committee on Ways and Means.

After the consideration of these bills, we will take up the conference report on H.R. 7557, the Department of Transportation and Related Agencies Appropriation Act, 1978; and the conference report on H.R. 7556, the Departments of State, Justice, Commerce, and the Judiciary, and Related Agencies Appropriation Act, 1978.

On Tuesday, the House will meet at noon.

The Private Calendar will be called, but there will be no suspensions on that day, according to the present plan.

We will start consideration of H.R. 7171, the Agricultural Act of 1977, which will be before the House for the adoption of the rule, with 2 hours of general debate and consideration under the 5-minute rule.

On Wednesday the House will meet at noon to continue consideration of H.R. 7171, the Agricultural Act of 1977. Hopefully, we will complete action on that bill on that day.

On Thursday the House will meet at 10 a.m. to consider H.R. 5400, the Universal Voter Registration Act of 1977, under an open rule, with 2 hours of general debate.

On Friday the House will meet at 10 a.m. to consider H.R. 4544, the Black Lung Benefits Reform Act of 1977, subject to a rule being granted.

We will also consider House Resolution 70, creation of Select Committee on Population.

The House will adjourn by 3 p.m. on Fridays and at 5:30 p.m. on all other days, except Wednesdays.

Of course, this is subject to the usual reservation that conference reports may be brought up at any time.

Any further program will be announced later.

Mr. RHODES. Did I understand the gentleman to say that we would adjourn at 5:30 p.m. on all other days except Wednesday?

Mr. FOLEY. At 5:30 pm.; that is correct.

Mr. RHODES. I know the gentleman said that hopefully we would complete consideration of the Agricultural Act of 1977 on Wednesday. On that day I assume we will continue in session until that act is completed; is that correct?

Mr. FOLEY. We will, hopefully, be in a situation so that we can complete the act. I think Members should count on a relatively long session on Wednesday night. However, if we are not far enough along on the bill so that there will be a prospect of finishing in a late session, we might have to go over until Thursday.

Mr. RHODES. Mr. Speaker, I thank the gentleman.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule on Wednesday of next week be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

ADJOURNMENT TO MONDAY, JULY 18, 1977

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

REFERRAL OF H.R. 8112, FROM COMMITTEE ON HOUSE ADMINISTRATION TO COMMITTEE ON GOVERNMENT OPERATIONS

Mr. PREYER. Mr. Speaker, I ask unanimous consent that H.R. 8112, previously referred to the Committee on House Administration on June 29, 1977, be referred instead to the Committee on Government Operations. The bill is not within the jurisdiction of the Committee on House Administration and was referred to it in error.

Mr. Speaker, that bill is the bill introduced by the Subcommittee on Government Operations at the request of GSA to abolish the Federal Records Council.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdom, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On July 11, 1977:

H.R. 6668. An act to amend the Age Discrimination Act of 1975 to extend the date upon which the U.S. Commission on Civil Rights is required to file its report under such act, and for other purposes;

H.J. Res. 539. Joint resolution to amend the statute of limitations provisions in section 2415 of title 28, United States Code, relating to claims by the United States on behalf of Indians.

REORGANIZATION OF THE EXECUTIVE OFFICE OF THE PRESIDENT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–185)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Government Operations and ordered to be printed:

To the Congress of the United States:

I herewith transmit my plan for the Reorganization of the Executive Office of the President (EOP), Reorganization Plan No. 1 of 1977. This plan is the first of a series I intend to submit under the reorganization authority vested in me by the Reorganization Act of 1977 (P.L. 95–17). It adheres to the purposes set forth in Section 901 (a) of the Act.

This plan in conjunction with the other steps I am taking will:

—eliminate seven of the seventeen units now within the EOP and modify the rest. There were 19 units when I took office; the President's Foreign Intelligence Advisory Board and the Economic Policy Board have already been abolished. Thus with this plan I will have eliminated nine of 19 EOP units.

—reduce EOP staffing by about 250 which includes the White House staff reduction of 134 or 28% which I have already ordered.

—improve efficiency by centralizing administrative functions; and

—improve the process by which information is provided for Presidential decisionmaking.

These recommendations arise from a careful, systematic study of the EOP. They are based on the premise that the EOP exists to serve the President and should be structured to meet his needs. They will reduce waste and cost while improving the service the President, and the nation, receive from the EOP.

The EOP now consists of the immediate White House Office, the Vice President's Office, the Office of Management and Budget, and fourteen other agencies. The EOP has a budget authority of about $80,000,000 and 1,712 full time employees.

The White House Office concentrates on close personal support including policy and political advice and administrative and operational services. The Office of the Vice President provides similar support to him. OMB's primary mission is to develop and implement the budget; it also carries out a number of management and reorganization activities.

Three EOP units have responsibility for policy development:

—National Security Council

—Domestic Council

—Council on International Economic Policy

The other 11 are more specialized offices that offer analysis and advice, help develop policy in certain areas, or carry out special projects. These are:

—Council of Economic Advisers

—Council on Wage and Price Stability

—Office of the Special Representative for Trade Negotiations

—Council on Environmental Quality

—Office of Science and Technology Policy

—Office of Drug Abuse Policy

—Office of Telecommunications Policy

—Intelligence Oversight Board

—Federal Property Council

—Energy Resources Council

—Economy Opportunity Council

To make the EOP more effective, four steps are necessary:

I. Strengthen management of policy issues.

II. Limit the EOP, wherever possible, to functions directly related to the President's work.

III. Centralize administrative services.

IV. Reduce size of White House and EOP staffs.

I. STRENGTHEN PROCESS MANAGEMENT OF POLICY ISSUES

Perhaps the most important function of the President's staff is to make sure he has the wide variety of views and facts he needs to make decisions. By building a more orderly system for collecting information and advice, the President can make sure that he will hear all the views he should—and hear them in time. To better insure that this happens, I am taking the following actions to:

—Institute for domestic and economic issues, a system similar to the Presidential Review Memorandum process currently used for National Security issues.

—Create a committee of Presidential advisers, chaired by the Vice President, to set priorities among issues and oversee their staffing.

—Assure that Presidential decision memoranda on policy issues are coordinated with Cabinet and EOP advisers most involved with the issue.

—Consolidate under the Staff Secretary the two current White House paper circulation systems.

—Appoint a group of advisers to review the decisionmaking process periodically.

—Give the Assistant to the President for Domestic Affairs and Policy clear responsibility for managing the way in which domestic and most economic policy issues are prepared for Presidential decision.

—Assign follow-up responsibility for Presidential decisions as follows: immediate follow-up will be handled by the NSC or Domestic Policy Staff most directly involved in the issue; long term follow-up on selected issues will be handled by the Assistant to the President for Intergovernmental Relations.

These actions recognize that the White House and Executive Office staff must use their proximity to the President to

insure that the full resources of the government and the public are brought to bear on Presidential decisions in a timely fashion. It is my purpose in instituting these changes to strengthen Cabinet participation in Presidential decisions.

II. RATIONALIZE EOP STRUCTURE BY LIMITING EOP, WHEREVER POSSIBLE, TO FUNCTIONS WHICH BEAR A CLOSE RELATIONSHIP TO THE WORK OF THE PRESIDENT

As the President's principal staff institution, there are several major things the EOP must do:

—Provide day-to-day operational support (e.g., scheduling, appointments) and help the President communicate with the public, the Congress, and the press.

—Manage the budget and coordinate Administration positions on matters before the Congress.

—Manage the Presidential decision-making processes efficiently and fairly, and bring the President the widest possible range of opinions.

—Help the President: plan and set priorities; monitor and evaluate progress toward achieving the President's objectives; understand and resolve major conflicts among line subordinates; manage crises, especially in national security matters.

In order to restructure the EOP around these basic functions, the functions of seven units should be discontinued or transferred, and ten units, including the White House Office, should be retained but modified.

Seven units should be discontinued or their functions transferred. These are:

1. Office of Drug Abuse Policy
2. Office of Telecommunications Policy
3. Council on International Economic Policy
4. Federal Property Council
5. Energy Resources Council
6. Economic Opportunity Council
7. Domestic Council

The functions of the *Office of Drug Abuse Policy* (ODAP) can be performed by a smaller staff reporting to a Presidential adviser in the EOP. The Office itself will be discontinued.

Much of the work done by the *Office of Telecommunications Policy* (OTP) can be more effectively performed outside the EOP. It is important that the EOP have the capacity to resolve differences and that the President have immediate advice on telecommunications and information policy, especially on national security, emergency preparedness and privacy issues. This only requires a small staff within EOP. The Office of Management and Budget would take responsibility for federal telecommunications procurement and management policy and arbitration of interagency disputes about frequency allocation. All other functions except developing Presidential policy options would be transferred to a new office within the Department of Commerce, headed by a new Assistant Secretary for Communications and Information, who will perform many of the functions previously performed by the head of the OTP.

I propose that the *Economic Opportunity Council* be discontinued; it is dormant and its only active function (preparation of the Catalogue of Federal Domestic Assistance) is being performed by OMB. Three other units are also inactive and should be discontinued: *Council on International Economic Policy*, the *Federal Property Council*, and the *Energy Resources Council*.

The *Domestic Council* should be abolished. It has rarely functioned as a Council, because it is too large and its membership too diverse to make decisions efficiently. Its functions have been performed entirely by its staff. This *Domestic Policy Staff* should report to the Assistant to the President for Domestic Affairs and Policy. Under the policy process system described earlier, they should manage the process which coordinates the making of domestic and most economic policy. They should work closely with the Cabinet departments and agencies to insure that the views of the Cabinet and agency heads are brought to the President before decisions are made.

The ten EOP units which will continue with some modification are:

1. White House Office
2. Office of the Vice President
3. Office of Management and Budget
4. Council on Environmental Quality
5. Council of Economic Advisers
6. Office of Science and Technology Policy
7. Office of the Special Representative for Trade Negotiations
8. National Security Council
9. Intelligence Oversight Board
10. Council on Wage and Price Stability

The operations of the *Office of the Vice President* reflect the combination of constitutional, statutory, and Presidentially assigned duties that make it unique among EOP units. Because his interests and assignments cover the same range as the President's, the Vice President requires a staff with expertise in diverse areas. Its basic functions should not be changed. However, I propose that certain support functions—involving accounting, personnel services, and supply—be transferred to a centralized EOP Administrative Unit.

The *Office of Management and Budget* would remain as a separate entity in the EOP, but some functional changes should be made. Four functions should be transferred from OMB to other parts of the government:

—Administration to the new EOP Central Administrative Unit;

—Executive Department/Labor Relations (except for Pay Agent, Executive Level Pools, and Legislative Analysis) to the Civil Service Commission;

—Advisory Committee Management Secretariat to the General Services Administration;

—Statistical Policy (except Forms Clearance) to the Department of Commerce.

I have asked the OMB to reorganize its management arm to emphasize major Presidential initiatives, such as reorganization, program evaluation, paperwork reduction, and regulatory reform.

The *Council on Environmental Quality* (CEQ) should remain in the EOP as an environmental adviser to the President. The CEQ's major purpose is to provide an independent assessment of our policies for improving the environment. Toward this end, it will analyze long term trends and conditions in the environment. It will advise OMB on the reorganization of natural resources functions within the Federal government. The Council will retain the functions it now has under NEPA and Executive Order No. 11514 with the exception of routine review of the adequacy of impact statements and the administrative aspects of their receipt and handling. The EPA will take over CEQ's evaluation responsibility under the Federal Nonnuclear Energy Research Development Act of 1974. The CEQ will continue to review and publish the Annual Report on Environmental Quality.

The strength of the *Council of Economic Advisers* (CEQ) lies in its economic analysis of current policy choices. It also presents objective economic data, makes macroeconomic forecasts, and analyzes economic trends and their impact on the national economy. It will continue with a small reduction in staff.

The *Office of Science and Technology Policy* (OSTP) should retain those science, engineering, and technology functions which can be so useful in helping the President and his advisers make decisions about policy and budget issues. Instead of the Intergovernmental Science, Engineering, and Technology Advisory Panels, the President should rely on an intergovernmental relations working group, chaired by the Science Adviser. The Federal Coordinating Council on Science and Technology should operate as a sub-Cabinet working group chaired by the Science Adviser. The reorganization work of the President's Committee on Science and Technology would be part of the overall reorganization effort. The responsibility for preparing certain reports should be transferred to the National Science Foundation.

The proposal places manageable limits on OSTP's broad mandate while emphasizing functions that support the President.

The *Office of the Special Representative for Trade Negotiations* (STR) is now operating effectively and will be retained essentially as is. With the difficult negotiations now underway in Geneva, the benefits of transferring the STR to another agency are outweighed by the potential reduction in its effectiveness as an international negotiator.

The *National Security Council* (NSC) will be retained in its present form and its staff slightly reduced.

Intelligence Oversight Board (IOB) should be retained to insure that abuses of the past are not repeated and to emphasize Presidential concerns regarding intelligence issues.

The *Council of Wage and Price Stability* (COWPS) is a necessary weapon in the continuing fight against inflation and will be retained. To be sure that its work is closely coordinated with the economic analyses performed by the

Council of Economic Advisers (CEA), COWPS should be directed by the Chairman of CEA.

III. CENTRALIZE ADMINISTRATIVE FUNCTIONS

About 380 (22%) of the full-time, permanent EOP personnel perform administrative support services in EOP units. Most EOP units besides the White House and OMB are too small to provide a full complement of administrative services. They depend on the White House, OMB, GSA, other federal departments, or several of these sources for many of these services. This approach is inefficient; the quality is uneven and the coordination poor. Some services are duplicated, others inconsistently distributed (excess capacity in some units and deficiences in others), and most too costly.

I propose to combine administrative support operations into a Central Administrative Unit in EOP to provide support in administrative services common to all EOP entities. It should be a separate EOP entity because of the need to assure equal access by all other units.

This consolidation will result in:

—saving of roughly 40 positions and about $1.1 million
—improved and more innovative services
—a focus for monitoring the efficiency and responsibility of administrative services
—a base for an effective EOP budget/planning system through which the President can manage an integrated EOP rather than a collection of disparate units.

The EOP has never before been organized as a single, unified entity serving the President. It is only by viewing it as a whole that we can improve efficiency through steps like the Central Administrative Unit.

IV. REDUCE THE SIZE OF WHITE HOUSE AND EOP STAFFS

I am reducing the White House staff by 28%, from the 485 I inherited from my predecessor to 351. This involves cuts in my policy and administrative staffs as well as transfers to the Central Administrative Unit.

I estimate that this plan and the other steps I am taking will reduce staff levels in the EOP by about 250, from 1,712 full-time permanent positions to about 1,460 and will save the taxpayers at least $6 million.

As in the rest of the government, I will be reluctant to add staff unless necessary to help me do my job better.

* * * * *

I ask that you support me in improving the operations of the Executive Office of the President by approving the attached reorganization plan.

In summary this plan would:

—Abolish the Domestic Council and establish a Domestic Policy Staff.
—Establish within the EOP a Central Administrative Unit.
—Transfer certain functions of the Council on Environmental Quality to the President for redelegation.
—Abolish the Office of Drug Abuse Policy and vest functions in the President for redelegation.
—Abolish the Office of Telecommunications Policy and transfer functions to the Department of Commerce and to the President for redelegation.
—Create an Assistant Secretary of Commerce for Communications and Information.
—Vest some Office of Science and Technology Policy functions in the President for redelegation.
—Abolish the Economic Opportunity Council and vest those functions in the President for redelegation.
—Transfer the Committee Management Secretariat function of the Office of Management and Budget to the President for redelegation.
—Make other incidental transfers attendant to those mentioned above.

Each of the changes set forth in the plan accompanying this message is necessary to accomplish one or more of the purposes set forth in Section 901(a) of Title 5 of the United States Code. I have taken care to determine that all functions abolished by the plan are done so only under statutory authority provided by Section 903(b) of Title 5 of the United States Code. The provisions in the plan for the appointment and pay of any head or officer of any agency have been found by me to be necessary.

As we continue our studies of other parts of the Executive Branch, we will find more ways to improve services in the EOP and elsewhere. This plan is only a beginning, but I am confident that it represents a major step toward a more efficient government that will serve the needs of the people and the President well.

JIMMY CARTER.

THE WHITE HOUSE, *July 15, 1977.*

BLACKOUT IN NEW YORK CITY AND WESTCHESTER COUNTY A NIGHTMARE

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHEUER. Mr. Speaker, the blackout in New York City and Westchester County yesterday was a nightmare in more ways than one. Obviously, we all must be concerned that the power for 10 million of our citizens in the Nation's largest metropolitan area could suddenly be cut off for almost 24 hours. And the fact that this power company had taken special precautions in light of the New York City blackout 12 years ago, only makes this most recent experience more horrifying.

But, Mr. Speaker, I would like to suggest to my colleagues that the sociological implications of the looting and rioting that took place under the cover of this blackout are far more disturbing than the technological implications of the loss of power itself. In the earlier New York City blackout only around 500 arrests were made and rioting and arson was at a minimum.

Contrast the comparative peace and tranquillity of November 1965 with the violence and disruption of July 1977. More than 2,700 people were arrested for plundering, vandalising, rioting, and setting fires. The arrest rate was so great that the Tombs, New York City's oldest prison, which has been closed for 3 years because of its inadequacy as a reliable prison facility, had to be reopened. More than 80 police officers were injured in attempting to apprehend suspects and firemen had bottles and stones thrown at them as they tried to fight fires.

What puzzles me, and I believe what should be puzzling to others as well, is what made the public's reaction to the 1977 blackout so different from the public's reaction to the blackout in 1965. One police officer was quoted in today's New York Times as explaining that "You have an entirely different element in the city now. Anything goes." This type of explanation seems imprecise and insufficient to me. We must learn more, far more, and we must act on what we learn.

Mr. Speaker, I intend to initiate inquiries into the changes in circumstances that might explain the startling reaction of the populace to this week's blackout. Questions which I believe need to be addressed include:

First. As precisely as possible, in what types of neighborhoods did the preponderance of the looting and violence occur? In particular, what was the unemployment rate in those neighborhoods?

Second. What was the role of illegal immigrants in the looting and violence? How many of the arrestees were illegal immigrants?

Third. What are some of the demographic factors which have shifted from 1965 to 1977? Which of these factors might have contributed to the shift in behavior? Could it be levels of education achievement, the standard of housing, the age of the population, the median income of the population, or the unemployment rate? Is it some combination of these factors?

Fourth. Is there any reasonable and acceptable way by which the looting, vandalism, arson, and violent attacks against policemen and firemen could have been better contained and controlled?

I intend to ask the General Accounting Office, the Congressional Research Service, the Community Relations Service of the Department of Justice, the Departments of HEW, and Labor, and a consortium of New York university and foundation experts to look into these questions. The blackout in New York may well have illuminated some critical underlying and pressing sociological problems which urgently require our attention.

CONGRESSIONAL APPROPRIATIONS FOR POSTAL SERVICE SHOULD INSURE SATURDAY MAIL DELIVERY

(Mr. COLEMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN. Mr. Speaker, Yesterday in adopting the conference report on the Treasury-Postal Service Appropriations bill, the Congress failed to put itself on record as being opposed to the

proposed reduction in the current 6-day mail delivery week. The conference committee dropped an amendment which prohibited the use of any funds appropriated under this bill for a reduction in 6-day mail delivery service. This amendment, which I strongly supported, would have served notice on the Board of Governors of the U.S. Postal Service that the Congress will not allow 6-day mail service to be eliminated.

Since we have set up an independent postal authority and relinquished congressional control over the day-to-day operations of the Postal Service, it becomes vitally important that we exercise care in appropriating vast sums of money to subsidize those operations. The people of this Nation do not expect us to act as postmasters and postmistresses, but they certainly will hold us responsible for exercising control over the pursestrings of the multibillion dollar Postal Service. The American people do not want Saturday mail delivery stopped, and we should have insisted on inclusion of this amendment. It would have sent a clear message to the Postal Service Management.

BILL TO REDUCE 4-PERCENT FOUNDATION TAX

The SPEAKER pro tempore (Mr. WRIGHT). Under a previous order of the House, the gentleman from New York (Mr. CONABLE) is recognized for 20 minutes.

Mr. CONABLE. Mr. Speaker, I am introducing today, along with my colleague on the Ways and Means Committee, Congressman JAMES CORMAN, a bill to reduce the present 4-percent tax on foundation investment income to 2 percent. Twenty-four other members of the Ways and Means Committee are joining us in cosponsoring this bill.

The broad support of these bills among the membership of the Ways and Means Committee tells us something about the merits of the issue to which the bills are addressed. Let me review the substance of that issue briefly.

The 4-percent tax on foundations was added to the Internal Revenue Code in 1969. Six years of experience with this tax reveals that it produces revenue which is well over twice the amount which the Internal Revenue Service spends in its functions concerning all classes of tax-exempt organizations—including not only foundations, but also social clubs, trade associations, labor unions, fraternal groups, and many others. That experience shows also that the real burden of the tax falls very directly upon the charitable service projects and programs to which foundations make grants.

In the United States, private philanthropy shares with Government the responsibility for many human needs which in other nations are solely or almost exclusively the concern of Government. Our approach represents our traditional view that a strong society is one with vigorous private institutions, foundations among them. The Government now plays a substantial role in supporting medical research, assisting the performing arts, alleviating problems of rural health and nutrition, and providing legal services for poor and disadvantaged groups. Not only were foundations active in all of these areas before Government, but the experience gained through relatively modest foundation projects has frequently enabled Government to chart its course more wisely and more efficiently. Foundations have provided a marketplace for new ideas and programs, a fund of risk and venture capital for enlarging knowledge, and a source of support alternate to Government, for citizen groups, including the poor, minorities, women, and others.

Government and foundations, therefore, share goals and objectives. They are partners—not adversaries. If these underlying assumptions about the desirability of private initiative, the decentralization of power, and the utility of a broad base of decisionmaking are correct—and I fervently believe they are—we, as representatives of the people, must take care not unnecessarily to tax, and thereby diminish, the foundation resources that help support the private service structure. It is counter-productive to do so.

Our experience with the foundation tax shows that, at the 4 percent rate, this levy does precisely what it ought not to do. It unnecessarily reduces the flow of foundation funds to our hospitals, schools, universities, museums, youth groups, minorities, community programs, and the range of human benevolent activity supported by foundation giving.

Lowering the tax by one-half would increase quite directly the amount that foundations pay to their charitable beneficiaries. That result would follow necessarily because, under a provision which we added to the Internal Revenue Code in 1969, every year foundations must pay out for their charitable purposes the greater of their net income or 5 percent of their investment value. In applying this minimum payout requirement, foundations credit as a payout for charitable purposes the amount they pay under the 4-percent tax. A reduction of the tax would, therefore, increase specifically the amount that foundations are compelled to distribute to their charitable beneficiaries.

On the basis of recent collections of the Treasury from this tax, we could expect a 2-percent rate to restore about $30 million a year to charitable service activities. Based on Internal Revenue Service estimates of expenditures in 1975—the most recent year for which the IRS made such data public—the remaining $30 million of revenue that a 2-percent tax would produce for the Government would exceed by approximately $20 million dollars the IRS costs of supervising foundations.

Whether one views the 4-percent tax as a way of returning to the Government the expense of supervising foundations or as a necessary imposition to assure that foundations pay some share of the general costs of Government, our experience now tells us that a 2-percent rate is more than adequate. Consequently, adjustment of the rate of the tax is now very much in order.

Mr. CORMAN. Mr. Speaker, I am pleased to join today with my colleague, BARBER CONABLE and other members of the Ways and Means Committee in introducing legislation to reduce the present 4-percent tax on foundation income.

In 1969, Congress became concerned over abuses that had developed among some foundations, and stringent reforms were adopted. One of the provisions of the 1969 act required the Internal Revenue Service to conduct intensive audits of foundations. An excise tax at the rate of 4 percent was requested by the Service as necessary to cover audit costs. Since then, the Service has audited almost every foundation in the country at least once. It has found a high level of compliance with the reforms enacted in 1969, and has determined the tax could be reduced to 2 percent and still cover the costs of auditing.

The 1969 act also requires that every grantmaking foundation pay out each year, for charitable purposes, the greater of its net income or 5 percent of its asset value. It imposes broad restrictions on self-dealing and business holdings, special new requirements for grants by foundations to individuals, a set of safeguards for grants by foundations to organizations other than public charities, and strict limitations on foundation efforts to influence legislation or to participate in voter registration.

These restrictions are enforced by very substantial penalty taxes imposed on foundations, individuals, and foundation managers who approve prohibited transactions.

Grant-making and operating foundations make vital contributions to our society. Foundation support was responsible for the development of our public library system in the United States, and helped devise medical answers to malaria, hookworm, yellow fever, typhus, rabies, tuberculosis, and a number of other diseases. Foundations have played a major role in the development of public television in this country, and provide important continuing sustenance for our colleges and universities.

In light of the clear record of accomplishment by foundations and in light of the success of our 1969 reforms, we should act now to reduce the 4 percent tax on foundation income to 2 percent. The additional 2 percent could be returned to foundations to flow through to scholarship recipients, medical research programs, and other projects that meet the needs of the community as well as the individual. I hope that this legislation will receive early and favorable consideration.

MIDDLE EAST PEACE RESOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FINDLEY) is recognized for 5 minutes.

Mr. FINDLEY. Mr. Speaker, we Americans share with our friends in the Middle East the anxiety of those who wait, unsure of what the future brings to that restive region.

With others we greeted 1977 expectantly, thinking that this year would usher in what no year since 1948 has:

the beginnings of a true peace in the Middle East. The ensuing months, however, have lessened our optimism without increasing our understanding of why we should relinquish our hope of peace. With gloomier thoughts have come predictions that failure to convene a Geneva Conference by the fall will provoke war. Countering these observations, some dispute that war is either imminent or inevitable.

Such speculation does not serve us well. We cannot predict war. We do not know whether war in the Middle East will come tomorrow or in October or in June or whether it will come at all. What alone is certain is that the conditions that have produced four wars in 29 years continue to destabilize the region and create a high risk of renewed conflict. Our efforts, undeterred by spells of optimism or pessimism, must be directed, toward removing the conditions for war and minimizing the probability of conflict.

Continuity of the concern, initiative, commitment, and perseverance that have long characterized U.S. policy toward the Middle East is extremely important at this time. This concern and initiative inspired us to support the creation of the State of Israel. Commitment and perseverance have enabled us unrelentingly to stand by Israel when few others did.

Further manifestations of our Middle East policy are the economic, diplomatic, and military assistance we have provided to that region during the past three decades. In recent years, we have infused large amounts of aid into this area. We have offered our diplomatic services in calming overt conflict and devising ways to restrain further hostilities. We have made available in support of the 1975 Sinai accord between Egypt and Israel not only U.S. technology but also U.S. citizens to monitor that technology.

In return for our efforts, we have earned many dividends. Our aid has helped promote the well-being and security of Israel while it has also facilitated improved relations with Arab States. We have, in Israel, a strong, viable, and democratic friend. Our new friendships with Arab nations have enhanced our ability to act as mediator and have reduced an often pernicious and disturbing Soviet influence in the Middle East. In an area where trust has been totally lacking, the Sinai support mission has functioned as a workable example of how Israel and Egypt can coexist.

Arab leaders have at last expressed a willingness to come to terms with Israel and have indicated their readiness to accept the fact of Israel in the Middle East. Progress toward peace has occurred.

But much remains to be done. No one can go so far as to characterize the situation in the Middle East as good. Budgets sag under military expenditures that drive up inflation. This inflation oppresses the disadvantaged and threatens regimes that are moderate and progressive. Living constantly with uncertainty and fear disturbs Arab and Israeli populace alike, driving some away, alienating others. Nations, armed to the teeth, scrutinize each other's movements, ever watchful for one sign which may signal new bloodshed.

A diminishment of U.S. efforts in furthering peace is unthinkable. We debate the perimeters of our role but we may not deny it. It will approach in the future what it has always been in the past. We will continue to demonstrate our concern and will re-pledge our commitments. We will aid and support; we will suggest, cajole, plead, and badger. We will not impose, however, for that is not only beyond our means but unlikely to produce a settlement that is either realizable or durable. But we have too much at stake to sit this one out.

The United States has much to contribute to the building of a momentum toward peace in the Middle East. We can help to create the conditions which will give promise to a Geneva-type conference. We can give assistance and support to the parties participating in negotiations. We will serve as mediator and conciliator of differences. We will undoubtedly also be involved in offering, as we did in 1975, a means to guarantee a successful outcome. We must help to assure not only that a conference takes place but, equally important, that the conference is based on a sense of purpose and understanding which will enable it to succeed. We can, therefore, encourage the participants to move toward acceptance of broad and basic principles that are vital to a peace settlement by setting forth the general outlines of what we deem to be essential ingredients of peace. We can seek to stimulate a growing consensus on the nature of peace in the Middle East that will impel them toward a final settlement.

With that in mind, I am introducing today a resolution which embodies basic principles which I believe are fundamental and essential to peace in the Middle East. They are consistent with U.N. Security Council Resolution 242 which has been accepted as the framework for negotiations by Israel and the Arab States directly involved.

The first principle of the resolution reiterates language of U.N. Security Council Resolution 242 and calls for the renunciation of the use of force to settle disputes. The right of Israel to exist unchallenged as a sovereign and independent state within secure and recognized boundaries is basic to the settlement and crucial to peace.

Principle two must be at the heart of any agreement. Peace will remain precarious and without solid foundation unless each party agrees to establish diplomatic relations and move toward full economic and political relations with all other parties. Cultural and educational exchanges and tourism are examples of unfettered movement and contacts that are needed to enlarge the mutual understanding of differing societies and make peace meaningful. This principle must be the supreme objective of any peace agreement.

Israeli withdrawal from territory occupied in 1967 is intrinsic to U.N. Security Council Resolution 242, will be central to any settlement, and is therefore called for by principle three of the resolution. Territorial aggrandizement by armed conflict is unacceptable; it risks setting a precedent that may one day be turned against Israel, prejudicing that Nation's own security and survival. However, some limited modifications of Israeli borders from those existing in 1967 may be necessary to render those boundaries more defensible.

Principle four calls for establishment of zones that will assist the implementation of the agreement. These zones must be free of national military forces, patrolled by U.N. troops, and should be of proportionate width on either side of the boundaries established between Israel and her neighbors. Flexibility and commonsense will be necessary in assuring the fair and effective application of this principle. The size and geography of Israel will preclude exact proportionality in certain areas.

In the fifth principle, the resolution calls for self-determination for inhabitants of the west bank and Gaza. The settlement may provide a link between the west bank and Jordan. The critical element is self-determination, letting the inhabitants decide their own future. Unless the interests and rights of the Palestinians are met by a final settlement, a just and durable peace will not be achieved. However, just as there must be a Palestinian homeland, the Palestinians must recognize Israel and the right of Israel to maintain its identity and character as a Jewish state.

Equitable compensation for those who have suffered economic losses as a result of their displacement forms principle six.

The seventh principle acknowledges that some refugees may wish to return to the locale from which hostilities displaced them. This should be permissible to the extent that it does not undermine the national security or destroy the national identity of the states involved.

As expressed in principle eight, freedom of navigation of the Red Sea, the Gulf of Aqaba, and the Suez Canal should be the right of all parties to the agreement.

Principle nine recognizes that Jerusalem is a holy city for the Jewish, Christian, and Moslem faiths. All individuals should be free to enter Jerusalem to observe their religious beliefs. This principle, fortunately, has existed in practice since 1967.

A final peace settlement on these principles presages a formalization of the ever-increasing American role in the Middle East. In the event of a final agreement based on these principles, this resolution, in section two, expresses a sense of Congress that the United States should guarantee the settlement.

This commitment should not be aimed against any party to the agreement but, instead, would support the principles agreed upon in the peace settlement to the benefit of all parties. Although Congress expressed great concern during its evaluation of the 1975 Sinai agreement that the United States not guarantee a situation that continued to be unstable and in flux, it is my belief that it would approve a U.S. guarantee of a final and overall settlement.

In a sense, Congress would be taking one further step and formalizing what already exists as a vague and ill-defined American commitment to the security of Israel. Beyond that, of course, Congress would be dealing fairly with the interests of Arab states. In 1973 we placed our forces on alert when Arab armies threatened to overrun Israel. We went to considerable lengths which included the weakening of our own military preparedness to speed emergency supplies to Israeli troops. We have continued since then to send high levels of military aid to that nation.

In the context of a final peace settlement in the Middle East, and only then, I would argue that it is in our interest, and in the interest of Israel and of all nations to seek peace and stability in the Middle East for the United States to establish a military base in Israel as part of the American guarantee. Israel, of course, would have to want and accept the existence of a U.S. base on its territory in order for this to occur. But I believe that we would all have much to gain by this clarification of the security relationship between the United States and Israel and by a U.S. security commitment to guarantee a peace—a just peace for all parties—based on the principles I have described. A U.S. security guarantee of the final settlement would be, therefore, a logical part of a peace package.

I am introducing the following resolution on Middle East peace in the hope that the United States will approach the fall of 1977 with neither optimism nor pessimism but with a sense of realism that will generate renewed and practical efforts toward peace.

Text of the resolution follows:

H. CON. RES. 284

Whereas peace in the Middle East is essential to world peace and to the peace and well-being of the people of the United States, Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the United States should seek agreement by all parties to a peace settlement in the Middle East based upon the following principles:

(1) Termination of all claims or states of belligerency and respect for and acknowledgment of the sovereignty, territorial integrity, and political independence of every State in the area and the right of each to live in peace within secure and recognized boundaries free from threats or acts of force.

(2) Development of full diplomatic and economic relations among all parties to the agreement.

(3) Withdrawal by Israel to boundaries approximating those of June 5, 1967.

(4) Establishment and control by the United Nations Security Council of a zone of proportionate width on each side of the borders between Israel and its contiguous neighbors, the security and inviolability of which is to be maintained by United Nations forces subject only to the authority of the United Nations Security Council and removable only by its affirmative vote, such zone to be free of nationally controlled military forces.

(5) The right of Palestinians to self-determination within the West Bank of the Jordan River and Gaza, subject to Palestinian recognition of and respect for the sovereignty and integrity of Israel within the agreed boundaries.

(6) Just compensation for Arab and Jewish refugees from the region who have suffered losses as a result of their displacement.

(7) The right, limited only by overriding considerations of national identity and security of the States involved, of displaced persons of the region to return to their homes.

(8) Guaranteed freedom of navigation through the Suez Canal and all international waterways of the area to all parties to the agreement.

(9) Guaranteed unhindered access to the city of Jerusalem to persons of all religious faiths.

SEC. 2. It is the further sense of the Congress that the United States should guarantee a final settlement based on the principles stated above.

A $48 BILLION PRESIDENTIAL ERROR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. EDWARDS) is recognized for 5 minutes.

Mr. EDWARDS of Oklahoma. Mr. Speaker, those who persistently oppose the deregulation of natural gas cite as justification the need to provide financial protection to consumers. However, as my two esteemed colleagues, Representative DAVID STOCKMAN of Michigan and Representative CLARENCE BROWN of Ohio, have just demonstrated in their analysis, "The Cost of Natural Gas Deregulation: A Reestimate," deregulation will actually benefit consumers. Indeed, they have reached the logical conclusion that our Nation can no longer afford not to deregulate. I commend their study to all my colleagues. I would also like to place in the RECORD an editorial from the Wall Street Journal, "A $48 Billion Presidential Error," which fully supports the Stockman-Brown analysis:

A $48 BILLION PRESIDENTIAL ERROR

When the House Commerce Committee two weeks ago voted 22-to-21 against deregulation of new natural gas, President Carter and his energy people celebrated a victory. The White House had come down to using the argument that deregulation would give producers a "windfall" of more than $71 billion in revenues. This is over and above what they would get from the $1.75 per thousand cubic feet (mcf) price ceiling in the Carter plan. Perish the thought, even though producers would probably invest almost as much in exploration and production as they receive in revenues.

Mr. Carter's energy people have been shamelessly playing with numbers like this all year to support their case for continued regulation, scaring people with the idea that deregulation will cost consumers a lot more money. What they carefully avoid mentioning is that continued regulation will cost even more.

In a careful, conservative study that bends over backward to be fair to the White House, two Republican Congressmen this week estimated that the Carter plan will cost $48 billion more than deregulation between now and 1990. Here is how Rep. David Stockman of Michigan and Rep. Clarence Brown of Ohio came to this conclusion:

They first reject the incredible White House assumption, implicit in its numbers game, that at a price above $1.75 per mcf zero gas will be produced. The study instead reckons that over the 13-year period, an additional 25 trillion cubic feet (tcf) will be produced as a result of deregulation. Current production is about 20 tcf a year, and the estimate of 25 tcf from deregulation is highly conservative. More production, of course, would mean more savings from deregulation.

If American consumers are denied 25 tcf of natural gas, they will have to get the energy instead from oil or liquefied natural gas or synthetic gas from naphtha or coal. All are more expensive than gas is likely to be under deregulation. The cost of these fuels adds $168 billion to the energy bill. And by moving 25 tcf less gas through the pipeline system, the distribution charges rise per unit to the consumer. This comes to another $44 billion cumulatively. The administration simply ignored these hidden costs in making its case.

The 13-year energy costs under deregulation are then calculated by Stockman-Brown at $414.2 billion. The parallel figure under the Carter plan is $461.8 billion with the gap between the two widening every year thereafter.

If there is any error in these numbers, the Carter plan gets the best of it, considering the length to which Reps. Stockman and Brown went to be fair. For example, they hold OPEC pricing constant through the 13 years. But obviously, if the United States must substitute for 25 tcf of domestic natural gas, it most likely will have to import the energy equivalent. This increase in demand would permit OPEC to increase its oil price by at least $1 per barrel for all oil. This adds an average of roughly $33 billion to the U.S. import bill during the 13 years, and adds $100 billion to the import bill of Europe, Japan and the Third World. The Stockman-Brown $48 billion estimate charitably ignores these costs.

Even if the increased demand has zero impact on OPEC pricing, it would still mean the United States would have to increase imports of Arab oil by nearly 500,000 bbls. per day when compared to a deregulated scenario. The Stockman-Brown study figures the Carter plan will mean an extra $26 billion in the U.S. import bill over these years even without a price increase.

The Carter people will no doubt want to quibble with these numbers, if they can't find a way of ignoring them altogether. But there is absolutely no logical way deregulation can cost consumers more than the Carter plan. The only way the President's people can defend their position is by sticking to their assumption that there is no gas to be found above $1.75. It is hard to see how any serious person can accept such an assumption. Even the most pessimistic of the three estimates in the ERDA MOPPS study, for example, found twice as much gas at a price of $3.25 than at $1.75.

Mr. Carter is supposed to be good with numbers and logic, and ought to sit down with his own slide rule, taking the administration's gas deregulation position as seriously as the B–1 or the neutron bomb. It's inconceivable that a good engineer would make a $48 billion mistake.

CAPTIVE NATIONS WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, during this 19th observance of Captive Nations Week, it is fitting that we extend our encouragement to the millions of people in the captive nations who yearn for the freedom we take for granted.

In his inaugural address, President Carter committed himself and our Na-

tion to steady and forthright action on behalf of human rights, when he said:

Because we are free we can never be indifferent to the fate of freedom elsewhere . . . The passion for freedom is on the rise. Tapping this new spirit, there can be no nobler nor more ambitious task for America to undertake . . . than to help shape a just and peaceful world that is truly humane.

President Carter's stand on human rights expresses the popular basis of our foreign policy, one which chooses activism instead of apathy, and vigilance instead of negligence. Public opinion polls show that Americans, many of whom trace their origins to the captive nations, are more concerned by the challenge to human rights than by any other aspect of international affairs.

Taking action on their feelings, as in Chicago, where thousands will march tomorrow in the annual Captive Nations Parade, means a conscious choice on the part of a great many Americans to use the tools of our democracy in reaffirming hope and support to those captive nations which aspire to national independence.

Under the dynamic leadership of Viktors Viksnins, chairman of the Captive Nations Committee in my own city of Chicago, a week-long observance of the plight of the captive nations is being held, culminating in a reception at the Palmer House Hotel. Rev. Hugo Grivans, who was allowed to leave Communist Russia after spending over 16 years in a Siberian concentration camp, is also visiting Chicago during this week, and I was glad to have a part in his release through communications with the Soviet authorities.

A copy of the Captive Nations Week proclamations by Chicago's Mayor Michael Bilandic and Chairman Viktors Viksnins follow:

OFFICE OF THE MAYOR, CITY OF CHICAGO,
PROCLAMATION

Whereas, our city's annual observance of Captive Nation's Week will be highlighted by a State Street parade at noon on July 16th; and

Whereas, under auspices of the Captive Nation's Friends Committee, the week's activities will direct public attention to the plight of people whose homelands are under Communist control; and

Whereas, many citizens of these countries are linked by family ties to residents of this community, and it is commendable that United States citizens, in appreciation of their freedom, should extend sympathy and the hope of freedom to their fellow-men and women whose liberty has been denied:

Now, therefore, I, Michael A. Bilandic, Mayor of the City of Chicago, do hereby proclaim the period of July 11 through July 16, 1977, to be Captive Nations Week in Chicago and urge all citizens to take cognizance of the special events arranged for this time.

[From the Captive Nations Committee, Chicago, Ill.]

CHICAGO CAPTIVE NATIONS WEEK JULY 11–JULY 16, 1977—RESOLUTIONS

Whereas, the Senate and the House of Representatives have authorized the President of the United States of America to proclaim the third week of July as Captive Nations Week, and

Whereas, communist imperialism has already enslaved one third of mankind and is making further inroads in Asia, Southern Europe, Africa and Latin America, and

Whereas, the military strength of the Western Powers is declining relative to the strength of the Soviet Union, making it harder to deal from a position of strength, and

Whereas, Western political and Business leaders, are making further concessions to the Soviets, concessions which only strengthen the power that oppresses tens of millions of Eastern European and Asian people, and which threatens all free countries, and

Whereas, the Soviet Union has failed to live up to the provisions of the Helsinki Conference concerning the basic human rights of individual and Religious Freedom and freedom of movement.

Now, therefore, be it resolved, by the Chicago Captive Nations Week Committee, to urge the United States to assume real and moral leadership in dealing with these problems. We urge the United States to consider beforehand, the effect any of its agreements and policies with the Soviet Union may have on the oppressed people of Eastern Europe, Asia and Cuba. We remind the United States and the Western countries that, agreeing to the Soviet Unions illegal annexations and occupations would set a precedent for accepting international lawlessness.

Be it further resolved, that the restoration of the sacred rights of all nations based on principles of democracy, self-determination, and sovereignty within their respective boundaries, must become the goal of Western and Soviet Policy. Only then will the world have a chance for a just and lasting peace. The United States is deceiving itself if it thinks it can bring peace to Europe as a partner of the Soviet Union while ignoring the wishes of the captive people of Europe.

Be it further resolved, that the United States maintain its strong stand on human rights at the Belgrade conference, dealing with the violations of the Helsinki Agreement as outlined in the House of Representatives, resolution No. 249 and Senate resolution No.

Be it further resolved, that the United States stop selling equipment and technology to the Soviet Union, which enhances the ability of an oppressive Soviet Government to stay in power.

Be it further resolved, that the United States, build up its military power relative to the Soviet Union. The present decline in United States power, if it continues, could prove fatal to the United States.

Be it further resolved, that the United States abstains from giving diplomatic recognition to Cuba and aid its Communist government through trade.

Be it further resolved, that the United States continues its support of Free Republic of China.

Be it further resolved, that this committee, once again urge the establishment of the permanent Captive Nations Committee (House Resolution 211) and Freedom Academy, which, is long overdue.

It will be my pleasure to participate tomorrow as grand marshal of Chicago's Captive Nations Parade and as the main speaker after the parade, because I firmly believe that we as Americans should take a strong stand in defense of the rights of oppressed peoples. As Americans, we are able, when many millions of others are not, to make choices as to where we will live and travel, and how we will raise our children. The recognition that others are not as fortunate in maintaining their cultural and religious heritage must drive us relentlessly toward action on behalf of the peoples of the captive nations.

The list of captive nations is long and grows longer with each passing year. The following is a current established list of captive nations:

ESTABLISHED LIST OF CAPTIVE NATIONS

THE CAPTIVE NATIONS—WHO'S NEXT?

Country, people, and year of Communist domination

Armenia	1920
Azerbaijan	1920
Byelorussia	1920
Cossackia	1920
Georgia	1920
Idel-Ural	1920
North Caucasia	1920
Ukraine	1920
Far Eastern Republic	1922
Turkestan	1922
Mongolia	1924
Estonia	1940
Latvia	1940
Lithuania	1940
Albania	1946
Bulgaria	1946
Yugoslavia (Serbs, Croats, Slovenians, etc.)	1946
Poland	1947
Romania	1947
Czecho-Slovakia	1948
North Korea	1948
Hungary	1949
East Germany	1949
Mainland China	1949
Tibet	1951
North Vietnam	1954
Cuba	1960
Cambodia	1975
South Vietnam	1975
Laos	1975

Mr. Speaker, this is not a time for acceptance and resignation, but a time for confidence and determination. Free men and women and free nations, acting in unity, are more than a match for any totalitarian system. The spirit of freedom can never be crushed, but freedom itself can be gradually eroded. We face this danger today in Europe, and such a threat, if unchallenged, could have serious consequences not only for Europe but for democracies all over the world including our own.

If we value freedom, we as a Nation and as a people will face this challenge, steady our vigilance, and renew our determination to overcome it. Europe is the cradle of our civilization, and the nations of Europe remain our strongest allies and closest working partners. This tradition and heritage of freedom and cooperation with the countries of Europe remains our best hope of final victory over the totalitarianism that threatens us all.

Mr. Speaker, during this Captive Nations Week, observance in many parts of our country symbolize America's rededication to the struggle for liberty and human rights. And at the same time, the steadfastness and courage shown to us by the suffering citizens of the captive nations continues to provide inspiration to us all. We shall together remain adamant in our opposition to this tyranny until the struggle is won and the captive nations once again take their

rightful place in the community of free nations.

ALICE PAUL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New Jersey (Mrs. MEYNER) is recognized for 5 minutes.

Mrs. MEYNER. Mr. Speaker, the news of Dr. Alice Paul's death at the age of 92 saddened me greatly. I had hoped she would live to see her equal rights amendment become a part of the U.S. Constitution.

Dr. Paul devoted the greater part of her life to working on the ERA's passage and, unfortunately, as she spent the last days of her life in a New Jersey nursing home, the "life" of the ERA is uncertain.

Her legacy remains, and she will continue to live in the hearts of the many women she has inspired. An excellent editorial on the imprint she left in "her story" appeared in the Washington Star on July 14, and I commend it to the attention of my colleagues.

ALICE PAUL

Before Betty Friedan had stopped waxing her kitchen floor, before Gloria Steinem knew enough not to wear pink, even before Shirley Chisholm decided to run for President, there was Alice Paul. When she died last week at 92, this indomitable woman had been fighting for women's rights for more than 70 years.

Hers was the generation that took the real heat in women's battle for the vote. These were the suffragists who went to jail, starved themselves on hunger strikes and endured force feeding to dramatize their determination.

Alice Paul got her first exposure to militant feminism in England around the turn of the century. She was one of the followers of Emmeline Pankhurst and she exposed herself to the same hazards and penalties, prison included.

Back in the United States, she added D.C. jail and the Occoquan workhouse to her prison experience. She also had a taste of life in the psychopathic ward of a hospital where she was taken after her prison hunger strike had weakened her to the point where she needed medical care.

It worked, of course. The 19th amendment was passed, and women had the vote.

For Alice Paul, though, this was a preliminary skirmish in a large war. In 1923, she wrote the first Equal Rights Amendment submitted to Congress. The National Women's Party, which she helped to found, saw to it that the amendment was introduced in every Congress for the next 49 years, until it was passed in 1972. Alice Paul lived to see it ratified by 35 states—all but the last three needed to make it official as the 27th amendment to the Constitution of the United States.

The shifting status of women in society is one of the dramas of modern times, and only the shift in itself is more significant than the way it has come about. It is not too much to say that feminists of the Alice Paul kind virtually invented the style of guerrilla politics that has now become so central an instrument of social change for our times.

There had been civil disobedience before, but these women were pioneers in the manipulation of public opinion through its display. They used their position as members of an educated and well-born elite-Alice Paul graduated from Swarthmore at a time when university training was for few men and extremely few women. They used the chivalries and taboos community mores still attached to their femaleness. They developed great expertise at maneuvering policemen and government officials into brutalities.

The heritage of their tactical genius has not been entirely happy. And yet, it is always inspiring to be reminded, as the life of Alice Paul reminds us, of the way individual courage and determination do change the world.

HELSINKI'S UNFULFILLED PROMISES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. GLICKMAN) is recognized for 5 minutes.

Mr. GLICKMAN. Mr. Speaker, my family and I enjoy rights and freedoms here in the United States, rarely available to citizens in any other nation on Earth. But I am not here today to extol the virtues of the American system. I would like, instead, to relate a story of a family who is not so fortunate.

A constituent of mine, Mr. Sam Hardage of Wichita, Kans., visited the Soviet Union recently and met with Victor and Irina Breilovsky and their children, a Soviet Jewish family who has been denied an exit visa to Israel by the Russian authorities.

After returning to the United States, Mr. Hardage alerted me to the suffering of the Breilovsky's. I told him I would bring their situation to the attention of Congress through the "Helsinki's unfulfilled promises" project.

Five years ago the Breilovsky's applied for a visa to emigrate. The day after the application was made both Mr. Breilovsky and his wife were fired from their jobs. In addition, their telephone service was cut off and their mail intercepted and heavily censored. During this time the family has been subsisting on income earned by Mr. Breilovsky from freelance interpretation under the name of a friend.

Prior to their application, Mr. Breilovsky was a research scientist, and his wife, a mathematician. While his request to emigrate was accepted, Mrs. Breilovsky's was not on the basis that her work with paritive equations might have exposed her to state secrets. This branch of mathematics is well known and practiced worldwide. To my knowledge, there is nothing secret about what she was doing.

In addition to the suffering caused by their loss of jobs, their son Leonid, has been subject to repeated and severe harassment by school officials. He has been forced to change schools three times, each school more inferior to the previous one. Leonid is now faced with the prospect of being drafted into military service, which according to Soviet authorities, will expose him to state secrets. This would automatically exclude him emigrating.

On the basis of Leonid's situation and because of the KGB's recent interrogation of Mr. Breilovsky, the family has decided that they would like to have any member of their family emigrate.

Despite the Soviet's agreement to the Helsinki Accords, situations like that of the Breilovsky family continue to exist. It is essential, therefore, that we increase, even amplify our efforts to let the Soviets know of our feelings in this abrogation of human rights.

HEARINGS TO BEGIN ON MAIL OPENING BY CUSTOMS SERVICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

Mr. PREYER. Mr. Speaker, I discussed in this Chamber last month a concern with the 6-year-old practice by which the Postal Service permits the Customs Service to open sealed mail from abroad without a search warrant.

My Government Operations Subcommittee on Government Information and Individual Rights has been examining this matter. On Thursday, July 28 at 9:30 a.m. the subcommittee will open public hearings by receiving testimony from the U.S. Postal Service. Witnesses for the Treasury Department and Customs Service will testify at a subsequent hearing.

Any Member who has received complaints about the opening of sealed letters from abroad is welcome to forward those materials to the subcommittee staff.

CIGARETTE SMUGGLING: THE NEED FOR FEDERAL ACTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

Mr. DRINAN. Mr. Speaker, the illegal transportation and sale of cigarettes across State lines is a serious and growing crime which receives far too little attention. Criminals purchase large quantities of cigarettes wholesale in a State with a very low tax on cigarettes and transport them to a State with a much higher tax. They then sell them at a black market price lower than the legal market price of the high-tax State, but at a large profit over the initial purchase cost in the low-tax State.

Law enforcement officials have compiled overwhelming evidence that organized crime is largely responsible for cigarette bootlegging. Organized crime derives hundreds of millions of dollars annually from this activity—money which is stolen from the majority of the States. Bootlegging not only robs millions in revenue from the States; it also robs legitimate cigarette wholesalers and packers of their livelihoods and, in some cases, their lives. It is emphatically not a victimless crime.

Revenue losses include not only tax dollars, but also increased costs for law enforcement and for unemployment compensation payments to those who lose their jobs as a result of massive illegal wholesaling of cigarettes. The transportation of contraband for illegal sale is by definition an interstate activity, thereby making it impossible for the States to deal effectively with this type of crime. Only the Federal Government can

take the measures required to alleviate this serious and growing problem.

Cigarette bootlegging arises as a result of the wide disparity in the rates at which the individual States tax cigarettes. In Massachusetts, for example, the cigarette tax is 21 cents per pack; in North Carolina, the tax is but 2 cents per pack. Cigarettes are bought wholesale in North Carolina or in several other low-tax States and then sold in Massachusetts, Texas, Connecticut, Minnesota or any of a large number of high-tax States at a black market price, yielding enormous profits for organized crime. The retail price of cigarettes, including State taxes, varies from a high of 57.6 cents in Connecticut down to 35.8 cents in North Carolina—a 21.8 cents diflerential. It is this differential which makes cigarette bootlegging so profitable—and therefore inevitable.

The extent of organized crime's involvement in cigarette bootlegging is well documented. According to the Advisory Commission on Intergovernmental Relations, organized crime is responsible for the illegal transportation and sale of more than a billion packs of cigarettes annually, resulting in criminal profits of more than $105 million and losses to wholesalers and State tax bureaus of more than $500 million.

Because of the huge illegal interstate traffic in cigarettes, more than 2,500 drivers, packers, and salesmen in New York State alone have lost their jobs, and nearly half of New York's legitimate cigarette wholesalers have gone out of business. Other high-tax States have suffered similar job and revenue losses. The remaining wholesalers are forced to pay enormous sums annually for skyrocketing insurance premiums and for security guards. Despite these measures, the profitability of bootlegging is such that theft and hijacking continue to increase.

Among the majority of the 50 States which are substantially affected in terms of the percent of cigarette tax revenue lost due to smuggling are the following: Connecticut, 20.0 percent; Washington, 18.8 percent; Florida, 17.5 percent; New York, 17.4 percent; Texas, 17.3 percent; Arkansas, 15.8 percent; New Jersey, 15.3 percent; Wisconsin, 14.2 percent; Pennsylvania, 13.6 percent; and Minnesota, 14.9 percent. The annual net loss in tax revenues from the States as a whole as a result of cigarette bootlegging is approximately $337 million. The States losing the most revenue are New York, $172.3 million, Texas, $143.1 million; Pennsylvania, $35.6 million; Florida, $35.7 million; and New Jersey, $26.0 million.

Individual States are clearly unable to deal with this problem. Federal action is essential to foster effective law enforcement and to remove the incentives for the illegal interstate transportation and sale of cigarettes. Cigarette smuggling can be reduced significantly only by congressional action to eliminate the enormous State tax differentials. The States cannot be expected to adopt more uniform tax rates in the absence of Federal incentives. The high-tax States have pressing revenue needs and are, therefore, unlikely to lower their cigarette tax rates; the low-tax tobacco-producing States generally do not have equivalent revenue needs and are not favorably disposed to increasing the tax on their major product.

In short, only the Federal Government has the authority and the resources to combat cigarette smuggling and remove this large and growing source of revenue for organized crime. An effective solution requires comprehensive Federal legislation that will bring about a more uniform tax rate among all the States and thereby eliminate the incentive for cigarette smugglers.

In the near future I will introduce legislation to accomplish this goal. The bill which I will introduce will include both incentives for more uniform State taxation of cigarettes and a formula to insure that revenues are distributed in an equitable fashion so that no State suffers an undue financial burden or an undeserved windfall. I hope that Congress will act expeditiously and decisively to put the cigarette smugglers out of business and end the drain on State treasuries.

HUMAN RIGHTS DRIVE PERSISTS UNDER SOVIET PRESSURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

Mr. FASCELL. Mr. Speaker, two remarkable documents recently received from the Soviet Union give powerful testimony of the strength Soviet human rights activists are displaying under mounting adversity. Both reports are from the Groups to Promote Observance of the Helsinki Accords in the USSR, one from the original Moscow group and one from the organization created in the Ukraine to monitor compliance with human rights pledges in that part of the Soviet Union.

Both speak of the growing repression against members of the groups, of the trial and cruel sentences given Ukrainian Helsinki advocates Mikola Rudenko and Oleksiy Tykhy, of the trumped-up charges of arson used to exile Moscow group member Malva Landa to Siberia—supposedly for setting fire to her own apartment. The trial of Rudenko, a distinguished writer, and of Tykhy, a schoolteacher, was not even held in a courtroom. It was staged in a village factory far from the cities where the men were arrested last February. It was entirely closed to their friends and barred—for the first 6 days—to their womenfolk. It was also sealed completely, of course, against the critical gaze of foreigners who have their own stake in seeing how the Soviet Union honors the pledge it gave at Helsinki to "promote and encourage the effective exercise of civil and political rights."

Both documents also evidence a fierce determination to go on holding the Soviet leadership's Helsinki performance up to the scrutiny of world opinion. The KGB, these dedicated men and women maintain, is trying not only to crush the Helsinki monitors but to convince outsiders that they have already been battered into submission. "We declare," say the members of the Moscow group, "before the entire world that these claims are without any basis whatsoever." Though arrests and exiles have cut deeply into the group's founding membership, new supporters have joined in Moscow and the Ukraine. "The groups are enduring, replenishing," the leaders assert. "The best indicators of this are the documents of the groups and the incessant flow of declarations concerning violations of the Helsinki Accords in the Soviet Union that make their way to the groups.

In spite of the intensification of repressions, the work . . . is continuing.

The full documents were made available to the Commission on Security and Cooperation in Europe by the New York-based Committee for the Defense of Soviet Political Prisoners. They are appalling and simultaneously encouraging. I believe they will be of interest to all our colleagues.

DECLARATION OF THE MOSCOW GROUP TO PROMOTE OBSERVANCE OF THE HELSINKI ACCORDS

In conjunction with speeches made at the Belgrade Conference, the KGB has begun to settle matters with the arrested members of Soviet Helsinki Monitoring Groups. We are referring, in particular, to the leader of the Ukrainian group, Mykola Rudenko and group member Oleksiy Tykhy. Simultaneously, in Odessa, the philologist Vasyl Barladyanu is being tried for the dissemination of the materials of this group.

In Moscow, formal court proceedings, based on provocational charges against Helsinki group member Malva Landa were initiated in regard to a fire in her apartment, and against a tactician of the Jewish movement, Josef Begun, who was charged with parasitism.

The trials of Rudenko, Tykhy and Barladyanu are taking place in total secrecy. The Kiev-resident Rudenko was taken 800 kilometers from Kiev to Donetsk, and the trial against him and Tykhy was begun in the working-class village of Druzhkivka, 100 kilometers from Donetsk. The trial began in the "Red Corner" * of a closed enterprise.** The trial-room was filled by individuals approved by the KGB. Not only were the friends of the accused not allowed into the trial-room, but neither were the arriving relatives; among them the 80-year old mother of Oleksiy Tykhy, who with great difficulties had made her way to Druzhkivka. The workers from the factory where Tykhy was employed were also forbidden from entering the site of the trial. They had arrived there in order to attend the court proceedings, but were denied the right of entry. The trial of V. Barladyanu is also a "closed" proceeding. We don't know what is going on behind the closed doors of these trials, in which the verdicts will, naturally be claimed to be "OPEN".

But what is coming to pass? Total injustice. Is this the way that "socialist democracy" is being expanded? Similarly, we have learned from a letter by former political prisoner Yuri Fedorov, that the organs of the KGB are attempting to construct a frame-up against Aleksander Ginzburg and Yuri Orlov along the lines of the Shakhtivsky Case, the Industrial Party Case, the case of the "SVU" (Ukrainian Liberation League), and the case of the "Social-Democratic Center"; "legal" and "illegal" "centers". The KGB is attempting to create such centers from among the ranks of former prisoners through

* A Communist Party information center.
** A factory for which one needs a special security pass to gain entrance.

the utilization of physical force, promises and threats. All this is being in order to carry out reprisals against the leading participants in the movement for the defense of human rights in the USSR; to slander and blacken all opposition in our country. The ultimate purpose of all this is to serve in disseminating false KGB-inspired rumors, spread into the West by such correspondents as Kraft, concerning the fact that the opposition movement in our country has been crushed, that the Helsinki Group has ceased its activity.

We declare, before the entire world that these claims are without any basis whatsoever. In spite of arrests and emigration to the West which have resulted in the decline of our membership by half, it is with a feeling of great pride for our leading members, that we note that in answer to the repressions many new friends have appeared, and a number of them have expressed the desire to enter into the ranks of the Group. The Moscow Group has added the outstanding Soviet lawyer Sofia V. Kalistratova. Petro Vins, (the son of prominent religious activist Georgiy Vins, who is currently incarcerated) has joined the Ukrainian Group, as has Oiha Heyko, the wife of arrested Group member, Mykola Matusevych. The Groups are enduring, replenishing. The best indicators of this are the documents of the Groups and the incessant flow of declarations concerning the violation of the Helsinki Accords in the Soviet Union that make their way to the Groups.

In spite of the intensification of repressions, the work begun by Orlov, Ginzburg, Shcharansky, Rudenko, Tykhy, Matusevych, Marynovych, Gamsakhurdia, Kostava and other member of the Groups, is continuing.

DECLARATION OF THE UKRAINIAN GROUP TO PROMOTE OBSERVANCE OF THE HELSINKI ACCORDS; ON THE TRIAL OF MYKOLA RUDENKO AND OLEKSIY TYKHY

Such is "socialist democracy"! And so, seven years strict regime and five years exile have been meted out to the leader of the Ukrainian Group to Promote the Implementation of the Helsinki Accords; the poet and philosopher Mykola Rudenko; and ten years of special regime and five years' exile for a member of the Group, the school teacher Oleksiy Tykhy. Can what occurred be called a trial? No!

People are tried openly and justly (if they are criminals), but in this case people have been tyrannized for many years and afterward secretly taken away for investigation in a gangster-like manner, 800 km. away from their native city. For the site of the trial they chose a place (Druzhkivka) even 100 kilometers further away. A "Red Corner" * situated in a closed enterprise ** was transformed into a court-room and filled with a carefully selected audience. No friends or observers were allowed into the court-room. Not even close friends or family had been informed, either about the conclusion of the investigation or the beginning of the trial.

As a result the defendants were left without any defense. And the wife of Rudenko and the 80-year old mother of Tykhy were admitted only on the 6th day. They were shaken by the appearance of the accused. Both defendants appeared tired and exhausted. During the course of the defense and especially during his final statement Mykola Rudenko felt faint several times. This is not surprising, as five months of detention in a Donetsk prison, situated in a heavily polluted "industrialized" region, could not have passed without having taken their toll.

The Court declared the Ukrainian Group to be an anti-Soviet organization and its documents were regarded as anti-Soviet. This is a blatant falsehood. Among the documents of this Group there isn't one which we do not support. We find only documents which discuss the actual violation of the Helsinki Accords in our country. One can easily be convinced of this provided all the facts we have reported are subjected to public examination. But such a public examination was not even attempted. Worse than this, measures were adopted so that even the public would not know what was taking place in the court.

The organizers of the trial behaved in a Mafia-like way; abducting the victims and isolating them. This is precisely the principle they followed by choosing Druzhkivka as the place of the trial. In a large city, for example in Donetsk, it would have been more difficult to spot an outsider. But in Druzhkivka the militia knows all the inhabitants. This is why friends of the defendants arriving from Kiev and Moscow immediately fell into the hands of the authorities. Some were detained for three days in a preliminary detention cell, and then were forcibly sent home. Naturally, in conditions of extreme isolation, it is possible for the authorities to make false charges and mete out punishment for a truthful account of repressive activities on the part of the authorities. In such conditions reprisals can be made with gangster-like cruelty.

The court sentence for Mykola Rudenko means death. Due to his war wounds he will not last long under the conditions of a strict regime concentration camp. For Oleksiy Tykhy the verdict virtually means life imprisonment. Tykhy is a fifty-year old, infirm person, and even if he survives the conditions of a special regime camp, followed by exile, his health will undoubtedly deteriorate.

Only universal indignation can be the answer to such inhumanity. Shame on the executioners of the judicial cover-up! Shame on those who inspire these executioners! Freedom for Mykola Rudenko, Oleksiy Tykhy and Vasyl Barladyanu, (who was convicted concurrently in Odessa on the 29th of June) for distributing materials of the Ukrainian Group! Freedom for the other arrested members of the Helsinki Groups: Puri Orlov, Aleksandr Ginzburg, Anatoly Shcharansky, Mykola Matusevych, Myroslav Marynovych, Zviad Gamakhurdia and Merab Kostava! Freedom for all political prisoners in the USSR!

---

U.N. LAW OF THE SEA CONFERENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

Mr. BEDELL. Mr. Speaker, the United Nations Law of the Sea Conference has just completed its summer session, and later today will release a composite draft treaty which embodies the Conference's recommendations for the orderly management of our oceans. I would like to take this opportunity to commend our able U.S. delegation for its hard work and dedication on this highly significant international effort, and I look forward to hearing Ambassador Richardson's report on the Conference which will be presented in executive session before the House International Relations Committee next Tuesday, July 18, 1977.

The Law of the Sea Conference in New York considered a variety of important issues. However, the greatest controversy surrounds the question of deep sea mining.

There are two basic schools of thought on this issue. One camp argues that exploitation of mineral resources on the ocean floors should be postponed until an international agreement governing such development is devised. The other contends that since American mining companies have the technological ability to exploit these resources now, they should proceed to do so, with the Federal Government guaranteeing their investment in such an operation.

I have been involved in the dispute over access to mineral deposits on the deep seabed as a congressional delegate to the Law of the Sea Conference, and I am opposed to unilateral development. I believe that there has been considerable misunderstanding in the national debate on the deep sea mining issue and I would like to attempt to put it into better perspective.

Mr. Speaker, the driving force behind the unilateral approach are four mining consortiums. As a lifelong businessman, I believe that I understand their rationale in advocating this option. These four companies are not interested in waiting for the negotiation of a new law of the sea treaty. They simply do not perceive such a strategy to be in their best interest.

These four mining companies are primarily concerned with maximizing their profits—which is understandable. They have thus devoted considerable time, energy, and financial resources to selling their position to U.S. officialdom and the American people. Their representatives sat in on U.N. deliberations in New York. They participated in discussions at briefings. And they are very active in lobbying Congress. In fact, one company, Kennecott Copper, even hired a former U.S. law of the sea negotiator as legal counsel and lobbyist. In view of the tremendous potential profits of deep sea mining operations, it appears to make sense for the industry to expend the money and the effort necessary to implement legislation and a treaty which are favorable to them.

Having outlined some of the reasons why the four mining consortiums have mounted a formidable campaign in behalf of unilateral action, let me explain briefly why I feel that it would be a mistake for the Congress to encourage such a course of action by enacting legislation which would require the Federal Government to compensate the mining companies for any loss in investment suffered as a result of a subsequent ratification of an ocean treaty.

In my judgment, the deep sea mining issue transcends the perceived self-interest of a select group of mining companies. It involves the question of who will prevail when the pursuit of world harmony and order conflicts with the short-term financial interests of a small component of American industry. And, in addition, it raises a fundamental question about the relationship between the short-range and long-range interests of American business in the international environment.

Several weeks ago, former Secretary of State, Henry Kissinger, addressed a business seminar conducted by Georgetown University's Center for Strategic and International Studies. During his appearance, Dr. Kissinger commented on what he feels is the shortsighted approach which much of American business applies to public policy issues, and suggested that many of the positions which business takes on these issues are actually counterproductive to their own best interests. In fact, Dr. Kissinger went so far as to say, in comments to the press—and I am quoting now—"business has no perception of its long-range interests," and that, "when business gets into trouble, it sends its lobbyists around."

I do not agree with Dr. Kissinger's sweeping generalizations about the motivations and perspicacity of American industry. And I think that he is being unfair to much of the business community with his stereotype. However, I do believe that the law of the sea issue constitutes a good example of a case where blind adherence to short-term profits is contrary to good public policy and, in the long run, is indeed counterproductive to business' own best interest.

It is important to understand that the relationship between the developed and developing worlds lies at the heart of the international debate over the establishment of an authority to regulate deep sea mining. The developing nations, long victims of an unequal distribution of the world's wealth, have a legitimate demand for equity, and for a greater share of the fruits of global economic development. But they cannot escape, any more than the industrial nations, the reality that their future depends on the health and stability of the international economic system. This is the common thread that binds all participants in the international comity of nations.

In his recent Georgetown University address, Dr. Kissinger commented that:

It is one of the urgent tasks of government to make clear, on an agreed basis, the ground rules for foreign investment. Developing countries have a right to ensure that private capital is admitted in areas or ways consistent with the national priorities and legitimate regulations of a sovereign government. But investors and the industrial nations have a right to know in advance what the ground rules are, and not to have them altered arbitrarily and capriciously in the middle of the game. Both sides have obligations; both sides can benefit from agreed principles cooperatively achieved.

Later on in this same speech, Dr. Kissinger touched upon the role of industry in this scheme. Thus, he said:

Governments of the industrial nations must assume a major responsibility. New agreed practices of international cooperation, and new institutions which have the confidence of all parties, are needed to provide a framework of public commitment and private incentive within which the multinational corporation can make a constructive contribution to development in the decade ahead.

Mr. Speaker, this is sound counsel, and I would suggest to my colleagues in the Congress that nowhere is this more clear than in the case of the law of the sea.

The four mining companies who wish to proceed with unilateral exploitation of the deep seabed have assumed a very narrow view of this issue. In my opinion, corporate planners should realize that if they would be more patient, and give negotiation a chance, they would benefit in the long run. The establishment, by general agreement, of an international authority to govern development of the deep seabed would be far better for all parties concerned than chaos in the absence of a treaty.

Mr. Speaker, I am greatly disturbed that the anti-treaty, pro-unilateral action lobbying efforts of four mining companies may jeopardize the opportunity to negotiate an acceptable international solution to the deep sea mining question, and, in the process, may taint the public perception of American business. Such an outcome could be unfortunate in the extreme—for the American people, for American industry, and for the international community. When it comes to deep sea mining and the law of the sea, I must agree with Dr. Kissinger's assessment that business is working against its own interests.

AGRICULTURAL ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WOLFF) is recognized for 5 minutes.

Mr. WOLFF. Mr. Speaker, I rise today in order to call to the attention of the House the broad based support which has formed behind my amendment to strike title XV from the Agricultural Act of 1977. This title, which would establish a wheat research and promotion program, would adversely affect consumers, farmers, and processors. I would like to read for the benefit of my colleagues some correspondence which I have recently received from representatives of each of these groups in favor of the amendment which I will offer:

CONSUMER FEDERATION OF AMERICA,
Washington, D.C., July 14, 1977.

DEAR REPRESENTATIVE: This week the House will vote on H.R. 7171, the Agricultural Act of 1977.

At its most recent Board of Directors meeting on June 8, 1977, CFA's Board approved a policy resolution on the Farm Bill, a copy of which is attached.

The purpose of this letter is to specifically communicate to you CFA's strong opposition to Title XV of the bill, and urge you to vote for the Wolff amendment which would delete that provision.

While we agree that there are important consumer concerns about the nutrition supply and marketing aspects of the wheat industry, we do not feel that the scope and structure of Title XV of the Agricultural Act will optimally address them.

At its most recent annual meeting, on February 12, 1977, CFA adopted the following policy resolution concerning commodity and promotion boards:

Commodity and promotion boards which are in any way sponsored, administered, or supported by the government should not be allowed. By promoting certain commodities at the expense of other commodities, these boards violate basic principles of fairness, represent an inappropriate involvement of government officials and taxpayer revenues in private industry gimmickry, and ultimately result in an increased consumer cost of the commodities promoted.

During Congressional consideration of the Beef Research and Information Act, the Office of Management and Budget foresaw the dangers of commodity boards when it stated that the bill:

. . . would not be in the long-run interest of agriculture, the food industry, or consumers in general. The involvement of the Federal Government in the promotion of a particular commodity at the expense of other commodities would compel other commodity groups to seek similar assistance in order to maintain their share of the food market. The net effect of such action would be to unnecessarily increase costs to both producer and consumers.

CFA is concerned that any assessment will be passed on to consumers, particularly in light of the oligopolistic character of certain segments of "end product manufacturers." In addition, a substantial portion of the collected assessment is bound to go toward advertising and promotion in view of the apparent preference of many "end product manufacturers" for the short term benefits of advertising versus the long term benefits of product improvement and lowering of prices.

We therefore urge you to vote for the Wolff amendment to delete Title XV of H.R. 7171. The title is clearly anti-consumer provision.

You will be receiving additional communications from CFA as to our position on other specific features of this legislation.

Sincerely,

KATHLEEN F. O'REILLY,
Executive Director.

AMERICAN FARM BUREAU FEDERATION,
Washington, D.C., July 15, 1977.

Hon. LESTER L. WOLFF,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN WOLFF: The American Farm Bureau Federation opposes Title XV of the proposed Agricultural Act of 1977, H.R. 7171.

Farm Bureau has given careful consideration to various commodity promotion programs over the years. In the case of the so-called Wheat and Wheat Foods Research and Nutrition Education Act, the AFBF Board of Directors has approved a recommendation of the AFBF Wheat Advisory Committee, composed of wheat producer leaders from 15 major producing states, that this legislation be opposed.

Although the proposal provides that funds would be checked off from end product manufacturers, it is to be expected that such funds ultimately would come from the returns paid to farmers from raw commodities.

Farm Bureau urges deletion of Title XV from H.R. 7171 by the House of Representatives.

Sincerely,

JOHN C. DATT,
Director, Washington Office.

THE BISCUIT AND CRACKER MANUFACTURERS' ASSOCIATION,
Washington, D.C., July 13, 1977.

Hon. LESTER L. WOLFF,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN WOLFF: Title XV of H.R. 7171, Agricultural Act of 1977, contains the Wheat and Wheat Foods Research and Nutrition Education Act which would authorize a tax on all products containing wheat to finance baking industry research programs. Provisions of this Title would establish sweeping government interference in industry nutrition, research and education programs. Taxing power of government should not be used to finance private indus-

try programs. Cookie and cracker industry which uses 70 million bushels of wheat annually opposes Title XV. We believe this legislation undesirable from any standpoint. We urge you to support amendment to strike Title XV from H.R. 7171 on floor.

Sincerely,

JOSEPH M. CREED,
Executive Vice President and General Counsel.

SOCIAL SECURITY SYSTEM

(Mr. BEDELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BEDELL. Mr. Speaker, the financial stability of the social security system is of great concern to us all. In recent years, we have heard much discussion about projected deficits in the system which, in turn, have precipitated alarm in Congress and throughout the country.

The general parameters of the problem are well known. The social security system faces both an immediate and long-term financial crisis, as is evidenced by the growing imbalance between expenditures and income in the social security trust fund. The question is how to best deal with this problem.

Today, the gentleman from Ohio, Mr. WHALEN, and I are introducing legislation which is designed to correct the long-range financial dilemma of the social security system. This proposal, entitled the Social Security Benefits Decoupling Act, would cut the predicted long-term deficit in half. It would also simplify accounting procedures, and make the benefits system comprehensible to the layman. And it would give a fair shake to workers who participate in the social security system, while having no effect on present retirees. The bill contains a 10-year "hold harmless" provision to avoid inadvertent lowering of benefits for any individual.

Let me take just a moment to amplify.

The projected imbalances in funding in the social security system are attributable to two factors: First, a basic change in demographic trends which have created a situation where fewer workers will be supporting a larger retired segment of the population; and, second, a flaw in the automatic benefit formula for the computation of benefits which was established in the Social Security Act Amendments of 1972. It is this latter problem which the Whalen-Bedell proposal seeks to redress.

Social security authorities, both in and out of Government, agree that the current ratio between earnings before retirement and benefits is appropriate and equitable. But, under existing law, this ratio does not remain stable. It increases progressively over time. Thus, each time present retirees receive an automatic social security cost-of-living increase, the ratio of benefits to earnings for future retirees also rises. The net result is that, if the present situation, which "couples" employee contributions with automatic benefit adjustments, continues, many future retirees will actually draw larger social security benefits than their wages before retirement. It does not take much imagination to perceive the implications of such a contingency for the long-range financial stability of the social security system.

The Whalen-Bedell proposal would "decouple" payments for future retirees from automatic adjustments for present retirees thus assuring that future benefit levels will not be tied to wage and price increases and that replacement rates will remain relatively constant. Such a change would not, of course, restrict benefit amounts, which would continue to be based on the Consumer Price Index. For a more detailed discussion of this issue I would refer you to the March 10, 1977, CONGRESSIONAL RECORD, page 7064.

The Whalen-Bedell bill is not a complicated measure. It proposes a three-step progressive benefit formula based on the average of the wages earned in any "high 10" years of the worker's employment. That is all there is to it.

This is not a new or radical concept. Of the 65 existing Federal income security programs, five of the leading 10 programs base benefits on the average of a top-X number of years. Foreign service officers, for example, receive benefits based on the highest average salary earned during any 3 consecutive years of service multiplied by 2 percent times the years of service.

Social security, on the other hand, currently involves a complicated eight-step guide to computation of benefits. If an applicant wishes to compute his benefits, he must first complete these eight steps only then to discover that he still must decipher the actuarial benefit tables. And, to top matters off, these tables change almost every year, and, of themselves, involve a nine-step formula for determination of benefits.

Mr. Speaker, over 33 million Americans contribute to the social security system. I believe that they are entitled to a program which is as workable and fair as those available to foreign service officers, or civil service employees, or to the employees of the Tennessee Valley Authority and to District of Columbia policemen, firemen, and teachers. It seems to me that participants in the social security system—which is the largest retirement program in the United States—should be assured equitable treatment relative to other Federal retirement programs and should have confidence in the viability and responsiveness of their program. Sadly, this does not appear to be the case at present.

Mr. Speaker, Congress has already delayed action on the social security trust fund issue for too long. The need for the substitution of a new benefit formula for the present "coupled" system has been universally recognized. It is time to implement a well-conceived decoupling proposal. It is also time to provide participants with a system that is equitable, responsive and comprehensible. I hope that the Ways and Means Committee hearings on social security financing problems, which are scheduled to begin on Monday, July 18, will contribute to that end.

ARE THE GLOBAL BUREAUCRATS WORTH THEIR HIRE?

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, while we argue about congressional pay and, indeed about nearly everyone's pay in our own country, we overlook the biggest ripoff of them all in salaries. The bureaucrats in organizations such as the United Nations and the World Bank apparently have found the happiest hunting grounds of all. They are paid salaries and provided benefits which are literally out of this world.

A recent article in the Christian Science Monitor by Mr. John Dillian states, for example, "A U.S. Federal employee with a GS–18 earns $47,500 as a result of this year's pay hike. But at the World Bank pay for the same type of job is $74,-100, and at the United Nations it is $85,-500."

Mr. Dillian goes on to note, "Bureaucrats drawing salaries of $40,000 and up have become commonplace. Figures compiled here show that at the World Bank, the average salary for more than 2,000 members of the 'professional' staff * * * is $48,050 a year."

As an issue related to those bloated salaries, a recent survey done by the General Accounting Office called attention to the fact that although the United States contributes a minimum of one-fourth and sometimes as much as one-third of the funds for the operation of the United Nations, only 13 percent of the U.N. professional employees are Americans.

The House has just passed the largest foreign aid bill in the last quarter of a century. Despite the best efforts of some dedicated Members to reduce this bill, it wound up as a whopping $6 billion. I doubt seriously that the people back home are happy about this situation. One of the contributing factors to the high cost of foreign aid is the salary of the people who work for the United Nations and related organizations.

I would urge my colleagues in both the House and the Senate to take note of this development. It should be of interest to know also that the work force of the United Nations has doubled in the past 10 years; that the State Department estimates that the basic salaries of the U.N. professionals are 38 to 57 percent higher than the salaries of the U.S. civil servants; and that pensions for U.N. employees are as much as 55 percent higher than for our civil servants.

It is clearly time for the Congress to increase its scrutiny of these organizations with particular regard to the salaries and benefits paid. We should not expect the American taxpayer to continue to fund agencies which are clearly out of line with unreasonable salary and benefit schedules. In no case should the United States contribute to the payment of salaries in world organizations in amounts higher than those drawn by employees of comparable responsibilities in U.S. Government departments.

WHAT PRICE SHOULD WE PAY FOR RELATIONS WITH COMMUNIST CHINA?

(Mr. SIKES asked and was given permission to extend his remarks at this

point in the RECORD and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, Secretary of State Vance is preparing for his forthcoming trip to mainland China in August. In a recent major speech on Asia, he stressed normalization of relations between our country and Red China. He gave scant treatment to the issue of human rights which, in other nations, has received so much emphasis from the Carter administration. Perhaps it is things he did not say that spoke the loudest. He omitted any mention of Taiwan or American guarantees for Taiwan against Communist aggression. This could well be interpreted as a signal to Peking that the United States is ready to abandon its support for the Republic of China. The omission immediately caught the attention of other non-Communist Asian countries who have cabled the U.S. State Department to learn whether the United States is beginning a withdrawal from its commitments in the region in order to placate Communist China. An angry statement from Taiwan suggested that Washington is selling out 16 million nationalist Chinese and betraying its own moral principles while trying to establish full diplomatic ties with the Peoples' Republic of China.

It is difficult to understand the emphasis which apparently is being given by the United States toward formation of diplomatic ties with Red China. True, it is a nation of 800 million people, but one which has harnessed its entire populace to the task of providing enough food and clothing for their own requirements. The volume of trade to be expected from Red China is limited. They are not a military threat to the United States, but they do have sufficient power to overrun countries like Taiwan if the United States withdraws the protection we now accord those nations.

Red China's primary concern is to avoid the conflict with Russia while pushing for leadership among world Communist nations. China has been very active in Africa, and, indeed, is providing more competition than any other nation to Russia's dreams of domination there. Peking needs the U.S. support and friendship far too much to risk losing it over the question of Taiwan. Simply stated, we have given them reason to feel that we want to curry favor sufficient to drop Taiwan.

We are all aware that Peking, in the Shanghai communique of 1972, insists that there be recognition of one China—the mainland. We saw the result of such insistence during the 1976 Olympic games, during which the Canadians acceded to the Communist Chinese demands that only one team represent "China." It is unfortunate if the speech of Secretary Vance can now be taken as an indication of a major change in our policy and the American Security Treaty with Taiwan. The Red Chinese will take full advantage of this.

Mr. Speaker, there are certain advantages to normalized relations with mainland China, not the least of which is a form of buffer to the ever-present Soviet threat. It is apparent that there remains no love lost between these two Communist powers, and reasonable actions by this Nation to build some relationship with the mainland Chinese may be to our advantage.

Yet I strongly reject any claim that this Nation must accede to the Communist Chinese in their demand that there be U.S. relations with only one government representing the Chinese people. I feel, Mr. Speaker, that this Nation, this administration, and this Congress should emphasize that it is the Chinese mainland which stands to gain by a more formal relationship with the United States. It is time for them to begin to respect our other relationships and to be prepared to deal with this Nation on some of our terms. The matter of diplomacy is a two-way street and I suggest we begin to see some traffic in our direction before we step on the accelerator and rush to meet their demands.

The Washington Star in an editorial entitled "Taiwan as a Pawn," stated the situation forcefully and clearly. I submit it for reprinting in the RECORD:

[From the Washington Star, July 11, 1977]

TAIWAN AS A PAWN

Everything President Carter and the State Department say about relations with the People's Republic of China, as well as everything they don't say, sounds more and more like the United States abandoning Taiwan. And, true to the rule every country but ours seems to follow, the more accommodating we become, the sterner the People's Republic grows on the subject.

That ominous word "liberation" is in the air.

The 16 million people of Taiwan, of course, have other words for that: "aggression," "invasion," "betrayal" to begin with.

It is a situation full of ironies. The leaders of the People's Republic of China have obvious reasons for wanting to do just what they say they want to do, which is to incorporate Taiwan into the Communist Chinese state. Taiwan's industrial capability, widely recognized as a wonder of development comparable only to the post-World War II Japanese achievement, would be a distinct benefit to the faltering economy of the mainland. But material gain is perhaps less important than the prestige value of taking over Taiwan.

The leadership of Hua Kuo-feng is still imperfectly consolidated after the purge of the radical element identified with Chairman Mao's widow, Chiang Ching, which seems to have involved a gang of considerably more than four. Diversion of public attention to an external enemy always helps to solidify control at home. So does a conspicuous triumph.

Whether it happened by force or not, taking over Taiwan would be a show of strength to impress the world. It would be seen as a humbling of the United States, which had made so many promises to Taiwan, as well as a vindication of communism in general and Communist Chinese power in particular.

This is where more of the ironies set in. Among those who would not be pleased to see such a flaunting of Chinese might would be the Soviet Union. It is even possible that, with the United States standing aside, the Soviets might divert some of the arms their interests no longer called for in Indochina to the Taiwan defenses, simply as a means of forestalling their great rival's advancement.

Such a possibility could make the Hua government reluctant to invade Taiwan. And, even if Taiwan had neither American nor Soviet equipment and other aids, its own defenses and spirit are in good repair. An invasion by liberators from the mainland could fail. As the Bay of Pigs so eloquently testified, it can happen.

At best, a successful invasion of Taiwan would involve Peking in a sticky situation. The USSR's embarrassments over Hungary and Czechoslovakia have lingered; furthermore, it's likely that it would take considerably more bloodshed to overturn the entrenched government in Taipeh than to put down a few disorganized Hungarian Freedom Fighters.

As for the possibility of a negotiated reunification of the two Chinas, it's remote. The only carrot Peking could dangle would be autonomy and a chance to keep the fruits of its superior energy and skill. Not much chance there, ideological passion being what it is. The only stick would be cutting off Taiwanese trade. Peking has already done much of what can be done on that one, strongarming, for example, Japanese firms to forego doing business with Taiwan as the price of doing business with mainland China. It would just about have to be invasion.

And, with all the hazards weighed, the main inducement for invasion may be that American readiness to give in to anything Peking asks in order to arrive at full diplomatic relations has maneuvered the People's Republic Chinese into a posture of such belligerence. Even that's not the final irony, though. The final irony is that it's so hard to think of anything we will gain by abandoning Taiwan that we couldn't have without disavowing a long friendship and a lot of high-sounding pledges.

Trade? The Chinese are as eager for it as the American companies. Good will in the Third World? Looking weak next to a large Marxist nation won't win us points with a small one. And abandoning allies under pressure never looks good to anybody.

Nobody proposes that we send troops to Taiwan or so involve ourselves in its defense that we risk another Vietnam. All that's required by honor and self-interest is use our bargaining strengths in the current negotiations to assert Taiwan's right to exist outside Peking's control, or at least to make its own terms for reunification. There's still time.

NATION FACING CRUCIAL DECISIONS OVER POLICIES ON COMMUNICATIONS

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HANLEY. Mr. Speaker, as you know, I have spoken recently at a number of forums on the future of postal service in the United States. It is my belief, and the belief of many experts, that the future clearly lies with electronic communications. There appeared in the July 8 edition of the New York Times an excellent comprehensive look at this very subject. The article was written by a fine reporter, David Burnham. I would like, at this time, to share this article with my colleagues:

NATION FACING CRUCIAL DECISIONS OVER POLICIES ON COMMUNICATIONS

(By David Burnham)

WASHINGTON, July 7.—Fundamental changes in the way that Americans communicate are forcing the Federal Government to make policy decisions that could alter the fortunes of the nation's largest communication organizations and the lives of most citizens.

The pending decisions confronting the Carter Administration, Congress and the Federal Communications Commission involve a complex balancing of such questions as the competing rights of large corporations, the pos-

sible demise of the United States Postal Service, delicate diplomatic negotiations over the use of the air waves by individual nations and the importance of privacy to individual citizens.

The communication changes, made possible by the increasing use of several technologies, are expected to transform the way that many Americans conduct their lives: how they send written messages, pay their bills, talk to their politicians, get their pay, obtain medical care and receive entertainment, news and other information in their homes.

According to interviews with scores of communication experts and reports by dozens of different agencies, commissions and consultants, some of the most difficult pending questions awaiting resolution are the following:

How is the Carter Administration going to shape the executive branch agencies under its control to deal with communications issues? At present, according to several officials, Mr. Carter is planning to abolish the existing White House Office of Telecommunications Policy and scatter its functions among a few Presidential assistants and the Commerce Department.

Should Congress follow the lead of the House Communications Subcommittee and attempt a total revision of the Communications Act of 1934, the basic framework for regulation of all communications in the United States and a document that many experts contend has been largely outmoded and is now slowing the application of the most advanced technologies?

Should the Federal Communications Commission continue its policy of gradually subjecting the American Telephone and Telegraph Company to increasing competition in the sale of specific kinds of telephone equipment and communication services?

Should Congress grant the United States Postal Service a legal monopoly on electronic mail similar to the one it enjoys with conventional mail in the hope that such an extension could subsidize the sagging fortunes of the Postal Service and guarantee the continuation of first-class mail delivery? Or should electronic mail, like the telephone, be operated by private industry?

PARALLEL WITH ENERGY SEEN

Should there be a single clearing house within the Federal Government to serve as a highly efficient central switching point for the steadily increasing volume of financial transactions completed by electronics and computers, or would such a clearing house pose a threat to individual liberty?

"Communications now has the potential to change the way Americans live more than any other sector of the American economy," said one White House staff official.

"But there seems to be a close parallel between communications today and energy 20 years ago. You could see the energy problem was coming back in 1957, but because there weren't any gas lines then, it was impossible to get a consensus that it was something that required careful consideration."

Another factor contributing to the difficulty of developing communications policy is the sheer size of the industry. According to such experts as Marc U. Porat, an economist now working with the Aspen Institute, more than half of the wages paid in the United States and nearly half of the nation's $1.8 trillion gross national product "originate with the production, processing and distribution of information goods and services."

In a recent article, Dr. Porat argued that while "information occupations" accounted for only 10 percent of the work force at the turn of the century, they now represent "45 percent of all jobs in the United States."

While there are economists who argue with some of Dr. Porat's definitions, there is no question that communication encompasses a huge sector of the American economy and some of the largest and most powerful institutions: the National Letter Carriers Association, the International Business Machines Corporation, the advertising industry, the three television networks, the Communication Workers of America, the movie industry and Ma Bell's empire.

SOCIAL PROBLEMS RAISED

Beyond sheer size, the new technologies raise difficult social problems, according to many experts.

The development of electronic systems for the transfer of funds, in which cash and checks are replaced by blips on a computer, has been made possible by the availability of increasingly cheap and reliable computers in banks, insurance companies and retail establishments. The growth of relatively small electronic funds systems has suggested the need for a national clearing house where all such transactions could be sorted out and possibly stored.

The Federal Reserve System, for example, recently initiated an experimental project in which its customary role as a clearing house for banks was broadened to include the handling of tapes carrying transactions of individual electronic-fund transfers.

Last year, John M. Eger, then acting director of the White House Office of Telecommunications, challenged the Federal Reserve plan on the ground that it might one day be used to build centralized Government files on the buying habits and movements of individual citizens.

The Federal Reserve plan, Mr. Eger said in a brief filed in opposition to it, could ultimately give the Federal Government "a highly effective tool for keeping track of people and enforcing 'correct' behavior."

Representative Lionel Van Deerlin, the chairman of the House Communications Subcommittee, discussed some of the stakes involved in the decisions awaiting resolution.

"What we have now in communications is government by court edict," the California Democrat said. "The 1934 Communications Act, in large part a rewrite of the 1887 Interstate Commerce Act, is hopelessly out of date. There is no overall policy statement from Congress, and the F.C.C.'s regulations therefore are frequently arbitrary and capricious."

Mr. Van Deerlin said that a major result of the outdated law and faltering regulation was that competition was being discouraged throughout the communications industry, and that the American people were therefore being deprived of "better, faster and cheaper communications."

Representative Timothy E. Wirth, a Colorado Democrat who is a member of the Communications Subcommittee, talked about other aspects of the situation in a speech last fall to the Institute for Telecommunication Sciences.

"There is very little recognition of the social significance of the computer and communication revolution," he said. "The unspoken fact is, in today's society, that information is power, and the terms of access to information determine who has influence and who reaps benefits in our society.

"Think of that for a moment. We are talking about economic power, about social and intellectual standing and about political participation. All are fundamentally affected by the availability of knowledge, which depends upon information which is rooted in technology."

HIGH SKILLS REQUIRED

A White House staff member discussed the same issue in somewhat different terms. Noting that the increasingly complicated communications environment was going to require "very high skills" to operate, the official speculated that this "may make it even harder than it is today for important segments of our society to take part in the economy."

In an effort to develop a more informed consensus about some of these issues, the House Communications Subcommittee two months ago published a 486-page staff report that tried to define some of the key communications issues and the possible steps that Congress might take to resolve them.

Various chapters in the report dealt with the use of the radio spectrum, broadcasting, domestic telephone service, international telecommunications, cable television and privacy.

The subcommittee, which has been holding hearings on these issues, now hopes to complete by December a draft proposal for rewriting the 1934 Communications Act.

Richard E. Wiley, the outgoing chairman of the F.C.C., said in a recent interview that the commission's effort to develop new policies "may slow down the introduction of new services."

"I would like to have more national direction, we could use policy guidance," he said, noting that the 1934 Act naturally contained no reference to recent technologies.

Three key technologies are involved in the communication revolution. First is the computer, which each year grows cheaper, more reliable and smaller. In a report published several years ago by the Conference Board, a nonprofit business research organization, it was reported that since the early 1950's, the physical size of computers has diminished by a factor of about 1,000, the costs have dropped a hundredfold and the capacity has grown by a factor of 1,500.

NEW SATELLITE PLANNED

A recent article in Science magazine described the results of these changes. In 1950, the Federal Government ordered its first two big computers. Today, the article said, there are 220,000 computers in the United States, 40 percent of them medium or large size, manned by 2.5 million computer professionals.

The second key technical development is the high-altitude communications satellite, which can transmit directly to roof-top antennas. The potential of direct broadcasting from satellite has prompted Japan to consider developing a single transmitting station in space for all its people. In a world where large numbers of nations in Africa, South America and Asia are unable to afford conventional television broadcast stations, the social and educational possibilities are enormous.

In another application, a company established by I.B M. and Aetna Insurance has won permission from the F.C.C. to launch a satellite that would permit corporations to transmit data between offices and factories all over the United States without ever picking up a telephone or going near a post office.

The third and possibly most significant new technology is fiber optics communications, which is now being pursued by A. T. & T., the International Telephone and Telegraph Corporation, Siemans A. G. of Germany, Nippon Electric and Corning Glass. According to virtually all experts, fiber optics is expected to cost less than coaxial cable, be far smaller and lighter and be capable of transmitting far more information.

Fiber optics deals with the transmission of light and images, as around bends and curves, through a flexible bundle of plastic optical fibers.

Assuming the resolution of the remaining technical problems, such as how to achieve simple splices, many experts believe that within a few years A.T. & T. can begin a program to replace the copper telephone wire running into almost every building with fiber optics, which would be able to carry two-way television, a variety of two-way teletype services, dozens of conventional television channels and telephone messages.

The combined impact of these new tech-

nologies on the way Americans live will be enormous, most experts agree.

"If you link fiber optics with a teletype machine, you could do much of your banking from home, some of your shopping from home, buy airline tickets from home and maybe even work at home," said Richard Neustadt, one of several White House staff members now spending much of their time on communication issues.

The new communication technologies, he said, could also mean major improvements in the delivery of various social services, especially in rural areas where vast distances could be erased by electronics in the delivery of medical and school services.

Representative Van Deerlin sees the new communication systems leading to profound changes in politics, with candidates campaigning over citizens' band radio and elected officials being able to have "town meetings" via two-way cable television that would allow give-and-take conversations with all constituents who cared to turn on their sets.

But beyond the specific changes expected in the way that Americans bank, shop and obtain information and news, some experts believe that the communication and information revolution may ultimately strongly influence some of the basic values of society.

In an essay published several years ago, John McHale, director of the Center for Integrative Studies, State University of New York, speculated that the rapid growth of communications might affect the value of real property.

With more and more wealth being generated by information and communication technologies that, unlike coal and oil and uranium, cannot be used up, material property will no longer be the sole basis of economic power, Mr. McHale suggested.

In the industrial age, he said, wealth resided in visible assets such as land, buildings, machines and animals. But with the increasing value of information processing, physical properties "already have less and less intrinsic wealth values themselves."

HEARINGS IN ALASKA PROMOTE UNDERSTANDING ON ALASKA WILDERNESS BILLS

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, the Subcommittee on General Oversight and Alaska Lands of the Interior and Insular Affairs Committee utilized the July recess to conduct a series of hearings, meetings, and field inspections in southeastern Alaska. As chairman of the subcommittee, I was especially gratified that seven of its members took a portion of their recess time to travel to Alaska and participate in the strenuous schedule of activities that the subcommittee carried out there between July 1 and 10.

The subcommittee heard at its official hearings a total of around 600 witnesses in three 12-hour sessions, one each in Sitka, Juneau, and Ketchikan. In addition, the members met informally with many residents of those cities and traveled to the towns of Pelican, Hoonah, Petersburg, Kake, and Angoon for informal meetings with several hundred residents of those places. Inspection and briefing trips were also made to a number of logging sites and potential mining sites in various parts of southeast Alaska.

In between hearings and meetings, subcommittee members and staff visited all but one of the proposed wilderness areas in southeastern Alaska that would be established by H.R. 39, the principal bill pending before the subcommittee. The only one we missed is the proposed Yakutat Forelands Wilderness, which was closed in by weather conditions. The subcommittee expects to include a visit to that area as part of its scheduled hearing and field inspection trip to interior Alaska during the August recess.

Mr. Speaker, I think I can safely say that every member who made the trip came back impressed and exhilarated by the breathtaking beauty of the vast expanse of forests, fiords, islands, and mountains, with their sparkling lakes, winding rivers, ice-capped peaks, and gleaming glaciers spreading out with infinite variety along the rugged southeastern coast of the Nation's largest State. Although there are scattered logging scars, most of the land shows no sign of man's presence. Here and there in the coves and bays, one spots an occasional fishing vessel or raft of cut timber. However, the chief signs of life are an occasional wandering bear or soaring eagle, along with flocks of gulls, ducks, and geese. Several times the members thrilled to the sight of spouting whales and leaping porpoises.

Mr. Speaker, it is the combination of spectacular scenery and vast stretches of wilderness that makes Alaska unique. Until now, Alaska's huge size, remoteness and long, dark winters have protected its wilderness character. But rapidly escalating pressures for development are such that it can no longer be assumed that the prime wilderness features of Alaska will survive unless they are given protected legal status.

The 1958 Alaska Statehood Act and the 1971 Alaska Native Claims Settlement Act provide for the transfer of a total of 144 million acres of Federal land to the State and the Natives. When completed, this will be the largest transfer of public land in the Nation's history. Even then, however, the Federal Government will still own approximately 60 percent of the land in Alaska. When the Native Claims Settlement Act was being debated in 1971, there was concern that some portion of these huge Federal holdings be set aside for future enjoyment by the American people. Accordingly, the Congress approved section 17(d)(2) of that act, authorizing the Secretary of the Interior to withdraw from mining and other uses up to 80 million acres of these Federal lands so that Congress could consider whether to provide permanent wilderness, park, or other protected status for them. Under the law, these lands will remain withdrawn until December of next year. If Congress does not act by then, the 80 million acres will once more be open to uses that may be destructive of their wilderness values.

H.R. 39, introduced by our distinguished colleague, the Honorable MORRIS UDALL and drawn up in collaboration with Alaskan conservationists, would include the lands designated by the Secretary and additional Federal lands in Alaska in the national park system, the national wildlife refuge system, the national forest system, and the National Wild and Scenic Rivers System. The bill would also place all these lands, plus existing wildlife refuges and national parks in Alaska, under the National Wilderness Preservation Act. Thus the total land affected would be about the same in size as the total Federal land to be transferred to the State and the Natives under the existing legislation. Needless to say, any proposed transfer of this magnitude raises many issues and requires careful study and analysis.

The subcommittee commenced the hearing process this spring with 7 days of hearings in Washington, D.C. Secretary of the Interior Cecil Andrus, Assistant Secretary of Agriculture Rupert Cutler, Alaska Gov. Jay Hammond, and other government officials testified, as well as representatives of the logging industry, the mining industry, the oil and gas industry, many national organizations, and individual citizens. Because of the tremendous nationwide interest in the proposed legislation, the subcommittee then went "on the road" and held hearings in Chicago, Atlanta, Denver, and Seattle. These hearings were all held on Saturdays, so that working people could more easily attend. In all, about 1,000 witnesses from all walks of life were heard in these hearings, and many more presented written testimony. The subcommittee has also been given a formal briefing by the U.S. Geological Survey and the Bureau of Mines and has scheduled a briefing by the National Forest Service for later this month.

While the testimony was overwhelmingly supportive of legislation to preserve key wilderness areas in Alaska, fears were expressed, mostly by business interests, that H.R. 39 would "lock up" too much of Alaska's potential mineral and timber resources and would block access to key areas by residents of the State.

The July recess was the first opportunity the subcommittee had to travel to Alaska to inspect the areas covered by the bill and to listen to local residents and officials. For months before then, opponents of the bill conducted an extensive campaign in the Alaskan news media to create the impression in Alaska that the bills would eliminate existing jobs and prevent future growth of the State's economy. This campaign exploited Alaskan residents' sense that they have long been a "stepchild" of the Nation, subjected to the whims of remote bureaucrats in Washington, D.C. Unfortunately, past experience, to some extent, justifies this sense of grievance on the part of Alaskans. Moreover, the failure of previous administrations to carry out expeditiously the transfer of the 100 million acres of Federal lands that were promised to the State under the Statehood Act and the 44 million acres promised to the Natives has aggravated the sense of frustration in Alaska.

For these reasons, the subcommittee expected to be confronted by an atmosphere of hostility when it commenced hearings in Alaska. This was, indeed, the case when the first hearing commenced on July 5 in Sitka. In fact, a well organized campaign had brought about the closing of a substantial number of the stores in Sitka on that day in protest, and the members of the subcommittee were met with numerous signs, pickets, and other demonstrations. I am happy to report, however, that by the time of our third hearing, July 9 in Ketchikan, a much more constructive atmosphere prevailed. The hearings were well attended and were carried in full on the local radio stations. Thus, those present and the residents of the entire area could see for themselves that the members of the subcommittee were sincerely interested in listening to the views of the local people and in understanding and adjusting to local concerns.

They could also see that their interests were being forcefully represented on the subcommittee by their own Congressman, The Honorable DON YOUNG, who sat through all the lengthy hearings and provided outstanding assistance and advice, even though he was in strong disagreement with some features of the proposed legislation.

As a result, the subcommittee received much useful and specific information and ideas from the witnesses in Alaska. This information was made more meaningful because members of the subcommittee had personally familiarized themselves with the land in question. On the basis of what we have learned thus far, I believe it is going to be possible to preserve significant areas of wilderness in southeast Alaska, to protect the existing industry, to allow room for economic expansion, and to enable continuation of the traditional local lifestyles and land uses. Indeed, one of the major industries of southeast Alaska, the fishing industry, appears to need the designation of some areas as wilderness in order to assure the continued protection of the fisheries resource.

Southeastern Alaska is large enough so that there is plenty of room for multiple uses. It is a question of marking out certain of the extensive Federal lands there for prime use as a wild resource, leaving the majority of those lands available for logging, mining, and other development. It is also a question of establishing procedures for adjusting uses in wild areas to meet overriding national and local needs and procedures for coordinating the future management of these areas with State and local organizations. The subcommittee is dedicated to developing such legislation before the end of this session of Congress.

Mr. Speaker, at our July 7 hearing in Juneau, the witnesses were about evenly balanced between those supporting and those opposing H.R. 39 in its present form. The next day, the Juneau newspaper, Southeast Alaska Empire, published an editorial reflecting the shift beginning to take place in Alaskan attitudes toward such legislation. The editorial points out:

We don't want to see existing jobs eliminated and future jobs co-opted but it is time that all of us recognize there is enough Tongass National Forest for all types of people to enjoy, whether they be Oregon itinerant loggers, "posey sniffers," fishermen, tourists, prospectors or subsistence hunters.

Once we set aside portions of the Tongass for wilderness and for commercial developments so each group is mollified, it could boost the economic well-being of Southeast. . . . That means there will have to be some wilderness areas and the faster they are established, the quicker we can get to the business of building a region aesthetically pleasing and financially sound.

The subcommittee plans 2 more weeks of hearings, meetings, and field inspections during the August recess, this time in interior Alaska and the Alaska Peninsula. If we and residents of Alaska continue efforts to reach mutual understanding, I believe we can and will develop legislation that will be satisfactory to the majority of people in both Alaska and the rest of the Nation and that will also protect some of the glories of that great land for the people of Alaska and the Nation to use and enjoy for generations to come.

Mr. Speaker, the full text of the editorial from the Southeast Alaska Empire of July 8 follows these remarks:

[From the Southeast Alaska Empire, July 8, 1977]

WILDERNESS VS. ECONOMY?

Mike Miller, the veteran Juneau legislator, dropped a bomb in his backyard yesterday. He told a congressional committee holding hearings in Juneau that he supported the "Udall bill," federal legislation that would put 114 million acres of Alaska into preserved status—wilderness, including four million acres of the Tongass Forest.

It was an act of courage or a foolish political move, maybe both.

At the very least it was aberrant behavior for a politician. Many of the breed seem content to follow rather than lead. His stand in favor of wilderness will be read instead as a stand against Southeast's economic progress. There is no doubt he is bucking the tide of public opinion.

But Mr. Miller was speaking for a sizable minority of Juneau residents and what appears to be, from the shape of hearings held "outside," a majority of Americans. He expressed the considerable frustration that many have with the lack of direction that has been evident for the last 50 years in the Tongass Forest.

It is only in recent years that the Forest Service has tried to develop a comprehensive guide to Tongass Forest use. Conservationists have been frustrated since the beginning of the century in their efforts to preserve a portion of the Tongass in wilderness state. As sops to conservation sentiment (which has built to crescendo pitch in years past) Glacier Bay National Monument was created, then expanded, a small portion of Admiralty Island was set aside as a bear refuge and another small section as eagle habitat.

In contrast, more and more of the forest has been committed to the saw, while the feds have studied and restudied wilderness sections. Conservationists became even more alarmed when they saw that areas being studied for preservation were sections of the Tongass that were patently unfit for timber exploration. It seemed to confirm fears that the Forest Service was not interested in setting aside a portion of the Tongass which included a 'typical' Southeastern forest habitat.

Because of the situation it is no wonder that conservationists have embraced the 'Udall bill' as their only salvation. They learned in the past that the Forest Service had not listened. They were not willing to wait and see what the new Tongass Guide would offer a couple of years hence. They have grown tired of waiting. Rep. Miller's acceptance of the Udall bill is not surprising in that light.

While we cannot accept the Udall bill and its instant wilderness policy for Alaska, including the Tongass Forest, we do think it is time that a portion of the Tongass, perhaps Admiralty Island, be dedicated to a preserved status and not just logging.

We don't want to see existing jobs eliminated and future jobs co-opted but it is time that all of us recognize there is enough Tongass National Forest for all types of people to enjoy, whether they be Oregon itinerant loggers, 'posey sniffers,' fishermen, tourists, prospectors or subsistence hunters.

Once we set aside portions of the Tongass for wilderness and for commercial developments so each group is mollified it, could boost the economic well-being of Southeast. The spector of additional court battles and fratricidal in-fighting is the other alternative. That means there will have to be some wilderness areas and the faster they are established, the quicker we can get to the business of building a region aesthetically pleasing and financially sound.

STRONGLY OPPOSE OUR RELATIONS WITH CUBA

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, one of the reasons why I strongly oppose the normalization of our relations with Cuba as long as it is dominated by the Communist Castro is that Castro has made Cuba a Russian military base 90 miles from the United States in the Caribbean. I have before me a letter of July 8 by Dr. Manolo Reyes, distinguished Latin commentator for Channel 4 television in Miami, who points out that Russian warships are performing joint maneuvers with Cuban gunboats in the Gulf of Mexico and pointing out other uses of Cuba and Cuban waters as a naval base of Russia. Dr. Reyes, with his letter of July 8 to me, also sent me a copy of a pamphlet advertising a conference on future trade and investment opportunities in Cuba. This certainly violates the action previously taken by the House of Representatives in respect to trade with Cuba and the policy of the U.S. Government respecting trade with Cuba. I ask unanimous consent that this pamphlet and Dr. Reyes letter to me appear in the RECORD following these remarks:

DR. MANOLO REYES,
Miami, Fla., July 8, 1977.

Congressman CLAUDE PEPPER,
U.S. Congress,
Washington, D.C.

DEAR CONGRESSMAN PEPPER:

Just a few hours ago I learned that Russian war ships were performing joint maneuvers with Castro's gunboats in the Gulf of Mexico.

As you know, for the last six years, on twelve occasions, I have denounced this situation before the U.S. Congress and Senate at different hearings.

Here is the way I denounced the new Soviet naval task force to Cuba.

Dr. Manolo Reyes informed that four Soviet war ships have been performing naval maneuvers in the past hours in the Gulf of Mexico. The four Soviet war ships are two destroyers, a cruiser and a supply ship.

The naval maneuvers have been taking place outside the coast of Cuba in international waters, just 35 miles away from the U.S. coast. Russian ships are seldom this close to the American coast when performing naval maneuvers. The four Soviet ships were joined by two Castro gunboats on the night of Wednesday, July 6, 1977.

The U.S. destroyer BIGELOW has been observing the naval maneuvers of the Russian and Cuban ships.

All this proves once again that Castro's regime has given Cuba over to the Soviets, who use it as a strategic military base, both aerial and naval, for their excursions in the Atlantic and the Gulf of Mexico, and that this is dangerous to the security of the United States and the American continent.

I also attach a copy of a pamphlet in reference to a conference to be given in New York this month about trade and investment opportunities in Cuba. I feel this is in direct opposition of the motion approved by the House of Representatives against trading with Cuba.

Awaiting your reply, I am sincerely,

Dr. Manolo Reyes.

COMING TRADE AND INVESTMENT OPPORTUNITIES IN CUBA

JULY 18, 1977/AMA HEADQUARTERS, NEW YORK CITY

Briefing runs from 9:00 a.m. through 5:00 p.m.:

How to stand out in the crowd of U.S. companies lining up for business with Cuba.

Virtually every industry is interested in doing business with Cuba. But few have the hard data they need to evaluate the potential.

Americans going to Cuba on business are confronted with the problem of who to see . . . and when.

There's also a problem in getting the Cuban bureaucracy to respond to your inquiries.

To help you over some of the hurdles . . . and give you guidelines that are working for other organizations . . . we've scheduled this information-filled briefing.

You'll hear from an outstanding group of speakers. These are people with on-the-scene experience and plenty of business savvy.

They'll cover the kind of facts you need in order to make the most profitable decisions for your company.

For example—

The best ways to deal with the Cuban bureaucracy.

The steps involved in getting a project approved.

How much you can reasonably expect to accomplish on a trip to Cuba.

How to make sure you see the right people—and the importance of timing.

What happens to any letters you write—and why it often takes months to get a response.

And more.

Case histories will highlight what the Cubans want from U.S. companies—and what the Cubans are willing to give in return.

In addition—a get-acquainted reception at the conclusion of the program will let you meet and chat with the speakers on an informal, off-the-cuff basis.

You're urged to register early for this important briefing.

You can use the registration card provided on this announcement. Or, wire or phone the Registrar in New York City. Either way—act now to assure places for yourself and a team of your key people.

If you'd like further information on this important program, please contact John T. Cunningham at AMA Headquarters in New York City (212–586–8100).

COCHAIRMEN

Burton M. Joseph, President, I. S. Joseph Co., Minneapolis, Minn.

Kirby Jones, President, Alamar Associates, Inc., Washington, D.C.

GUEST SPEAKERS

Robert Dockery, Executive Assistant to the Chief of Staff, Senate Foreign Relations Committee, Washington, D.C.

John H. Keller, President, Caribbean Holidays, Inc., New York, N.Y.

Lawrence H. Theriot, Policy Analyst for Cuba, Bureau of East-West Trade, Department of Commerce, Washington, D.C.

Robert C. Chinn, Senior Vice President, Control Data Corp., Minneapolis, Minn.

Mira Berman, Principal, Gemini Images, Inc., New York, N.Y.

Eugene A. Theroux, Esq., Partner, Baker & McKenzie, Washington, D.C.

BRIEFING AGENDA

Economic and Political Overview:

What products went into pre-1959 U.S.-Cuba trade?

What are U.S. foreign policy objectives?

What is the current pattern of Cuba's foreign trade?

What are the prospects for U.S.-Cuba trade?

How Does Cuba's Foreign Trade Apparatus Work?

What is its function?

How is it organized?

Selling to Cuba: Case Histories:

What are prospects for direct U.S.-Cuba transactions?

What is the status of indirect U.S.-Cuba transactions?

What does Cuba want to buy?

Buying From Cuba: Case Histories:

What does Cuba have to sell?

What procedures will be involved?

Negotiations:

What special techniques are involved?

How do you handle arbitration and dispute settlements?

Current Legal Framework for U.S. Business With Cuba:

How would U.S. Export Licensing work?

What is the status and prospects for payment of claims against Cuba?

What financing and payment practices can be expected?

Business Travel to Cuba:

Who can travel to Cuba now?

How to approach travel.

What are the prospects for increased travel?

Group Discussions:

What are other companies doing?

How should a company be planning with regard to Cuba?

Three ways to register fast!

Important: Always give your Priority Number when registering.

1. By phone: Dial (212)566–8100. Ask for Registration. Give Registrar your Priority Number. You'll get immediate confirmation of your registration.

2. TWX 710–851–1530: Please include Priority Number, Meeting Title, Dates and City. Also name, title, company, address and phone of each registrant.

3. By mail: Complete and mail registration card on this anouncement. Be sure to specify your Priority Number.

You can register up to the time of the meeting, but don't come to a meeting without confirmation. If it has not arrived before the meeting date, call AMA's Registrar at (212)586–8100.

AMA's Hotel Service: AMA does not arrange hotel accommodations. However, the following hotels will hold a bloc of rooms up to two weeks before your meeting starts. To make a reservation, contact the hotel directly. Be sure to act promptly—and mention AMA for preferred treatment.

New York: The New York Hilton at Rockefeller Center, 1335 Avenue of the Americas (two blocks from the American Management Associations Building). Contact the Hilton Reservation System 212–594–4138. Specify the priority number of the AMA meeting you are attending.

Chicago: Marriott Motor Hotel—312–693–4444 (immediately adjacent to the AMA Management Center—Chicago, O'Hare Airport).

Other locations: Contact the hotel where your meeting is held at least two weeks before your meeting starts.

Cancellation policy: Confirmed registrants cancelled later than one week before the meeting are subject to a $25 service charge. Registrants with confirmed applications who fail to attend are liable for the entire fee unless they contact AMA's Registrar prior to to the meeting to cancel.

Tax deduction for educational expenses: Treasury regulation § 1.162–5 permits an income tax deduction for educational expenses registration fees and cost of travel, meals and lodging undertaken to: (1) maintain or improve skills required in one's employment or other trade or business, or (2) meet express requirements of an employer or a law imposed as a condition to retention of employment, job status or rate of conpensation.

Registration fees: The full fee is payable in advance and includes the cost of meeting materials.

Individual fees: Each 1-day meeting, AMA Members, $190; Nonmembers, $215.

Send teams at reduced rates—During the meeting, they'll compare notes and pool thinking on how the ideas and concepts presented relate to your company's specific problems. Back on the job, they'll be able to tackle these problems with a highly coordinated team approach. The special fees for a company team of three managers attending the same meeting are:

Team fees: Each 1-day Meeting (per person), AMA Members $165; Nonmembers[1] $190.

Note: Other discounts are available for larger groups. For details please contact AMA's Registrar.

MAYOR BRENNER'S CALL TO SURVIVORS ON MEMORIAL DAY

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, I would like to commend to our colleagues an eloquent speech by my good friend, Mayor Sam Brenner of Surfside, Fla., who has issued a strong challenge to all the survivors of those we commemorated with sorrow and pride on Memorial Day 1977. He urges us all and the nations of this world to strengthen the United Nations' goals for peace and its capacity to contribute to such aims as will guarantee a more secure and reasonable environment for us as well as for the other nations of this world, which have seen the horrible wars of this century, and lives in anticipation of more. I believe that Mayor Brenner offers us all food for careful thought.

---

[1] Nonmembers: Difference between member and nonmember registration fee can be applied to AMA membership. Check box on card for full information.

The speech follows:

THE INVISIBLE FLAG

In a few moments you will hear the bugle blow "taps" and the drum roll to the calling of the names of our dearly departed who gave their lives to preserve our Nation. As I hear their names called forth to the strains of this mournful music, the roll of the drum ruffles an invisible flag stirring in the hearts of men.

Oh! Yes, there is a new flag stirring in the hearts of men! It is the flag of the coming of international law and order, the prime priority of our times. There is no eulogy we can deliver for these men greater than the hoisting of that flag. What better time and place for the people to be heard than on an occasion of memorial services for our departed soldiers? We shall return here year after year to eulogize these men and to mark our progress for peace. I do not come here only to weep for dead soldiers. The time for tears is passed! I come here also to take action for the living so that we do not perish as they perished.

Look to the heavens! Look to the skies! Look for that invisible flag unfurling before our aching eyes. In order to begin its revelation and spangling in the sunlight, on this 29th day of May, 1977 I charge President Carter and all the leaders of the world with:

Step No. 1. To call for all the member nations of the United Nations to contribute 15 percent or some adequate agreed upon percentage of their fighting forces into a heterogeneous peace-keeping force for an experimental 5-year period, during which time there is to be a moratorium on the production of armaments.

I charge President Carter and all the leaders of the world with:

Step No. 2. To call for the restructuring of the United Nations voting procedure to include an international House of Representatives as well as the General Assembly and for the overriding of the veto by a ⅔ vote of both Houses.

I charge President Carter and all the leaders of the world with:

Step No. 3. To call for the relinquishment of nations' sovereignity to wage war, upon the similar simultaneous action of all member nations.

I charge President Carter and all the leaders of the world with:

Step No. 4. To call for mutally supervised periodic inspections to check up on the adherence of member nations to their agreements.

There could be more charges but these are enough for now and the benefits to be derived are too numerous to mention. Ultimately this will lead to a turnover of all capital weapons and to the dismantling and confiscation of all nuclear bombs. From these few steps mankind will take another "giant step" . . . First the moon and now the stars of the hope of man. This is a blueprint for man to touch the stars, and for these men whose memory we honor today to stop twisting and turning with agony and anguish in their graves. For surely they cannot be sleeping, for we who are here to honor them have also betrayed them.

Do you know what it says on this monument? "Dedicated to those who served in preserving this nation." Preserving this nation for what? For holocaust? President Carter's disarmament negotiator, Paul Warnke, tells us "now as your intercontinental ballistic missiles become both more dangerous and more vulnerable, there is a lowering of the nuclear threshold—and there is the temptation to strike first because you fear you won't be able to strike second.' '

A great mind of our times, Albert Einstein, wrote in his book "Out of My Later Years" . . . "The only hope for protection lies in securing of peace in a supranational way. A world government must be created which is able to solve conflicts between nations by judicial decision. This government must be based on a clearcut constitution which is approved by the governments and the nations and which gives it the sole disposition of offensive weapons . . ." Einstein's theories of relativity brought us successfully to the threshold of a new world, surely his theories of world government can bring us to the threshold of a workable peace.

In all these 32 years since the birth of the United Nations what failing was there among us that prevented the creation of an adequate peace keeping force? Who can deny that we have failed these men whom we honor today? Where is the peace they fought for? Peace is a wounded soldier, we must heal the wounds of that soldier even as the mad race for armaments accelerates more and more each year.

We can no longer live in a world where nations are wild beasts roaming the jungles of nationalism. We must now clear the jungles and tame the wild beasts. Man has become the greatest predatory beast of all times. He has lost his right to declare war and must relinquish that sovereignty. How many Hitlers do we have to outlive before we can take our rightful place alongside a brotherhood of nations in an organization of international law and order? Hitler was the direct product of international anarchy! There could never have been a Hitler as we knew him had there been international law and order.

International law and order is long overdue and must be created for the protection of all nations. Its realization will insure the survival of mankind. There is a soundless tocsin that peals for peace inside all of us and its tolling will lure us toward the creation of the new order.

Oh! There is a new flag stirring in the hearts of men! Blow the bugle and ruffle the drum and call the roll one by one, not of those present but of those past, not of the living but of the dead who march again before our eyes, bearing a new flag these men can see with sightless eyes. Blow the bugle and sound the drum and call the roll one by one!

Mayor SAM BRENNER,
Sureside, Fla.

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I have been on a factfinding trip to the Middle East with a delegation of other Members for the past 2 weeks. As a result, I have missed a number of recent rollcall votes.

On Monday, July 11, I would have voted "yes" on roll No. 403, House Joint Resolution 24, to designate a week as National Lupus Week. I also would have voted "yes" on roll No. 404, H.R. 2960, to erect a memorial in the District of Columbia in honor of the 56 signers of the Declaration of Independence. I would have cast a "yes" vote for House Resolution 642, roll No. 405, the rule under which the Indian claims bill was considered.

Tuesday, I would have voted "yes" on roll No. 406, H.R. 7658, to provide housing for certain disabled veterans. I also would have cast a "yes" vote on roll No. 407, H.R. 7345, the Veterans' and Survivors' Pension Adjustment Act. On final passage of the Indian claims bill, H.R. 5023, roll No. 408, I would have voted "yes."

On Wednesday, I would have cast a "no" vote on H.R. 5970, roll No. 409, the Defense Department procurement authorization conference report. I would have voted "no" on roll No. 410, the McCloskey amendment to the maritime authorization that sought to prohibit the use of operating subsidies for the carriage of grain to the Soviet Union. On final passage of the maritime bill, H.R. 4963, roll No. 411, I would have voted "yes." I would have cast a "yes" vote for the rule under which the National Consumer Cooperative Bank bill, H.R. 2777 was considered (roll No. 412).

Yesterday, I would have voted "yes" on roll No. 413, a motion for the House to resolve itself into the Committee of the Whole for consideration of the National Consumer Cooperative Bank bill. I would have cast a "no" vote on the LaFalce substitute to the Consumer Cooperative Bank bill, roll No. 414. On the Rousselot amendment, roll No. 415, that terminates on December 31, 1982, all authorities granted under the same bill, I would have voted "yes." I would have voted "yes" on final passage of H.R. 2777, roll No. 416. I also would have voted "yes" on House Resolution 658, establishing a permanent Select Committee on Intelligence (roll No. 417). On the rule for the mine safety bill, House Resolution 682, I would have cast a "yes" vote. I would have voted "yes" on roll No. 419, for going into committee. On roll No. 420, the Gudger amendment, I would have voted "no." On roll No. 421, the Sarasin amendment, I would have voted "yes." On roll No. 422, the Andrews amendment, I would have voted "no."

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CARNEY (at the request of Mr. WRIGHT), for today, on account of official business of the Committee on Veterans' Affairs.

Mr. COTTER (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. FOUNTAIN (at the request of Mr. WRIGHT), after 4:30 p.m. on July 14 until 11:30 a.m. on July 15, on account of official business.

Mr. YOUNG of Missouri (at the request of Mr. WRIGHT), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. COLEMAN) and to revise and extend their remarks and include extraneous matter:)

Mr. FINDLEY, for 5 minutes, today.

Mr. EDWARDS of Oklahoma, for 5 minutes, today.

(The following Members (at the request of Mr. GEPHARDT) to revise and extend their remarks and include extraneous matter:)

Mr. SIKES, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.
Mrs. MEYNER, for 5 minutes, today.
Mr. GLICKMAN, for 5 minutes, today.
Mr. PREYER, for 5 minutes, today.
Mr. DRINAN, for 5 minutes, today.
Mr. FASCELL, for 5 minutes, today.
Mr. BEDELL, for 5 minutes, today.
Mr. ECKHARDT, for 5 minutes, today.
Mr. WOLFF, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. NEAL, immediately following the remarks of Mr. ANDREWS of North Carolina, on H.R. 4287 in the Committee of the Whole today.

(The following Members (at the request of Mr. COLEMAN) and to include extraneous matter:)

ADJOURNMENT

Mr. GEPHARDT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (3 o'clock and 11 minutes p.m.), under its previous order, the House adjourned until Monday, July 18, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1937. A letter from the Director, Selective Service System, transmitting notice of a delay in the submission of the semiannual report covering the operation of the Selective Service System to adjust to the new fiscal year ending September 30, 1977 (section 10 (g) of the Military Selective Service Act); to the Committee on Armed Services.

1938. A letter from the Deputy Assistant Secretary of the Interior, transmitting notice of two new personal record systems for the Department, pursuant to 5 U.S.C. 552(a)(o); to the Committee on Government Operations.

1939. A letter from the Director, National Science Foundation, transmitting notice of a new records system for the Foundation pursuant to 5 U.S.C. 552(a)(o); to the Committee on Government Operations.

1940. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the intention of the Department of State to consent to a request by the Government of the Federal Republic of Germany for permission to transfer certain U.S.-origin defense articles and services to the Government of the United Kingdom, pursuant to section 3(d) of the Arms Export Control Act; to the Committee on International Relations.

1941. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Ambassador-designate John D. Negroponte, and his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

1942. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Ambassador-designate Jean M. Wilkowski, and her family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

1943. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to section 112(b) of Public Law 92–403; to the Committee on International Relations.

1944. A letter from the Acting Secretary, Interstate Commerce Commission, transmitting notification of the Commission's extension of the proceedings in docket No. 36491, *Wheat, Oklahoma and Kansas to Texas Gulf Ports*, pursuant to section 15(8)(a) of the Interstate Commerce Act, as amended (90 Stat. 31); to the Committee on Interstate and Foreign Commerce.

1945. A letter from the President, Legal Services Corporation, transmitting a report on the delivery of legal services to the poor, pursuant to section 1007(g) of the Legal Services Corporation Act; to the Committee on the Judiciary.

1946. A letter from the Executive Director, Reserve Officers Association of the United States, transmitting a copy of the audit of the Association's account for the year ended March 31, 1977, pursuant to section 16 of Public Law 81–595; to the Committee on the Judiciary.

1947. A letter from the Secretary of Transportation, transmitting a report on the study of soundproofing schools and public health facilities located near airports, pursuant to section 26(3) of Public Law 94–353; to the Committee on Public Works and Transportation.

1948. A letter from the Acting Administrator, Environmental Protection Agency, transmitting a draft of proposed legislation to amend the Federal Water Pollution Control Act (section 319); to the Committee on Public Works and Transportation.

1949. A letter from the Administrator, Environmental Protection Agency, transmitting a draft of proposed legislation to amend the Federal Water Pollution Control Act (section 509); to the Committee on Public Works and Transportation.

1950. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to provide customs procedural reform, and for other purposes; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BOLLING: Committee on Rules. House Resolution 685. Resolution providing for the consideration of H.R. 5400. A bill to establish a universal voter registration program, and for other purposes (Rept. No. 95–502). Referred to the House Calendar.

Mr. ZABLOCKI: Committee of conference. Conference report on H.R. 6884 (Rept. No. 95–503). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEDELL (for himself, Mr. THONE, Mr. MINETA, Mr. BAUCUS, and Mrs. HECKLER):

H.R. 8340. A bill to require that all reports concerning certain sales of meat and meat food products meet standards set by the Secretary of Agriculture concerning accuracy and completeness; to the Committee on Agriculture.

By Mr. BIAGGI (for himself, Mr. PREYER, Mr. WYDLER, Mr. MURPHY of New York, Mr. FLORIO, Mr. KOCH, and Mr. GILMAN):

H.R. 8341. A bill to amend title XIX of the Social Security Act to provide that an individual who is unable to care for his or her personal needs without assistance shall be eligible as a disabled person (even though employable) for the services of a home health aide under the applicable State plan approved under such title; to the Committee on Interstate and Foreign Commerce.

By Mr. CLAY (for himself, Mr. FORD of Michigan, Mr. HARRIS, Mr. LOTT, Mr. SOLARZ, Mr. TAYLOR, Mr. UDALL, and Mr. CHARLES H. WILSON of California):

H.R. 8342. A bill to amend title 5, United States Code, to provide for the application of local withholding taxes to Federal employees who are residents of such locality; to the Committee on Post Office and Civil Service.

By Mr. CONABLE (for himself, Mr. CORMAN, Mr. BRODHEAD, Mr. BURLESON of Texas, Mr. COTTER, Mr. CRANE, Mr. DUNCAN of Tennessee, Mr. FISHER, Mr. FORD of Tennessee, Mr. FRENZEL, Mr. GEPHARDT, Mr. GRADISON, Mr. HOLLAND, Mr. JACOBS, Mr. JONES of Oklahoma, Mr. KETCHUM, Ms. KEYS, Mr. LEDERER, Mr. MARTIN, Mr. MIKVA, Mr. PICKLE, Mr. SCHULZE, Mr. STEIGER, Mr. TUCKER, and Mr. VANDER JAGT):

H.R. 8343. A bill to amend section 4940 of the Internal Revenue Code of 1954 to reduce the excise tax based on the investment income of private foundations from 4 percent to 2 percent; to the Committee on Ways and Means.

By Mr. CONABLE (for himself, Mr. CORMAN, and Mr. WAGGONNER):

H.R. 8344. A bill to amend section 4940 of the Internal Revenue Code of 1954 to reduce the excise tax based on the investment income of private foundations from 4 percent to 2 percent; to the Committee on Ways and Means.

By Mr. DELANEY (for himself, Mr. ROONEY, Mr. MARKEY, Mr. RINALDO, Mr. EARLY, Mr. STRATTON, and Mr. NOLAN):

H.R. 8345. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer to deduct, or to claim a credit for, amounts paid as tuition to provide an education for himself, for his spouse, or for his dependents; to the Committee on Ways and Means.

By Mr. EDGAR (for himself and Mr. KOSTMAYER):

H.R. 8346. A bill to amend the Urban Mass Transportation Act of 1964 to revise the program of Federal operating assistance provided under section 17 of such act; to the Committee on Public Works and Transportation.

By Mr. GILMAN (for himself, Mr. BENJAMIN, Mr. HARRINGTON, Mr. YOUNG of Alaska, Mr. LAGOMARSINO, and Mr. FISH):

H.R. 8347. A bill to amend title 38, United States Code, in order to entitle veterans to 54 months of educational assistance for all educational programs under chapter 34 of such title, to eliminate the time limitation within which educational assistance must be used, and to restore on behalf of certain veterans educational assistance benefits previously terminated; to the Committee on Veterans' Affairs.

By Mr. HAMMERSCHMIDT (for himself, Mr. JOHNSON of California, Mr. YOUNG of Alaska, Mr. ROUSSELOT, Mr. CORNWELL, Mr. GOLDWATER, Mr. WALKER, Mr. RONCALIO, Mr. GINN, Mr. ROBERTS, Mr. DON H. CLAUSEN, Mr. MINETA, Mr. HOWARD, Mr. HUBBARD, Mr. STUMP, Mr. RAHALL, Mr. CLEVELAND, Mr. TUCKER, Mr. CORCORAN of Illinois, Mr. HOLLENBECK, Mr. DE LA GARZA, Mr. DEVINE, Mr. SHUSTER, Mr. FLIPPO, and Mr. DICKINSON):

H.R. 8348. A bill to amend the Airport and Airway Development Act of 1970 to require the establishment of a system of automated flight service stations; to the Committee on Public Works and Transportation.

By Mr. HILLIS:

H.R. 8349. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

By Ms. HOLTZMAN (for herself and Ms. BURKE of California):

H.R. 8350. A bill to amend the Immigration and Nationality Act to exclude from admission into and to deport from the United States all aliens who persecuted others on the basis of religion, race, or national origin under the direction of the Nazi government of Germany; to the Committee on the Judiciary.

By Mr. JENRETTE:

H.R. 8351. A bill to provide emergency assistance to producers who suffer loss of feed grain production due to disastrous drought conditions in 1977; to the Committee on Agriculture.

By Mr. KASTEN (for himself, Mr. ADDABBO, Mr. BOWEN, Mrs. CHISHOLM, Mr. FISH, Mr. GEPHARDT, Mr. GLICKMAN, Mr. HAGEDORN, Mrs. HECKLER, Ms. KEYS, Mr. MOAKLEY, Mr. QUAYLE, and Mr. SCHULZE):

H.R. 8352. A bill to amend the National Housing Act to provide for the insurance of graduated payment mortgages, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. KAZEN:

H.R. 8353. A bill to amend section 10 of the act of August 4, 1976 (90 Stat. 1090) the Federal Coal Leasing Amendments Act of 1975; to the Committee on Interior and Insular Affairs.

By Mr. McDONALD:

H.R. 8354. A bill to amend the Immigration and Nationality Act to facilitate the adoption of more than two children; to the Committee on the Judiciary.

By Mr. MATHIS:

H.R. 8355. A bill to amend the Tariff Schedules of the United States by repealing item 807 of schedule 8, part 1, subpart B; to the Committee on Ways and Means.

By Mrs. MEYNER:

H.R. 8356. A bill to establish a Commission on Proposals for a National Academy of Peace and Conflict Resolution; to the Committee on International Relations.

By Mr. MOAKLEY:

H.R. 8357. A bill to amend title II of the Social Security Act to increase from 22 to 26 the age until which child's insurance benefits may be paid on the basis of full-time student status, and the age before which a child must have become disabled in order to qualify for such benefits on the basis of disability; to the Committee on Ways and Means.

By Mr. NEDZI (for himself, Mr. AMMERMAN, Mr. HAWKINS, Mr. PATTISON of New York, Mr. PANETTA, Mr. STOCKMAN, and Mr. THOMPSON):

H.R. 8358. A bill to amend title 44, United States Code, to provide for the designation of libraries of accredited law schools as depository libraries of Government publications; to the Committee on House Administration.

By Mr. RODINO (for himself, Mr. BROOKS, Mr. FLOWERS, Mr. SEIBERLING, Ms. JORDAN, Mr. MAZZOLI, and Mr. HUGHES):

H.R. 8359. A bill to restore effective enforcement of the antitrust laws; to the Committee on the Judiciary.

By Mr. RODINO (for himself, Mr. KOCH, and Mr. ALLEN):

H.R. 8360. A bill to amend chapter 5 of title 5, United States Code (commonly known as the Administrative Procedure Act), to permit awards of reasonable attorney's fees and other expenses for public participation in Federal agency proceedings, and for other purposes; to the Committee on the Judiciary.

By Mr. ROONEY (by request):

H.R. 8361. A bill to amend the Federal Railroad Safety Act of 1970 to clarify and strengthen the role of the States in promoting safety on the Nation's railroads; to the Committee on Interstate and Foreign Commerce.

By Mr. SHARP (for himself and Mr. DRINAN):

H.R. 8362. A bill to amend the worker adjustment assistance provisions of the Trade Act of 1974 in order to provide that workers may be covered under certification of eligibility to apply for such assistance if they are totally or partially separated from adversely affected employment within 2 years before the date of the petition for such certification; to the Committee on Ways and Means.

By Mr. SEIBERLING (for himself, Mr. ADDABBO, Mr. BENJAMIN, Mr. BONIOR, Mr. CAPUTO, Mr. CUNNINGHAM, Mr. ERTEL, Mr. FARY, Mr. GAYDOS, Mr. GILMAN, Mr. GLICKMAN, Mr. JENRETTE, Mr. KILDEE, Mr. LE FANTE, Mr. LENT, Mr. LLOYD of California, Mrs. LLOYD of Tennessee, Mr. LOTT, Mr. MAGUIRE, Mr. MURPHY of New York, Mr. ROE, Mr. ROYBAL, Mr. RYAN, and Mr. BEDELL):

H.R. 8363. A bill to amend title II of the Social Security Act to require that procedures be established for the expedited replacement of undelivered benefit checks, to require that decisions on benefit claims be made within specified periods, and to require that payment of benefits on approved claims begin promptly; to the Committee on Ways and Means.

By Mr. SOLARZ:

H.R. 8364. A bill to allow a person having a claim for damages against an individual entitled to diplomatic immunity to bring an action in the Court of Claims for recovery of such damages from the United States; to the Committee on the Judiciary.

By Mr. STAGGERS (for himself, Mr. ROONEY, Mr. CARNEY, Mr. MADIGAN, and Mr. RINALDO):

H.R. 8365. A bill to amend the act of March 4, 1907, commonly referred to as the Hours of Service Act; to the Committee on Interstate and Foreign Commerce.

By Mr. ULLMAN:

H.R. 8366. A bill to amend the act of October 26, 1974, providing for the establishment of certain units of the national park system, to revise the boundaries of the John Day Fossil Beds National Monument in the State of Oregon, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. VANIK (for himself and Mr. JONES of Oklahoma):

H.R. 8367. A bill to provide customs procedural reform, and for other purposes; to the Committee on Ways and Means.

By Mr. WHALEN (for himself and Mr. BEDELL):

H.R. 8368. A bill to amend title II of the Social Security Act to reduce the effect of wage and price fluctuation on old-age, survivors, and disability benefits, with such benefits being computed on the basis of the workers' 10 or less years of highest earnings; to the Committee on Ways and Means.

By Mr. WOLFF (for himself, Mr. GILMAN, Mr. BAUCUS, and Mr. STARK):

H.R. 8369. A bill to amend title 38, United States Code, to provide counseling for certain veterans; to permit acceleration of monthly educational assistance payments to eligible veterans and dependents; to revise the criteria for nonaccredited courses; to provide alternative financial and educational assistance to peacetime post-Korean veterans affected by the expiration of their delimiting period; to provide for a conditional extension of the delimiting period for certain Vietnam-era veterans; to provide for the development of additional educational, employment, and readjustment assistance programs for veterans; to provide for the correction and preclusion of, and protection against, abuses and misuse of veterans benefits; and to otherwise enhance and improve the effectiveness, integrity, and utilization of veterans readjustment assistance programs; to the Committee on Veterans' Affairs.

By Mr. HARRINGTON:

H.R. 8370. A bill to restore the effective enforcement of the antitrust laws; to the Committee on the Judiciary.

By Mr. EILBERG (for himself, Mr. PHILLIP BURTON, Mr. MAZZOLI, Mr. MONTGOMERY, Mr. MURPHY of Pennsylvania, Ms. FENWICK, Mr. EVANS of Georgia, Mr. ERTEL, Mr. MICHAEL O. MYERS, Mr. STOKES, Mr. WINN, Mr. FISH, Mr. LEDERER, Mr. BADILLO, Mr. PEPPER, Mr. LAGOMARSINO, and Mr. FARY):

H.J. Res. 548. Joint resolution to designate the calendar week beginning February 5, 1978, as National Electrical Safety Week; to the Committee on Post Office and Civil Service.

By Mr. BLANCHARD:

H. Con. Res. 283. Concurrent resolution expressing the sense of Congress with respect to the Baltic States; to the Committee on International Relations.

By Mr. FINDLEY:

H. Con. Res. 284. Concurrent resolution on Middle East peace; to the Committee on International Relations.

By Mr. ROBERTS:

H. Con. Res. 285. Concurrent resolution providing for printing of summaries of legislation concerning veterans; to the Committee on House Administration.

By Mr. RUSSO:

H. Con. Res. 286. Concurrent resolution expressing the sense of Congress with respect to the Baltic States; to the Committee on International Relations.

By Mr. STUDDS (for himself, Mr. BEILENSON, Mr. CAVANAUGH, Mr. HARRINGTON, Mrs. MEYNER, Mr. DRINAN, Mr. BRODHEAD, Mr. EILBERG, Mr. LLOYD of California, Mr. OTTINGER, Mr. WAXMAN, Mr. SISK, Mr. PANETTA, Ms. HOLTZMAN, Mr. MITCHELL of Maryland, Mr. LEACH, Mr. KOSTMAYER, Mr. HARKIN, Mr. DOWNEY, Mr. PATTISON of New York, Mr. MILLER of California, Mr. HUGHES, Mr. BAUCUS, Mr. DELLUMS, and Mr. IRELAND):

H. Con. Res. 287. Concurrent resolution disapproving the proposed sale of airborne early warning aircraft to Iran; to the Committee on International Relations.

By Mr. WOLFF (for himself and Mr. VENTO):

H. Con. Res. 288. Concurrent resolution expressing the sense of the Congress that the President actively seek an international convention which has as its goal a multilateral treaty to deny sanctuary to international terrorists; to the Committee on International Relations.

By Mr. YATRON:

H. Con. Res. 289. Concurrent resolution calling for freedom and self-determination for Lithuania, Latvia, and Estonia; to the Committee on International Relations.

By Mr. ROE:

H. Res. 686. Resolution to create a select committee to conduct a study of the circumstances surrouding both product liability and professional liability insurance rate increases, and of any other product and professional liability insurance coverage issues the committee shall determine; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

220. By the SPEAKER: Memorial of the Legislature of the State of New York, relative to Federal assistance to agricultural industries; to the Committee on Agriculture.

221. Also, memorial of the Legislature of the State of Louisiana, relative to Federal programs for flood victims; to the Committee on Banking, Finance and Urban Affairs.

222. Also, memorial of the Legislature of the State of Louisiana, relative to nuclear facility construction; to the Committee on Interior and Insular Affairs.

223. Also, memorial of the Legislature of the State of New York, relative to the security of the Republic of China; to the Committee on International Relations.

224. Also, memorial of the Legislature of the State of California, relative to telephone rates; to the Committee on Interstate and Foreign Commerce.

225. Also, memorial of the Legislature of the State of Louisiana, relative to the effects of saccharin; to the Committee on Interstate and Foreign Commerce.

226. Also, memorial of the Legislature of the State of Louisiana, relative to regulation of the insurance business; jointly, to the Committees on Interstate and Foreign Commerce, and the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HARKIN:

H.R. 8371. A bill for the relief of John H. R. Berg; to the Committee on the Judiciary.

H.R. 8372. A bill for the relief of Conrad C. Stork; to the Committee on the Judiciary.

By Mr. LONG of Maryland:

H.R. 8373. A bill for the relief of Dr. John C. Hume; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

147. The SPEAKER presented a petition of the Sport Fishing Institute, Washington, D.C., relative to a national wetlands protection policy; jointly, to the Committees on Merchant Marine and Fisheries, and Public Works and Transportation.

H.R. 5400

By Mr. LEVITAS:

Page 26, line 19, insert "(i)" after "(B)".

Page 26, line 25, strike out "(i)" and insert in lieu thereof "(I)".

Page 27, line 4, strike out "(ii)" and insert in lieu thereof "(II)".

Page 27, after line 7, insert the following new clause:

(ii) Any State may provide by law, in accordance with the provisions of this clause, that such State shall not be subject to the requirements of subsection (a) or any other requirement of this Act. Any such provision by a State shall not apply to the general election for Federal office in 1978. No such law enacted by any State shall be considered to be in effect for purposes of this clause unless such State completes all action necessary to place such law in effect before the close of December 31, 1981.

By Mr. RHODES:

Page 30, after line 17, insert the following new paragraph:

(8)(A) Each State and unit of general local government shall require that any individual who registers to vote in a Federal election under subsection (a)(1), and any individual who registers to vote in a Federal election during the 7-day period immediately before such election, shall vote in such election through the use of a paper ballot.

(B) Any paper ballot cast by any individual in accordance with subparagraph (A) shall be sealed in a separate unmarked envelope by such individual and returned to a State or local official at the polling place involved. Such State or local official shall attach the envelope to any registration information and materials required to be furnished by such individual under this subsection or under the laws of the State or unit of general local government involved.

(C)(i) Each State and unit of general local government may take such steps as may be necessary, in accordance with any applicable State law, to inspect and verify any registration information and materials specified in subparagraph (B), in the case of any individual who votes by paper ballot in accordance with subparagraph (A). Such State or unit of general local government shall make such information and material available to any official representative of a political party, upon written request, for purposes of such inspection and verification. Any such inspection and verification shall be completed within a reasonable time after the election involved.

(ii) Any paper ballot cast in accordance with subparagraph (A), and any registration information and materials specified in subparagraph (B), shall be subject to challenge in accordance with any applicable State law in the State involved. If any such ballot is disallowed as a result of any such challenge, such ballot may not be included in the voting tabulation for the Federal election involved by the State or unit of general local government involved.

(iii) Any paper ballot cast in accordance with subparagraph (A) shall be detached from any registration information and materials accompanying it before such ballot is tabulated by the State or unit of general local government involved.

H.R. 7171

By Mr. BONIOR:

Page 67, after line 11, insert the following new subsection.

SEC. 1106. (a) On or before January 31, 1978, and every second year after 1978, the Secretary of Agriculture, in consultation with the administrator of the Agency for International Development, shall prepare and transmit to each House of the Congress a hunger impact statement concerning domestic and international food assistance programs administered through the Department of Agriculture and such programs administered through the Agency for International Development. Such statement shall at least include, with respect to food assistance programs carried out, or to be carried out, within two years of the date on which such statement is transmitted, the following:

(1) a description of areas in which food assistance has been, or will be, provided, including income levels, nutritional characteristics, and food production in such areas;

(2) a description of the nutritional value of agricultural commodities which have been, or will be, distributed under such programs; and

(3) an evaluation of such programs, including the efficiency of administration and the effects of such programs with respect to nutritional improvement, if any, of individuals receiving benefits from such assistance.

(b) The Secretary may secure directly from any department or agency of the United States information necessary to enable him or her to carry out the provisions of this section. Upon request of the Secretary, the head of such department shall furnish such information to the Secretary.

By Mr. HARKIN:

Page 14, line 18, strike "$1.75 per bushel for the 1977 crop and".

Page 14, line 19, strike "1978" and insert in lieu thereof: "1977".

Page 16, line 4, strike "$1.85" and insert in lieu thereof: "$2.00".

Page 64, immediately after line 16, insert the following:

"AGRICULTURAL CONSERVATION PROGRAM

"SEC. 1013. Subsection (a) of section 7 of the Soil Conservation and Domestic Allotment Act (49 Stat. 1149, as amended; 16 U.S.C. 590(a)) is amended to read as follows:

"(a) Congress recognizes that agricultural producers, as the suppliers of the Nation's food and fiber and owners and operators of private lands, have the responsibility for making the management decisions relating to (1) changes in land use or cropping systems which are needed to conserve, develop, and protect soil and water resources on agricultural land; (2) the installation of soil and water conservation measures to provide enduring protection to agricultural land from erosion, deterioration, pollution by natural and manmade causes; (3) the improvement of water quality through the prevention and abatement of agricultural-related pollution. It is hereby declared to be the policy and purpose of this act to assist agricultural producers in attaining these objectives and thereby help assure (1) the continued supply of food and fiber necessary for the maintenance of a strong and healthy

people and economy and (2) the conservation of vital natural resources and enhancement of the environment. The activities necessary to attain these objectives shall be carried out to the extent feasible in such a way as to benefit fish and wildlife resources; promote recreation; preserve open space and enhance natural beauty; preserve vital historic and archeological sites; maintain important aquatic areas to help prevent floods and improve water management; prevent pollution and environmental degradation; and avoid the creation of hazards to persons or animals.

"SEC. 1014. Section 8 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h) is amended by—

(a) striking out the first three sentences of subsection (b) and inserting in lieu thereof the following:

"(b) The Secretary is authorized to carry out the policy and purpose specified in section 7(a) by providing financial assistance to agricultural producers, based in the case of long-term agreements, on farm and ranch conservation plans approved by local conservation districts, where such districts are organized, for carrying out enduring conservation and environmental enhancement measures. For the purpose of this section, the term "long-term agreement" refers to a multiyear agreement not in excess of ten years. Eligibility for financial assistance shall be based upon the existence of conservation or environmental problems which cause a reduction in the productive capacity of the Nation's land and water resources or cause a degradation of environemntal quality. The local committees provided for hereinafter shall determine, in accordance with the provisions of this Act and criteria established by the Secretary, the types of conservation problems that exist on farms and ranches, the priorities of such problems, and the practices needed to solve them. The amount of financial assistance to be provided shall be that portion of the cost of effectuating the physical installation of conservation and environmental enhancement measures, which the Secretary determines is necessary. In determining level of payment, consideration will be given to—

"(1) the farmer's inability to carry out the measures to the needed extent with his own resources.

"(2) the amount of expected conservation or environmental benefit accruing to society;

"(3) the total cost of carrying out the needed measures;

"(4) the degree to which the farmer benefits from other public programs aimed at conservation and environmental enhancement; and

"(5) the degree to which appropirate conservation or pollution abatement practices will be applied in the absence of financial assistance.

"The Secretary, informulating the national program, shall take into consideration:

"(1) The need to control erosion and sedimentation from agricultural land and to conserve the water resources on such land.

"(2) The need to control pollution from animal wastes.

"(3) The need to facilitate sound resource management systems through soil and water conservation.

"(4) The need to encourage voluntary compliance by agricultural producers with Federal and State requirements to solve point and nonpoint sources of pollution.

"(5) National priorities reflected in the National Environmental Policy Act and other current congressional and administrative actions.

"(6) The degree to which the measures contribute to the national objective of assuring a continued supply of food and fiber necessary for the maintenance of a strong and healthy people and economy.

"(7) The type of conservation measures needed to improve water quality in rural America.";

(b) striking out ", and, wherever practicable, they shall be classified on two bases: (a) Soil-depleting crops and practices, (b) soil-building crops and practices." in the last sentence of the first paragraph of subdivision (b);

(c) striking out subsection (c) and inserting in lieu thereof the following:

"(c) Funds appropriated for carrying out the purpose of this Act may not be utilized to provide financial or technical assistance for drainage or filling on wetlands designated as wetland types 3 through 20 in the United States Department of the Interior, Fish and Wildlife Circular 39, Wetlands of the United States, 1956, or other equivalent reports issued subsequently; *Provided,* That the Secretary shall encourage the preservation of wetlands types 1 and 2 where they are adjacent to wetlands types 3 through 20 and are needed to maintain a balanced aquatic or semi-aquatic ecosystem; *Provided further,* That this section shall not affect authorities provided in Public Law 87–732."

(d) striking out subsection (d);

(e) striking out the first three paragraphs of subsection (e) and inserting in lieu thereof the following:

"(e) Payments made by the Secretary under subsection (b) to agricultural producers shall be divided among landlords, tenants, and sharecroppers in proportion to the extent such landlords, tenants, and sharecroppers contribute to the cost of carrying out the conservation or environmental enhancement measures.

"The maximum payment which may be made to any person shall be determined by the Secretary.";

(f) striking out subsection (f); and

(g) striking out the second sentence of subsection (g).

"SEC. 1015. Section 10 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590j) is repealed.

"SEC. 1016. Section 12 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590l) is repealed.

"SEC. 1017. Section 13 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590m) is amended by striking out 'Production and Marketing Administration' each place it appears and inserting in lieu thereof 'Agricultural Stabilization and Conservation Service', by striking out 'Administration' and inserting in lieu thereof 'Service'.

"SEC. 1018. Section 15 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590o is amended—

"(a) by adding the following new sentences at the end of the first paragraph:

"The amount appropriated shall be available until expended. A specified amount or percentage of the appropriation shall be designed for long-term agreements. The Secretary shall distribute the funds available for financial assistance among the several States in accordance to their conservation needs, as determined by the Secretary; and

"(b) by striking out the second undesignated paragraph of such section.

"SEC. 1019. Subsections (a) and (e) of section 16 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590p(a) and 590p (e)) are repealed.

"SEC. 1020. The Act of June 16, 1938 (52 Stat. 710, 746; 16 U.S.C. 590h–1), is amended by striking out the last proviso in the undesignated paragraph under the heading 'CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES, DEPARTMENT OF AGRICULTURE'.

"SEC. 1021. The provisions of sections 1013 through 1020 shall become effective October 1, 1977."

By Mr. MAHON:

Page 24, on line 16, strike the words "shall immediately" and insert in lieu thereof the word "may".

By Mr. NOLAN:

Page 1, insert the following immediately after line 13:

"SEC. 102. Section 101(4) of the Agricultural Act of 1970, as amended, is renumbered as section 101(5) and the new section 101(4) is added as follows:

"(4) No payments shall be made under the annual programs established under the Agricultural Act of 1949, as amended, for the 1978 through 1981 crops of wheat, feed grains, upland cotton, and rice to;

"(a) a corporation, partnership, or other legal entity comprised of more than one person if a majority interest in such legal entity is held by stockholders, partners, or persons who themselves are not engaged in farming operations as a sole proprietorship;

"(b) a trust or similar arrangement established by a person who would not have been eligible for payment under this subsection;

"(c) The provisions of this subsection shall not prohibit prgram participation by:

"(i) Any farmer-owned and controlled cooperative, corporation, or association which meets the requirements of the Act entitled "An Act to authorize association of producers of agricultural products", approved February 18, 1922 (42 Stat. 388, 7 USC 291–292, the Capper-Volstead Act) or as defined in section 15(a) of the Agricultural Marketing Act of 1929 (49 Stat. 317; 12 USC 1141).

"(ii) Any family farm corporation founded primarily for the purpose of earning income from agriculutral production. A majority of the shares must be held by, and a majority of the shareholders must be, close relatives. To qualify, a farm must be lived on or actively operated by one of the related family member stockholders.

"(iii) An organization described in section 501(c)(3) of the Internal Revenue Code of 1954 and exempt from tax under 501(a) of such Code."

By Mr. PANETTA:

Page 123 line 4, after "Conservation," insert "Water Conservation,".

Page 123, after line 24, insert the following new paragraph and redesignate the subsequent paragraph accordingly:

(d) Water conservation, including the development and dissemination of scientific and technological information to improve methods, procedures and practices for conserving water (such as irrigation management, tail water reuse, desalination, and crop conversion);

By Mr. SEBELIUS:

Page 8, line 20, insert the following new paragraph:

(p) "Elderly person" in this Act shall mean a person 65 years of age or older.

Title XI, on page 67, immediately after line 4, insert the following new section and redesignate existing section 1105 as section 1106:

"(e) Bagged commodities for the purpose of financing by the Commodity Credit Corporation under this Act shall be considered 'exported' upon delivery at port, and upon presentation of a dock receipt in lieu of an on-board bill of lading.".

By Mr. SMITH of Iowa:

Strike line 20 page 44 through line 19 on page 46 and in lieu thereof substitute the following:

SEC. 902. The Agricultural Act of 1949, as amended, is amended by adding the following new section:

"SEC. 109. (a) Notwithstanding the provisions of any other section of this Act or the provisions of any other law, the Secretary of Agriculture shall establish, maintain and dispose of a separate reserve of wheat,

corn, and other enumerated feed grains through storage contracts with producers as described in this section and in accordance with the provisions of this Section. Such reserves shall be no less than twenty-five million tons nor more than thirty-five million tons: *Provided*, (i) That such maximum amount may be adjusted by the Secretary as required to meet such commitments as may be assumed by the United States pursuant to an international agreement containing provisions relating to grain reserves; (ii) that the Secretary is authorized to proportion reserve stocks of grain to correspond to usual marketing demands; and (iii) that the aforementioned totals and proportions of stocks are to be considered norms or averages and shall not prohibit the accumulation or release of stocks as authorized under other provisions of this section. The Secretary shall not charge interest on a loan on grain held by a producer in such reserve.

"(b) The reserve shall be constituted by offering to producers who have eligible commodities under a Commodity Credit Corporation loan or purchase agreement an opportunity to enter into a storage agreement of not less than three nor more than five years, and by providing for storage payments to producers of such amounts as the Secretary determines appropriate to cover the cost of storing the commodities held under these agreements. The grain initially stored under a producers storage contract shall have been produced by the producer and stored at his expense for the first eight months of the marketing year in which it was produced. Such producer agreements shall permit producers to cancel the agreement or redeem the commodity held under the terms of this section during such periods as the Secretary determines that the market price for that commodity exceeds 140 per centum of the then current loan rate for such commodity, and payments for storage shall cease during these same periods. The Secretary shall establish interest and storage penalties sufficient to offset any advantages which might accrue to producers due to premature redemption of loans (that is, redemption which occurs when the Secretary has determined the market price equals or is below 140 per centum of the then current loan rate), or any other actions in violation of the terms of this subsection.

"(c) Storage contracts made under provisions of this section shall contain a provision permitting cancellation by the Secretary of storage agreements, and cancellation of any Commodity Credit Corporation loans made under provisions of this section at such time as the Secretary determines that the market price for the commodity exceeds the higher of the following:

"(1) 165 per centum of the then current loan rate for that commodity, or

"(2) 130 per centum of the average market price for the preceding three marketing years:

Provided, however, That the quantity of the commodity covered by such cancellations shall be limited to the net quantities by which estimated domestic consumption and exports exceed estimated domestic production, imports, and carryovers for the marketing year.

"(d) The Secretary may, at his option, reconcentrate all grains stored in commercial warehouses at such points as he deems to be in the public interest, taking into account factors including transportation and normal marketing patterns. The Secretary shall permit rotation of stocks and facilitate maintenance of quality under regulations which assure that the holding producer or warehouseman shall, at all times, have available for delivery at the designated place of storage both the quantity and quality of grain covered by his commitment. In the event of failure to cover his commitment with either the quantity or quality of grain specified, the holding producer shall be required to reimburse the government for any deficiencies in value and the holding warehouseman shall pay twice the amount of any such deficiencies in value.

"(e) The net additional quantity of any commodity covered by such long-term storage contracts under this section in any marketing year shall not exceed the lesser of the following:

"(1) the net additional estimated total carryover in excess of normal for the marketing year; or

"(2) the amount the maximum reserve inventory determined for the given commodity in subsection (a) above exceeds the total stocks of such commodity held in the reserve at the beginning of the marketing year.

"(f) Except as provided in subsection (g) herein, notwithstanding any other provision of law, the Commodity Credit Corporation shall not sell any wheat, corn, barley, rye, oats or grain sorghum owned or controlled by it for less than 150 per centum of the then current respective loan rates. The provisions of this subsection shall not apply to sales or other disposals of such commodities under (a) the fifth and sixth sentences of section 407 of this Act; (b) the Act entitled 'An Act to authorize the sale at current support prices of agricultural commodities owned by the Commodity Credit Corporation to provide feed for livestock in areas determined to be emergency areas, and for other purposes', approved September 21, 1959 (73 Stat. 574), and (c) section 813 of the Agricultural Act of 1970.

"(g) The Secretary may buy and sell at an equivalent price, allowing for the customary location and grade differentials, substantially equivalent quantities in different locations or warehouses to the extent needed to properly handle, rotate, distribute, and locate such commodities which the Commodity Credit Corporation owns or controls. Such purchases to offset sales shall be made within two market days. The Secretary shall make a daily list available showing the price, location, and quantity of the transactions entered into hereinunder.

"(h) The Secretary shall use the Commodity Credit Corporation to the extent feasible to fulfill the purposes of this section; and to the maximum extent practicable consistent with the fulfillment of the purposes of this section and the effective and efficient administration of this section shall utilize the usual and customary channels, facilities, and arrangements of trade and commerce.".

By Mr. WOLFF:

Page 157, strike out line 16 and all that follows through line 4 on page 181 (and amend the table of contents on page 2 accordingly).

SENATE—*Friday, July 15, 1977*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. GEORGE MCGOVERN, a Senator from the State of South Dakota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray:

Dear Lord and Father of mankind, we thank Thee for Thy mercies which are new every morning. Rekindle the flame of Thy holy spirit within us. Renew our minds. Strengthen our bodies. Fill our hearts with Thy love. Equip us, O Lord, not for selfish pursuits, but for service to the whole Nation and to our fellow man everywhere.

"With Thee began, with Thee shall end the day:
Guard Thou the lips from sin, the hearts from shame,
That in this house have called upon Thy name." JOHN ELLERTON, 1866.

Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., July 15, 1977.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable GEORGE MCGOVERN, a Senator from the State of South Dakota, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. MCGOVERN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP.

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Thursday, July 14, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

OUTER CONTINENTAL SHELF BILL

Mr. ROBERT C. BYRD. Mr. President, I inquire of the minority leader as to whether or not there might be a possibility that we could get a further reduction in the time limitation on any amendments about which he may know.

Mr. BAKER. Mr. President, I thank the majority leader for his inquiry.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate.

The ACTING PRESIDENT pro tempore. The Senate will be in order.

Mr. BAKER. Mr. President, I made inquiry of Members on this side, following our colloquy last night, about the possibility of reducing time. I am happy

to report that on this measure—the only one where we did not have a reduction of time was the Bartlett amendment—Senator BARTLETT has indicated his willingness to reduce that time from 2 hours to 1 hour.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader for this information.

I make such a request at this time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE APPROPRIATIONS BILL

Mr. BAKER. Mr. President, if the majority leader would permit me, I would also say that if he plans today to try to turn to the consideration of the legislative appropriations bill, I believe we might be able to reach an agreement on that measure, as well.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader.

I would plan to call up that measure today. Does he have a suggestion as to the time?

Mr. BAKER. Mr. President, if the majority leader will yield, I took the liberty of inquiring on this side of the aisle about approval for a limitation of time of 1 hour on the bill and 30 minutes on amendments to the bill, and if that has any appeal to the majority leader I would be happy to agree to that arrangement.

Mr. ROBERT C. BYRD. Very well.

Mr. President, I ask unanimous consent that on the legislative appropriation bill there be a time limitation of 1 hour to be equally divided between Mr. HUDDLESTON and Mr. SCHWEIKER, that there be a time limitation on any amendment thereto of 30 minutes, a time limitation on any debatable motion or appeal, or point of order, if such is submitted to the Senate, of 20 minutes, and that the agreement in respect to the division and control of time be in the usual form.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. I thank the majority leader, Mr. President.

Mr. ROBERT C. BYRD. I thank the minority leader.

Mr. President, I think the Senate should be aware that the legislative appropriation bill will be called up today. If there is a hiatus at some point prior to the completion of the OCS bill which would lend itself to the transaction of business on the legislative appropriation bill, the leadership will attempt at that point to bring up the legislative appropriation bill.

However, if that does not occur, upon final disposition of the OCS bill the leadership will then call up the legislative appropriation bill.

I personally do not know of any specific problem with that bill. I doubt that a great deal of time will be needed to dispose of it. But Senators should be alerted to the fact that final action on the OCS bill will not necessarily mean that the Senate has completed its business today or that the final rollcall has occurred.

Now, it may very well be that no rollcall votes will be necessary on the legislative appropriation bill, but I think that both cloakrooms should be aware of this so that Senators may be so informed.

I thank the distinguished minority leader.

OUTER CONTINENTAL SHELF BILL

Mr. BAKER. Mr. President, if I could speak one moment in that respect, I would also hope that our colleagues on this side of the aisle, who may not intend to call up their amendments which are printed at the desk, might let us know this as soon as possible so that we can plan on this side the sequence of those amendments during the course of the day.

Mr. ROBERT C. BYRD. This leads me, if I may suggest, Mr. President, to the distinguished minority leader, that we ask our respective cloakrooms to determine, if possible, the number of amendments Senators intend to call up, as we did the other day and it was very successful in that event, and I would be willing on my side to see if any Senators on this side of the aisle plan to call up amendments and, if so, we will know who they are and we will be able, perhaps, to expedite the calling up of those amendments.

Mr. BAKER. Mr. President, I think that is a good suggestion. I will then ask our cloakroom to put out a so-called hot line telephone message advising our Members that it is the intention of the majority leader to try to dispose of the legislative appropriation bill today and also to inquire if Members on this side of the aisle have amendments which are not printed and if they intend to call up the amendments which have been printed.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I will be happy to report the results of that telephone query to the majority leader as soon as I have it.

Mr. ROBERT C. BYRD. Yes, and the minority leader, I believe, has in mind amendments to the OCS bill.

Mr. BAKER. That is correct.

Mr. ROBERT C. BYRD. So do I.

I think this has been a helpful discussion, Mr. President. I again thank the minority leader.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I yield the remainder of my time under the standing order to the distinguished Senator from Kansas.

The ACTING PRESIDENT pro tempore. The Senator from Kansas is recognized.

THE FARM CRISIS IS DEEPENING

Mr. DOLE. Mr. President, I appreciate the distinguished minority leader yielding this time because I would like to speak very briefly about the deepening farm crisis.

Mr. President, I am afraid that the plight of U.S. farmers, especially wheat and feed grain producers, who find themselves caught in a vicious cost-price squeeze is not fully understood by most Americans—except for those whose livelihoods are in some way affected directly by farming or related enterprises.

While wheat farmers have seen the items comprising their cost of production escalate, they have seen the price of wheat plunge from around $4 per bushel to less than $2, which is about $1 below the cost of production for most farmers.

You find out rather quickly how serious the situation is for the grain farmers and for the rural communities dependent on their income by talking with bankers, implement dealers, grain dealers, and farmers in grain producing areas such as my State of Kansas.

COMMENTS FROM KANSAS

I would like to share with Senators some of the comments I have heard from back in Kansas.

From grain dealers I am hearing these comments:

Farmers Cooperative Association, Parsons, Kans., Dean Walker:

> Farmers are having a real problem recovering their cost of production. Commodity prices are just too low. Soybeans have dropped $3.00 in the last two weeks. The whole market needs a little bit of stability. Fuel, taxes, machinery, fertilizer—everything is up price-wise for the farmer, but the price is pretty low. The outcome is that many farmers who are now out on a limb with mortgages on their property and high interest payments are going to be bankrupt very soon. We (cooperatives) have a high number of accounts receivable—higher than we have ever had, and I am a little bit worried about getting it back. I can't see the market getting better the way it is right now. I have been in the grain business since 1939 and the last couple of years have been the shakiest I have ever been through. It is a vicious circle—unions strike for higher wages and companies then have to raise their prices on goods produced and thus the cost of living goes up. Then the unions strike for higher wages and it starts over again. While this is going on, the farmers are out in the fields producing. They have to pay the higher price for the machinery and everything because the unions have forced the prices up, but their commodity is just given away.

Fort Scott Grain & Feed Co., Inc., Fort Scott, Kans., Jack Prather:

> When the farmers make money, we do, and they aren't making money. Because the prices are so low the farmers in this area aren't going to produce wheat next year. Because the prices are so low, they are going to plant fall crops instead, such as soybeans and sorghum.
>
> Because they are going to plant fall crops, they are going to inflate the fall market and that will lower the price on beans and sorghum and increase the problems all the way around. Elevators are closing all over the State. The reason is because they are not making money, and they are not making money because the farmers are not making money and that goes back to the top of the argument.

AGCO, Inc., Russell, Kans., Loren Dinkel:

paying a little to the bank and none to the grain dealer or vice versa—cannot pay both. The farm economy is very bad. Some are There isn't enough money in the farmer's hand to go around. The farmer doesn't need more credit—he has had too much already. What he needs is a profit.

Garden City Co-Op, Garden City, Kans., Harley Foulks, manager:

We all know that the farm problem will have a domino effect on the rest of the economy in our agricultural areas. I think it will spread from farm areas to industrial areas if something is not done.

Implement dealers, who are among the first to feel the effects of a farm depression, have made these comments to me:

This is one of the most depressed economic times we've ever seen. There is no way things can continue as they are—we can't last. We need to have foreign grain sales or immediate government help—not in six months, but now. We won't last six more months.

Farm implement dealer, Garden City, Kans., Cecil O'Brate:

The ripple effect of the declining farm economy is being felt by implement dealers. One of my stores which sold 40 tractors last year has sold only 6 this year.

Western Kansas Manufacturers, Inc., Dodge City, Herb Greenstreet, executive secretary:

Since 1975, tractor sales in nine wheat producing states declined 15.5 percent. A survey of Kansas implement dealers showed a 17.7 percent decrease in dollar volume and a 35.9 percent decrease in employment since 1975. In the first quarter of the year, combine sales are off 27.7 percent and tractor sales are off 27.3 percent. We don't see anything better in the next two to three years for farm equipment manufacturers.

The Emporia Gazette, of Emporia, Kans., carried the following interesting statement on July 8, 1977, in its "60 Years Ago" column:

The first wheat of the 1917 crop has been sold to the Soden's Mill by Ed Collins of the Fowler neighborhood. It brought $2.00 a bushel.

Here we are 60 years later and the Ed Collins' cannot get $2 for a bushel of wheat.

KANSAS BANK SURVEY

My colleague, Representative SEBELIUS, recently surveyed the Kansas Bankers Association. Survey returns from over 300 Kansas banks showed that 45 percent of Kansas farmers are in "serious trouble" and indicate that 86 percent of the States' wheat producers will lose money this year because of the current farm crisis. Those farmers in "serious trouble" included 8.7 percent of farm bank customers who cannot repay current debts and 36.2 percent of farm customers who have gone through major refinancing of their assets.

PRICE COMPARISONS: INAUGURATION DAY VERSUS CURRENT

I would like to compare some cash prices for farm crops carried in the Wall Street Journal on Inauguration Day, January 20, 1977, with those quoted in the same paper on Tuesday, July 12, 1977:

Farm commodity	Jan. 20, 1977	July 11, 1977	Decline since Jan. 20 1977
Wheat, No. 2 Ord. Hard Kansas City (bushel)	$2.70¾	$2.34½	$0.36
Wheat, No. 2 Soft Red Chicago (bushel)	2.73½	2.20½	.53
Milo, No. 2 Kansas City hundredweight	4.10	3.30	.80
Corn, No. 2 Yellow Chicago bushel	2.59	2.07¼	.51¾
Oats, No. 2 Milling Minneapolis (bushel)	1.82	1.20	.62
Rye, No. 2 Minneapolis (bushel)	2.90	2.15	.75
Barley, top quality Minneapolis (bushel)	3.35	2.50	.85
Soybeans, No. 1 Yellow Chicago (bushel)	7.15½	5.93	1.22
Flaxseed, Minneapolis (bushel)	7.50	5.15	2.35
Sugar, cane raw New York (pound)	11.55	.0964	.02
Cotton, 1 1/16 in mid-Memphis (pound)	.6565	.6040	.05¼

The public was led to believe that the Carter administration would would get the "economy moving." Well, it has not happened for producers of crops.

All of the grain crops, soybeans, sugar, and cotton have suffered drastic declines in the prices producers received for their products while their costs have increased substantially.

This week, in hearings on problems of international trade before the Subcommittee on International Trade of the Senate Finance Committee, Tom Smith, a witness for American Cotton—AMCOT—which is the sales arm of four major U.S. cotton marketing cooperatives, testified that cotton prices are down $100 per bale from prices received earlier in the marketing year.

In the first 5 months of the Carter administration, wheat is down 53 cents per bushel. Corn is off 52 cents per bushel, soybeans are off $1.22 per bushel, flaxseed is down $2.35 per bushel. Also, sugar prices are down.

These declines in prices have not been addressed by any innovative ideas or programs of the new administration that I have seen during their first 5 months in office.

I see the Canadians outselling us in world markets, including China. I hear threats of a veto if target prices are high enough for a farmer to recover his cost of production.

HEARING ON INTERNATIONAL TRADE

On Wednesday, July 13, 1977, we held a hearing in the Subcommittee on International Trade of the Senate Committee on Finance on the problems of international trade. Witnesses included Secretary Bergland and representatives of various commodity groups. I detected a strong sentiment for greater use of CCC credits to make U.S. farm products more competitive in world markets. Secretary Bergland confirmed that the CCC "makes a profit" on the CCC credit program. I believe that this program, which does not affect the taxpayers' pocketbooks, should be used more vigorously to facilitate exports, and I invite the administration's support of legislation which I have proposed to expand its use in world markets where it is now prohibited.

ADMINISTRATION SHOULD REASSESS POSITION

To help alleviate the distress in rural America caused by slack demand and falling prices, I hope the administration will reassess its position concerning its acceptance of the farm support levels in the Senate farm bill.

We attempted in that bill to do two things regarding needed support for farm commodities. First, we set the loan level for commodities at a point that would permit U.S. grain to remain competitive in world markets; and second, we felt that the target or income supplement price should be high enough to enable farmers to recover, on the average, their cost of production—not a guaranteed profit, but merely production costs.

This seems fair not only to the farmers who take their chances against the vagaries of weather, insects, and disease, but, also, to the consumers who have a vital interest in maintaining a viable farm economy that can deliver to the tables of America and the world a stable supply of food at reasonable prices.

Thus, these principles were embodied in the Senate farm bill and they resulted in a wheat target price of $2.90 per bushel in 1977 and $3.10 in 1978. I urge my colleagues in the House to increase their target levels to conform with those of the Senate. Twenty-five cents per bushel, which is the difference between the House and Senate target prices for 1977, equates to a possible $100 million in my State of Kansas and $500 million nationally in potential farm income.

It is my contention, and my colleagues have concurred with their votes on the floor of the Senate, that farmers deserve to recover their cost of production, as represented in the Senate figures. To compromise on these figures would be, in essence, "picking the farmers' pockets."

SENATE FARM BILL EQUITABLE AND FAIR

This Senator believes that the Senate farm bill is equitable and fair to the farmer, the consumer, and the taxpayer. I do not see how President Carter could veto this legislation without losing credibility. After all, it has been less than a year since, as a candidate, he said:

If I am elected, we will make sure that our crop support prices are at least equal to the cost of production. That will not guarantee a profit—no real farmer wants that—but it will give the determined farmer a chance to stay in business . . . .

FARM CRISIS NOT A LOCALIZED PROBLEM

The Dallas Federal Reserve Bank in its June economic report shows that the farm income problem is not localized in any one State. Farm debt, which increased $11 billion in 1976 and stood at $100 billion at the start of 1977, is continuing "with a large increase expected again this year." The report says that financial problems are greatest for borrowers in the Midwest and Southwest who are "having difficulty servicing their debts as a result of the cost-price squeeze caused by higher production costs and lower farm prices.

I should like to conclude my statement

with some quotes from people affected by the farm crisis in States other than Kansas. Depressed prices are spreading from wheat to feed grains to the detriment of the farm economy in many States. I would like to share these comments from feed grain areas:

COMMENTS FROM CORN BELT

Demeter, Inc., Fowler, Ind., Don Brouilette:

We have the worst of two worlds in this local area—low prices and drought. With $1.90 corn and no rain, the corn farmer cannot do anything but lose on his crop. Soybeans could still provide him some income.

We have had some farmers undercapitalized, and I would guess that some will bite the dust in the next couple of years unless something is done to keep them in farming.

A local implement dealer that has been in business about seven years told me that last week was the first week since he has been in business he hasn't sold a single piece of equipment—not even a small insignificant sale.

The price levels in the Senate bill would help farmers stay in farming. It looks like a fair way to correct the situation until exports return.

Farmers are going to put most of their harvest under loan this year, and this will make prices climb so that higher loan levels will be more workable.

Farmers Union Coop Association, Greenwood, Nebr., John Jones, Manager:

It's beginning to get critical. You get the tune from the farmer that they are "losing faith in the government."

The price of grain is down. Last year they got fifty, sixty to seventy bushels of wheat per acre and got by, but this year if they didn't get at least forty to fifty bushels per acre (and many didn't), they cannot make their cost of production.

This increase in target prices and deficiency payments is essential to keep the farmer going, and, with some production controls next year, they ought to make it until increased exports and better prices return.

National Bank of Monticello, Monticello, Ill., C. N. Finson:

Farmers last year were in good shape. They are now getting $1.84 per bushel for corn, which is well below the cost of production. They are holding corn. Looks like another good production year and price won't come back because of large supply. There is no profit in it. Beginning to feel pressure on cash flow—operating costs, taxes, and cost of living. The farmers in the biggest bind are the ones who have made land purchases. Banks can refinance without much difficulty. Concern about the farm bill is the loan levels. Farmers feel they will be priced out of world market.

Farmers State Bank, Trimont, Minn., Leslie Peterson:

Beginning to run into increased problems with cash flow. Corn is selling at $1.78 to $1.80 per bushel. Farmers refuse to sell at $2.00 per bushel. Will have some problems handling 15 to 20 percent of farmers. I am concerned over farm bill deficiency payments and feel they are extremely important. Old allotments are out of date and need to be based on current planting and production levels. Farmers need to know what payments will be in order to plan ahead.

Farmers Elevator Co., Bondurant, Iowa, Norman Havel, manager:

We have given farmers the idea we need full production through statements from government officials and increased prices from increased exports.

Supply and demand is still the best process, but this year there is a good supply of grain throughout the world and this has resulted in decreased exports and depressed prices. Now we must cut production.

We're going to have some failures due to lack of moisture in Iowa, but there is no incentive to cut back production if the loan level is only $1.48 per bushel for corn.

If the loan level for corn can be increased to $2.00 per bushel as is provided in the Senate-passed bill, our farmers will be willing to cut production and take their chances on increased exports in the future. Most of our people are going to make it through this year, but it is going to be critical. We need this increased loan and reduced production in order to avoid a repeated and far more critical situation in 1978.

CONCLUSION

These comments are from the people most affected by declining grain prices. They deserve a better response to their problems than they are getting from the administration.

If the House and Senate farm bills go to conference with the low target levels now in the House bill for wheat, this Senator does not plan to accede to target levels below those now in the Senate bill. If this means a veto by the President, then he can explain to the farmers of America why he feels they should not recover their cost of production as he promised as a candidate for the office he now holds.

QUORUM CALL

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1977

The ACTING PRESIDENT pro tempore. Under the previous order the Senate will now resume consideration of S. 9, which will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes.

The Senate proceeded to consider the bill.

AMENDMENT NO. 507

The ACTING PRESIDENT pro tempore. The pending question is on the adoption of amendment No. 507, by the Senator from New Hampshire (Mr. DURKIN), on which there shall be 30 minutes of debate. The Senator from New Hampshire is recognized.

Mr. DURKIN. I thank the Chair. I do not think we thought up any new arguments overnight either for or against it, and if the other side is prepared to yield back their time at this time, I am prepared to yield back the time at this time and we can proceed to a vote.

Mr. JACKSON. Mr. President, I would strongly suggest that we proceed to vote. We discussed this at some length at the last hour, and I think most Members are ready to vote. I would hope the time would be yielded back, as suggested by the Senator from New Hampshire.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. ROBERT C. BYRD. I believe a great many Senators are on notice that a vote may occur as early as somewhere between 10 and 10:15, but I doubt that they are aware of the fact that a vote could occur at this point.

I wonder if we could use 6 or 8 minutes in the meantime, we can let our cloakrooms know and they can be alerting Senators' offices that the vote is about to occur.

Mr. JACKSON. Why not have an understanding, I would say to the majority leader, that we will yield back the time and the vote will start at 10 o'clock and, in the meantime, all Members will be advised. Committee meetings will be starting, and they will want to have that notice.

Mr. HANSEN. Well, I would not want to say how quickly. I do have a statement, Mr. President, I would like to make. I realize that because so few people are here in the Chamber to hear it there is a likelihood that the Durkin amendment may pass.

Mr. JACKSON. Well, the Senator is very modest, as always.

Mr. HANSEN. I always am. [Laughter.] I do not have a long statement, and I will be happy to do that.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield? I would suggest that our respective cloakrooms alert Senators' offices that a rollcall vote may occur at any time.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. JOHNSTON. Mr. President, will the Senator yield me a couple of minutes?

Mr. HANSEN. Yes.

Mr. DURKIN. Mr. President, this is on their time.

The ACTING PRESIDENT pro tempore. Yes.

Mr. JOHNSTON. I would like to ask the distinguished Senator from New Hampshire a couple of questions about this amendment. Is it not true this also has broad Government drilling both offshore and onshore in this amendment?

Mr. DURKIN. No; this is not as broad a drilling provision as the Senate adopted yesterday. The amendment says, among other things—

An independent estimate of total discovered reserves, including proved and indicated reserves, and undiscovered resources, including hypothetical and speculative resources, of natural gas and crude oil by fields and reservoirs based on, where necessary,

I think those words "where necessary" are very, very important.

geological and geophysical explorations carried out by Federal or other appropriate agencies.

So it does not contemplate the extent or the scope of drilling the Senate adopted yesterday in the amendment of the Senator from the State of Washington.

Mr. JOHNSTON. But it does contemplate Federal exploration, where necessary?

Mr. DURKIN. Not Federal exploration. I think you have to distinguish with respect to exploration. I think, quoting the Senator yesterday, he said the only way to know is to drill, and you never know——

Mr. JOHNSTON. I am not trying to argue it right now. I am just trying to find out. Did not the Senator use the word "exploration" just a minute ago?

Mr. DURKIN. No.

Mr. JOHNSTON. Exploration is not—the Federal Government may not explore under this amendment? Yea or nay, that is my question.

Mr. DURKIN. Well, I think if the Senator is asking the question he is going to have to give me time to answer it.

Mr. JOHNSTON. All right.

Mr. DURKIN. I am not sure which one of the three questions you want answered. We are not talking about exploration to the extent that the Senate adopted yesterday in the Jackson amendment, which I supported. This says the President shall have the authority, where necessary, to conduct geological and geophysical exploration for the purpose of ascertaining a true picture of the reserves for oil and natural gas onshore and offshore in this country.

Mr. JOHNSTON. I think that is my answer. There is Federal drilling, where necessary.

Who determines where necessary?

Mr. DURKIN. The President.

Mr. JOHNSTON. All right. It is onshore and offshore. So what we have in this amendment is a Federal drilling program. There is nothing in here, by the way, to indicate that this could be carried on by independent contractors, is there?

Mr. DURKIN. No; but it does not mandate it. It gives the President complete flexibility that he can use existing authority that is contained in the FTC, FEA, FPC, USGS, the Interior Department or he has the flexibility to contract it out as contemplated and set forth in the Jackson amendment yesterday.

Mr. JOHNSTON. Very well.

Mr. President, I hope the Senate realizes what the implications of this amendment are. We were told yesterday we needed a very small program of Federal drilling in order to tell in some instances what was on the Outer Continental Shelf.

Now we have a granddaddy amendment, a "Big Bertha" amendment of Federal drilling. We have now stripped away the pretense of going through inlimiting this Federal drilling to the Outer Continental Shelf, but it is anydependent contractors, and we are not where both onshore and offshore, a Federal drilling program.

I do not know how much money Congress wants to put up for this kind of program, but I can tell you we are talking about a multibillion-dollar program.

It seems to me that to replace the independent drillers, who drill over 90 percent of the wells onshore, by a Government oil company which this contemplates is absolutely insane, absolutely silly; at a time when we are trying to speed up and do something about the energy crisis, to form a Government oil company, I guess a Government oil company, or either just have the Interior Department do it directly is absolutely ridiculous.

We also have some information provisions in the act. Everyone is for information, but these provisions of this amendment were rejected by the committee on the Natural Gas Act, as I recall.

In any event, we have information legislation which ought to be considered in committee on its merits and not go into this kind of a broad legislation on the floor of the Senate.

Mr. President, this kind of legislation has not been considered by the committee in depth. To the extent that it has we have other legislation pending that ought to be able to work its way.

It just seems as though we are in an "Alice in Wonderland" atmosphere in the Senate in which the most successful independent energy-producing segment of industry in the world, the American oil companies, are being replaced, or we are laying the groundwork for replacing them, both independents and majors, by Federal endeavors.

I just cannot believe this Senate understands or understanding the depth and breadth of this amendment, the scope of it, the possible implications, would vote for it. I hope we will vote this amendment down, Mr. President.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. MELCHER addressed the Chair.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. MELCHER. Mr. President, will the Senator from Wyoming yield me 3 minutes?

Mr. HANSEN. Which side are you on?

Mr. MELCHER. You will find out if you will yield to me. [Laughter.]

Mr. HANSEN. I yield 3 minutes to my good friend from Montana.

Mr. MELCHER. Mr. President, I thank the Senator for yielding.

I have trouble with this section of this amendment that deals with the President, meaning somebody in Interior or somebody in another Federal agency, being involved with exploration wells onshore.

Collecting this kind of data is absolutely essential, but that data are collected by wildcatters, independents who go out and sink the drills and drill the well, hoping they are going to hit oil or gas. It is not an area that is overlooked. It is not an area that is neglected. It simply is an area that is being taken care of by independents now.

And this particular section on page 5 which has been referred to by the Senator from Louisiana disturbs me very greatly and I believe detracts from the amendment to the extent that I must vote against the amendment because it goes much beyond a collection of data. It gets into the position of actual wildcatting, that independents are doing now. Therefore, I regretfully must oppose the amendment.

Mr. HANSEN. Mr. President, I thank my good friend from Montana for his very astute observations. I yield myself what time I will require.

I point out that the basic premise of the amendment before us—that company reserves data are suspect—is fallacious. These data are in all cases verified by State regulatory agencies. We have heard recurring charges of reserves doctoring or production withholding by companies. However, study after study has refuted these charges.

An independent inventory by the Federal Government—besides being an enormous waste of taxpayers' money—would take years to accomplish, and require continual updating and revision, and require massive amounts of manpower grossly in excess of the present swollen Federal payroll.

With regard to the first point; the hundreds of thousands of wells in this country each require individual investigation if any reasonable reserve figures are to be arrived at. This is a constant vigil for the some 10,000 producers of oil and gas in this country. It would be literally an impossible task for the Federal Government. But taking only one look at a well is not enough. As any gas or oil well continues to produce, circumstances change and a little more information becomes available and estimates of proven recoverable reserves are revised.

They are sometimes revised upward, they are sometimes revised downward. But they are constantly being revised and corrected by the people who drill the wells, produce them, maintain and repair them, live and breathe with them. No Federal bureaucrat can possibly glean any more information from that well than the man who has worked with that well for all the years of its life.

The prodigious task of the Federal Government separately collecting all this voluminous data, and attempting to arrive at an independent determination of reserves and production potential, is frankly beyond my rather vivid imagination.

With regard to the second point, the manpower requirements of this amendment are, in my opinion, impossible to meet. The Federal Government does not presently have sufficient personnel with the expertise to make reserves and production determinations. There is frankly no way they can hire sufficient personnel. If they could, it would cost the taxpayer through the nose.

In summary, Mr. President, I will simply repeat that the study contemplated by this bill would require inordinate amounts of time, manpower, and money. This would be a genuine taxpayer ripoff.

Mr. JOHNSTON. Mr. President, will the Senator yield for a question?

Mr. HANSEN. I am happy to yield.

Mr. JOHNSTON. Does the Senator have any idea how much it will cost to do all this drilling on lands both offshore and onshore? Of course, this includes Government drilling on private lands as well, does it not?

Mr. HANSEN. Yes, it does. That is my understanding.

Mr. JOHNSTON. How many billions of dollars would it take to carry out that kind of program?

Mr. HANSEN. I suppose in order to give an accurate, informed answer to the Senator's question would in itself cost a slug of money. I do not think anyone knows now. I do not have the faintest notion that anyone in Government even knows what it would cost simply to try to provide that answer, and I would imagine that, if we were to ask GAO what it would cost them in order to gather the information together to make a responsible answer to the Senator's question, they would want a pretty sizable budget allowance just to try to put that information together.

Mr. JOHNSTON. Does the Senator not suppose that if the Department of the Interior had the mandate to do this drilling offshore and onshore on Federal and private lands, as this amendment requires, they would see this as a great challenge to being accepted with enthusiasm and to have the typical bureaucratic reaction which is to staff up for the job and to seek comparability of pay with private geologists?

Mr. HANSEN. My answer to that is a resounding yes. In the first place, I think having listened to the rhetoric in this Chamber and on the Hill for some several years and having heard repeated time after time, "we do not know what the facts are, all we want is the information," I can easily understand how enthusiastic some young eager beavers could be in trying to accept that challenge, and I suspect they would do precisely what the Senator from Louisiana anticipates. I think they would go out real gung ho determined to compile the information together in sufficient depth that it would be one whale of an undertaking and undergoing, too, that this country could ill afford to make, in the first place costwise and, second, would delay the overall operation interminably.

Mr. JOHNSTON. Does the Senator have an opinion as to the constitutionality of the Federal Government exploring on private lands without the consent of the owner?

Mr. HANSEN. I happen to think that that is a clear invasion of the rights of a private property owner. I think that it could be contended that it would be a taking. If I were involved I am certain that I would want to explore with a competent lawyer what the constitutional ramifications of such a proposed action would be. It would occur to me that if the Federal Government would presume to think that it can go, as this amendment would indeed direct it to do, as I understand it, on privately owned land and say, "We want to know what is down there and whether you give us permission or not does not matter, we are going to drill the wells," I should think that there would be lawsuits filed from one end of the country to the other.

Mr. JOHNSTON. Is it the history of Federal programs to start off on a modest basis and stay on the modest basis?

Mr. HANSEN. The Senator from Louisiana knows, as does everyone who is a student observing the national scene—and few have his competency I would add—nevertheless, the fact is invariably every little program that we began a long time ago, started out modestly and then once you bring a group of Government workers together and the program becomes surrounded by bureaucrats it grows and grows and grows just like Topsy, and I have no doubt at all but what we would find this to be precisely that kind of a small seedling that would encompass the whole United States if we are foolish enough to proceed with it.

Mr. JOHNSTON. Yesterday, the Jackson amendment, which was proffered to us, which was a very limited amendment, was going to be used only in very unusual circumstances and was protected by the so-called Stevens amendment which required a budgetary line item before the power could be used. There is no such limiting language in this amendment, is there?

Mr. HANSEN. I find none at all.

Mr. JOHNSTON. This money could be taken out of general appropriations, to the Interior Department, could it not?

Mr. HANSEN. In my opinion, that is precisely right.

Mr. JOHNSTON. And the chances are it will be for both to staff up and hire the geologists and the others to conduct such a program of drilling and conduct the drilling as well?

Mr. HANSEN. I am sorry. I was distracted.

Mr. JOHNSTON. I say that expenditure is likely to follow not only from the staffing up standpoint but from the standpoint of hiring the number of geologists and the other staff support necessary to conduct such a program of Government drilling but also from the standpoint of expenditures for the drilling itself.

Mr. HANSEN. That is my understanding.

Mr. JOHNSTON. What percent of the present wells drilled onshore are drilled by the majors? It is less than 10 percent, is it?

Mr. HANSEN. My understanding is that that is right. I do not have an updated figure on that, but I think that that figure is right in the ball park. Most of the wells that are drilled inland are not drilled by the majors.

Mr. JOHNSTON. They are drilled by independents?

Mr. HANSEN. That is right.

Mr. JOHNSTON. So that the power in this bill with respect to drilling onshore on public and private lands, to the extent that authority is used, is likely to supplant by a factor of about 90 percent the independents; in other words, it is Government in lieu of independents. We are not talking about Exxon now; we are talking about the small independent driller who drills most of the wells onshore at this time.

Mr. HANSEN. That is exactly right. And, of course, I think that in itself poses a real danger.

ADDITIONAL STATEMENTS SUBMITTED

Mr. JACKSON. Mr. President, I support Senator DURKIN's reserve-information-gathering amendment.

The disturbing question this amendment raises is why do we not yet know the true extent of our oil and gas reserves. Part of the reason is that debate has centered on the question of whether the Government actually has the authority to collect the data necessary to independently determine the status of reserves without having to rely on industry data—data which is understandably suspect as being self-serving.

It is now too late to postpone the vital energy policy decisions we must make shortly while we wait for a definitive study of our reserves. However, it is not too late to mandate the collection of this information so we may later refine or even alter the course of our energy policy to accord with the realities of our energy supplies.

At present Federal data-collection authority is spread unevenly and inconsistently over several agencies including the Federal Power Commission and the U.S. Geological Survey. The Department of Energy will consolidate many of these authorities. However, there are still serious questions about the overall power of any agency of the Federal Government to make the necessary inspections, drillings, and data verifications necessary to give the Government the ability to independently determine the true extent of our oil and natural gas reserves.

The amendment would authorize and direct the President to get this urgently needed information and to report it to Congress annually.

The bill leaves to Presidential discretion the manner in which information is to be gathered. The President need not duplicate existing efforts, but may, if he chooses, rely in part upon work now being performed under other provisions of law, provided he assures the accuracy, independence, and credibility of the energy information he reports annually to Congress.

Mr. President, this is an eminently reasonable amendment, especially in view of the continuing problem we have in having to rely on oil company figures. It is high time that the public had assurances that those figures are fact or fiction. I urge my colleagues to support Senator DURKIN's amendment.

Mr. MCINTYRE. Mr. President, I rise to support the amendment that is being offered by my friend and distinguished colleague and fellow New Hampshire Senator (Mr. DURKIN). We have only begun to emerge from decades of ignorance about our energy supplies. This experience should have taught us all by now that the public and the Government need accurate and untainted information about the Nation's supplies of oil and natural gas. And right now, we are not getting that kind of information.

All my colleagues from New England can certainly recall winters of fear such as that of 1966–67, when we had a mysterious shortage of home heating oil, followed by predictable increases in the price. It was not explained until some time later, after an investigation by the House Small Business Committee. It was then found that the major companies had substantially expanded their capacity to store oil at terminals along the Colonial Pipeline and the Plantation Pipeline which run north from Louisiana to the Northeast. They used that storage space to hold back the oil from the New York spot market until prices rose.

This information did us no good after the winter had passed.

And certainly all of my esteemed colleagues will recall the winter of 1973–74 and the confusing days of the Arab oil embargo. The newspapers were full of stories predicting a permanent world oil shortage. Everyone was afraid they were right, and the economy fell into its worst slump in more than a decade.

There were long lines at the gas pumps. Most people turned their thermostats down because they were genuinely afraid they would run out of heating oil. The oil companies were the only source of information we had—and they said we were in the middle of a terrible shortage.

So we complained, but not too much, when the price of oil continually rose. The oil companies said it was necessary, or we would run out.

We had no way to dispute what they said. The Federal Government got all its information from the oil companies—and still does. We had to take their word for it.

But to this day, no one has explained to my satisfaction why there were oil tankers waiting off the east coast, or why there was a glut of home heating oil in February of 1974, 3 weeks before the embargo ended.

During that time, the oil companies kept saying we had to do away with price controls or there would be a permanent shortage.

It has been 3 years since the embargo ended, and they are still singing the same tune.

And at the same time, the oil companies are trying to convince us that they know what is best for us. They are saying, "Just turn over your offshore reserves and we will find the oil for you." They do not want us to take the trouble of finding out how much oil lies in the public domain offshore, or how far down below the seabed the oil is, or how hard it is to extract. They want us to believe that the oil is expensive, scarce, and hard to find—so that we believe only big oil can find it, at a high price.

This debate over S. 9 reminds me very much about a debate we had 4 years ago, in the summer of 1973, over Alaskan oil. I stood here with the man who was then the distinguished Senator from Minnesota (Mr. MONDALE), who is now Vice President of the United States and President of this august body. We tried to convince our colleagues that the pipeline to carry Alaskan oil should be built through Canada, so that the oil could be used by the whole Nation.

We lost that debate because the major oil companies were the only ones who had any information about North Slope oil and about the oil needs of the west coast. They said all the oil would be needed there, and that they had no intention of shipping any oil to Japan. And they had reams of facts and figures to prove that all the oil would be used on the west coast. So, they said, a pipeline across Canada was needlessly expensive.

Well, lo and behold, 1977 rolls around, the pipeline is finished—at nearly 10 times the original cost estimates given to us by the oil companies—and all of a sudden, the west coast cannot use all the oil. And where do the oil companies want to send that oil but to Japan.

Thankfully, those of us who believe that some harm could result from increasing our imports while shipping off our Alaskan oil have gotten the point across to the administration.

But the debates over Alaskan oil, and this debate over the Outer Continental Shelf amendments, are clear examples of what happens when the Government sets public policy using statistics that private corporations develop for their own benefit.

Facts and figures are much like pets. They are very loyal to their owners. And that is why I am giving my full support to the amendment proposed by my distinguished New Hampshire colleague (Mr. DURKIN). I wish to compliment my colleague for having the courage to stand up and offer this amendment, and I urge this respected body to adopt the amendment.

All that the distinguished Senator (Mr. DURKIN) wants is to have the Government collect some facts and figures about our oil and natural gas supplies so that the people of the United States have some good, sound information to compare with the figures that the oil companies give us. Then, and only then, can we do a good job of deciding what steps we must take to solve our energy problems.

Mr. HANSEN. Mr. President, I would offer a couple of additional comments on Senator DURKIN's amendment.

First, no one opposes the general concept of supplying accurate, reliable OCS data to the Federal Government for energy policy decisions.

However, oil and gas companies are already heavily burdened by reserve report requirements. In fact at the present time there is in existence an "ad hoc interagency committee" which includes the following agencies with jurisdictional interests in oil and gas reserve and production data:

FPC, FEA, USGS, ERDA, FTC, SEC and GAO.

These agencies have recently reached agreements on how best to coordinate their data requirement and share such data in a manner which involves the least duplication of effort by reporting companies. I have a recent article discussing the suggestions of this committee. In view of this recent development I question the need for a new investigative effort at this time.

Furthermore, there has never been any evidence that the data presently supplied by industry is unreliable. In 1976 the FEA conducted a thorough evaluation of reserve data supplied by API and AGA. There were no significant differences between the estimates reached by FEA and those supplied by the industry.

However, beyond this general observation I would note two specific objectionable features which should be removed from this amendment.

First, in subsection (d)(2) on page 3, Senator DURKIN proposes to authorize Government exploration. This issue is, or was, the subject of an amendment by Senator JACKSON and need not be addressed here again.

Second, subsection (h) on page 5 attempts to bar future litigants who may contest the legalities of portions of this act from obtaining injunctive relief from a court. This represents an unnecessary and unacceptable incursion into the role of the judicial branch and I question the constitutionality of such a provision.

Both of these sections should be stricken from the amendments.

Mr. President, I ask unanimous consent that an excerpt from the report of the Ad Hoc Interagency Committee on the Oil and Gas Reserves Survey, entitled "A Plan for Collecting Oil and Natural Gas Reserves Data," published in the January 1977 edition of Statistical Reporter, be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The Federal Energy Administration (FEA) was required to do a "complete and independent" evaluation of U.S. oil and gas reserves for 1974. Their final report, published in October 1975, indicated that proved reserves estimates produced by API and AGA were in close agreement at the national level.

Oil reserves (billions of barrels): FEA, 38.0; industry, 34.2 (API).

Gas reserves (trillions of cubic feet): FEA, 240.2; industry, 233.2 (AGA).

These differences do not appear to be outside of the range of estimating error since reserves estimating is not an exact science—different experts will arrive at different estimates from the same basic data due to judgmental factors and the use of different but generally accepted methodology.

Mr. WILLIAMS. Mr. President, I would like to commend Senator JACKSON and his committee for continuing their efforts to complete a major and long overdue reform of the law governing the development of our Outer Continental Shelf's oil and natural gas reserves. I am certain the new statute will lead to a substantially improved and accelerated program because it recognizes the need to balance our economic and energy needs with our concern for the coastal environment.

Along the New Jersey coast, this means balancing the risks off-shore energy development pose to our coastal resorts with the potential benefits to our State's economic situation from an increase in both our own and the Nation's domestic energy supply. As much as I favor the rapid exploration of these oil and gas reserves, we cannot proceed without first assessing the State and local environmental impact and providing adequate safeguards.

The new statute provides precisely for this careful review and I strongly support it. I am similarly encouraged by the administration's equally strong support for OCS reform legislation, both on its merits and as part of an overall national energy policy. Needless to say, if these reforms had been adopted by the previous administration, the OCS leasing program would not today be bogged down in lawsuits, conflicts with States and other delays. If changes we had proposed in the last Congress were not scuttled at the last minute, I am confident we would now be exploring the mid-Atlantic shelf rather than awaiting the results of lengthy and costly court proceedings.

The present statute, passed more than two decades ago, does not come close to requiring the kind of review that is an absolute necessity today. We have unfortunately discovered in recent years that without a legislative mandate, the administration, specifically the Department of Interior, might willfully ignore the rights of coastal communities when ordering the leasing of OCS tracts. This has naturally alarmed residents of New Jersey's coastal towns, as well as millions of tourists, who fear offshore energy development might destroy the special character and lifestyle they cherish. Moreover, since many of these communities depend on tourism, many livelihoods might be lost were energy facilities constructed adjacent to or on the beaches.

The court action which has brought OCS leasing off New Jersey's coast to a halt came because of the previous administration's attitude toward OCS leasing. Today we are extremely fortunate in having an Interior Secretary who clearly understands the concerns of States and local communities. Secretary Andrus strongly favors this new statute, though I am sure he would act responsibly in administering OCS leasing without the changes. But we may not always be so lucky in having an Interior Secretary who seeks to avoid an adversary relationship with States and local communities; thus the amendments are necessary.

I believe the new statute will go far in correcting the inadequacies of the old law, which has clearly failed to insure rapid exploratory development of OCS resources. It has also failed to promote effective competition among oil companies, failed to balance adequately the non-energy resource values of the continental shelf and coastal zone with their potential energy values, and failed to guarantee compensation for all business and individual injuries suffered as an outgrowth of continental shelf exploration. The new law will recognize that the public treasury must receive full and fair value for the public's resources and that OCS development must fall within the context of a coherent national energy policy.

In recent years, continued confusion over the future direction of the Nation's OCS policy has created paralysis at a time when we need bold, positive action. The Nation has suffered a substantial loss of public confidence in the Federal Outer Continental Shelf management program. Secretary Andrus is working hard to restore the trust eroded by previous administrations, but the legislative reforms contained in S. 9 will insure rapid and permanent restoration of that trust. I therefore urge its swift approval.

(This concludes additional statements submitted.)

The PRESIDING OFFICER (Mr. ANDERSON). The time of the proponent has expired. The Senator from Washington has 12 minutes remaining.

Mr. JACKSON. Mr. President, I yield back the remainder of my time.

Mr. DURKIN. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from New Hampshire. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND) is necessarily absent.

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from New Jersey (Mr. CASE), the Senator from Missouri (Mr. DANFORTH), the Senator from Michigan (Mr. GRIFFIN), and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

I further announce that, if present and voting, the Senator from New Jersey (Mr. CASE) would vote "yea."

The result was announced—yeas 54, nays 39, as follows:

[Rollcall Vote No. 287 Leg.]

YEAS—54

Abourezk	Gravel	Muskie
Anderson	Hart	Nelson
Bayh	Haskell	Nunn
Biden	Hathaway	Pell
Brooke	Hollings	Proxmire
Bumpers	Humphrey	Randolph
Byrd, Robert C.	Inouye	Ribicoff
Cannon	Jackson	Riegle
Chafee	Kennedy	Roth
Chiles	Leahy	Sarbanes
Church	Magnuson	Sasser
Clark	Matsunaga	Schweiker
Cranston	McGovern	Stafford
Culver	McIntyre	Stevenson
DeConcini	Metcalf	Stone
Durkin	Metzenbaum	Talmadge
Eagleton	Morgan	Williams
Glenn	Moynihan	Zorinsky

NAYS—39

Allen	Hatch	Packwood
Baker	Hatfield	Pearson
Bartlett	Hayakawa	Percy
Bentsen	Heinz	Schmitt
Burdick	Helms	Sparkman
Byrd, Harry F., Jr.	Huddleston	Stennis
Curtis	Javits	Stevens
Dole	Johnston	Thurmond
Domenici	Laxalt	Tower
Ford	Long	Wallop
Garn	Lugar	Weicker
Goldwater	McClellan	Young
Hansen	McClure	
	Melcher	

NOT VOTING—7

Bellmon	Eastland	Scott
Case	Griffin	
Danforth	Mathias	

So Mr. DURKIN's amendment was agreed to.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURKIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 506

Mr. METZENBAUM. Mr. President, I call up amendment No. 506.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM), for himself, Mr. WEICKER, Mr. JACKSON, Mr. HOLLINGS, Mr. KENNEDY, Mr. DECONCINI, Mr. RANDOLPH, Mr. BAYH, and Mr. LEAHY proposes amendment No. 506.

On page 156, line 19, strike out "66⅔" and insert in lieu thereof "50".

Mr. THURMOND. Mr. President, will the Senator yield to me about 3 seconds?

Mr. METZENBAUM. Yes.

Mr. THURMOND. I ask unanimous consent that Mr. Robert Lyon of my staff be accorded the privilege of the floor during consideration and vote on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, this amendment would reduce the amount of cash bonus bids that would be permitted under the law from 66⅔ percent to a maximum of 50 percent. The amendment might appropriately be called the "free enterprise amendment," because the issue this amendment addresses is whether or not Congress believes that all of the leases on the Outer Continental Shelf should continue to be awarded to the large oil companies, or whether we want to make it possible to use the six alternative bidding procedures provided in the legislation to encourage independent companies to compete for leases.

Very recently, the staff of the Committe on Energy and Natural Resources did an analysis of what has transpired in the past when cash bonus bidding was used. This analysis compared lease sale No. 40, the recent mid-Atlantic sale in which cash bonus bidding was used and lease sale No. 36, the only sale ever to use royalty bidding. In both instances, it was quite evident that the majors dominate under the cash bonus bidding procedure.

In lease sale No. 40, all 20 of the 20 highest bid tracts were awarded to major oil companies. One company, Exxon, took five of the top 20 tracts and 33 of the 93 tracts sold—more than a third. The companies provided cash bonus bids totaling $1.13 billion, of which 30 percent came from Exxon alone.

It is obvious that when we are talking about dollar amounts as large as these, very few corporations in this Nation are in a position to bid. Most companies do not have the resources to compete. Of the few that do, those which have an interest in competing are the major oil companies.

Mr. RANDOLPH. Mr. President, will my colleague yield?

Mr. METZENBAUM. I yield to the Senator from West Virginia.

Mr. RANDOLPH. I am gratified at the opportunity to share with him cosponsorship, under his leadership, of this amendment. I think that is very important. The only reason I asked the Senator to yield to me now is that I must leave the Chamber for some other work.

I think it is important for us to realize that now, as we talk about giving the independents an opportunity for bidding—that is really what it is. They now, in effect, are shut off from that opportunity. We are not in anywise saying that those companies that are majors are not being given the opportunity to bid.

Is that correct?

Mr. METZENBAUM. The Senator from West Virginia is, as usual, 100 percent correct. Everyone can bid. The point is only to limit the cash bonus bidding system because this system is weighted so heavily in favor of the major oil companies. The Senator is 100 percent accurate.

Mr. RANDOLPH. I think that the equity that is apparent to me, and I think it is the thrust of this amendment, should appeal to the membership of the Senate.

Mr. METZENBAUM. I hope that it does, and I very much appreciate cosponsorship of this amendment by the Senator from West Virginia.

This truly is an amendment that has to do with fairness. It has to do with equity. It has to do with a reasonable approach to the entire question of what we are going to do with these great reserves that sit in the Outer Continental Shelf. Are we going to say that there are just a few companies in this country that have the capacity, the ability, and the will to find the oil that we need so badly? I cannot believe that the Senate believes that. I cannot believe that the people of this Nation want that. I truly question whether or not the major oil companies, themselves, would not recognize the fairness of trying to open the door so that they, as well as others, may have an opportunity to bid on a fair basis with all of the other companies.

In lease sale No. 36, which was conducted in October of 1974, all of the tracts went to the smaller firms: Why? Because, in that lease sale, royalty bidding was permitted. At that time the independent companies said to the Government:

> We are not going to raise millions of dollars in advance and put it in the Federal Treasury. Rather we want to use our dollars for the purpose of drilling. We are willing, if you give us that opportunity, to pay the Government a far greater percentage of the amount of oil and gas we produce than the Government would otherwise receive from the oil and gas produced in those tracts under cash bonus bedding arrangements.

As a consequence, the Government received bids ranging from 51 percent to 78 percent in lease sale No. 36.

Husky Oil Co. was one of the winning bidders in lease sale No. 36, and I might say that Husky Oil Co. is not, itself, a small company. It is a company with vast resources, very substantial income, a company that has done an excellent job. But in communication with the Chairman of the Committee on Energy and Natural Resources, Husky Oil has recommended that a new Outer Continental Shelf bidding system should have, as its prime objective, the largest possible commitment of companies and drilling activity to secure more oil and gas reserves for our Nation.

Husky Oil officials have testified that, in some instances, their company was not in a position to bid because of the cash bonus bidding procedures. As Husky stated in a letter to the Chairman:

> Each time we have removed ourselves from the competition, simply because we lacked the finances required for a high bonus bid, plus the funds necessary to begin an active high-cost drilling program.

Mr. President, I ask unanimous consent a copy of this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

HUSKY OIL CO.,
Washington, D.C., March 4, 1977.

Hon. HENRY M. JACKSON,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR JACKSON: Over the years Husky has repeatedly evaluated the economics of bidding in the OCS. Each time we have removed ourselves from the competition, simply because we lacked the finances required for a high bonus bid, plus the funds necessary to begin an active high-cost drilling program. It wasn't until 1975 that the Department of the Interior permitted limited royalty bidding that Husky competed for OCS leases. We were successful, not only in receiving a bid award, but also in making a commercial gas discovery on that lease, for which a platform is now being constructed.

Some of the alternative bidding systems currently proposed would be helpful to the modest-sized domestic companies. Others would not. Husky favors the following:

1. A work commitment coupled with a net profits interest. (See our testimony dated June 25, 1974 on this subject, copy enclosed.)

2. Royalty bidding with a sliding scale provision on production that would avoid premature well abandonments.

3. A combination royalty and cash bonus system that will result in a fixed low cash bonus with the emphasis on royalty payments, thus permitting the successful bidders to use their cash resources for actual drilling.

The OCS bidding system should have as its prime objective the largest possible commitment of companies and drilling activity to secure more oil and gas reserves for our nation. This is best accomplished by encouraging more companies to bid competitively and to use their financial resources in drilling as many wells as possible, which after all is the only way of discovering oil and gas. This is contrasted with the present policy of high bonus cash bids which discourages some companies from considering the OCS, and places bonus funds in the U.S. Treasury rather than in the search for new oil and gas reserves.

To the extent that risks can be spread through joint bidding, companies should be allowed to do so, regardless of size. The present practice does not reduce competition. It does permit companies the freedom of enlarging their exploration exposure by taking a lesser percent interest in more activity within their exploratory budget capabilities. Such joint venture enterprises have long been recognized in our free enterprise system, and should be allowed.

If we can furnish additional information on this matter, we would be pleased if you would call on us.

Yours very truly,

M. DALE ENSIGN,
Vice President.

Mr. President, there was another house sale, a third one, held more recently than those in 1974 and 1976 to which I have referred. The most recent lease sale took place in June of 1977 for Gulf of Mexico tracts. The cash bonus bidding procedure was again used and the high bids came to $1,210 million for 152 tracts. Who was the major bidder? Who won the greatest number of tracts? Gulf Oil, one of the largest companies in the world, one of the Seven Sisters was the most successful.

Gulf was the high bidder on 13 tracts for a total of $349 million. And who were the other successful bidders? Other major winners were Exxon, Atlantic Richfield, and Shell.

Now, look at the amounts they had to come up with. Those figures speak for themselves, indicating that the independents are not in a position, in spite of their reasonably successful operations in a free enterprise system, to be able to successfully compete for the Outer Continental Shelf tracts.

Exxon was awarded 9 tracts for $88 million. Arco was the high bidder, alone or with others, on bids totaling $83.5 million. Shell won 12 tracts for over $100 million.

In every study that has been made of this subject, whether by the committee staff or by some other group, it has been evident that bidding on a cash bonus bid basis plays into the hands of the majors and that if bidding is on a royalty basis, it gives the free enterprise system a chance to work.

Mr. JOHNSTON. Will the Senator yield?

Mr. METZENBAUM. For a question, without losing my right to the floor.

Mr. JOHNSTON. Yes.

I am wondering how much money was put in the budget estimates for bonus bidding and how much the Senator's amendment, if we went up at least to 50 percent, would take away from that bonus revenue, and whether that has been taken into account by the Budget Committee in those targets.

In other words, whether this would bust the budget in terms of targets.

Mr. METZENBAUM. I do not know the answer to that. But I say to the distinguished Senator from Louisiana that if we were to have an initial loss by reason of that fact, I feel totally confident that it would be a one-time loss to the Federal Treasury and that over a longer period of time, the Federal Treasury would gain very substantially by reason of increased revenues because of the use of royalty bidding, and of the other kinds of procedures provided for under this bill.

Mr. JOHNSTON. By one-time losses, the Senator does not mean a 1-year loss. Actually, the leadtime is in many instances 5 to 8 years in getting the production, so that it would be a one-time loss stretching over every year, over a period of 5 to 8 years, would it not?

Mr. METZENBAUM. I do not think I agree with the Senator from Louisiana on that score.

It would be a one-time loss if the Office of Management and Budget had provided an anticipated amount of return by reason of the bonus bids.

In future years, we would not lose anything because by that time, they would understand that we were going to be using other kinds of bidding, rather than cash bonus bidding. The only loss would be in the year the bids were taken when the bonuses would not be paid.

Mr. JOHNSTON. When the Senator says, "a loss," he means we would have to lower the budget estimates for next year, but for every year after that, those estimates would automatically be smaller, but that would not be a loss because it would be an anticipated loss.

Mr. METZENBAUM. No, I do not mean that. I mean we would have a one-time loss because of failure to obtain the bonus in the year of the bid. But once drilling

started and the wells began to produce, there would actually be a gain, as I see it, and I believe the facts would confirm my projections in that area. In the future the budget would actually gain because new bidding systems would generate additional revenues.

Mr. JOHNSTON. When the Senator says, "a one-time loss," he means per lease. But in terms of the budgetary impact, there will be a loss in fiscal year 1978, fiscal year 1979, fiscal year 1980, fiscal year 1981, and fiscal year 1982, and hopefully, if this works, then along about fiscal year 1983, fiscal year 1984, and fiscal year 1985, we will realize, if the Senator's theory is correct, more revenue at that time, is that correct?

Mr. METZENBAUM. If it takes that long in order to have the oil come on stream. I do not believe it would take that long, although I would yield to the Senator from Louisiana's greater expertise in the area of oil, since there is so much done offshore in his area. But in my opinion, when a loss would occur only if receipts of this kind were anticipated in the budget.

I have not been informed by the administration that they have any concern whatsoever with respect to any anticipated diminution of income due to the failure to have this income from bonus bidding.

I do not believe that is considered a part of the budget on an annual basis. But if the Senator from Louisiana knows that is the fact, I would appreciate being informed.

Is it the fact, as the Senator understands it, that they anticipate certain income in the budget from bonus bidding?

Mr. JOHNSTON. Yes, bonus revenues are included. I cannot say what that figure is. I will attempt to get it. I was wondering whether this had been checked.

I do not know of any opposition from the administration, but as far as that goes, I do not know of any knowledge by the administration of this factor.

Mr. METZENBAUM. I am pleased to tell the Senator from Louisiana that I have spoken with someone from the administration today with respect to this amendment and have been advised the administration is sympathetic to the amendment and is going in this direction. The administration feels that a lower level of bonus bidding will work out to the administration's benefit and to the country's benefit in the long run.

Mr. JOHNSTON. I see.

Mr. METZENBAUM. A Congressional Research Service study done in January 1976 documented a high degree of concentration in Outer Continental Shelf lease ownership. That concentration developed because of cash bonus bidding.

Nine of the 10 top owners of OCS leases are also among the top 10 oil producers.

Continental Oil is not one of the top 10 oil producers. It falls all the way down to No. 13 in that category, but it is one of those top 10 on the Outer Continental Shelf. These 10 firms—Chevron, Texaco, Exxon, Shell, Union, Arco, Gulf, Continental, Mobile, and Amoco—hold 62 percent of the Outer Continental Shelf acreage that has been leased. Six of those firms: Shell, Texaco, Gulf, Exxon, Chevron, and Continental, account for 70 percent of the offshore oil production.

I believe that this is the kind of amendment that those of us who believe in, and who have been products of, the free enterprise system, should support. This amendment is based on the belief that everybody ought to have an opportunity in this system, I believe that this amendment gives fair and equitable treatment to all.

This is not to say, as the distinguished Senator from West Virginia pointed out, that the largest companies will be precluded from bidding. This is not to suggest that merely because a company has volume or assets or net worth at a certain figure, that it cannot compete.

All this amendment says is that the Federal Government shall not use an inequitable form of bidding, one that favors the largest firms, in more than 50 percent of the cases.

I think, Mr. President, that this amendment should be supported by every Member of the Senate who believes in free competition.

Mr. HANSEN. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. HANSEN. Mr. President, in the first place, I do not yield to the Senator from Ohio in opposing him by implying that I am not a believer in the free enterprise system.

As a matter of fact, I happen to be. Maybe I would not measure up according to the definition that some Members of the Senate might wish to place upon a free enterpriser. But, so far as I am concerned, I think there is great virtue in that system; and it is precisely because of my belief in that system that I oppose this amendment.

Let us look at the spokesmen for the small independents. Let us examine what they say. What do they say?

Small companies and independents, with regard to the kind of competition that the Senator from Ohio is talking about, cannot afford to operate offshore exploration and production activities. They are presently participating as fully as they wish and have every opportunity to increase their participation in the future as they may desire.

Both the Domestic Petroleum Council—and Husky Oil is a member of that council—representing small and independent sized oil and gas companies, and the Independent Petroleum Association of America, representing more than 4,500 independent producers, endorse the present law and adamantly maintain that the present law assures them as much participation in offshore activities as they can handle.

The bidding system that has been advocated here by a number of people, including the Senator from Ohio—it is one of the systems—is the variable royalty system. Do Senators know how that system works? Let me explain. This is the system I would like to see more greatly utilized through the adoption of this amendment.

Increased use of the variable royalty provision will not increase participation by small and independent sized companies. It may increase participation if by participation all you mean is being able to make a bid. But let me tell Senators what is going to happen.

It will open the door for the large natural gas pipeline companies to go out on the Outer Continental Shelf and bid astronomical royalty percentage levels—70 percent, 80 percent, 90 percent; yes, even greater than a hundred percent, as Senator LONG mentioned yesterday.

How could they do this? How could anyone possibly bid in excess of 100 percent royalty? Well, it just happens that the interstate gas pipelines, being public utilities, have the assurance in the operation of those pipelines that they are guaranteed a profit on the use of those pipelines. So all they have to do is to put the natural gas that they might find into the pipeline, go to the respective public service commissions in the States, to the Interstate Commerce Commission, to the Federal Power Commission, and says, "Here is what the gas is costing us, and here is what we have to receive from the ultimate consumer in order to be guaranteed the 10 percent or 15 percent profit," or whatever it is that the regulatory authorities deem they are deserving of receiving.

So it really does not matter to them what the gas is going to cost them, so long as it can be put into the system and the rates that they will be able to charge the final user will be determined by including a certain percentage of profit. That is the way it works. That is why the users of natural gas in America—and that includes most Americans—have a very real interest in trying to increase the domestic supply of natural gas. If only half as much gas is put through that system as might have been flowing through it in the year previous, the gas pipeline companies are not going to lose money. All they have to do is to go to the regulatory commission and say, "give us this as the amount we can charge for the gas we sell in order to guarantee that the profit we are entitled to will be made."

Anyone without very much mathematical background can easily understand precisely what that means.

So the Senator from Louisiana (Mr. LONG) was right yesterday, when he said that if we embark on this kind of system, let us understand what we are doing. If anyone thinks that that is going to guarantee cheaper gas by increasing participation among people who are able to bid on a royalty basis, it sounds great—and that is what this amendment by the Senator from Ohio proposes to do. It proposes to set aside 50 percent of all the land that will be under the administration of the Secretary of the Interior, to say that it can be bid for on a basis different from a cash bonus bid basis. It sounds great, but it is the greatest ripoff of the American public that we will ever see.

Although this amendment may be adopted—I realize that there are not all that many people around here listening to the debate—if this goes through and if 50 percent of the land that would be eligible for leasing under the old system,

which has been working so well, should be set aside and this means of bidding has become a fact, then I think there may be some good questions that the public will be asking Members of Congress later on.

They will want to know why we changed a workable system that was delivering good results for one that results in an inordinate escalation of their natural gas expenses.

I am pleased that the distinguished senior Senator from Louisiana is on the floor, because I have tried to make, in what I fear is a rather ineffective way, the extremely perceptive point he made last night. Let us not fool ourselves in thinking that this is going to be in the public interest. It will not be in the public interest at all. The old system that has been used historically in this country when the Government has business to do has been to go out and call for bids on the business.

Of course, I cannot go out and drill on the Outer Continental Shelf. Those wells probably cost an average of $10 million, and they are pretty expensive.

I spoke last night about the Destin tract, a tract that sold for $1.4 billion, when you add together all the bids that were taken by the Federal Government on those tracts. This is the point that the junior Senator from Louisiana impliedly referred to, when he spoke about the revenues that would come to the Federal Government as a consequence of the bonus bids on the Outer Continental Shelf. It has a very real budget impact.

Eighty-six cents out of every dollar that has been produced on the Outer Continental Shelf has gone back into the Federal Treasury. Only 14 cents out of every dollar has gone to the oil companies.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. HANSEN. I am happy to yield to the Senator from Louisiana.

Mr. LONG. If we are going to make any headway toward solving the energy problem, our best hope, all things considered, would be to get some additional production from that area that lies under the Atlantic Ocean under the Gulf of Mexico and under the Gulf of Alaska. That area probably includes about as much land as the Government owns elsewhere, and only 1.5 percent of it has been subject to development.

We have here a bill to impede production of oil in the areas where we are most likely to find some. It is a bill to impede production of gas in the areas from which we are most likely to obtain some gas. We have already passed a bill to impede the production of coal in the areas where we are most likely to get some coal.

So if we think in terms of what we can do to make the energy crisis worse, Congress is moving steadily in that direction. It is passing bills to reduce the production of coal; it is passing bills to reduce the production of oil; it is passing bills to reduce the production of gas. The people wonder whether we are crazy. What is our excuse for this?

It would seem to me that when we had a Republican President in the White House there might have been some wisdom in our mischief because at that point when we were passing these bills to put more and more stumbling blocks in the way of production of energy which the Nation desperately needed, the Democrats could pretty well count on the fact that the Republican administration would get credit for it because it happened while a Republican occupied the White House.

But what is our excuse now? We now have a Democratic majority in the Congress, and one would think we would like to keep it that way. One would think we would like to keep a Democrat in the White House.

Can the Senator tell me what logic there is in passing more bills to make it more difficult to produce energy in this country?

Mr. HANSEN. I would have to respond to my good friend from Louisiana the logic, if there is any in it, totally escapes me.

I compliment him for his understanding in depth of problems that surround trying to produce adequate energy for this country. I do not know any reason at all.

I did want to make one additional point that I had not made. I spoke about this Destin tract that sold for $1.4 billion. Anyone can go down there and lease land there now. Do you know why? Because oil companies drilled 14 dry holes down there.

They had about all of that pleasure they could enjoy, and a little bit more than they could stand, and they turned it back to the Government, $1.4 billion—they abandoned all of the leases because they do not want any more of that kind of pleasurable experience.

Mr. LONG. Mr. President, will the Senator yield at that point? Is the Senator aware of the fact that from under the waters beyond the State's 3-mile limit the oil companies have not made anything? I am talking about the oil companies as a group. They have put billions of dollars into it bidding on leases and exploring and drilling for oil and have found a lot of oil, but they do not have their money back. They are behind by literally billions of dollars, and yet one would think that that is some enormous bonanza out there.

If and when they ever do get their money back out of it, when they get out of the red and into the black, the Government will be collecting 48 cents out of the dollar in taxes.

Would you not think that would be an incentive for someone to permit them to make a profit out of all of this?

Mr. HANSEN. I would think so.

I yield to my good friend, the junior Senator from Louisiana.

Mr. JOHNSTON. I have a perfecting amendment or perhaps a substitute for this amendment. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. MORGAN). Until the time has expired this amendment to the amendment is not in order.

Mr. JOHNSTON. I see.

I wonder if the Senator from Ohio, the sponsor of the amendment, would just as soon have it considered at this time? I am not trying to—I will not be long in discussing. It is a very simple amendment.

Mr. METZENBAUM. Quite the opposite of it being a simple amendment, as I read the Senator's amendment it totally vitiates my amendment, so I must object to it being considered until the time has elapsed. I would be happy to consider it later.

Mr. JOHNSTON. Very well.

Mr. President, will the Senator yield me some time?

Mr. HANSEN. Yes.

Mr. JOHNSTON. Mr. President, my good friend, who is the sponsor of this amendment, has been very assiduous in his attendance of meetings. He has probably been there more than most Senators on the Energy Committee, so I imply no criticism at all when I say when we considered royalty bidding in the Energy Committee I happened to have been the only one there, the staff and I, and after hearing all the evidence the staff made its recommendations as they do on most of these bills, and the staff recommended not only that we not go with this amendment but that we eliminate royalty bidding altogether.

The staff, believe me, Mr. President, is not a captive of big oil, but the staff just happened to listen, as I listened, to the evidence.

If any fair person will listen to this evidence, he will see this is not a question of the little man trying to put Mom and Pop offshore into business, but this is a question of what is the best way to manage the Government's resources to produce the most oil and get the most money out of it.

I think it is not arguable, and if anyone cares to listen—and, Mr. President, I wish I had more eloquence to get more people to listen—but as I see these votes come about today I feel, as I said a moment ago, like we are Alice in Wonderland. We just authorized the Federal Government directly, not through subcontractors, to get into the drilling business onshore, offshore, private lands, public lands, the whole schmear, and it passed here by a 60 percent vote. So I am not so sure that the people really listen on the floor of the Senate.

But let me tell you, for those who do care, what the evidence indicates. First of all, the Federal Government is going to lose a lot of money on next year's budget. I do not know what that figure is. I am sending staff out now to check on it. I know we got over $1 billion in bonuses on the Destin Dome.

If this amendment were in operation on the Destin Dome, we would have lost at least half, maybe the whole amount, of that $1 billion.

I know we bid Lease Sale 40 out in the Atlantic at $1.4 billion. That would be at least half or at least all of that which would be gone. So I do not know what the budgetary impact is, but I can tell you we do have an estimate for next year as to that budgetary impact. I am informed that last year it was $1.4 billion. This year so far it is $2.7 billion. Staff just handed me that.

I do not know what the estimate is for next year, but I hope Mr. MUSKIE can respond. You are talking about losing at

least half of that $2.7 billion. I do not know what program we are going to take it out of, but I hope this Congress is ready to pare next year's budget by at least $1.3 billion if it is based on the same figures as this year.

Now, what were the other arguments about this royalty bidding? At first, premature abandonment. We have tried royalty bidding before. The Interior Department has tried it. They have authority. Do you know what they found? They found it did not help the independents.

We hear about the shedding of crocodile tears for the independents on the floor of the Senate. The independents testified in our committee, and do you know what they said? They said "We do not want it. Do not do it for our benefit." And yet this is the free enterprise amendment, that these independents want to be helped.

We found that you had premature abandonments in this sort of situation where, for example, you have a bonus bid of 80 percent, as we had in the experiment that the Interior Department conducted, and then when you have to pay out 80 percent of every dollar that comes off every barrel of oil you produce, what do you find? Very quickly you pass that point at which it is no longer economical to produce the oil.

Mr. METZENBAUM. Mr. President, will the Senator from Louisiana yield at this point for a question?

Mr. JOHNSTON. Not at this point, but I will in a moment.

But more important than the premature abandonment, because there are provisions in law where you can readjust that royalty, the most serious part about this amendment, in my view, is the decision not to develop.

It is a mathematical formula that is really very simple, and let me explain it to you. If you assume that you have a royalty bid of 80 percent, and an 80 percent royalty bid is precisely what we had in Interior's experiment, then it means that the value of the oil in the ground must exceed your expenses by that same ratio in order to be able to make that decision to drill.

What does this mean? Let us say you have $100 million worth of oil in the ground. You went out and explored and you found $100 million worth of oil. You know it is there, but you have to have one of these rigs to drill in a thousand feet of water, and that costs you $50 million, so your expenses are $50 million. You have $100 million worth of oil in the ground.

Now, under the present situation where you put up your bonus on the front end that money is gone, you cannot recover that. But thereafter, all you have to pay the Federal Government is one-sixth of the rest, so you can develop that $100 million worth of oil in that kind of situation.

But if you have to pay the Federal Government 80 percent, you did not pay them anything to begin with, but if you have to pay them 80 percent of all the rest, then it is not economical to order that rig, to invest $50 million to develop it, because if you put up your $50 million to develop and you only get $20 million of the remaining $100 million, then you have gone in the hole as far as developing that tract.

Now admittedly that situation happens only when you find oil and you find it in less quantities than you had hoped for. Mr. President, that is not an unusual thing. That frequently happens. When it does happen, the Federal Government, the people, the taxpayer, the consumer, is going to be the one to lose the oil.

Mr. HANSEN. If the Senator from Louisiana will yield for an observation, let me state, Mr. President, that it seems to me also that this particular amendment encourages speculation by people who can bid a high royalty bid and not do a thing about it because they do not have to pay the royality until the oil is actually produced. It discourages development, as the Senator is pointing out, for this reason.

The successful bidder can sit on the tract, let tracts around it be developed, and then when they are developed, if they are successful, he will not have to do a single thing. He can rip off the Government, disposing of his lease, at a higher price than might otherwise have been anticipated without having put up very much more money. Is that not the situation?

Mr. METZENBAUM. Mr. President, will the Senator from Wyoming yield?

Mr. HANSEN. No. I am asking the Senator from Louisiana if that is not the situation.

Mr. JOHNSTON. That was my next point.

Mr. HANSEN. I beg the Senator's pardon.

Mr. JOHNSTON. I am glad the Senator brought it up because this was testified about. The answer to this is, and I am going to yield in just a moment to the Senator from Ohio, but I will anticipate the answer, that is, he will say it is possible to have a work commitment. The problem of work commitments is that work commitments are by necessity small in percentage to the cost, because exploration is small in relation to the percentage of bonus bids. For example, on the Destin Dome they spent over a billion dollars on bonuses but only a couple hundred million dollars on the actual exploration, and that kind of ratio of about 20 percent is not unusual at all.

So, there is just no way that you can devise a work commitment that is sufficient in size and in scope to insure that you are going to have enough drilling done and if you make your work commitment too big you are going to scare away these independents for whose benefit this amendment is allegedly contrived.

Finally, let me say that this amendment brings up that problem of rolled in pricing on natural gas. Where you have a company that can sell its natural gas to the customer and can pass along whatever its expenses are to customers and then make a profit on top of that, as you can with these interstate gas companies, then he can bid 100 percent because whatever he bids if he finds gas out there he can simply pass it along to his customers on the rolled in pricing.

Let me say I would like very much to be able to solve that problem of rolled in pricing as opposed to incremental pricing. In last year's Pearson-Bentsen amendment we attempted to do that, but it is not an easy problem to solve because you cannot regulate the price to the customer when these interstate pipelines pass over a State border and are connected in what we call the Henshaw lines. We have tried to get at that problem and we just have not come up with the legislative formula so far to be able to do it.

So all I can tell Senators is that after considering all this testimony in the committee the staff, who as I say is not working for Exxon, recommended against this royalty bidding. I was the only one there. It was clear to me, and I do not expect you to accept my word for it. But I would just like an answer to these questions particularly the one about what do you do about that decision not to develop. In other words, you find oil out there, it is in commercial quantities, it is in large quantities, but you bid so much that it is not worthwhile to develop it. I just think it is clear. You can say this is for the benefit of the independents, free enterprise, and for the flag, motherhood, and all that, but I can tell you Senators the evidence does not support it. The independents do not support this, and I do not think the interest of the American people is supported by this amendment either.

Mr. METZENBAUM. Mr. President, will the Senator from Louisiana yield?

Mr. JOHNSTON. I yield.

Mr. HANSEN. Mr. President, I want to hear, as I know the Senator from Louisiana does, but we have a limited amount of time remaining. Would the Senator mind speaking on his own time?

Mr. METZENBAUM. I thought this would be charged to my own time.

The Senator talked about the independents being opposed to this. Was there not testimony from Ford Graham, a Louisiana independent, testifying that he would prefer any system that let him put his money up front into the ground rather than the bonus system, which is what is permitted under this law as it came out of committee?

Mr. JOHNSTON. No, he did not. I was there when Mr. Graham testified. He is from Louisiana. I know him well. What he said is this, that they like the present system. He is going to live under whatever system you have, and if the Senator will check the transcript, he will find that he said this. He said he is going to live under whatever they do. He said he does not think it is in the national interest. But if you come up with work commitment or bonus bidding or whatever, he and his company are going to be out there bidding.

Mr. METZENBAUM. What is in the national interest? He said he did not think bonus bidding was in the national interest. Is that what the Senator is saying?

Mr. JOHNSTON. No.

Mr. METZENBAUM. What is the Senator saying he said was not in the national interest?

Mr. JOHNSTON. Let me check the transcript. He said not in the national interest.

Mr. METZENBAUM. Do we have the transcript available with respect to Mr. Graham's testimony?

Mr. JOHNSTON. No, but I recall very well.

Mr. METZENBAUM. If we could obtain it.

Mr. JOHNSTON. Mr. Graham was not for royalty bidding. I can stand to be corrected. I can find it.

Mr. METZENBAUM. I did not say he was. I said I think he indicated he was not for bonus bidding, that he would like to invest his money into the drilling operation, putting it up front, as he stated it.

I think it is important that the Senate understand that the Senator from Wyoming and the Senator from Louisiana have both been talking about this horrendous idea of abandonment. What are we going to do when a fellow bids a high royalty and then walks away from the bid? Let me point out to the Senator that at the instance of Senator BARTLETT, I recognized this when in committee and suggested an important modification in royalty bidding procedure. It was Senator BARTLETT who talked to us in the committee about work commitment, and it was I who offered an amendment to add a work commitment to the royalty bidding provision to see to it that the problem the two Senators have been talking about cannot arise.

Mr. JOHNSTON. Will the Senator yield?

Mr. METZENBAUM. One moment. And when we talk about what the staff recommendation was, the staff recommendation took place before we had changed the language with respect to royalty bidding. What we now say on royalty bidding is the following:

Variable royalty bid based on a percentum of amount or value of the production saved, removed or sold.

But then there is something else. Something else is in this legislation now that was not in it when the staff made its recommendation, and something else that I believe the distinguished Senator from Wyoming and the distinguished Senator from Louisiana have forgotten about. And that is that we added a provision saying one of two things. With either a fixed work commitment based on dollar amount for exploration, which could be an amount of $300,000 or $1 million or $5 million, as much as you are prepared to put in the ground, which would be set by the Secretary of the Interior based upon his own analysis of how much it would need. Or if that would not be sufficient to protect the interests of the United States, the Secretary of the Interior may provide for a fixed cash bonus in order to see to it that you could not abandon a proposal once you had moved forward on it.

Mr. JOHNSTON. Will the Senator yield on that point?

Mr. METZENBAUM. No, not quite. But there is something more that is in this amendment that we put in. We said that if the whole question of a fixed work commitment will not answer the problem, and if a fixed cash bonus will not answer this problem, and if you want to be certain that you have the individual locked in tight and that he will not abandon his royalty bid, then the Secretary of the Interior can do something over and beyond. He can have the fixed work commitment and the royalty bid and the bonus amount both combined together so that the interest of the United States will be protected and there need never again be a chance of any abandonment of a royalty bid which has been awarded to an individual who does not have enough money invested to see to it that he can continue forward.

I think that that language has been totally overlooked in the arguments that have been made so ably today by both of the Senators who have opposed this measure, and I think there is another point that we must discuss before this debate concludes. That has to do with the fact that Senators would seem to suggest that there are two possibilities, one possibility being for royalty bidding and the other possibility being for bonus bidding. But that is not what the law provides. There are five other possibilities, and I think that Senators ought to be aware of those possibilities. Under (A), you can have bonus bidding. Under (B) you can have the variable royalty bid, which combines with it this question of work commitment or bonus as well, or both.

But you can also have a cash bonus bid or a work commitment bid based on dollar amount or exploration with diminishing or sliding royalty, as fixed by the Secretary of the Interior.

You can have a cash bonus bid with a fixed share of the net profit of no less than 30 percent.

You can have a fixed cash bonus with the net profit share reserved as the bid variable.

You can have a cash bonus bid with a royalty at no less than 12½ percent, fixed by the Secretary in amount or value of the production saved, removed, or sold, and a per centum share of net profits of no less than 30 percent.

And, yes, you can have a work commitment—this is the amendment offered by the distinguished Senator from Oklahoma (Mr. BARTLETT)—a work commitment based on a dollar amount for exploration with a fixed cash bonus and a fixed royalty in amount or value of the production saved, removed, or sold, as set by the Secretary of the Interior.

The options are wide open as to what you can do. To suggest that it is either-or is to deny the facts of the language in this measure as we are considering it.

Mr. JOHNSTON. Mr. President, will the Senator yield at this point?

Mr. METZENBAUM. For a question, not losing my right to the floor.

Mr. JOHNSTON. Very well. The Senator talked about work commitments for exploration. I was not talking about work commitments for exploration. I talked about that in my speech a while ago. What I was talking about is a work commitment for development, and there is none in that language.

Mr. METZENBAUM. If the Senator from Louisiana is prepared to offer language providing for a work commitment for development along the lines of the language presently in the bill, either with or without the present language for exploration, the Senator from Ohio will be pleased to join him in offering such an amendment.

Mr. JOHNSTON. The problem is, it cannot be done, because you cannot require a person to develop to a certain extent until you know whether he has oil, or how much oil he has.

Mr. BENTSEN. Mr. President, how much time do we have left before we have a vote on this proposal? The Senator from Texas has been trying for some time to get recognition.

The PRESIDING OFFICER (Mr. BURDICK). The proponent of the amendment has 33 minutes, and the opponents have 34 minutes.

Mr. HANSEN. Mr. President, as quickly as the Senator from Ohio has concluded, let me serve notice now that I would like to yield as much time to the Senator from Texas as he may desire.

Mr. METZENBAUM. I certainly want to hear from the Senator from Texas, but the Senator from South Carolina has been waiting for the floor, and I am pleased to yield to him. How much time does the Senator wish?

Mr. HOLLINGS. About 5 minutes.

Mr. METZENBAUM. I yield the Senator from South Carolina 5 minutes.

Mr. HOLLINGS. Mr. President, I will probably be even more brief. This wonderful contest we have been having down there with the Phillips 66 team, I was engaged in that for 5 or 6 years, but now that has gone on to the Energy Committee and my friend the Senator from Ohio, who I must say is doing a better job than I.

But I want the Senators from Louisiana, while the senior Senator is here, to listen a moment before they say, "Let's leave that and jump to the matter of pricing."

When this crowd came on to the floor yesterday, when we had the exploratory drilling concept in contest, we were like pigs in a poke. We know who the pigs were, but it was like we were in a poke, trying to get out of the poke and into the game; namely, have a look-see at what oil they have.

Maybe with exploratory drilling, we will have some sensibility as to what we are doing here in the Government. But now this morning, when we are trying to bring flexibility into it, they go to the budget and they say, "Oh, Senator from Louisiana, we are losing a lot of money."

Do you think that crowd is really worried about the budget? I have worked with them on the Finance Committee, and I have not seen their assistance in trying to hold the budget down.

Second, with respect to the hearing and who was there, I was not. But you do not have to look to a hearing. The best hearing we ever had on this is what the Senator from Louisiana has been telling us for 10 years on this floor, that where you drill you have got to go down deeper, and how expensive it is. And who does it? The independents do 80 percent of it.

When we had the oil depletion allowance before us here, we put in a specific provision for the independents as a matter of national policy, because of the persuasive views of the senior Senator

from Louisiana. He said the independents did all the drilling. Because the big majors, you know, are running ads, with Mobil sponsoring plays and TV shows—they are sending me ads in the mail now; we do not even have to see them in the newspapers. They are buying dignity every evening at 7 o'clock, with "This is the way it was," "We want you to know we are working for your trust," and all the time looking to buy a circus, or another can company, or something else.

But the independents cannot do that. They have to stay in there and just fight, and when we come to the pricing, which will be on Labor Day, you and I will be in rhythm, but you will go off in a different direction.

With respect to that hearing, we were trying to get the independents, who were onshore doing all the drilling, in essence, to go offshore and have an impact out there. But the name of the game has been: "Secretary of the Interior: Mr. President, I have got to balance the budget. The President: I am with you." And at the end of the year you have to put on one, two, or three, but that was like a transfer of title, transferring title to the public lands to the major oil companies, who squatted, who just rested, and who never explored any at all, because they did not have to.

Mr. President, what has held up the energy crisis in this country is right here in the Congress of the United States, because we cannot make reasonable, rational business decisions with respect to competition and opening up the gates so the independents can get into the game.

That is all the Metzenbaum amendment is about. It provides all kinds of alternatives, with the Secretary not bound by any, because if they do not work or they do not cooperate, he can call back the contract and we can go with another one.

They do it everywhere else, no matter how far away. Even in the North Sea, the most difficult of all. Seven dollars a barrel is what they are getting in the North Sea, and you have Phillips, Gulf, and Exxon there, not walking away. They do it with other governments, and that government has got 51 percent. Here we are talking about 100 percent. The British people have 51 percent ownership, and the major oils are not worrying about private enterprise and all these ads, TV shows, and news programs.

They are out there in every other country, working in those countries, not debating and everything else. But here they have a largesse, a wonderful nest egg.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HOLLINGS. Excuse me; I will yield back my 5 minutes in just 1 minute.

Mr. President, they are just relying on the stupidity of Congress. Like this week, the first thing they talk about is deterioration of the air.

Do you know where the policy has been, Senator from Montana? It has been in the back pocket of the major oil companies. Of course, they want to keep us confused with these silly arguments, and there will be no policy at the Government level, and they will run the policy themselves. That has been the dilemma in this country.

The Senator from Ohio is trying to open up matters and let the same independents who operate competitively and successfully on land go offshore and compete in the same fashion, with similar rigs and everything else.

Mr. HANSEN. Mr. President, will the Senator yield for a question?

Mr. HOLLINGS. On your time, because I have run out of minutes.

Mr. HANSEN. Yes. Mr. President, let me say I did indicate a few minutes ago, maybe 10 minutes, that I would yield next to the Senator from Texas.

If the Senator from Louisiana would not mind withholding his request a moment in order that the Senator from Texas might first be heard, I would like to do it that way.

Mr. BENTSEN. I am opposed to the amendment of the Senator from Ohio. I believe it overreaches. Let me say that the Senator from Texas was the first one, I believe, to introduce an amendment for alternative bidding. The Senator from Texas did that 5 years ago. I introduced a production sharing proposal similar to the Indonesian contract which first provides recovery of costs to the producer, then a sharing of net profits above the costs of production. I urged that the Congress agree with that. It is not a total panacea, and it is not a total answer, but I believe it helps. I had the head of an oil company sit in my office and he said, "Senator, my choking point is something less than $100 million. When it comes to offshore bidding, I would like to go off shore and compete as I have done on shore."

When it comes to cash bonus bidding, often the amount of money involved is in the hundreds of millions of dollars and eligibility is extremely limited.

I want to see more people participate. I want to see them do it something like the Indonesian contract, where there is a recovery of costs and then a participation in the net profits thereafter.

There are about 11 countries in the world which have that kind of a contract.

But I also know that this is not a total answer. That is why I feel we should experiment with alternative bidding systems in no more than one-third of the leases. I also believe any such alternative bid provides first for the opportunity of return of costs then a division of net profits above costs of operation.

Some of the arguments on the other side are quite legitimate. There is a great temptation to overbid on a participation. There is a great temptation for some of the under-capitalized companies to bid when they cannot handle a major blowout with the resulting environmental problems.

One of the problems will be, and why I am going to support a random selection amendment which will be offered by Senator JOHNSTON, is that we might see that the very best structures are given this kind of a bid while bonus bidding will be left to the poor structures. That would not bring in much revenue for us and would distort the results. I will support a random selection or awarding of these kinds of formulas on a variety of acreage.

The other problem we have in trying to solve this energy problem is the shortage of capital We do want them to put as much of that money in the ground as possible. Even for the big companies, when we talk about a billion dollar bidding deal, as we saw on the Destin Dome, that is a drain, and that means that much less money they can spend on drilling.

So I support the concept of an alternative bidding system similar to my Indonesian proposal, always have, and will continue to.

We have seen it done on land, we have seen it done with private owners and on State lands.

I believe this will give some competition to the major companies, competition offshore, which I think will be a healthy thing for the country.

I do believe we ought to try to chart this middle course between the rhetoric I have heard on both sides of this argument, and see that we keep it to the one-third limitation.

Mr. METZENBAUM. Will the Senator from Texas yield for a question on my time?

Mr. BENTSEN. I yield.

Mr. METZENBAUM. Does the Senator realize that the committee did not have a position on this point?

Mr. BENTSEN. Then it is my position.

Mr. METZENBAUM. The committee split right down the middle. I wanted to be certain that the Senator knew the committee split right down the middle.

Mr. HANSEN. Mr. President, I will yield to the Senator from Louisiana.

Mr. LONG. Mr. President, I would like to say to my friend from South Carolina that I have voted for the kind of bidding we are talking about here. I voted for it in the past and I will vote for it again. Texas is different from Louisiana. For years Texas has been letting out some of their bids on a royalty basis and some on a front-end basis. I have advocated that the same thing be done in Louisiana and on the Continental Shelf. I voted that way here on the Senate floor.

Mr. HOLLINGS. Will the Senator yield for a question?

Mr. LONG. Yes.

Mr. HOLLINGS. Does the Senator think the independents really would love to participate in that Outer Continental Shelf?

Mr. LONG. Yes.

Mr. HOLLINGS. I am confident that they would. That is all I wanted to know.

Mr. LONG. But we are talking about a bill which seeks to do that kind of thing. It says that one-third of the leases would be let on that basis.

We have to keep in mind that this is not just a black and white proposition. There are advantages to doing it both ways. The major companies would prefer the big cash up front. I understand that. A man like Ford Grant speaking for the Louisiana exploration would say:

> That is not the way I would like to do it. Why not let me put the money into drilling, rather than the leases. You will get more drilling that way.

When people bid on these leases, they ought to be permitted to put the money they bid into drilling on the lease rather than just paying the money into the Treasury. That would help the independ-

ents. A company like Louisiana Land, which is about 23d in size, would be delighted to see it that way. We ought to get more drilling when they do it.

But this thing brings problems with it. Some of the problems were discussed by my colleague from Louisiana.

In certain areas, for example in the Gulf, if you find anything, you know you will find gas. That is shown by experience.

A big pipeline company chief executive officer told me some years ago:

> If that is how you are going to do business, we will bid on it. We will bid 100 percent. If someone else bids 100 percent, we will bid 101 percent the next time because from our point of view we need the gas. If we have to pay for that gas, we are willing to pay in order to put it into the pipeline because we are having difficulty serving our customers. If we do not serve them, we will lose those customers. From our point of view, we are desperate enough for gas that we are in no position to quarrel about the price we have to pay for it. We will pay 100 percent and if someone bids 101 percent, we will bid 102 percent.

If we do it that way, we wind up paying a lot more for the gas than if done another way. But if they get the lease on that basis, if they are paying more than 101 percent, the more they run the cost up the more profit they make. That is the one where they put the brother-in-law on the payroll to help operate that particular lease.

It is kind of like that story I told about the people who had the round of drinks at the Mayflower Hotel in World War II.

One man said, "Let me have the check. I am on an expense account. It won't cost me anything."

The other fellow said, "I would just as soon have it. I have a 90-percent excess profits tax. It won't cost me but 10 cents on the dollar."

The other man said, "Hell, no, let me have the check. I am on a cost plus contract. I will make a 10-percent profit."

So that kind of thing gets into it when we let one of these big pipeline companies go out and produce the gas. Sometimes we find we have frustrated our own purpose. Instead of letting the independents bid on it we have put the pipeline company into the position to rip off the consumer. The Senator does not want that to answer any more than I do. He does want the independents to compete.

If we look at the equipment the independents have available to them, it is expensive equipment. If they want to get it, they have to get their equipment on order, and get in line to buy it. They might not be able to lease the equipment, because someone is out to get it if there is to be a lease to drill. I suspect we will find that with the equipment which can be made available in the foreseeable future, that would be as much as those people could drill.

I applaud what the committee has done. I think it is a good idea. We ought to explore it and see the extent to which it would bring about more production. But just because something is a good idea does not mean we have to go completely hog wild about a thing until we see how it works out.

Mr. METZENBAUM. Will the Senator from Louisiana yield for a question?

Mr. LONG. On the Senator's time.

Mr. METZENBAUM. If he thinks it is going hog wild, would the Senator from Louisiana be good enough to explain why he voted for the very same provision in the same bill 2 years ago? It was 50 percent 2 years ago.

Mr. LONG. I thought I just got through explaining why. Frankly, my impression is that I know a little more now than I did 2 years ago. I like to think I learn something every day around this place.

Mr. METZENBAUM. I understand. Now the Senator is back on the time of the Senator from Wyoming.

Mr. LONG. Frankly, when that situation occurred at that time, we were not debating whether it ought to be one-third or one-half, and we were not talking about the very point I am talking about. Do the independents have that much equipment to drill with? Can the Senator answer that question?

Mr. METZENBAUM. I should think that the independents would be in as good a position to have the equipment as the majors. I think that, since there are more independents than there are majors, there is a better chance that they would be able to procure the equipment through their own ingenuity. I think the private enterprise system works that way.

Mr. LONG. Now the Senator is thinking. I asked for information, not what the Senator thinks.

Mr. METZENBAUM. I apologize to the Senator for thinking.

Mr. BUMPERS. Will the Senator from Ohio yield me a couple of minutes?

Mr. METZENBAUM. How many minutes?

Mr. BUMPERS. Five.

Mr. METZENBAUM. I yield to the distinguished Senator from Arkansas.

Mr. BUMPERS. I always thought Senators were open-minded.

Mr. HANSEN. I am open-minded.

Mr. BUMPERS. I see we have about seven Senators in the Chamber and they are all as open-minded as Senator HANSEN just said he is.

I would like to make a couple of observations. Why do the major oil companies resist this amendment? Why do they want to stay on the cash bonus basis? I suggest that there are two reasons.

No. 1, as long as they are on a cash bonus basis, they are going to get the bids. The Senator from Ohio read off a list of the last sale. It is Exxon and all that crowd, just as it always is, because they have the money and they can put it up.

The Senator from Texas, a while ago, said he talked to a small Texas oil company man and he said, "I would choke on a hundred million dollars." Exxon throws that much away every day. Their sales are $50 billion a year.

As I stated, they know that they are going to get the bids as long as it is on a cash bonus basis.

No. 2, they know that the Secretary is not going to demand and nobody else is going to demand a very big royalty on the part of the U.S. Government, as long as there is a gigantic cash bonus on the front end.

I really must confess that there is not a great deal of difference in the committee bill which now says that the Secretary will take up to two-thirds of the bids on a cash bonus basis. The difference between that and 50 percent, which the Senator from Ohio is recommending, is not all that much.

My personal preference would be to do away with all cash bonus bidding. Let everybody come in and say, "I will do the work and I will give the Government a fair share of the product, whatever it is."

The U.S. Government is about the only government in the world that even permits private oil drilling. There are Pemex in Mexico, Pertamina in Indonesia. British Petroleum, and French Petroleum. Just because we want the United States to drill on the Outer Continental Shelf to see what we have, before we let Exxon and Texaco and Mobil and all the rest of them start producing and developing the oil and gas, you would think the country had gone Communist. Nothing could be further from the truth.

Let me digress just a moment to say that those outrageous ads that the Mobile Oil Co. puts in the Wall Street Journal and the New York Times every day are an absolute insult to a person's intelligence. I get so tired of looking at those things that I could scream. They say that we have to deregulate. That is the free enterprise system, deregulate.

Do you know why? Because they know what is going to happen to the price when we deregulate. The price is going to go sky high. They know we are running out of oil and gas. The price is going to go up. They happen to control all of the reserves. Of course, they want to deregulate.

What do they say? It is the free enterprise way. It is free enterprise to let the marketplace decide. That is the biggest smoke screen ever perpetrated on the American people. It is the biggest hoax ever perpetrated on the American people.

What do they say next? As the Senator from South Carolina said:

> We just have to drill so deep nowadays, it just costs so much that we cannot stand it; we have to have more money for our product.

What do they do with the money they have? I tell you what Mobil does: They go out and buy the Marcor Corp., Montgomery Ward, and American Can Co. for $800 million cash. That shows how sensitive they are to the energy needs of this country.

This is the same old story. I am going to support the amendment. I am going to vote for it. I do not think it is that big a deal, but it is at least a chink in the armor. It gives the Secretary a little discretion. It gives him the right to say that we are at least going to give some people who have not had a chance to drill on the Outer Continental Shelf a chance.

Do you know what the majors are going to say? "We cannot take this. You let competition interfere with the free enterprise system."

That is the whole argument in a nutshell, Mr. President.

I am happy to support the amendment. On behalf of the committee, I can say that the same amendment was offered in the committee. Senator METZENBAUM offered it in the committee.

The same amendment there was defeated on a 9 to 9 vote, a tie vote. But I hope that it will not be defeated here today, for all the reasons I have just stated.

I thank the Senator for yielding me time.

Mr. HANSEN. Mr. President, I yield such time as he may desire to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, I am sorry that Senator HOLLINGS is not here. I should like to have shared my thoughts with him for a few moments.

I have listened this morning to this debate. I listened attentively to the Senator from Arkansas in his last discussion. I think we are making noises this morning that do not even address the issue that is before us. Let me tell what the amendment before us reminds me of in terms of what is happening to our Government.

It appears to me—and I used this example one other time, but it fits here even better—that we come to the conclusion, in the Senate, that anything worth doing is worth overdoing. That is really the issue here.

The Senator from Arkansas is absolutely right when he says that this amendment does not do much, except that, on an approach to capturing the resources offshore that have not worked to this point, we are mandating that 50 percent of it be done that way. The way the committee did it was to say, "If it is that good, Mr. Secretary, you can do 50 percent, you can do 80 percent." All the bill says is that no more than 66⅔ percent will be cash bonus. If he finds that it has all these wondrous cures that have been alleged here, he can put 50 percent into royalty bidding if he wants. The thing that we are doing here today is saying that, in an untried experiment, we are going to tie the Secretary's hands.

The committee recognized that we ought to try royalty bidding. It is in there. It is permitted. Everyone here has so much confidence in the integrity of the Secretary of the Interior, in the Secretary's concern about getting the best deal for the American taxpayer and getting oil produced and gas produced. Then, why in the world, if we have all that confidence, do we want to adopt an amendment that immediately says to him, "You must use 50 percent of a system that is speculative, that we are not even sure will work," and mandate it?

What the committee did is to say, "If it is that good, you can do 50 percent, but we are not ordering you to. The only thing we are saying is, you cannot use the old system for more than two-thirds of it."

That is the issue. For those who are talking about flexibility and the great qualities and attributes of this new system that we want to use, the committee has already provided for that. What we are doing with that amendment that is before us is saying, if it is worth doing, let us just go wild with it. Anything worth doing, do it all the way, when we do not even know the effects. I suspect the effects are going to be less production in the short term—at least in the next 7 or 8 years—if we force the Secretary to take a new approach that we do not know will work and mandate that a full half of all the leases will be done that way.

Having said that, let me just talk a minute about the so-called independent. I really do not understand how we can be here on the floor talking about independents as if we are talking about the Ma and Pa grocery store. This approach costs $50, $60, or $100 million right off the bat. So we are certainly not talking about the independents, that are drilling over there in New Mexico, forming a joint venture to put a half million dollars together. They are not drilling offshore. They know that the technology and investment is beyond them.

Let me tell the facts about independents as I have found them. I did not get these from any oil company or Phillips 66 team, as some have alleged who are worried about America's energy.

I have the recap from the Secretary of the Interior on the last major lease that was let. It says that there were 478 companies, large and small, that bid and got an interest in that lease. Four hundred and seventy-eight, Mr. President.

Now, I will state what else it shows. It shows that of that total, 326 independents—that is the non-16 major oil companies—326 of the leases are owned partially or in toto by the nonmajors and 126 by the 16 majors.

Does that mean the independents in this country are not participating in the offshore drilling activity promoted by the U.S. Government with its resources?

And, incidentally, the Senator from Arkansas commented about what is going on all over the rest of the world, suggesting, I think, perhaps we ought to nationalize, as I read what he said.

But it is interesting, do we know who they are using to do their drilling, Mr. President, those other countries in the North Sea and in Mexico? Who do we think will be doing the work?

The same American companies that we are down here accusing of working in a way that is not in the interest of the United States.

Even those other countries recognize that they know how to do it, that they have developed the skill and ability and technological approach to even the most difficult things.

Here we sit in the Congress talking about an energy crisis and we talk about the private sector of the United States, in particular, the oil companies, as if they obviously are the kind of thing we ought to get rid of.

I say this, if we do not have a tax structure that taxes enough, change it. If we do not have a good enough antitrust law, pass a better one. But do not sit here and talk about wanting to help the independents when, as a matter of fact, they have been participating, and they are not here asking for this approach.

In fact, I believe the junior Senator from Louisiana is right. The compelling testimony before the committee, is that they are getting a fair share.

I checked it out myself.

I will submit for the RECORD a 6-page list of those who participated, and on the last public bid, it contains 326 independents, those who are not part of the so-called big 16.

Where did they get their interest?

This is not a private interest, Mr. President. It is in the hands of the Secretary of the Interior.

Mr. President, I will submit a summary of all the sales since December 1970, which summarizes the interest of the independents in the offshore ownership and activities of public leases, offshore, of the United States.

Mr. President, it is revealing, if anyone is interested in facts, because they already have an interest. They are already partners, and to the extent they can afford it, that is what they are getting.

Certainly, they cannot afford a $200 million project, so they own 10 percent of it.

But they are not here asking for us to experiment, experiment with the huge resource that is there.

In conclusion, for those who are certain, and I am not, for I am no expert, I do not have any interest in my State, I could not be further from the offshore activities existing or to come, but for those who are certain the royalty bidding approach combined with work requirements, and the like, is the greatest thing since chocolate cake, then I resubmit that the Secretary of the Interior can award 50 percent of the future offshore leases to them. It is that flexible.

What we are doing with the Metzenbaum amendment is to say that before they even know it will work, they are obligated to put 50 percent there.

I submit in the interest of the diversity that exists in terms of resources, technological ability, capacity to do the job, that what we ought to do is precisely what the committee did and say that no more than 66⅔, the old way, and I stress "no more than," it leaves at least one-third for the experiment, the experiment in motherhood we have been talking about here today. If it works, they can have 50 to 70 percent of it that way.

But why insist on tying the Secretary's hands with an approach that we do not even know will work?

I ask unanimous consent that the two recapitulations of the facts on the bids to this point be printed in the RECORD.

I thank the Senator from Wyoming.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OCS LEASE SALE NO. 47—SUCCESSFUL OCS BIDDERS

Member company	Number of tracts bid on	Number of tracts obtained	Average interest in participation (percent)
Allied Chemical		1	25
Amax Petroleum		1	15
Amerada Hess		5	30-50
American Natural Gas		4	39
Aminoil	15	6	39
Amoco		3	25-100

1

Mr. HANSEN. Mr. President, I congratulate the distinguished Senator from New Mexico for having spelled out very clearly, very understandably, in terms that everyone should be able to comprehend, what the facts are.

When he spoke about the independents as not being people who would compare with the mom and pop grocery store and the extreme costs of trying to develop oil reserves and oil resources on the Outer Continental Shelf, I wish everyone might have been listening to him, because that is precisely the problem.

I must say, Mr. President, I was somewhat amazed when it was implied here earlier this morning that the American Nation, the United States, is the only nation that has followed this course of letting private entrepreneurs handle the development of its oil and gas resources.

Let us look at that from the other side of the coin. It is true. This country has about 6 percent of the total population of the world, which now is estimated to be almost 4 billion people, or whatever, and it is rather unique, indeed it is, that we should seek people in the private sector of our economy to develop the oil and gas resources.

But when we look at the success ratio, when we understand that although we are about 6 percent or 5 percent of the world's population, and we use roughly one-third of the world's energy, we ought to be able to understand why that is true.

It is true because we have had a system working in this country that has been so successful that we were able to have at our disposal that great amount of energy. This is an energy-intensive nation.

We talk about balance of trade, and the only reason we are not in extremely tough circumstances as far as balance of payments go is that the American farmer is able to produce far more than we can possibly consume in this country and, as a consequence, we are able to export from the State of North Dakota and a lot of other States a whale of a lot of corn and wheat and soybeans and other products, as well. That has accounted for keeping the balance of payments down at controllable levels.

All we need to do if we are to make comparisons, England has nationalized things. They nationalized the coal mines.

I flew over to England a few years ago when we were going into the Middle East and some people on the plane said, "You know, this reminds me of World War II days."

I was not sure what they meant. They said, "Look at the city down there, it is nearly black."

When we got to the hotel, 10:30 at night, the sign on the door said, "There will be no hot water until tomorrow morning."

We almost had to grope our way down the hallway because they had about a 30-watt lightbulb at rather long distances to try to conserve energy.

England nationalized its energy and it did not work too well.

I think a lot of British people would be tickled to death to have to put up with the free enterprisers who find the oil and gas in this country.

Who developed the oil fields in Saudi Arabia? Did the Saudi Arabian Government do it? They did not. The Saudi

Arabians are pretty smart people and when they wanted to have their oil resources developed and their gas resources developed they did not go to the blacksmith to have it done. They went to the companies who knew how to do it.

When the resources were developed in the North Sea, who did both countries that have access to a proportional share of the North Sea go to? They went to the experts. They came right back to the American oil industry to get the job done because they wanted to have it done by people who knew what they were doing.

The trouble with having the Government in this business, and that is the whole thread of this OCS bill, it seems to me, is that it presumes that we are going to save money, that we are not going to have this rip-off by the major oil companies.

People forget that Americans own the major oil companies, and people forget that the first concern of the board of directors of Mobil—and they have been maligned here this morning because they bought some stock that was owned by Montgomery Ward. I think they acted with good reason. If they are listening to the debates that take place on this floor, as I suspect they have from time to time, they cannot escape the conclusion that, despite the kind of job they have been doing, this Congress is bound and determined to put them out of business.

If I were on a board and if I were responsible to the stockholders—which I am not—and somebody wanted me to take care of their interests, I would have to conclude that this might be a good time to diversify; because if there is one thing that impresses me as being an overwhelming sentiment among a majority of the Members of this Congress it is the fact that, whatever may be said, the oil companies are bad guys and any way you can put them out of business, any way you can hurt them, any way you can make it tougher for them to operate, that is good sense.

The fact is that we have more energy available in this country than any other country on earth. For every hour of work we put in on a farm or ranch, we burn 1.2 gallons of fuel oil. A gallon is about one-third or one-fourth as costly in the United States as it is anywhere else in the world.

It so happens—and I remind my good friend from Arkansas once again—that that oil so far has been produced not by the Government of the United States but by the independents and by the majors. They have done a whale of a good job of it, and they have been supplying that oil for about one-third or one-fourth as much per gallon cost of gasoline as is true anywhere else.

When they had the tragic fire in the North Sea, did the Government of Norway call in its Norweigian experts to put out the fire? They may have consulted with them earlier, but they went down to Texas to get a guy named Red Adair, because he knew what he was doing, and he put out the fire.

I must say that it distresses me to see people stand on this floor and say that the major oil companies and the independents are not any good. I think the record speaks for itself. We have done the greatest job I have ever seen done in this country, and I hope we will have the good sense to say, "Let us not try to outlaw success. Let us not try to outlaw efficiency."

I yield to the Senator from North Dakota.

(Mr. HARRY F. BYRD, JR., assumed the chair.)

Mr. BURDICK. Mr. President, I have listened to this debate and find it very interesting. There is one issue that does not seem to be settled in my mind.

What was the testimony with regard to the wishes of the independents? If we are going to make room for the independents, what was the testimony in the committee?

Mr. HANSEN. I did not hear all the testimony, but what I did hear was that both the IPAA and the Domestic Petroleum Council, which represents the middle-sized group, testified that the law under which we have been operating is entirely satisfactory to them. They did not testify in support of the bill we have before us now.

Does that answer the Senator's question?

Mr. BURDICK. I believe it does.

Mr. METZENBAUM. May I respond further to the Senator?

Mr. HANSEN. On the time of the Senator from Ohio.

Mr. METZENBAUM On my time.

I think there was testimony on both sides with respect to the independents. Husky Oil Co. testified—and this is their quotation:

> Under the present bonus bid system, companies like Husky do not have sufficient capital for successful cash bonus bids to acquire leases plus the high costs of exploration and production.

They went on to say:

> We believe the best method of assuring development of millions of acres coming to bid on the OCS is for companies to bid a lease on the basis of a work commitment, coupled with a net profits interest to the Government when oil or gas is actually produced.

The bill that came out of committee, I am certain, is far more acceptable to Husky, which is one of the major independents, than it would be with just the bonus bidding procedure.

Mr. BURDICK. I understand that the independents have an organization representing their views. I understand there are several hundred independents in the country. Did they or their organizations appear and testify and give their position?

Mr. METZENBAUM. I believe that the independents did testify. The Senator from Louisiana sat through more of that hearing than I did.

Would the Senator from Louisiana care to respond?

Mr. JOHNSTON. I think it is fair to say that the independents oppose this amendment. In fact, they oppose royalty bidding. We are talking here about royalty and not profit bidding. They oppose royalty bidding principally because they are afraid of competition from the gas companies, the pipeline companies, the gas pipeline companies, who can come in and bid 100 percent and roll it into their prices and have a cost-plus deal.

Mr. HANSEN. If the Senator will yield, on my time, let me observe, for the benefit of the Senator from Ohio, that of all the members of the Domestic Petroleum Council, so far as I know, Husky Oil is the only member that testified in support of royalty bidding.

Mr. LONG. Here is the point—and I have not heard one word of defense against this argument, because I do not think they have any defense against it: With respect to most of these leases off Louisiana and Texas—and that is the only place you can drill now, unless at some point between now and the hereafter, the Environmental Protection Agency will let us drill elsewhere in the Atlantic—most of what you have to drill for out there is gas.

The pipeline companies, such as Columbia Gas, Tenneco, and the rest of them, can bid 100 percent. Who can bid more than 100 percent? Even Exxon cannot do that, unless they want to lose money.

Mr. METZENBAUM. On whose time is this, Mr. President?

The PRESIDING OFFICER. The time of the Senator from Wyoming.

Mr. LONG. Even Exxon cannot bid 100 percent, unless they would love to lose some money. But a pipeline like any one of the majors—United or others—can go out and bid 100 percent because they need the gas for their customers. They can put it on their rate basis and make a profit on top of it, as they do with a cost-plus deal.

So, from their point of view, no matter how much it costs, they make a profit. That is why the independents testified against it, because they cannot bid against the pipelines. Even Exxon cannot bid against the pipelines.

I am curious to hear the Senator answer how he proposes to have the independents bid more than 100 percent.

Mr. METZENBAUM. Responding further to the Senator from North Dakota: When the independents testified against the royalty bidding, that had to do with that specific issue. At that time, the bill had not been amended to require either a cash bonus in addition to the royalty or a work commitment. I doubt very much that they would be opposed to the language as is, although I do not know that to be the case. However, the fact is that there are seven different ways you can bid under this law.

So that the question of whether you are for royalty bidding or not for royalty bidding is not directly pertinent to the issue before us today. The question before us only has to do with the maximum amount of the tracts that may be put out on cash bonus bidding alone. The evidence is unequivocally clear that only the majors have been successful when there was bonus bidding. They are the ones who have obtained the major tracts, and in some instances as much as 100 percent of the tracts.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield.

Mr. BUMPERS. No self-respecting public service commission or any other

ratemaking authority, such as the Federal Power Commission, is going to allow any pipeline transportation company to pass along 100 percent royalty. To suggest that the gas companies are just busting to get out on the Outer Continental Shelf and bid 100 percent royalty so they can siphon the gas off into their pipelines is totally specious. Of course, that is not going to happen.

The Federal Power Commission regulates the price of gas in interstate commerce.

Mr. LONG. Mr. President, will the Senator yield to me?

Mr. BUMPERS. Let me make this point. The Federal Power Commission is going to regulate the price of interstate gas.

Mr. LONG. Mr. President, will the Senator yield?

Mr. BUMPERS. Yes.

Mr. LONG. One of the chief executive officers of the biggest pipeline told me he would bid 100 percent. Furthermore, whatever the Federal Power Commission will let them charge for the gas the company is prepared to bid, just anything they let them bid.

Mr. BUMPERS. That is just my point.

Mr. LONG. How can you bid against anybody when he is in position to say the Government gets it all, "and anything you let me bid I bid?" How can you bid against him? The pipeline companies said, "Anything you will let me bid I will bid." How can you beat that?

Mr. BUMPERS. My point is the Federal Power Commission is not going to let them bid like that because they are not going to let them pass on any such exorbitant cost.

Mr. LONG. The Federal Power Commission would have to let them charge something for the gas.

Mr. BUMPERS. Something, but not 100 percent.

Mr. LONG. All right, whatever the Government would let them charge for the gas is what they will bid. How can you bid more than that?

Mr. HANSEN. Is it not a fact, furthermore, that when people are out of gas, as they were last winter, they would pay any amount? We passed legislation authorizing the President of the United States to make whatever kind of arrangement could be made in order to get gas. Can you say the Federal Power Commission is not going to do something? Believe me, when they are out of gas in Ohio, as they were last winter, I do not care what it costs, when people are out of gas that becomes pretty important. That is the first priority.

Mr. BUMPERS. Mr. President, if the Senator will yield at that point, the President put a cap on that. The President said up to $2.25.

Mr. LONG. Let us just pin the point down because you cannot answer this. Let me put this point to you. Let us say—you say the FPC will not let you put your gas in at 100 percent. All right. Then I say to you if I am a pipeline company trying to bid, I say, "Mr. Federal Power Commission, if you would not let me bid 100 percent, tell me what can I bid? Can I bid 90 percent? Can I bid 99 percent? What can I bid, because anything you will permit me to bid I will bid for it." How can an independent outbid that?

Mr. METZENBAUM. I find this discussion an amazing one. Here I find two men, both of whom have stood on this floor and have been two of the strongest advocates for deregulation of the price of natural gas—who have said by their votes that they do not want the Federal Power Commission to have any authority—two men standing here and telling us that the Federal Power Commission will let them increase as much as they need to increase if they bid at 100 percent.

Well, the facts are the Federal Power Commission, if you permit it to have the power that it now has, will not do so because the Federal Power Commission does not permit the amount paid on royalties to be cranked into the price. But instead of that you are coming here and using an argument that this amendment is going to play into the hands of the natural gas pipeline companies and the Federal Power Commission. The fact is that nothing could be further from the truth.

Mr. LONG. Mr. President, who had the floor?

Mr. HANSEN. You can have as much time as you want.

Mr. LONG. Senator, you cannot escape the argument—you are trying to escape it—you cannot escape it, you have to try to answer it.

Let me try to explain it to you again. Here is the point: The pipeline company needs the gas. If the independent gets the gas, he has to sell it to the pipeline company. That is where it has to go, and the pipeline companies are ready to bid because they need it. They do not want to take the chance of losing it, because somebody else needs the gas. They do not like to drill but they need the gas—however, they will drill because they desperately need the gas.

Now, the gas is to be sold at the price the Federal Power Commission says you can sell it for. So from the point of view of the producer, of the pipeline company bidding for it, they will say to the Federal Power Commission, "If you won't let us bid a hundred percent, tell us what you will let us bid for it because we will bid anything you let us bid for it."

I would be curious to know why not. And the independent bidding against it is bidding against the very company to whom he hopes to sell the gas. So basically the pipeline company is bidding whatever he is permitted to charge for it, and he is willing to bid a hundred percent. If he cannot bid a hundred percent he will bid anything they will let him bid. How can the independent bid against even 95 percent or 90 percent.

Mr. BUMPERS. Let me answer that. The independent producers are not subject to regulation by the Federal Power Commission. They could conceivably bid more than a hundred percent, but I do not buy the argument. They could bid a hundred percent royalty for the oil and 50 percent royalty for the gas, and they are not subject to regulation by anybody.

Mr. JOHNSTON. Does the Senator understand that all natural gas by independents and majors is now under regulation?

Mr. BUMPERS. Of course.

Mr. LONG. You just got through saying it is not.

Mr. BUMPERS. The independent can sell it to anybody he wants to, but he will be selling it to someone who is regulated. That is why I say they are not going to do it, nobody is going to do it. I do not know the president of the oil company you mentioned, I think he ought to have a saliva test and they ought to call the net boys. Nobody is going to do it at 100 percent.

Mr. TOWER. You say the independents are not subject to regulation?

Mr. BUMPERS. Independents who want to bid on this oil, who want to go out there and want to drill for it, are not subject to regulation.

When the pipeline company buys it from them, they are the ones who are going to be regulated.

Mr. LONG. Where did the Senator get the information?

Mr. BUMPERS. Tell me how they are regulated.

Mr. JOHNSTON. Mr. President, will the Senator yield? They are regulated by the Natural Gas Act of 1938, as amended by this Congress and extended by everybody. All interstate gas is subject to Federal Power Commission price control.

Mr. BUMPERS. But not oil.

Mr. JOHNSTON. Not oil. We are talking about natural gas.

Mr. LONG. That is what we are talking about, natural gas. That is what I have been saying all the time.

Mr. HANSEN. That is where you came in.

Mr. LONG. I am saying in practically all of the Texas part of the Gulf and most of the Louisiana part of the Gulf you know by geography where you are going to find gas. If you are going to find anything in certain areas, it is going to be gas. When you go to drill for the gas, you are subject to just exactly what I have been saying. I was not talking about oil. I did not think I was.

Mr. JOHNSTON. Mr. President, I would like to——

Mr. HANSEN. The Senator is yielded all the time the Senator may require.

Mr. JOHNSTON. Just to answer the question of how the independents feel about this bill, the distinguished Senator from North Dakota asked a question, and if he will give me his attention, I have gone over and gotten these statements.

First of all, to quote very briefly from the Domestic Petroleum Council in their testimony before our hearings they said, referring to section 205 on royalty bidding:

> It would actually reduce the level of participation by companies outside. The DPC strongly favors retaining the present bidding system of the cash bonus with a fixed royalty of not less than 12.5 percent. Additionally, the DPC would favor on an experimental basis a work commitment bidding system as will be detailed later.

So this is the Domestic Petroleum Council composed of independents.

Mr. METZENBAUM. Mr. President, will the Senator from Louisiana be good enough to explain to the Senate who

comprise the DPC, because it is my understanding it is actually controlled by the members of the majors.

Mr. JOHNSTON. It is a group of 21 small to medium-sized companies primarily concerned with domestic production of oil and gas. Some members are strictly producing, some are totally integrated, and some are affiliated with companies outside the industry.

Nineteen to twenty-one members' domestic production range from approximately 3,000 to 100,000 barrels of oil per day and up to 150 million cubic feet of gas per day.

These are the companies really, these intermediate-sized companies are the only ones, who can get out on the——

Mr. HANSEN. Husky Oil is a member of that Domestic Petroleum Council?

Mr. JOHNSON. That is right.

As far as what Mr. Graham said, I have now gotten his statement. On page 5 he goes on to talk about the bidding system presently used, and he said, "Something must be all right about the current law," speaking of the bid system. He goes on to analyze this bill in great detail, and he ends up with this conclusion. He says:

As a private citizen, I would like to see this Nation carry out the policy provisions stated in 102(1) of the bill. But if this bill becomes law in its present form just the opposite will be achieved.

So if the Senator would like, I can either give him a copy of Mr. Grant's statement or put it in the RECORD. I was there when he gave the statement, and I thought I had recalled that correctly, and the statement bears that out.

The fact of the matter is everybody who testified on this bill, the independents, with the exception of Husky Oil, all were against royalty bidding, and we are talking about royalty bidding. Nobody on the committee opposed the work commitment bids or the net profit bids on an experimental basis, but this bill goes overboard, 50 percent or more of royalty bidding, or these other kinds of bidding which, I think, is a grave mistake, and all the other independents think it is a grave mistake. Who thinks it is a good idea other than certain Senators? Nobody that I know of, nobody—maybe Husky Oil, if they ever change their opinion.

Mr. BUMPERS. If the Senator will yield to me, I think the American people think it is a good idea. Right now the U.S. Government is getting about 16⅔ percent royalty on the oil that it has sold so far on the Outer Continental Shelf plus those bids.

I would like the Senator to tell me what Phillips Petroleum Co. is paying Norway for the oil they found in the North Sea.

Mr. JOHNSTON. I cannot give the Senator the figures.

Mr. BUMPERS. I can tell the Senator it is over 50 percent. That is all we are doing here, just trying to make sure the American people receive what they are entitled to for what they own.

Mr. JOHNSTON. They received $2.7 billion last year in front end bonuses.

Mr. BUMPERS. What does the Senator think $2.7 billion will be in the North Sea where the reserves are estimated to be 15 to 20 billion barrels?

Mr. METZENBAUM. If the Senator from Arkansas will yield a moment, I wish to correct the Senator from Louisiana on that. May I have the attention of the Senator from Louisiana?

I am informed that the anticipated revenues do not indicate that that amount would be available from bonuses. That $1.1 billion would come in from royalties in escrow and only $1.6 from bonuses. All you would be doing under this bill is affecting the bonus part and you would be increasing the royalty part so I think that the $2.7 billion figure is a distorted one. These are figures I just obtained since the debate started this morning.

Mr. JOHNSTON. This is fiscal year 1978 the Senator is talking about.

Mr. METZENBAUM. That is correct.

Mr. JOHNSTON. I am talking about fiscal year 1977, $2.7 billion bonuses. So what the Senator is saving is his amendment will cost only $800 million for next year?

Mr. METZENBAUM. No, I am not willing to say my amendment will cost anything at all. My amendment will produce more revenue for the Federal Treasury over a period of time whether or not there might be some impact.

Mr. JOHNSTON. If the Senator will just get to next year's budget, when he says $1.6 billion in bonuses and his amendment does away with at least half of the bonus.

Mr. METZENBAUM. That is not correct. Mine does not do away with that much in bonuses. I have to point out to the Senator there are other provisions in the bill that make it possible to obtain up front figures, including bonuses that are possible under several of the other different sections, although those bonuses could be set by the Secretary of the Interior. So my opinion is that the impact of this bill with respect to future revenue would be very modest indeed, and whether it would have some impact is merely a matter for conjecture on both of our parts.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield to the Senator from Washington.

Mr. JACKSON. Mr. President, I support the Metzenbaum amendment. It was adopted by the Senate in 1975 when we last considered the Outer Continental Shelf leasing reform. The amendment furthers the objectives of the alternative leasing systems to, first, increase availability of funds for exploration, second, make it easier for independent oil companies to participate in the OCS development, and third, reduce the front-end cash bonus and increase the Government's share of oil and gas produced.

The limitation only lasts for 5 years and can be extended by the Secretary after a congressional review.

Finally, Mr. President, I think what the Senator from Arkansas said just a moment ago goes to the heart of this problem. The international oil companies, when they explore and develop in the North Sea, pay the British and Norwegians far in excess of anything they pay the United States for publicly owned property.

Mr. President, I think that is one of the key issues. We want to be fair about this. But I think it is ridiculous that oil companies oppose royalty bidding when they agree to bonuses and royalties set by other countries that far exceed anything that is being asked in this legislation or the amendment by the Senator from Ohio.

Mr. President, I simply want to see a fair return to the American people and I want to see a fair opportunity for private enterprise to engage in this undertaking. No one can honestly say that an ordinary entrepreneur who may be worth $100 million can really go compete with the kind of competition engaged in the OCS now, in which major oil companies bid into the billions of dollars.

I strongly urge my colleagues to support this amendment which we have previously adopted and do it by a substantial margin.

I thank the Senator from Ohio.

ADDITIONAL STATEMENT SUBMITTED

Mr. WEICKER. Mr. President, the present language of S. 9 would give the lion's share of the OCS leasing areas to the large oil companies.

Up to 66⅔ percent of prime oil and gas leasing areas can be offered each year under a cash bonus bidding system with a royalty. The consequence of this language is to offer most of the submerged lands likely to produce oil and gas to those bidders that have large amounts of front money.

Those bidders with small cash reserves would, in effect, be bidding on only the remaining one-third of the potential oil- and gas-producing lands. The likelihood of these remaining leases to be high producers is slight.

The many small independent gas companies that would like to compete in the OCS leases would not be able to effectively do so.

In my own State of Connecticut there are independent gas companies that are anxious to participate in the OCS activities but will be barred by economic barriers that S. 9 will impose.

The amendment to S. 9 that is before you would change the percentum of lease lands to be offered under the bonus bidding system from 66⅔ to 50. This would allow for a greater number of companies to compete for OCS leases. By opening more of the prime producing lands to such competition the leases would be distributed more fairly than is now provided by S. 9.

I urge my colleagues to vote in favor of this important amendment to insure fair competition and greater efficiency in OCS development and production.

Mr. HANSEN. Mr. President, if the Senator from Ohio is ready to yield his time back, I will be ready.

Mr. METZENBAUM. In just one moment I will.

Mr. HANSEN. I will withhold them.

Mr. METZENBAUM. I point out for Members of the Senate that those who have been the strongest opponents of this amendment, voted for legislation 2 years ago which contained roughly equivalent language, certainly to the same effect

which would accomplish the same purpose, include the distinguished Senator from New Mexico, the distinguished Senator from Wyoming, and both of the Senators from Florida.

Two years ago there was a limitation of 50 percent. All this amendment would do is make the law the same as that which it was when it passed the Senate 2 years ago.

Mr. President, if the Senator from Wyoming is prepared to yield back his time, I am prepared to yield back the remainder of my time.

Mr. HANSEN. I yield back the remainder of my time.

Mr. METZENBAUM. I yield back the remainder of my time.

Mr. HANSEN. Have the yeas and nays been ordered?

Mr. METZENBAUM. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has been yielded back. The yeas and nays have been ordered.

The question is on agreeing to the amendment of the Senator from Ohio (Mr. METZENBAUM).

The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. MORGAN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Louisiana (Mr. LONG) and the Senator from Maine (Mr. MUSKIE) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. MORGAN) and the Senator from Minnesota (Mr. ANDERSON) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Missouri (Mr. DANFORTH), the Senator from Michigan (Mr. GRIFFIN), and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

The result was announced—yeas 57, nays 33, as follows:

[Rollcall Vote No. 288 Leg.]

YEAS—57

Abourezk	Hart	Nelson
Bayh	Hathaway	Nunn
Biden	Heinz	Pell

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Long, against.

NOT VOTING—10

Anderson	Griffin	Muskie
Bellmon	Long	Scott
Danforth	Mathias	
Eastland	Morgan	

So Mr. METZENBAUM's amendment was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RANDOLPH. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG subsequently said: Mr. President, on the preceding vote I have a pair with the Senator from Maine (Mr. MUSKIE). If he were present and voting, he would vote "yea." I would vote "nay."

Mr. EAGLETON addressed the Chair.

Mr. JOHNSTON. Mr. President, if the Chair will recognize me, I will yield to the distinguished Senator from Missouri.

The PRESIDING OFFICER (Mr. SASSER). The Senator from Missouri is recognized.

AMENDMENT NO. 487

Mr. EAGLETON. Mr. President, I call up my amendment No. 487, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON), for himself, Mr. DANFORTH, Mr. PEARSON, and Mr. DOLE, proposes amendment No. 487.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 258, between lines 10 and 11 add the following new section 504 and renumber subsequent sections accordingly:

SEC. 504. The Natural Gas Act (15 U.S.C. 717 et seq.) is amended by adding the following new section at the end thereof:

"LIMITATION ON CURTAILMENT PLANS

"SEC. 24. (a) No curtailment plan, applicable to a natural gas company that transports natural gas in interstate commerce, prescribed or approved by the Commission or any successor agency pursuant to the provisions of this Act, shall directly or indirectly exclude or deny deliveries of natural gas prior to full curtailment of service to all other classes or priorities of uses prescribed or identified in such a curtailment plan.

"(b) For the purposes of this section the term 'high priority use' means—

"(1) use of natural gas in a residence;

"(2) use of natural gas in a commercial establishment in amounts of less than 50 Mcf on a peak day; or

"(3) any other use of natural gas the termination of which would endanger life, health, or maintenance of physical property.

"(c) Nothing contained in this section shall restrict the right of State utility commissions to impose load growth limitations on high priority uses.".

Mr. EAGLETON. Mr. President, this amendment has two purposes. First, it would assure that highest priority is given to human need uses of natural gas in any curtailment plan which is prescribed or approved by the Federal Power Commission. Human needs are defined by the amendment as use of gas in a residence, a small business, or any other activity necessary to protect life, health, or maintenance of physical property.

Second, the amendment would reserve to affected State or local utility commissions the authority to decide how to distribute available gas supplies as between new and existing uses.

Mr. President, on June 14, the Federal Power Commission issued an order in the Cities Service case which prescribes a new gas curtailment plan affecting some 500 communities in Missouri, Kansas, Oklahoma, Nebraska, and Texas. Incredibly, the order places large commercial customers, including hospitals, nursing homes, and some apartment complexes in a secondary priority below that of industrial process and feedstock uses. The order also establishes a virtual moratorium on new residential hookups even though there are excellent prospects that Cities Service supplies will increase in years ahead as a result of new gas discoveries. This means that gas which could and should be used for human needs will instead be diverted for use as boiler fuel or other low-priority activities.

This FPC order is totally inconsistent with everything Congress has had to say on the matter. In the recently enacted Emergency Natural Gas Act of 1977, for example, human needs are accorded priority above all else and the President is authorized to divert gas from other areas of the country if necessary to meet those needs.

Obviously, there are other uses of gas which are of pressing importance including gas for industrial processes, feedstock, irrigation, and grain drying and I believe those activities should be given a priority. But no use of gas should come ahead of human needs.

The priority categories of use which are contained in this measure are taken word for word from the high priority uses defined in the Emergency Gas Act of 1977, and parallel the policy guidelines set down by the FPC itself in a 1975 order, No. 467–B.

My amendment, which is cosponsored by Senators DANFORTH, PEARSON, and DOLE simply says the FPC may not curtail either new or existing human need uses prior to full curtailment of service to all other classes or priority of uses. It is made clear, however, that State or local utility commissions are free to establish such limitations or moratoriums on new gas use as local conditions and priorities may warrant.

It is my position that Congress intended in the Natural Gas Act to leave control over end use of gas to State regulation, for the good reason that State and local conditions vary so much that it is impractical to try to deal with them on the basis of a single FPC order affecting as many as five or six States at a time.

An example is the recent FPC order in the case of Cities Service. The FPC

order reversed the decision of the administrative law judge and declared a moratorium on all new residential hookups after January 1, 1978. Many of the small communities served by Cities Service provided gas only for residential use. The effect of the FPC order is to deny growth to these communities and to make the gas they might otherwise use for home heating available for such low priority industrial uses as boiler fuel and space heating.

I am under no illusion that this is a simple problem and I recognize there may be cases where industrial use of gas should have precedence over other high priority uses, including heating of schools and other public buildings. My amendment attempts to deal with those complexities by leaving it to the State and local jurisdictions to tailor their own programs within the volume of gas made available to them by the FPC.

Certainly, this is an important policy question which needs to be addressed by Congress in the context of its overall energy program. The action of the FPC in the Cities Service case makes it clear that we can no longer allow the issue to be decided on a case-by-case basis.

Mr. JACKSON. Let me say to the distinguished Senator from Missouri that I agree with his statement that the question of how we distribute available supplies of natural gas is of major importance and must be addressed by the Congress. Having said that, however, I would still hope that the Senator from Missouri will not press his amendment at this time on this particular bill.

The Committee on Energy and Natural Resources has just completed its hearings on natural gas price policy legislation. We hope to begin our markup of that legislation before the end of the month, possibly even next week.

I believe it would be more appropriate to consider the curtailment priority issue in connection with that legislation instead of in the context of the Outer Continental Shelf legislation.

Mr. EAGLETON. Can I have the commitment of the distinguished Senator from Washington that the curtailment issue will be considered as part of the natural gas package?

Mr. JACKSON. I can certainly assure my colleague that the issue will be considered. While the Carter natural gas price policy legislation does not address the issue, two other bills before the committee do so. The Senator from Missouri's bill which parallels this amendment, S. 1814, is before the committee. S. 256, cosponsored by Senators PEARSON and BENTSEN, has a curtailment priority section and has already been subject to extensive hearings before the committee. There is no doubt in my mind that the issue will come up during the committee's natural gas markup sessions. I will assure the Senator that his proposal will be discussed by the committee at the appropriate time.

Mr. EAGLETON. With that assurance, I will not press my amendment at this time. I ask unanimous consent that letters from the Federal Power Commission and the Federal Energy Administration, commenting on my amendment, be printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

FEDERAL ENERGY ADMINISTRATION,
Washington, D.C., July 13, 1977.

Hon. HENRY M. JACKSON,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR SENATE JACKSON: I have reviewed S. 1814, the proposed amendment to the Natural Gas Act which will require the Federal Power Commission or its successor agency to extend high priority classification under natural gas curtailment plans to uses of natural gas which are essential to protect life, health, or the maintenance of physical property. I understand that the provisions of S. 1814 will be offered as an amendment to S. 9, the Outer Continental Shelf Lands Act Amendments of 1977.

I concur that such essential uses for natural gas should be given a higher priority than industrial process or feedstock uses. In fact, this definition of essential uses was proposed and adopted in the Emergency Natural Gas Act of 1977 for purposes of reallocation of natural gas among pipelines. It would seem consistent to curtail natural gas using the same basis; however, there may be somewhat different considerations between priorities in an emergency and those which should be adopted as a long range curtailment policy.

FEA does not believe that consideration of the Outer Continental Shelf Lands Act Amendments of 1977 is a proper forum for deciding natural gas curtailment priorities. FEA believes that this very significant policy decision should be resolved in the broader context of deliberation on the natural gas provisions included in the National Energy Act.

For these reasons, FEA opposes adoption of the proposed amendment to S. 9, the Outer Continental Shelf Lands Act Amendments of 1977.

Thank you for providing me an opportunity to comment on this proposal to amend S. 9.

Sincerely,

JOHN F. O'LEARY,
Administrator.

FEDERAL POWER COMMISSION,
Washington, D.C., July 13, 1977.

Hon. HENRY M. JACKSON,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your letter of July 11, 1977, requesting my views on a proposed amendment to S. 9 which is identical to S. 1814, enclosed with your letter.

It is my understanding that this proposal is in response to Commission Opinion No. 805 issued on June 14, 1977, concerning the Cities Service Gas Company curtailment case. Since the Commission's opinion is now pending on rehearing, it would be inappropriate for me to discuss the proposed legislation insofar as it relates to pending Commission matters. Some general policy issues raised by the proposed amendments, however, are noted for your consideration.

In general, the proposed amendment would legislate a series of "high priority uses" to guide Commission adjudication of curtailments of service by interstate natural gas pipelines. In past testimony before Senate and House committees, the Commission has supported the enactment of legislative guidelines in this most difficult area of allocating limited supplies of interstate natural gas. The lack of legislative guidelines is reflected, in part, by the fact that the Commission's curtailment orders have been in continuous litigation since 1971.

It is clear that this issue of resources allocation is one which has profound implications for the entire nation. Thus, it is my belief that it is a policy issue which should be approached with sufficient opportunity to consider and weigh the many relevant factors before reaching a decision on the merits, including, for example, the relative impact of the legislation upon individual regions of the nation. In my opinion, the proposed amendment to S. 9 does not appear to provide the Congress with sufficient opportunity to consider such factors.

I appreciate the opportunity to present my views on the proposed legislation.

Sincerely,

RICHARD L. DUNHAM,
Chairman.

Mr. DOLE. Mr. President, I have joined with my distinguished colleagues from Missouri, Senators EAGLETON and DANFORTH, and my distinguished senior colleague from Kansas, Senator PEARSON, in an attempt to insure that homeowners will not be forced to bear the burden of our past errors in gas price regulation.

The FPC in recent weeks has publicized their concern for a worse gas shortage next winter than last, even though gas production is rising this year as a result of emergency deregulation-type gas prices. The FPC has also decreed that Cities Service Gas Co. must curtail new residential connections, even though Cities Service production also has improved this year.

The ultimate solution to gas distribution lies in deregulation and a free market process with other energy sources. All energy costs are obviously rising, forcing energy users to more carefully evaluate the most efficient, least expensive fuel for their own needs.

Industrial and large commercial users have been changing to alternate fuels as rapidly as possible. Schools and hospitals are trying to convert, but their budgets do tend to complicate their problems. I am studying ways to assist schools and hospitals meet these temporary needs.

Residential users have the greatest difficulty in meeting the higher costs of energy, particularly in the Midwest and Southwest where gas has been so plentiful and inexpensive. To completely deny them any residential use during this transition period adds even more burden. With deregulation, we would have a balance within a few years in which gas would be used only for those requirements which cannot be met by other energy sources. Residential use would continue to be one of those applications in many cases.

I say to the Senator from Washington, I am very pleased to learn that his natural gas price policy legislation could be ready as early as next week. The FPC opinion at issue here is nearing final implementation this week. Time is of the essence.

I have received many calls and letters from Kansans who feel this FPC ruling was unnecessary and penalizes the wrong people even if it were justified. After considerable study, I agree with them and have made every effort to ultimately set aside this ruling.

However, on the chairman's assurance of quick action with his new legislation, I concur that we should not press this amendment at this time.

Mr. PEARSON. Mr. President, I have joined my distinguished colleague from Missouri (Mr. EAGLETON) in cosponsoring the pending amendment, because of the urgent need to address a most serious issue. Deepening and pervasive curtailments of natural gas service experienced by many major interstate pipelines and their customers over the past 7 years have resulted in nationwide economic and social dislocations and hardships.

When a necessary commodity is in scarce supply and high demand, shortages will inevitably occur. This is precisely the situation in which our natural gas dependent nation finds itself. Due to the tremendous reliance by all segments of our society on this essential natural resource, it is imperative that we decide and implement the best national policy with respect to natural gas at the earliest possible date.

The recent Federal Power Commission order imposing a permanent curtailment plan upon the Cities Service Gas Co. is indicative of the difficulties that arise in an energy shortage situation. Under that curtailment order many end-users which serve essential human needs, such as hospitals and nursing homes, would be forced to seek expensive alternative sources of energy. In addition, due to load growth limitations placed on the Cities Service system by the curtailment plan, hundreds of communities, many of them rural and small, will be unable to develop in an orderly manner due to inability to acquire necessary volumes of natural gas for residential use.

I find the Cities Service order particularly perplexing with respect to my own State of Kansas which is a major producer and net exporter of natural gas. It is understandably difficult for Kansans to rationalize why they should not be allowed access to natural gas produced in their own State while such gas is being made available to millions of others located outside of Kansas.

No doubt, the legislation which we have proposed would adversely affect other essential users of natural gas. Essential agricultural uses of gas other than farming—such as natural gas used in fertilizer production—would not qualify for the highest priority classification contained within the pending amendment. However, it is my conviction that a denial of natural gas to these processes that are essential to food and fiber production would cause irreversible injury to the Nation and world's consumers.

Mr. President, yesterday I received a letter from the National Council of Farmer Cooperatives which further describes the situation I have just mentioned. I ask unanimous consent that the letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
July 14, 1977.

Hon. JAMES B. PEARSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PEARSON: Members of the National Council of Farmer Cooperatives are major users of natural gas, primarily for fertilizer manufacturing and food processing. As a result, the Council strongly opposes an Amendment No. 487 to S. 9 and S. 1814 designed to permit wholesale additions of new customers (residential and commercial) to the nation's natural gas system. This legislation would severely restrict FPC authority to limit new customer additions during this period of declining natural gas supplies.

A recent FPC curtailment projection indicates that interstate pipelines will have less gas available for delivery next winter than they had during the 1976–77 heating season. In releasing the report the Commission said:

"The report shows that pipelines project a net incremental deficiency of firm gas deliveries for next winter of 169.9 billion cubic feet, meaning they expect to have that much less gas available to deliver than was available last winter." (FPC Bureau of Natural Gas Staff Report, June 1977)

In view of declining supplies of natural gas, service to high priority feedstock and process users, as well as residential customers, is threatened. Adding new residential loads at this time will magnify the problem of maintaining service to these customers. In a similar case, the FPC said:

"[N]ew customers will result in a greater first priority load factor, indicating that very few lower-priority users would be available to be curtailed during times of peak use . . . If colder than normal weather appears and the middle levels are already curtailed, there is nowhere to curtail but upward. Thus the [new] customers served . . . may also have unheated homes 10 years later because of it." (*Northern Natural Gas Company*, Initial Decision 14, Docket No. CP76–52, et al.)

This legislation also attempts to distort the basic premise of long standing FPC policy of placing existing residential customers in the highest curtailment priority in an effort to encourage addition of new residential customers. It is generally recognized that residential service is interrupted last in a curtailment plan because a reduction in service presents serious safety problems. (*Texas Eastern Transmission Corp.*, Docket No. RP74–39–3, January 20, 1975.) This safety reason for placing residential users in Priority 1 applies only to previously attached users and does not relate to the issue of whether new residential customers should be added.

The National Council is particularly concerned that the proposed legislation ignores the necessity of protecting certain high priority industrial uses of natural gas. By definition the FPC has characterized industrial process, feedstock and plant protection requirements as high priority uses for which there is no substitute. In agriculture, failure to provide sufficient supplies of natural gas for these purposes will result in declining output and higher food prices. Of course, curtailment of gas service to feedstock and process users in other industries will result in lost production, plant shutdowns and unemployment.

Service to new residential customers during this period of declining supply will be at the expense of existing natural gas customers. By encouraging growth, sustained curtailment of process and feedstock loads is greatly enhanced since an increasing share of supplies are reserved for the highest priority uses of residential and certain commercial customers.

It is important to note that this letter is not an effort to justify low priority industrial uses of natural gas nor is it an effort to suggest that existing residential customers not be accorded the highest priority in any allocation plan. The National Council is acutely aware of increasing natural gas curtailments and supports the need to conserve remaining supplies for high priority needs including industrial uses for feedstock and process requirements.

Instead of promoting conservation as natural gas supplies decline, the legislation has the effect of encouraging additional natural gas consumption. Due to the nature of pipeline curtailments, local distribution companies and interstate pipelines will be forced to engage in a race to add as many new residential customers as possible in order to receive increased allocations of natural gas. In fact, a pipeline or distribution company that does not add new residential users will find itself in a position of losing gas to other companies which promote the addition of new residential customers.

While the measure purports to leave the issue of load growth to state utility commissions, the legislation may actually prevent a particular state from acting in the best interests of its residents by ordering a moratorium on load growth as a result of declining natural gas supplies. A state that unilaterally orders a moratorium will be placed at a competitive disadvantage with other states and as a result will lose some existing gas to states which do not order such a moratorium.

In summary, S. 1814 and Amendment No. 487 will reverse years of careful planning and curtailment implementation by the FPC, interstate pipelines and their customers and will compel local gas distribution companies to add new loads to their systems in order to avoid erosion of their share of gas supplies. States would be powerless to control load additions because a unilateral moratorium would simply divert gas from that state to neighboring states which do not impose a moratorium. Finally, the legislation removes all protection from critical high priority industrial users which by definition have no substitute fuel capability causing a potential threat to jobs and production in vital industries.

Sincerely,

BILL BRIER,
Vice President, Energy and Natural Resources.

Mr. PEARSON. The distinguished Senator from Washington has stated that the Energy and Natural Resources Committee, which he chairs, will consider curtailment priorities when his committee takes up overall natural gas policy in the very near future. The so-called Pearson-Bentsen bill, S. 256, is pending before that committee and contains proposed statutory priorities for pipeline curtailments which I believe are equitable. I would hope that the Energy Committee would focus on both my bill and the pending amendment in attempting to establish a workable and fair allocation scheme for delivering scarce supplies of natural gas to essential users.

Mr. President, in conclusion, it is my belief that the true solution to the curtailment situation must come through the establishment of a comprehensive natural gas policy which will maximize production while at the same time will phase out unessential uses of natural gas. It is in the national interest for the Senate to consider and act on such a policy in the very near future.

Mr. EAGLETON. Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

UP AMENDMENT NO. 658

Mr. JOHNSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) for himself, Mr. LONG, Mr. BENTSEN, and Mr. GRAVEL, proposes an unprinted amendment No. 658.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 157, after line 2, insert a new Section 205(a)(6)(B) as follows and renumber succeeding sections accordingly:

"The lease tracts to which the bidding systems authorized by subparagraphs (B) through (G) of paragraph (1) of this subsection are to be applied shall be chosen by random selection following receipt by the Department of public nominations of lease tracts to be included in a proposed lease sale, but prior to the initial announcement by the Bureau of Land Management of the tracts selected for incusion in the proposed lease sale. The Secretary shall immediately following such selection publish a notice in the Federal Register designating the lease tracts selected and the alternative bidding system or systems which shall be used for each such lease tract."

Mr. JOHNSTON. Mr. President, I shall be very brief. I hope the manager of the bill will listen to this. I think this is a very reasonable amendment. I hope not to speak more than 3 or 4 minutes.

All this amendment does, Mr. President, is to provide that as to those new kinds of bidding procedures which are selected, that they be selected on a random basis on leases. Under this amendment, we can have 50 percent of the leases on the new basis. All I would like is for that 50 percent to be on a random basis.

The PRESIDING OFFICER. The Senate will be in order. Senators will please take their seats or retire to the cloakrooms for conversations.

The Senator from Louisiana is recognized.

Mr. JOHNSTON. As I say, Mr. President, I hope this amendment can be accepted. All it provides is that we accept those on a random basis and we do not skim all the cream off the top of the milk by taking all of the best leases and putting them in on any particular kind of basis.

The facts show that some 30 percent of the offshore leases produce oil. Some of those are a lot better than others. I simply would like that selection to be on a random basis. I hope the manager of the bill can accept the amendment.

Mr. JACKSON. Mr. President, I suggest the absence of a quorum, the time not to be taken out of either side at the moment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DURKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded for the sole purpose of proposing a unanimous-consent request with respect to staff assistants on the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. Mr. President, I ask unanimous consent that Mark Kovin be accorded the privilege of the floor during consideration and vote on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll, subject to the same condition.

The second assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 658

The PRESIDING OFFICER. Who yields time?

Mr. JACKSON. Mr. President, I suggest the absence of a quorum, on the same basis.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. JACKSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JACKSON. Mr. President, the Senator from Louisiana (Mr. JOHNSTON) has offered an amendment. I have some reservations about that amendment, but I am prepared to take it to conference. I think we ought to go into it further. He does raise some points that I think have some merit. In the interest of time—and I know of the Senator's deep concern about this problem—I think the sensible thing is to accept the amendment at this time. I am willing to do that.

Mr. JOHNSTON. I thank the Senator.

Mr. BENTSEN. Mr. President, I have always been a supporter of an alternative bidding system. In fact, in 1974, I introduced a production sharing proposal similar to the Indonesian contract which provides recovery first of costs to the producer, then a sharing of net profits above the costs of production. My goal at that time was to insure the maximum possible competition for our offshore resources without sacrificing any needed production. This is still my aim.

However, the committee has recognized that the bidding systems it proposed are untried. The Department of the Interior has very little experience with any method other than the cash bonus system.

In order to gain this experience, I propose that the Secretary of the Interior choose by lot the tracts where the alternative bidding systems will be used. A lot selection process will provide the department with opportunities to test these methods in various situations.

We do not want a situation a Government administrator might choose to try this alternative bidding just on what he estimates to be the best structures and leave all the cash bonus bids to the poorer structures; such a procedure would distort the results.

Mr. President, all this amendment will provide is that when the Department of the Interior experiments with the country's OCS land, it will try these bidding systems on all types of acreage.

Mr. JACKSON. I yield back the remainder of my time.

Mr. JOHNSTON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana (Mr. JOHNSTON).

The amendment was agreed to.

AMENDMENT NO. 502

Mr. CRANSTON. Mr. President, I call up amendment 502 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes amendment 502.

On page 157, line 1, delete the phrase "outside the Santa Barbara Channel".

On page 194, lines 12 and 13, delete the phrase "or the Santa Barbara Channel".

On page 195, line 12, delete the phrase "or the Santa Barbara Channel".

On page 196, lines 15 and 16, delete the phrase "or the Santa Barbara Channel".

Mr. CRANSTON. Mr. President, this amendment is a very simple one. It would remove language, where it appears in four places in the bill, which affects the Santa Barbara Channel off the coast of California. As the bill is now written, the Santa Barbara Channel is treated as if it were a well-developed oil- and gas-producing region analogous to the Gulf of Mexico. In fact, it is not. By eliminating the language, as my amendment proposes, the Santa Barbara Channel is restored the full protections envisioned by S. 9 for all other OCS regions. The Santa Barbara Channel is not only at a relatively early stage of development with respect to oil and gas production, but it is a geologically unstable region deserving of the full procedural protections of S. 9.

There is much else that I am prepared to say about this amendment, but I do not know that that is necessary. I have discussed it with the distinguished floor manager (Mr. JACKSON). I understand that he supports it. I should be grateful for his comments and his help.

Mr. JACKSON. Mr. President, I understand that the main thrust of the amendment is to make certain that the Santa Barbara channel is included within the provisions of the pending legislation.

Mr. CRANSTON. That is correct.

Mr. JACKSON. Mr. President, we have had a slight bit of controversy in the past over drilling in that area. That is the understatement of the year. I think this amendment is in order. I am prepared to accept it.

I yield back the remainder of my time, if the Senator is willing to yield back his time.

Mr. HANSEN. Mr. President, there is some interest on our side in this. In order to expedite things—not to try to delay them—I suggest the absence of a quorum and that the time be charged to neither side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. JACKSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JACKSON. Mr. President, I ask unanimous consent that the pending amendment, the Cranston amendment, be set aside temporarily so that we can consider an amendment by Senator HATCH, where there is no controversy, so we can act expeditiously.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 659

Mr. HATCH. Mr. President, I call up my amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes unprinted amendment No. 659.

Mr. HATCH. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 206, line 12, insert the following after the word "Act"; "but no information transmitted by the Secretary hereunder shall identify any particular tract with the name or names of any particular party so as not to compromise the competitive position of any party or parties participating in the nominations."

INTEGRITY OF THE BIDDING SYSTEM

Mr. HATCH. Mr. President, this amendment protects the confidentiality of each party's bid on each particular OCS tract when the Secretary gives information to the States about the bidders and the tracts nominated. A State may need to know which tracts in a pending sale received nominations, or how many nominations a tract has received, it may even want to know what companies are bidding, but it does not need to know which particular tract has been nominated by a particular company. If such information were somehow to become public, it would compromise the competitive positions of each company and destroy the fairness of the bidding. The amendment simply insures the integrity of the tract nominating system.

I am prepared to yield back the remainder of my time and move that this amendment be accepted.

Mr. JACKSON. Mr. President, I see no objection to this amendment. I am prepared to accept it.

I yield back the remainder of my time.

The PRESIDING OFFICER. Without objection it is so ordered.

The question is on agreeing to the amendment.

The amendment was agreed to.

AMENDMENT NO. 504

Mr. KENNEDY. Mr. President, I call up my amendment and ask that it be stated.

The PRESIDING OFFICER. It will take unanimous consent to further set aside the Cranston amendment.

Mr. JACKSON. Mr. President, I ask unanimous consent that the Cranston amendment be temporarily set aside pending the consideration of the Kennedy amendment.

Mr. CRANSTON. May I ask how long that amendment will take?

Mr. KENNEDY. I give assurance that if it does get into any longer consideration, I shall be glad to yield to consider the Cranston amendment whenever it is agreeable. This might take until 6 o'clock.

The PRESIDING OFFICER. Without objection, the clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) for himself and Mr. METZENBAUM, proposes amendment No. 504.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, after line 10, insert the following new subsection and redesignate succeeding subsections accordingly:

(f) After December 31, 1980, it shall be unlawful for any person who owns or controls a pipeline which is used in transporting petroleum on or across the Outer Continental Shelf, to transport by such pipeline any petroleum which such person has produced, owns or controls, or in which such person has an economic interest. For purposes of this subsection—

(1) the term "person" includes all affiliates of such person;

(2) the term "affiliate" of a person means any other person which controls, is controlled by, or is under common control with, such person;

(3) the term "petroleum" means crude oil or condensate; and

(4) "control" shall be deemed to exist whenever any person owns or has the power to vote 10 per centum or more of the outstanding voting securities of a corporation or other entity.

Mr. KENNEDY. Mr. President, this amendment would separate the ownership and operation of the petroleum pipelines on the Outer Continental Shelf from other industry operations. The purpose of it is to insure that the pipelines on the Outer Continental Shelf are operated as common carriers. This would insure that they are operated in such a way that all the shippers have equal access to the pipeline transportation.

In legislation affecting common carriers we have recognized the inherent conflict of interest when the carrier is permitted to ship his own goods. For example, Congress has prohibited railroads from shipping goods in which they have an interest. The recent report of the Department of Justice on deepwater ports quotes internal memoranda from a large oil company as saying: "In practice, privately owned carriers have not been readily accessible to nonowners." And, "* * * there are many subtle ways that nonowners can in effect, be locked out by limiting grade, tankage use, batch size, scheduling, etc."

Aside from being able to exclude independent competitors from low cost transportation, the major companies that own pipelines are able to expand their control over the industry's crude supply. This, in turn, enables them to exercise monopoly power at the refining and marketing levels. Last year, the Judiciary Committee, in a report, concluded that:

Control of the crude oil pipeline system greatly expands the major's control of the domestic crude supply far beyond the amount they produce themselves.

Attorney General Levi, in his deepwater ports report, concluded that integrated companies as owners of pipelines have an incentive to restrict capacity and access through various overt and subtle devices in order to enhance their profits in downstream markets.

There are a number of independent pipelines presently in operation, Mr. President. They have two characteristics. First of all, they are very profitable. Second, because they are independent they seek consumers by providing services rather than trying to limit access.

Mr. President, I know there were not hearings on this particular aspect of the OCS development, although in the Antitrust Committee, over the period probably in the last 10 years under Senator HART, a very ample record was developed on this particular issue.

It is not really a strange issue to the Members of this body because there have been very extensive hearings over this period of time.

It does seem to me appropriate that as, we are moving in this important area of development on the Outer Continental Shelf, and particularly since we are talking about production on public lands, that basically belongs to the American people, that we insure as much competition as is possible in the production and the movement of this particular product.

For these reasons, it seems to me appropriate to call up this particular amendment.

I have had a chance to talk with the manager of the bill briefly about this particular amendment. I was interested in gaining his reaction to this particular proposal and see if it is not possible to work out, I think, at least some arrangement to insure the greatest degree of competition as we proceed to meet our energy needs.

The Outer Continental Shelf development is an extremely important part of the President's program and we on the Antitrust Committee have been reviewing the different aspects of the President's program in terms of the competitive impact.

There are a variety of different issues that will have to be considered in the fashioning of a national energy policy and the competitive aspects are not an unimportant feature of it.

It seems to me, as we move into a new area of development and encouragement, that this particular issue should be addressed.

Mr JACKSON. Mr. President, I must say that the Senator has raised very important questions. I am sympathetic with what he is trying to do, and that is to enhance competition.

I express the hope that he would defer action on this amendment on the very important work that he is engaged in as

chairman of the Antitrust Subcommittee of the Senate Judiciary Committee, until such time as we in our committee have had a chance to really get into this problem in more detail.

We have not made a record here, that is, in our hearings, and I would respectfully request my good friend to defer action at this time in light of the things we have to do that are very important in connection with adequate marshaling of all the facts.

I am certainly sympathetic with the need to enhance the competitive marketplace, which is the thrust, really, of the Senator's amendment.

Mr. KENNEDY. I appreciate the comments of the Senator from Washington and indicate to him the interest of the members of our Antitrust Committee in working closely with him as he and the members of the Finance Committee examine the legislative proposals of the administration and those proposals which have been developed in the Congress to deal with the energy program and to work in helping to consider the competitive impact, because it is an extremely important aspect.

This issue of the separation of the pipelines, from the major companies, is going to be something we will work on during the period of this debate and discussion.

But I understand the position that has been taken by the Senator from Washington and what I would like to do is send a somewhat different amendment to the desk as a substitute for that amendment and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator withdraw his amendment?

Mr. KENNEDY. I withdraw my amendment and send another to the desk.

Mr. JACKSON. Before we act on this, the junior Senator from California has arrived, may we complete action on the Cranston amendment?

Mr. KENNEDY. Fine. I am more than glad to withhold that amendment if I can be assured of recognition at the conclusion of it.

Mr. JACKSON. Mr. President, I ask unanimous consent that immediately after consideration of the Cranston amendment, the Senator from Massachusetts be recognized for the offering of the amendment which has been sent to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 502

The clerk will state the amendment of the Senator from California.

The assistant legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) proposes amendment No. 502.

Mr. HAYAKAWA. Mr. President, I rise in opposition to the amendment offered by my good friend and colleague from California, Senator CRANSTON.

As my colleagues know, this amendment would redefine the Santa Barbara Channel off the coast of California as a "frontier area." That is, an area where no prior exploration or production activities have taken place.

Mr. President, there are currently 3 leases with a total of 200 wells actually producing oil in the Santa Barbara Channel, and there are 17 more leases that have discoveries and could possibly produce. I find it difficult to understand how we can call such an area a frontier.

My colleague's concern stems from the 1969 blowout in the Dos Quadres field. However, the problems associated with that blowout have been corrected.

That was 8 years ago and I do not know how many more decades we will have to worry about that which happened in 1969.

That blowout was caused by an improperly installed blowout preventer and thus was a mechanical failure, not a geological fault. In addition, since the blowout, a technician has been in the field every single day carefully inspecting each well to insure safety.

Mr. President, the protection afforded frontier areas in the bill we are debating today is designed to apply highly exacting standards and procedures to areas that have never been explored.

Exploration has been taking place in the Santa Barbara Channel for almost 10 years. To apply these same standards to an area already producing could cause the entire Santa Barbara Channel to be unnecessarily shut down. The leases in this area produce approximately 40,000 barrels of oil per day. Do my colleagues really want to stop production of that much American oil?

I believe it is important to point out that there are already sufficient measures in the bill which would add additional environmental protection practices to the Santa Barbara Channel.

The Coastal Zone Management Act amendments adopted by Congress last year, which are now law, give the Governor the right to veto all future exploration plans as well as future development and production plans in the Santa Barbara Channel, as soon as the California coastal zone management program is approved.

S. 9 also provides for input from California to the Secretary of Interior regarding the Outer Continental Shelf in the Santa Barbara Channel. It states that the Secretary has to accept the State's recommendation for the channel unless he makes a specific finding that a contrary decision is necessary.

Mr. President, I suggest that the need for this amendment has not been demonstrated and the delays it would produce are unwarranted and unnecessary. Therefore, I hope my colleagues will join me in voting against it.

In summary, Mr. President, I do not believe the frontier designation for this area is appropriate and that is the reason for my objection.

Mr. CRANSTON. Mr. President, there is no suggestion in my amendment that the Santa Barbara Channel is a frontier area—defined by the USGS as a region about which we know little of the geology. The point is that we know a great deal geologically about that area, and it is because of what we know about it that we feel that some protection should be applied.

Specifically, my amendment would do the following:

(1) It amends section 205(a) to include the Santa Barbara Channel within the provision which precludes the Secretary of Interior from applying a cash bonus/fixed royalty bidding system to more than 66⅔ percent of the total area offered for lease each year.

(2) It amends section 25 by striking the phrase "or the Santa Barbara Channel" where it appears in three places. By striking this language, my amendment restores to any new leases in the Santa Barbara Channel the requirement that the lessee must submit and the Secretary must approve a development and production plan prior to the development and production of oil or gas. Existing leases in the channel would not be affected by my amendment.

The development and production plan, set forth in section 25, is at the core of the policy reform in S. 9 which separates the exploration phase of OCS development from the production phase. This reform is endorsed by the National Governor's Conference, the National Conference of State Legislatures, and the Coastal States Organizations. I have advocated this reform for several years and am delighted that it is an integral part of S. 9. It is a significant mechanism which will improve the planning process for OCS development as well as enhance the participation of State and local governments in this process.

The thrust of my amendment, then, is to be certain that this key reform is applicable to the Santa Barbara Channel.

Mr. President, it is not clear to me just exactly why the committee bill contains the language exempting the Santa Barbara Channel from the various provisions of S. 9. I can only presume that the committee acted on the mistaken assumption that the Santa Barbara Channel, like the Gulf of Mexico, has a long history of oil and gas production that would make the application of S. 9 burdensome.

In fact, the two regions are not analogous. Until December 1975, the Federal OCS leasing program was confined primarly to the Gulf of Mexico. The only exception to this was the small area leased in the Santa Barbara Channel in 1968.

As of calendar year 1976, the Gulf of Mexico was producing 1,000 times more gas than the Santa Barbara Channel and 22 times more oil. In the Santa Barbara Channel, of the 72 leases sold to date, only three are currently producing.

Moreover, the history of Santa Barbara Channel oil development since the disastrous blowout in January 1969, is instructive. Just days after the massive blowout and spill, then Secretary of Interior Walter Hickel ordered the suspension of drilling and production operations on six active leases and safety reviews were made of all other leases in the channel to determine if further operations could be conducted safely. Clearance to proceed were granted on a lease-by-lease basis. In addition, Secretary Hickel issued a Public Land Order in March 1969, withdrawing from leasing certain Outer Continental Shelf lands adjacent to the State of California's Santa Barbara oil sanctuary,

thereby creating a Federal ecological preserve.

In 1970, the administration submitted legislation to the Congress to terminate 20 existing leases immediately seaward of the State oil sanctuary, the Federal ecological preserve and the Federal buffer zone. In 1971 and again in 1973, similar legislation was submitted to the Congress by the administration but was expanded to terminate 35 existing leases in the channel.

This situation prevailed until November 1973, when in testimony before Congress on pending Santa Barbara Channel legislation administration witnesses announced a reversal of position and withdrew administration support from its own bill to create a Federal ecological preserve in the channel.

Subsequently, on August 16, 1974, the Acting Secretary of the Interior John Whitaker approved the plan of development for the Santa Ynez unit in the northern part of the channel. Production on this structure has not yet commenced.

A parallel development occurred on the State of California's tidelands in the channel. Immediately after the 1969 spill, the State lands commission, the State agency responsible for administering the State tidelands, suspended activities on State leases in the channel. This order was not lifted until December 11, 1973, when the State lands commission voted to end the moratorium on State tidelands production. Actual production on State leases is only recently resuming, however, because the decision to resume production required both an environmental impact report, pursuant to California law, and a permit from the State coastal commission.

In sum, while there is a history of Federal and State oil and gas development in the Santa Barbara Channel, the intervening suspension of activities resulting from the 1969 spill has left the channel today in an early stage of development.

OCS lease sale No. 48, a major new lease sale off the coast of southern California, was scheduled to occur in March 1978, until Secretary Andrus' recent decision to revise the OCS leasing schedule. Under the revised schedule, lease sale No. 48 has been postponed, probably until 1979 or 1980. This sale proposes to offer for sale a total of 217 tracts, of which 108—545,633 acres—are in the Santa Barbara Channel. Unless my amendment is adopted, these 108 leases would benefit from none of the procedural protections of section 25. As my amendment would not affect existing leases in the channel, I see no reason why the sale of future leases should be denied the protections afforded all other areas of the OCS by S. 9.

To exclude the Santa Barbara Channel from important provisions of this bill would not only be unwise and unfair, it would also do violence to the principle of State and local participation in Federal decisions affecting local interests and local living.

A major thrust of this bill—especially section 25 which is at issue here—is to give a greater role to State and local governments in the management of oil and natural gas resources in the Outer Continental Shelf, and in the protection of marine life and the coastal environment.

Specifically, for example, section 25 provides for a development and production plan to be formulated by the lessee and to be submitted for Department of Interior approval.

That plan would also be submitted to the affected State, county, and city governments for their consideration, comment, and criticism.

That is, all States and local governments except those in the gulf area and the Santa Barbara Channel.

Under the present bill, no such development and production plan would be required of any lessee in the channel and no mechanism would be provided for input by the State of California, the county of Santa Barbara, or any of the cities or communities concerned.

Why should the State of California and local governmental entities around the Santa Barbara Channel be denied the opportunity to have a say in Federal decisions vitally affecting their economies and their way of life?

Why should they be denied what most other States and localities in the Nation are being afforded?

Why should the citizens of California have to pray that people in Washington—3,000 miles away and far less familiar with local conditions—will have the sense and judgment to make right decisions about such locally important matters?

Not all wisdom resides in Washington. Not by a very long shot. As a matter of fact, in cases such as these, far more wisdom resides in the people of the States and communities intimately knowledgeable about local conditions and personally affected by basic changes in those conditions.

My amendment would give back to the people of California and the Santa Barbara area basic rights that this bill has taken away from them.

I urge that every Senator concerned about conserving and protecting environmental quality, concerned about conserving and protecting our natural resources and concerned about conserving and protecting State and local rights against unnecessary Federal preemption vote for my amendment.

I also want to make very clear that this is not an effort to prevent oil development in Santa Barbara Channel. It is simply an effort to make sure that that development is conducted in a sensible and orderly way.

Mr. President, I have discussed this amendment with the distinguished floor manager—Mr. JACKSON—and understand that he supports this amendment. I would be grateful for his comments at this time. And I will be happy to answer any questions.

Mr. HANSEN. I yield myself such time as I may require.

First, Mr. President, I express my high regard for the senior Senator from California, and I thank the junior Senator from California for performing a very worthwhile service.

In this bill, which has been the subject of consideration and markup for a long time by the Committee on Energy and Natural Resources, we recognized that there had been ongoing offshore development in both the Gulf of California and the Santa Barbara Channel for some time.

I think it would be easy to misunderstand what the junior Senator from California was saying. He was simply pointing out that there has been growing activity there.

I do not accuse the senior Senator from California of saying this at all; but in order that others may understand, I wish to make clear that the thrust of the remarks by the junior Senator from California was that there is a factual situation out there which reflects the presence of drilling rigs, of drilling activity, in the Santa Barbara Channel.

With that understanding, I have no desire further to delay action on the amendment of the senior Senator from California, and we are willing to accept it on this side.

Mr. CRANSTON. I yield back the remainder of my time.

Mr. HANSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. Under the previous agreement, the Senator from Massachusetts is recognized.

UP AMENDMENT NO. 660

Mr. KENNEDY. Mr. President, I call up my amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 660.

The amendment is as follows:

On page 152, after line 15 insert the following new subsection:

"(h)(1) Every right-of-way or other grant of authority for the transportation by pipeline on or across the Outer Continental Shelf of oil or gas shall require that the pipeline be operated in accordance with the following competitive principles:

"(A) The pipeline must provide open and non-discriminatory access to both owner and non-owner shippers;

"(B) Any shipper, owner or non-owner, able to provide a guaranteed level of throughput must have the unilateral right to demand expansion of throughput capacity within technological limits;

"(C) Any non-owner shipper must be able to demand an ownership interest in proportion to his guaranteed level of throughput at a cost reflecting depreciated replacement cost; and

"(D) Ownership interests must be subject to frequent revision to maintain ownership in proportion to throughput.

"(2) The Secretary shall consult with and give due consideration to the views of the Attorney General and the Federal Trade Commission on specific conditions to be included in any right-of-way, or other grant of authority in order to ensure that pipelines are operated in accordance with such competitive principles."

Mr. KENNEDY. Mr. President, this amendment would require the Secretary

to include in grants of pipeline rights-of-way on the OCS provisions which would implement four competitive principles: First, nondiscriminatory access to all shippers; second, right of shippers to demand expansion of capacity within technological limits; third, right of shippers to demand ownership share in proportion to throughput; and fourth, frequent revision of ownership to reflect throughput.

This amendment seeks to insure that OCS pipelines are true common carriers, accessible on equal terms to all shippers. It requires the Secretary to condition grants of pipeline rights-of-way with terms that will prevent the pipeline owners from abusing their natural monopoly position.

Improving the ability of smaller and independent producers to bid for OCS leases does little if their production simply falls into the control of the major companies who own the pipeline systems. Numerous investigations have concluded that integrated companies who own pipelines use their position to deprive nonowners of low-cost transportation. Moreover there is ample evidence that major companies have used their control of pipelines to enhance their control of crude oil supplies.

In his report on deepwater ports, Attorney General Levy concluded that integrated companies as owners of pipelines have an incentive to restrict capacity and access through various overt and subtle devices in order to enhance their profits in downstream markets.

While this problem could best be solved by separating pipeline operations from industry functions, the Department of Justice has proposed a second-best solution which involves implementing the four competitive principles set out in this amendment. These principles seek to limit the restrictive effects of shipper-ownership by opening the lines to all shippers and opening the owner's club to new members.

Mr. President, I have received a letter from John Shenefield as a result of questions during his testimony before our Antitrust Committee, and I should like to read the relevant portions:

I was asked whether there exists any regulatory device which could make a vertically integrated petroleum pipeline behave as if it were independently owned.

I believe that by requiring pipelines to operate pursuant to certain rules, is a second-best alternative to divestiture—

They favor the divestiture. But he indicated that establishing certain rules is the second best alternative.

. . . it might be possible to approximate independent operation.

Then he indicates what those rules would be. Those are the rules which have been incorporated in the amendment.

These conditions, I believe, would approximate the incentives which an independent pipeline owner has to maximize capacity and throughput.

Secondly, I would ask whether there exists any doubt in my mind whether particular petroleum pipelines ought now to be divested from their vertically integrated parent company.

Then he comments on that issue indicating that the Justice Department is reviewing it.

It seems to me if we had these rules accepted we would insure an important competitive element in the development, the production and the distribution of petroleum products off the coast, and I would hope that this amendment would be accepted so that in the letting of any pipeline rights-of-way those conditions could be complied with.

Mr. President, I ask unanimous consent to have the letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
June 30, 1977.

Hon EDWARD M. KENNEDY,
Chairman, Antitrust and Monopoly Subcommittee, Committee on the Judiciary, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: During the course of my testimony before the Subcommittee on June 23, 1977, you addressed to me two questions which I believe should be answered more fully.

First, I was asked whether there exists any regulatory device which could make a vertically integrated petroleum pipeline behave as if it were independently owned.

(Material to be supplied, transcript, page 118.)

I believe that by requiring pipelines to operate pursuant to certain rules, as a second-best alternative to divestiture, it might be possible to approximate independent operation.[1] The rules would be as follows:

(1) Crude oil and petroleum product pipelines must provide open and nondiscriminatory access to both owner and nonowner shippers.

(2) Any shipper, owner or nonowner, able to provide a guaranteed level of throughput must have the unilateral right to demand expansion of throughput capacity within technological limits.

(3) Any nonowner shipper must be able to acquire an ownership interest upon demand in proportion to his guaranteed level of throughput at a price reflecting depreciated replacement cost.

(4) Ownership interest must be subject to frequent revision to maintain ownership in proportion to throughput.

These conditions, I believe, would approximate the incentives which an independent pipeline owner has to maximize capacity and throughput

(Material to be supplied, transcript, page 121.)

Second, I was asked whether there exists any doubt in my mind whether particular petroleum pipelines ought now to be divested from their vertically integrated parent company.

While the problems arising out of vertically integrated ownership of pipelines, which I raised in my testimony, do, as a general matter, suggest the wisdom of divestiture, I do not think it appropriate at this time to commit the Department of Justice to seeking divestiture of any particular pipeline. There are two reasons for my reluctance in this regard. First, the Department has several investigations of pipelines in progress and I would not want to predict what decision we will reach with respect to one or more of those investigations. Second, we are currently weighing the respective benefits of proceeding through case-by-case litigation, based on the results of our investigations, and the efficacy of a legislative proposal to require divestiture in all cases.

I would like to thank you again for the opportunity to appear before your Subcommittee.

Sincerely yours,

JOHN H. SHENEFIELD,
Acting Assistant Attorney General, Antitrust Division.

Mr. HANSEN. Mr. President, will the Senator from Massachusetts explain for the benefit of the Senator from Wyoming how this changes existing law.

Mr. KENNEDY. Will, there is no requirement under the existing legislation that would separate the ownership of production from the ownership of pipeline operations on the Outer Continental Shelf.

I previously offered an amendment which would have separated ownership of production from the ownership of pipelines. The chairman of the committee indicated that this had not been a subject which had been developed during the course of their hearings, even though in the Antitrust Committee over a period of the last 10 years, and under the chairmanship of Senator PHILIP HART, I think a very substantial case has been made.

I think the more recently, the Deepwater Ports Report, issued under Attorney General Levi, and the conclusions of the present Assistant Attorney General for Antitrust, conclude that the separation is desirable in terms of the competitive situation.

But the present assistant attorney general indicated that a second best solution would be to insure that there would be certain protections for access to the pipelines by nonowner shippers and by the independents and, therefore, he set out four criteria which should be complied with.

The thrust of this amendment is to insure that those criteria would be complied with in the granting of rights-of-way for Outer Continental Shelf pipelines.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. KENNEDY. Yes, I yield.

Mr. BUMPERS. First of all, on behalf of myself, and I speak only for this side of the aisle, the committee would accept the amendment.

I am advised that this is essentially the same language now contained in the Deepwater Ports Act and, of course, I am always for anything that will guarantee competitive practices.

I had one question about the definition of "throughput," under subparagraph (b) which states:

Any shipper, owner or non-owner able to provide a guaranteed level of throughput must have the unilateral right to demand expansion of throughput capacity within technological limits.

Could the Senator put that in layman's language for me?

Mr. KENNEDY. Basically for "throughput" you could substitute the word "volume" in layman's language.

Mr. BUMPERS. I assume that is what it meant.

Well, as far as I am concerned, Mr. President, the amendment is acceptable. I cannot speak for the other side of the aisle.

Mr. HANSEN. What is that?

[1] *See* Report of the Attorney General on the Applications of Loop, Inc., and Seadock, Inc., for Applications for Deepwater Port Licenses (1976).

Mr. BUMPERS. As far as I am concerned, the committee on this side accepts the amendment.

Mr. HANSEN. Mr. President, I am pleased that the ranking member on the Judiciary Committee is here, Senator THURMOND.

Let me say while there is certainly much about this amendment that I do not understand and have not had an opportunity to study until now, it occurs to me we ought to understand that if a pipeline is built any place, as I read the amendment—and I have read it only hastily—whoever builds that pipeline undertakes some responsibilities to transport oil from other wells.

What bothers me about that is that part of the gain, part of the consideration in drilling wells and in trying to produce oil on the Outer Continental Shelf, has to contemplate not only the expenses in acquiring the lease, the drilling of the well and in producing the oil, but getting it to market as well.

I am just wondering what effect this added responsibility on the part of a well owner who wants to build a pipeline from his well to shore might have on his being willing to go ahead with the whole operation.

It occurs to me it would be a clear disincentive for an individual lease owner to have to contemplate and accept the added expense that seems to me to be implicit in this amendment. I may not be reading it correctly, but that offhand would be a concern I would have.

Mr. KENNEDY. There are a couple of points I mentioned. First of all, a pipeline is obligated under existing law to take oil on a nondiscriminatory basis.

But, second, the pipeline construction industry is a competitive industry. For example, in the development of the Outer Continental Shelf there are companies that would jump at the chance to build pipelines if they could get throughput commitments. But they are effectively precluded from that kind of competition at the present time.

There are pipeline companies that are prepared to enter the market, and I think it would have been preferable, quite frankly, to have permitted them to enter the market. But assuming now that they will not be permitted to enter the market, all this amendment does is to assure that shippers are going to be able to move their oil through, and are going to have their rights protected in an important and significant way, because the evidence, old studies, as well as recent studies, primarily, the deepwater ports report, indicate quite clearly that outsiders have a very significant competitive disadvantages in terms of being able to move a product.

These are just basic regulations, and I would hope this could be accepted and taken to conference; that the members of the committee would consult with the Justice Department on this particular issue, and that we would be able to convince the House as to its wisdom.

Mr. HANSEN. I thank the distinguished Senator from Massachusetts for his clarifying remarks.

Let me say I know so little about the operations of the Outer Continental Shelf that I hesitate to try to spell out what the situation there may be.

I can say, however, that inland one of the problems that is faced time and time again by drillers for oil is the cost of finding a way to get oil from the well to the market or to a pipeline. It is not so much a case of pipeline companies being willing to lay the pipe and to establish a pipeline as it is a problem of persuading someone, investors specifically, that there will be sufficient return from the pipeline to justify the expense.

I again speak with some degree of knowledge on that point, because I know a number of independents that have discovered oil that have had to haul that oil and, believe me, it gets to be a pretty onerous burden.

So I would not want Senators to think there are funds available and that people are just jumping over each other trying to build pipelines if only they had the authority to build them, because quite often it is just the other way around.

I would like to yield briefly to my friend from Louisiana.

Mr. JOHNSTON. Mr. President, this amendment, like some others we have had today, has a good ring to it when you look at it. I am trying to say we have not had hearings on it in the Energy Committee, so I cannot speak to it as an expert. But, on the face of it, it creates what seems to me to be some insoluble problems and, perhaps, the Senator from Massachusetts can help shed some light on this.

In the Gulf of Mexico we now have over 20,000 oil wells that are drilled out there. Every major oil company that I know anything about, or most of the majors, should I say, have drilled wells. In the process of producing that whole infrastructure in the Gulf of Mexico they have built a whole system of pipelines that serves particular areas of the gulf.

Now, frequently we will have consortia put together between the big oil companies and the independents, because it is so expensive.

Would not this amendment effectively preclude any of the majors from drilling in the Gulf of Mexico if they have pipelines out there already built?

Mr. KENNEDY. No. The answer to that would be categorically "No."

Mr. JOHNSTON. I mean if they have a pipeline built, let us say, to block 50 that serves, say, block 50 out in the Gulf of Mexico, they effectively cannot build on block 50 if their pipeline serves that block 50.

Mr. KENNEDY. This is not the divestiture amendment. I withdrew the divestiture amendment. What this would be is just the establishment of regulations for the utilization of pipelines. I favored the separate ownership of pipelines, but in light of the statements of the members of the committee it appeared appropriate to offer that at some other time. This would only establish regulations for pipelines in order to really carry through the basic legislative intent of the existing law going back I guess for about 50 years.

Mr. JOHNSTON. Let me ask this, then, and I thank the Senator for that answer: Is this entirely consistent with the Interstate Commerce Commission Act, or has that phase of it been studied?

Mr. KENNEDY. It is completely consistent. There has been some question as to the ICC's power to carry out effective regulation. I think it does, in a legislative form, the ICC should have been able to do. It is quite clear from the existing situation that additional law is needed in order to do the job of making pipelines common carriers.

Mr. JOHNSTON. These regulations would be promulgated and run by the Secretary of the Interior, would they not, and not by the ICC? If so, do we not then have bifurcation of regulatory authority here which can only result in conflicts? Is that not true?

Mr. KENNEDY. I do not see this as being any more complex than a variety of different regulatory situations. Quite frankly, what I would see happening is that this would be boilerplate language in the leasing arrangements and that would be the most important part of the Interior's involvement, and the enforcement of that could be done by the ICC. Basically, all we are trying to insure is that in the right-of-way grants these provisions be included. I think the enforcement could be done by the ICC. An arrangement could be worked out between the Energy Department and the ICC.

Mr. JOHNSTON. Certainly, the Secretary of the Interior is going to enforce his own regulations under this; is he not?

Mr. KENNEDY. Yes. He would enforce it, but in terms of working out the enforcement mechanism, it seems to me that something could be worked out. The Secretary of the Interior is going to insure that these provisions are complied with. Between the Department of the Interior and the ICC there can be an agreement on the implementation. We have a division of responsibility now between the Federal Trade Commission and the Antitrust Division for antitrust enforcement, just as we have other divisions of responsibilities between agencies. Obviously these are matters that can be worked out.

Mr. JOHNSTON. Mr. President, the trouble with this amendment is we do not really know what it does and what it does not do. I mean, everyone is for nondiscriminatory access to both owner and nonowner shippers. I believe the Interstate Commerce Act presently provides for that.

It may be and I am advised that it is in conflict with the recently enacted Deepwater Ports Act. I cannot say this is a fact. I am advised that that is so.

We are having a difficult enough time putting together deep water ports in the Gulf of Mexico. Sea Dock has recently fallen apart. The loop project in Louisiana is still alive at this time, but it is in serious trouble.

I hate to accept anything like this that has not had hearings which provides for a new group, that is, the Secretary of the Interior, to get into the business of providing regulations for pipelines out in the Outer Continental Shelf. There are a lot of things here that we do not

know precisely what they mean. For example, it says:

Any nonowner shipper must be able to demand an ownership interest in proportion to his guaranteed level of throughput at a cost reflecting depreciated replacement cost; . . .

Someone has to monitor constantly ownership interests, what is a guaranteed level of throughput, and what is cost. That is a job, it seems to me, that should properly be regulated by the Interstate Commerce Commission.

Mr. BUMPERS. Mr. President, will the Senator yield for a moment?

Mr. JOHNSTON. I yield.

Mr. BUMPERS. I say to the Senator from Massachusetts I have just been advised that the bill on page 151, already has a proviso which reads as follows:

That such oil or gas pipelines shall transport or purchase without discrimination, oil or natural gas in such proportionate amounts as the Federal Power Commission, in the case of gas, and the Interstate Commerce Commission, in consultation with the Administrator of the Federal Energy Administration, in the case of oil, may, after a full hearing with due notice thereof to the interested parties, determine to be reasonable, taking into account, among other things, conservation and the prevention of waste. Failure to comply with the provisions of this section or the regulations and conditions prescribed under this section shall be ground for forfeiture of the grant in an appropriate judicial proceeding instituted by the United States in any United States district court having jurisdiction under the provisions of this Act.

Let me ask the Senator from Massachusetts why is that language not satisfactory to accomplish essentially what he wants.

Mr. KENNEDY. Because it is the same language that exists in the Mineral Leasing Act and it has been rather ineffective. In response to the Senator from Louisiana earlier about the division of authority between Interior and the ICC, as I understand under the existing law, Interior has enforcement responsibilities regarding OCS pipelines under section 5(c) of the Mineral Leasing Act and the ICC also has responsibilities regarding the same pipelines.

So we already have existing a situation shared responsibility between Interior and the ICC. The particular language that the Senator read is language which had been included in the Mineral Leasing Act and has been found ineffective in dealing with present competitive problems at the present time, at least in the way it has been interpreted, implemented, and the way the regulations under it have been promulgated.

Mr. BUMPERS. There are two things about the Senator's amendment that trouble me. Would the Senator interpret subparagraph (b) to mean that a shipper could demand that the pipeline company expand to the point of building another pipeline if the shipper could guarantee a certain volume even if it might be uneconomical to do so?

Mr. KENNEDY. No. It is obviously a question of fact whether the expansion possibilities of the line itself are limited in technical terms.

What we have found in the deepwater ports situation, for example, the major companies have proposed to construct much more than they could economically construct, and the effect of that was to freeze out other users of the common-carrier facilities. That was the finding of the Justice Department, in the deepwater port investigation.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. BUMPERS. I yield.

Mr. HANSEN. Mr. President, I, too, am disturbed about this amendment. In recent days some of the earlier parties, though they had indicated an interest in building seadock in the Gulf of Mexico, have pulled out. I think Exxon was the most recent one to withdraw. I think Mobil, Exxon, and Gulf, together representing 52 percent of the interest in the project, have pulled out of the project. They did so primarily, I am informed, because the Department of Transportation letters contained these kinds of provisions.

I make that observation because, instead of broadening access to oil pipelines, I think it left precisely the opposite effect: Instead of making more pipelines available, it will result in fewer pipelines being built, and I was wondering if the Senator from Massachusetts would agree to strike subparagraphs (B), (C), and (D). Those are the ones that trouble this Senator.

There are, as the Senator knows, already antitrust laws on the books, so that some of the situations of which he is fearful, I think, are contrary to law now anyway.

I think that, absent hearings before the appropriate committees and consideration and markup by the Judiciary Committee as well as our committee, I would not want to support this amendment unless we could drop subparagraphs (B), (C), and (D).

Mr. BUMPERS. I do not know whose time this is.

Mr. HANSEN. On my time.

Mr. BUMPERS. There are two things that trouble me about the amendment. Under subparagraph (B), some shipper with 20,000 barrels of production a day could demand that another pipeline be laid, even though that 20,000 barrels of production would not pay that pipeline off in 100 years.

First, subparagraph (B) could be changed to some extent to make it not only within technological limits, but also to make it economically feasible.

Second, it appears that the Senator is turning this into a cooperative. If an owner wants to, he can make the demand that he be allowed to buy into it. This actually turns a pipeline company into a cooperative. I have difficulty with this provision, because someone has to stick his neck out for a lot of money.

I champion the thrust of what the Senator's amendment would do. I believe that pipelines indeed have in the past been discriminatory, and small operators have suffered as a result. In my State, as far as gas is concerned, we have had only one pipeline, and it has been a very unhealthy situation from time to time.

I wish the Senator would find it possible to accept the suggestion of the Senator from Wyoming. On behalf of the Energy Committee, I would be more than happy to guarantee to the Senator that we will hold hearings almost immediately, or as soon as possible, to discuss these three provisions, because they may have some merit if they were changed to some extent.

Mr. KENNEDY. Mr. President, let me respond to the Senator by saying the pipelines are, in the law, common carriers, and have been treated like common carriers with the exception that the integrated companies have been able to control them. The law does permit other common carriers such as airlines and railroads to be owned by shippers. That has been the law in this country during the last 50 years.

If you go before the ICC, you can require the expansion of railroad service. The ICC has that authority, to require the expansion of a spur in a particular area, just as they can permit a reduction in service.

We are tracking and following the common-carrier concept.

Mr. BUMPERS. It is true——

Mr. KENNEDY. Although in the popular view, pipelines are more often regarded as ordinary industry rather than utilities. We are attempting to develop similar concepts to those that apply to other common carriers, to apply them to pipelines, with the recognition that it has been because of the failure to apply such standards in the past that we have found extraordinarily noncompetitive or monopolistic factors at work in pipeline operations.

I am willing to work closely with the members of the committee. I was hopeful that we could profit on the basis of what we have found, or the Justice Department has found, in terms of the deepwater ports, and we could make sure that as we move into a whole new additional area, we could avoid the mistakes of the past.

But we are attempting to track what does exist in terms of common carriers and other utilities. We are doing it against the background of the fact that some of the most profitable operations in the country at the present time are the pipelines. The owners of the Colonial Pipeline Co., in the Eastern United States, recovered their investment in a 3-year period. Pipelines are usually safe and profitable investments.

Moreover, we are doing this against the background that there were independent pipeline operators closed out of competition in the development of the gulf.

(Mr. HART assumed the chair.)

Mr. BUMPERS. Mr. President, I do not believe this is an accurate or valid analogy between this and the ICC regulation of railroads. In that case, the shipper who wants a railroad to expand in order to accommodate him has to go before the ICC, which is the regulatory body constituted for that very purpose. There is no such provision in this amendment as far as I can see.

I have to confess that I have an aversion to a provision in the amendment, which says:

Any non-owner shipper must be able to demand an ownership interest in proportion to his guaranteed level of throughput at a cost reflecting depreciated replacement cost.

I am lost by that.

No. 1, I do not believe we are going to get anybody to build a pipeline with language like this on the books.

No. 2, there is not an element of equality or fairness in saying that somebody can come in and demand ownership. To demand, as under paragraph (B), that the shipper had the right to use the pipeline and that the owner could be required to expand within technological limits would be acceptable if we added, "as long as it is economically feasible to do so."

I think the last part of the Senator's amendment is excellent language, and I certainly subscribe to it. It says:

The Secretary shall consult with and give due consideration to the views of the Attorney General and the Federal Trade Commission on specific conditions to be included in any right of way or other grant of authority in order to insure that pipelines are operated in accordance with such competitive principle.

I think that is noble and fine language and I support it. But those other three subparagraphs cause me to pause.

Mr. KENNEDY. The difference, I would say, Mr. President, is that we are talking about a monopoly. Eastern Airlines flies from either New York to Boston or New York to Washington. Under their agreement with the CAB, if they have one more passenger than one plane will carry, they fly another plane. It is not possible for other airlines to come up there and start the business tomorrow. Eastern effectively has a monopoly on that kind of service.

The pipelines have a monopoly in terms of this particular service, an absolute monopoly.

If there were two pipelines out there, or three pipelines, these various provisions would not be applicable and this amendment would not be necessary. But with the existing situation, we are basically talking about a clear monopoly which is owned by the producer. This amendment is to insure the access of outsiders.

If we adjusted the ownership provisions, and I believe those are important, would the Senator be willing to accept it?

Mr. BUMPERS. Could the Senator be more specific?

Mr. KENNEDY. If we dropped section (D) of the amendment.

Mr. BUMPERS. I do not think so. Let me say this: I find no fault with subparagraph (A). Subparagraph (B) I would find no fault with, if the Senator was willing to add, after "technological limits," language similar to "and economically feasible."

Subparagraph (C) is the one that I find troublesome, because that is the one that allows an owner to demand an interest in the pipeline, which, in effect, turns the pipeline into a co-op and quite frankly, I believe, would be self-defeating, if it were adopted.

Mr. KENNEDY. We would be glad to see what could be worked out.

Mr. BUMPERS. Would the Senator be willing to lay this amendment aside temporarily?

Mr. KENNEDY. Yes. I have one other brief amendment.

AMENDMENT NO. 505

Mr. KENNEDY. Mr. President, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the amendment will be temporarily laid aside.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an amendment No. 505.

On page 36, after line 17, insert the following new subsection:

"(6) provide a requirement that the lessee offer 20 per centum of the crude oil, condensate, and natural gas liquids produced on such lease, at the market value and point of delivery applicable to Federal royalty oil, to small and independent refiners as defined in the Emergency Petroleum Allocation Act of 1973.".

Mr. KENNEDY. Mr. President, this is a very simple amendment. The basic independent aspect of the refinery industry at the present time has anywhere from 23 to 27 percent of the refinery capacity in the United States. This amendment is an attempt to insure that the independents are going to have first call on at least 20 percent of the new offshore production. I think there are some serious questions in terms of the way the President's program has been structured. Basically, there is a question as to whether the independent refiners are going to be able to survive. This 20 percent set-aside will at least assure accessibility to crude oil at the market price to the independent refiners.

I would think there should not be any reluctance to do this because the producers are going to get a market price in any event. The price they are going to receive will not be affected. What this amendment does do is assure the independents of a supply which they may not otherwise get from Outer Continental Shelf oil. That is the purpose of the amendment and why I believe it is advisable and necessary.

Mr. McCLURE. Mr. President, I am constrained to oppose the amendment. I understand the motivation by which the amendment is offered. However, I think it is fair to say that Congress has created a number of preferences for independent refiners. I might point to the small refiner bias and the preferential access to Government royalty crude. Incidentally, if there is any royalty bidding on the Outer Continental Shelf, the independent refiner would have preferential access to that Government royalty crude under existing law and regulation.

There is a guaranteed percentage of purchase of fuel by Government at highest prices; preference for the independent refiners in access to crude under the FEA mandatory crude oil allocation program; special exception relief by FEA from the obligation to purchase old oil rights and relaxation from meeting environmental timetables.

All these have already been given as preference or some special assistance to the independent refiners. Most of those have had my support because I think independent refiners have needed to have a little assistance to make them viable competitors in a period of shortage and in a period of crisis.

The small refiner bias under the FEA entitlement program alone provides a subsidy up to 4¼ cents per gallon over crude oil processed by larger refiners. That 4¼ cents per gallon subsidy should be contrasted to profit margins of less than 2 cents per gallon by the large refiners. Even under these circumstances, I believe the Senator will see that unfair competitive results are beginning to be apparent under that provision.

I think there has been no showing made that the refiners are currently having problems in obtaining crude oil supplies. If there is evidence that they are having trouble getting crude oil supplies, perhaps we would have to take a look at this, but there is no such evidence, to my knowledge. If a difficulty should arise, I believe they could be easily handled under the FEA's mandatory crude oil allocation program.

I do not believe there are sufficient facts, at least not facts presented to the Energy Committee, which would justify the kind of a mandatory allocation that is required here.

FEA currently has a study under way to determine whether such a problem does exist at the present time. The Justice Department studies have indicated that the current subsidy programs are anticompetitive in that they are designed to protect competitors and not competition.

For all of these reasons, because Justice is opposed to further subsidy and further anticompetitive practices in this field on behalf of the independent refiners, and because FEA is studying to see whether the independents do have this problem, I think it is premature at this time to try to make this mandatory allocation. Therefore, I oppose the amendment.

Mr. KENNEDY. Mr. President, I have just a few points of clarification.

First of all, this is not a subsidy. The independents will be purchasing at the world price.

Second, the administration's program will end the allocation program. We are operating with that basic assumption, so those kinds of setasides and entitlements will no longer exist, under the administration's program.

Third, the record of the last 10 years, in terms of development of Outer Continental Shelf oil, has indicated that the independent refiners have, effectively, been squeezed out. That has been well documented.

So, for the purpose of trying to give them the assurance that they will be eligible at least for the 20 percent setaside, it seems to me to be wise to insist on this amendment.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, will the Senator from Massachusetts indicate where this amendment is intended to be inserted? I think there is an error in the amendment.

Mr. KENNEDY. I ask unanimous consent to change "On page 36" on line 1 to "On page 162" and the number "6" on line 3 to "7."

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, as modified, is as follows:

On page 162, after line 17, insert the following new subsection:

"(7) provide a requirement that the lessee offer 20 per centum of the crude oil, condensate, and natural gas liquids produced on such lease, at the market value and point of delivery applicable to Federal royalty oil, to small and independent refiners as defined in the Emergency Petroleum Allocation Act of 1973.".

Mr. KENNEDY. Mr. President, I am prepared to yield back my time.

The PRESIDING OFFICER. Does the Senator from Arkansas yield back his time?

Mr. BUMPERS. Mr. President, I am not sure I am the one to yield back. I do not think I am going to vote for the amendment. I think the Senator from Idaho should control the time of the other side.

Mr. McCLURE. Mr. President, we are prepared to yield back the remainder of our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment, as modified, of the Senator from Massachusetts.

The yeas and nays have been ordered.

Mr. KENNEDY. Mr. President, I further indicate that this has the support of the Independent Refiners Association. Earlier today, a number of them appeared.

The PRESIDING OFFICER. The Senator yielded back his time.

Mr. KENNEDY. All right.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CANNON (after having voted in the negative). On this vote I have a live pair with the Senator from Maine (Mr. MUSKIE). If he were present and voting, he would vote "yea." I have already voted "nay." I, therefore, withdraw my vote.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from North Carolina (Mr. MORGAN), the Senator from Maine (Mr. MUSKIE), and the Senator from Georgia (Mr. NUNN) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. MORGAN) would vote "nay."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Missouri (Mr. DANFORTH), the Senator from Michigan (Mr. GRIFFIN), the Senator from Illinois (Mr. PERCY), and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

The result was announced—yeas 54, nays 33, as follows:

[Rollcall Vote No. 289 Leg.]

YEAS—54

Allen	Case	Cranston
Bayh	Chafee	Culver
Biden	Chiles	DeConcini
Brooke	Clark	Durkin
Eagleton	Kennedy	Proxmire
Ford	Laxalt	Ribicoff
Garn	Leahy	Riegle
Hart	Matsunaga	Roth
Haskell	McGovern	Sarbanes
Hatch	McIntyre	Sasser
Hatfield	Melcher	Schweiker
Hathaway	Metcalf	Sparkman
Hayakawa	Metzenbaum	Stafford
Heinz	Moynihan	Stevens
Huddleston	Nelson	Thurmond
Humphrey	Packwood	Weicker
Inouye	Pearson	Williams
Javits	Pell	Zorinsky

NAYS—33

Baker	Glenn	McClure
Bartlett	Goldwater	Randolph
Bentsen	Gravel	Schmitt

Burdick	Helms	Stevenson
Byrd, Harry F., Jr.	Hollings	Stone
	Jackson	Talmadge
Byrd, Robert C.	Johnston	Tower
Church	Long	Wallop
Curtis	Lugar	Young
Dole	Magnuson	
Domenici	McClellan	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Cannon, against.

NOT VOTING—12

Abourezk	Eastland	Muskie
Anderson	Griffin	Nunn
Bellmon	Mathias	Percy
Danforth	Morgan	Scott

So, Mr. KENNEDY's amendment was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

UP AMENDMENT NO. 660, MODIFIED

The PRESIDING OFFICER (Mr. HASKELL). The question occurs on amendment No. 660.

Mr. KENNEDY. Mr. President, I understand that I am entitled to modify my amendment, and I do so in the ways that I send to the desk, and I ask that my amendment be modified to that extent.

The PRESIDING OFFICER. The clerk will state the modification.

The legislative clerk read as follows:

Change the page from 152 after line 15 to 151, after line 18, and strike lines 12 through 17.

On line 7, after the word "shippers;" add the word "and"; and on line 11 after the word "limits" add "and economic feasibility."

The PRESIDING OFFICER. The amendment is so modified.

Mr. KENNEDY. Mr. President, I think this deals with the concerns of the floor manager of the bill. With his assurance that he will work closely with us in this other area, and the assurance of the committee earlier, from the chairman of the committee, the Senator from Washington, I think we can address this issue in a more comprehensive way later.

It seems to me to put us on record in insuring sensitivity to the competitive implications of shipper ownership. I understand that the Senator will accept this amendment.

Mr. BUMPERS. I thank the Senator from Massachusetts for his cooperation. I assure him again that those two provisions which have been stricken may indeed have great merit. I know I speak for the chairman of the committee as well as the other members of the committee in saying that we will cooperate in holding hearings and taking testimony along that line, at the request of the Senator from Massachusetts.

I have looked over the amendment as modified, and it is acceptable at this point.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I wonder whether we may have the amendment read.

The PRESIDING OFFICER. The clerk will read the amendment.

The legislative clerk read as follows:

On page 151, after line 18 insert the following new subsection and redesignate succeeding subsections accordingly:

"(f)(1) Every permit, license, easement, right-of-way, or other grant of authority for the transportation by pipeline on or across the Outer Continental Shelf of oil or gas shall require that the pipeline be operated in accordance with the following competitive principles:

"(A) The pipeline must provide open and non-discriminatory access to both owner and non-owner shippers; and

"(B) Any shipper, owner or non-owner, able to provide a guaranteed level of throughput must have the unilateral right to demand expansion of throughput capacity within technological limits and economic feasibility.

"(2) The Secretary shall consult with and give due consideration to the views of the Attorney General and the Federal Trade Commission on specific conditions to be included in any permit, license, easement, right-of-way, or grant of authority in order to ensure that pipelines are operated in accordance with such competitive principles."

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, will someone yield to me?

Mr. HANSEN. I yield time to the Senator.

Mr. JOHNSTON. Mr. President, the problem with this amendment is in subsection (B), which says this:

Any shipper, owner, or non-owner, able to provide a guaranteed level of throughput must have the unilateral right to demand expansion of throughput capacity within technological limits and economic feasibility.

Let us take a pipeline like the Alaskan pipeline, and you are getting ready to put in that pipeline. It is not already built, but you are getting ready to put it in position. You are trying to make the decision of whether to build it or not. You know that any owner or nonowner would have the right to require you to expand that pipeline from its present capacity of 1.2 million barrels a day up to 2 million barrels a day, and somebody is going to interpret economic feasibility.

The problem, it seems to me, is that instead of having all your economic facts on which to work at the time you make your decision to build or not to build the pipeline, you defer those down the line until some owner or nonowner—identity unknown—comes in to make his request as to whether to expand it or not. If he makes that request, then some-

one determines whether that is economically feasible.

It seems to me that that would be likely to discourage the building of some pipelines, because it would add a new unknown, when you are trying to finance a pipeline which might be as vast as the $7 billion Alaskan pipeline or an even larger trans-Alaskan or trans-Canadian gas pipeline. I am not sure that that would be the effect. It appears to me that it would. We have not had any hearings, and it seems a little dangerous to me to accept such a far-reaching amendment.

Mr. McCLURE. Mr. President, will the Senator yield for a question?

Mr. JOHNSTON. I yield.

Mr. McCLURE. One of the problems I have is that if the concept of the amendment is to say that this line is a common carrier or that the owner of the line must allow access to the line within that capacity of the line, to the extent of unused capacity, and that the nonowner of the line would be permitted to use that line to the extent of the unused capacity, that is one thing. But to say that they have the unilateral right to demand the expansion of their throughput, it seems to me, could be construed to mean that the owner of the pipeline must take some of ther own oil out and let the nonowner put his oil in.

Does the Senator agree with me that that possibility exists?

Mr. JOHNSTON. I think that might be a possibility. Another possibility you might have is the situation you have in Alaska. Again you have the throughput of a capacity of 1.2 million barrels a day and a total eventual capacity of 2 million for which additional pumping stations would be required. Now, they will need that 2 million total if they develop the Kaporik and Lisbon Fields, and if additional activity on Pet 4 and other areas comes through.

Under this amendment, it seems to me that someone could go up and drill and find a new discovery and displace the present owners if they were first in point of time. I guess it would be a question of who is first in point of time under this amendment. So if you are there first, you can demand not only the capacity but the throughput, and it does not make any difference that one of the owners would have a prospective discovery coming on line a few months later. That may not be the way it would work, but it seems to me a logical conclusion, and the kind of thing we ought to have hearings on.

Mr. McCLURE. Mr. President, will the Senator yield further?

Mr. JOHNSTON. Yes.

Mr. McCLURE. A pipeline capacity is not just a finite capacity. It has a number of variables, including the degree of the number of pumping stations, the amount of pressure, the velocity, and a number of other things that may be varied.

Now, economic feasibility might mean you can do other things to increase the throughput, but it will cost you more per unit to do that. That would still be economically feasible to put it through because in the sense that the product can still be marketed, after having borne the cost of transportation, but it would increase the unit cost of all the rest of the product that is being put through the line at the same time. So that a nonowner of the pipeline, I would assume, under this amendment could impose an additional economic burden upon the owner of the pipeline or the other producers that are putting product through the pipeline and, according to the amendment, would have the unilateral right to impose that economic burden upon the people who are already in the pipeline.

I am not certain that is the intention of the amendment, but I think that might be the necessary result of its application.

Mr. JOHNSTON. I am afraid what it would do, frankly, to the Trans-Canadian—Trans-Alaskan pipeline, and no one really knows because we do not have any hearings on this.

I wonder if the Senator from Massachusetts would be willing to take out subsection (B) and introduce it as a bill on which the Commerce Committee could have hearings, because I think that would be in the jurisdiction of the Commerce Committee?

Mr. KENNEDY. When I have an opportunity I will respond to these arguments, but I would like to be able to get the floor and then I would be glad to answer.

Mr. JOHNSTON. I would be glad to yield the floor.

Mr. KENNEDY. Mr. President, as we have seen in the Antitrust Committee, over the last 20 years or so, is that basically those who control pipeline capacity use it to carry their particular product downstream, and do it only to carry forward their own rather narrow economic interests. That happens to be the fact of the matter and that has been demonstrated and testified to for about 15 years before the Antitrust Committee. That happens to be the real world we are talking about.

What we are doing is recognizing that there is a real common carrier concept that ought to be applied to the pipeline.

There are those—and I include myself—who feel there ought to be separation between the production and the pipeline ownership, and there are pipeline companies that are ready, willing, and able to compete in this area.

But the fact of the matter is, Mr. President, that with regard to these strawmen that have been raised in terms of whose oil will go and whose oil will not go, and if there are prior agreements will they be overruled, these questions are basically worked out in the prorationing understandings and regulations. These are not the issues. Those are the regulations that are already in effect in the industry, and they apply on the Outer Continental Shelf.

The particular fact situation, stated by the Senator from Idaho, that there may be additional pumping station requirement for the flow of the product that may raise the cost to the principal utilizer of that line, may also very well result in a reduction of costs for the users. It may lower the costs with additional volume.

What we are making very clear here is that when the pipeline does incur additional costs which make additional volume not economically feasible, there is no legal obligation or responsibility for them to accept that additional volume of ingredient, but where they can do it and it is economically feasible they ought then to be performing as common carriers and make the increase for the advantage of the American consumer. That essentially is the reason for this particular amendment or those are the reasons.

On the other question about the terms of ownership provisions, these are intricate issues. They raise questions, and I am willing to see that we work closely with other committees on them. Although on those issues the Antitrust Committee has held years of hearings, I am glad to take the time to work with other members of the committee to deal with them.

But when we are talking about opening up to the American people the new kinds of opportunities to help meet our energy problem, then the reluctance of this body to require the expansion of those particular pipelines when it is economically feasible and when it is technologically possible to bring more oil to the American consumer is virtually incomprehensible to me.

I can understand why those major oil companies that have the oil and have the means of getting the oil to the shore, may have some reluctance when they obviously have clear economic interests in pumping through that pipeline only their own product so they can make greater profits downstream.

All we are attempting here in this very limited way is to insure that others are going to be able to use what ought to be a common carrier.

Mr. MAGNUSON. Mr. President, will the Senator yield? Has the Senator added to his amendment the words "economically feasible"?

Mr. KENNEDY. Yes, I added those words.

Mr. MAGNUSON. I was thinking like the Senator from Louisiana was thinking. Take the case of the Alaskan——

Mr. KENNEDY. There is no application because it is not Outer Continental Shelf. It would have absolutely no application.

Mr. MAGNUSON. I wanted to be clear because there may be a question of some oil and in that case it seems unreasonable. But it may be true and it has to be taken care of.

Mr. KENNEDY. I want to make it clear it has absolutely no application whatsoever.

Mr. MAGNUSON. I thank the Senator.

Mr. JOHNSTON. Mr. President, will the Senator yield on that question?

Mr. KENNEDY. Yes.

Mr. JOHNSTON. It says here "every right of way or other grant of authority for the transportation by pipeline or across the Outer Continental Shelf of oil or gas," et cetera. Now, does not the present Alaskan pipeline cross the Outer Continental Shelf? In other words, when you build your superport out there your pipeline comes right out to your superport buoy, does it not?

Mr. KENNEDY. My understanding is the superports are covered by the Deepwater Ports Act, and this would not be applicable to the Alaskan situation.

We would be glad to specify it. It is my understanding that is the case, but I would be glad to specify that if that will clarify it for the Senator.

Mr. JACKSON. Mr. President, will the Senator yield for just a point of clarification?

Mr. JOHNSTON. Yes.

Mr. JACKSON. It is my understanding that no part of the Alaskan pipeline crosses the Outer Continental Shelf.

Mr. JOHNSTON. This has reference to new pipelines, and I thought perhaps the new trans-Canadian might happen to cross the shoreline.

Mr. JACKSON. No.

Mr. JOHNSTON. If it does not then that is perhaps clear. But I think it ought to be made clear that this does not conflict with the deepwater ports bill because it does not make an exception for not applying to deepwater ports.

Mr. KENNEDY. I am glad to clarify that in the legislative history and in the language. It is my understanding, as the chairman of the committee stated that it would not apply, and that is certainly my understanding.

Mr. JOHNSTON. Very well.

Is it the understanding of the chairman of the committee that this amendment would not apply to a pipeline, a superport pipeline, that goes from onshore, crosses the Outer Continental Shelf, and terminates at the monobuoy out in the gulf or wherever?

Mr. JACKSON. The superport, I assume, is in the Outer Continental Shelf.

Mr. KENNEDY. My understanding is that is correct, and it is regulated by the Deepwater Ports Act.

Mr. JOHNSTON. Is it necessary to have a specific exemption here for deepwater ports, or can this legislative history clear that up? Perhaps counsel can speak to that question.

Mr. KENNEDY. It is certainly not the intention, and I am sure that can be a matter in the conference that can be clarified if there is any question about it. It is certainly not the intention.

Mr. JACKSON. I ask the author of the amendment. I think that would be the best way. I would not want to attempt to interpret the legislation.

Mr. KENNEDY. It is not necessary. The Deepwater Ports Act language is clear.

Mr. McCLURE. This is under the rights-of-way.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Does the Senator from Wyoming yield time to the Senator from Idaho?

Mr. HANSEN. I yield such time as he desires.

Mr. McCLURE. I thank the Senator from Wyoming.

I have only this remaining question. I do not disagree at all with the specific thrust of the amendment as I understand it. If there is unutilized capacity in that pipeline it should be made available.

My concerns are two: one is the question of whether or not the authority under the amendment can be utilized in such a way as to increase the cost of throughput to the owner of the line. I read it to say that it can.

I take it that the Senator from Massachusetts agrees that it might indeed increase the cost of throughput of the owner's own product. If that is the case, there is a very substantial deterrent to the original investment.

The second concern that I have is that it does not seem to me there is anything in this amendment that prohibits the owner of the other product from displacing the product of the owner of the pipeline. He has the unilateral right to demand the expansion of throughput of his product at the expense of the product of the owner of the line.

The PRESIDING OFFICER. The time of the opponents of the amendment has expired.

Mr. KENNEDY. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 5 minutes.

Mr. KENNEDY. I am glad to yield 2 minutes to the Senator.

Mr. McCLURE. I thank the Senator from Massachusetts for yielding.

If that is the case, it seems to me there is a very real deterrent to the original investment. I do not believe that that is the intention of the Senator from Massachusetts. It seems to me the language can be drawn to limit those two effects: The effect of displacement of the owner's product in favor of the nonowner's product and the effect of increasing the cost of transmission of product which is at least a possibility under the amendment. If those two objections could be removed from the amendment, I would have no trouble supporting the amendment.

Mr. KENNEDY. Mr. President, in the final 2 minutes, of course any increase in volume may very well mean some additional cost. As I mentioned earlier it may also mean some reduction. We have been trying to be clear that where it is economically not feasible the requirement would not lie. It would appear increased costs would be a reason to increase the tariff for utilization of those lines where there is any increased cost. That is clearly the intent of the author of the amendment. If such tariffs are not going to be forthcoming it would not be economically feasible, and I would think they would not have any further legal requirement. But assuming to the contrary, there would be at least a responsibility to move ahead. So it was within those kinds of parameters that the amendment is offered.

Mr. President, I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

(Putting the question.)

The PRESIDING OFFICER. The ayes appear to have it. The ayes have it.

The amendment was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JACKSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. HANSEN. Mr. President, will the Senator yield to me for one moment?

Mr. BARTLETT. I yield.

Mr. HANSEN. On behalf of Senator GRAVEL I ask unanimous consent that Deming Cowles be accorded the privilege of the floor during the consideration of and any votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oklahoma.

AMENDMENT NO. 494

Mr. BARTLETT. Mr. President, I thank the Senator, and I call up my amendment No. 494 and point out that the amendment was introduced by my colleague, Mr. BELLMON. I ask unanimous consent to have the amendment correctly shown as mine with my good friend and colleague as the first cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. BARTLETT), for himself and Mr. BELLMON, proposes an amendment numbered 494.

Page 204, strike lines 1 through 10, and insert in lieu thereof: "Secretary access to all basic data obtained from such activity and shall provide copies of such specific data as the Secretary may request. Such data shall be provided in accordance with regulations which the Secretary shall prescribe.

"(B) No lessee or permittee shall be compelled to provide the Secretary access to or copies of interpretations of basic data referred to in subparagraph (A) of this paragraph.".

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield for a unanimous-consent request?

Mr. BARTLETT. I yield.

TIME LIMITATION AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on the amendment by Mr. HATCH there be a 15-minute time limitation to be equally divided in accordance with the usual form.

I cleared this with Mr. HATCH, the minority leader, Mr. JACKSON, and Mr. HANSEN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BARTLETT. Mr. President, I ask unanimous consent that the following Senators be listed as cosponsors: Mr. DOMENICI, Mr. GRAVEL, Mr. HANSEN, Mr. HAYAKAWA, Mr. SCHMITT, Mr. STEVENS, and Mr. TOWER.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, the purpose of this amendment was read by the clerk.

"No lessee or permittee shall be compelled to provide the Secretary access to or copies of interpretations of basic data referred to in Subparagraph (A) of this paragraph."

Among the states purposes of the act are expeditious development of oil and natural gas resources in the Outer Con-

tinental Shelf, preservation and maintenance of free enterprise competition, and assurance to the public of a fair and equitable return on OCS mineral resources.

Mr. President, this bill would change a system that for 20 years has helped provide this Nation with its energy requirements and made it the leader in the world. The core of our domestic exploration success story lies in the private enterprise system that encourages the individual or group of individuals to devise a system that is better than that of others. The "confidentiality of information" and the opportunity to design, produce, and benefit from a better "mousetrap" is the prime lever that has propelled this Nation into high gear in the exploration and production of fossil fuels.

The principal planning and action agency under the present system, the Department of Interior, has stated that one of its aims is to encourage competition. Section 26 will be a major step backward in the effort to accomplish this accepted purpose.

The requirement that interpretations, as well as other data, be revealed to Federal, and in some cases State, agencies, will discourage rather than encourage competition. Required disclosure through the expenditure of its own manpower and financial resources will discourage further efforts to develop this information. There will be greatly reduced incentive for expenditures of time and money to gather information, or to develop new techniques such as geophysical "bright spots." Such forced disclosure provisions are of questionable legality and may lead to challenges in the courts and cause delay in exploratory operations.

A reduction in the effort to obtain geological and geophysical data through surveys or exploratory drilling will inhibit the exploration and development of domestic offshore reserves now so desperately needed. The disclosure of information on leased and unleased acreage would remove any competitive advantage the lessee would otherwise have as a result of its proprietary efforts. Revelation of interpretative data would impose a severe security problem that could lead to the entrance into the OCS area of speculators without proper financial or technical qualification who would not otherwise have access to the information. The ownership of leases by such persons, as opposed to qualified lessees, would impair the rapid development of new reserves, and could jeopardize the remarkable saftey record in OCS exploration and production.

This section would impose almost impossible collection, storage, compilation, interpretation, and administrative requirements on the Department of Interior, as well as the States. It must be remembered that there are more than a hundred lessees and the accumulation of data alone would be a staggering job.

The requirements of reserve data, size and timing of development, location of pipelines, and onshore facilities are questions that cannot be answered until after oil and gas are discovered.

In summary, section 26 would complicate and delay an efficient, effectively working system and impose requirements on Government and industry that are complex, unnecessary, anticompetitive, and extremely costly.

This amendment will in no way diminish the power of the Secretary of the Interior to gather basic exploration and production data. What it will do is protect offshore operators from the forced disclosure of proprietary, professional interpretations of such data.

I strongly urge passage of this amendment.

Mr. President, in the Energy Committee, in discussing the Outer Continental Shelf bill, on many occasions we have talked about the desire to increase exploratory activity in the Outer Continental Shelf, and to increase the recovery of oil and gas from what we hope to be very large and very meaningful reserves.

In talking about this, we have emphasized the importance of competition, which our chairman has mentioned on many occasions. We have had some differences of opinion as to how to improve competition; nonetheless, we have felt that competition in the free enterprise system is most valuable to a maximization of the efforts to find new oil and gas resources in the Outer Continental Shelf.

To me the essence of competition in the free enterprise system is in the encouragement of people who are participating to profit from their interpretations of ideas, approach to a problem, building a better mousetrap, and in having a different idea from someone else, an idea which works; whereas the other more customary, mundane, or usual approach has failed.

In our copyright laws, we recognize that the exclusive right to the publication, production, or sale of the rights to a literary, dramatic, musical, or artistic work, or to the use of a commercial print or label, will go by law for a specific period to an author, composer, artist, distributor, and so on. We grant exclusive rights to ideas and interpretations in patents, which Webster defines as "an official document, open to public examination, granting a certain right or privilege: letters patent; especially a document"—and I think it is interesting the words they use—"granting the monopoly right to produce, sell, or gain profit from an invention, process, and so forth, for a specific number of years."

So what we recognize as the essence of the machinery of private enterprise is the protection of the rights of interpretation, of approaches to solutions of problems, to the creation of machinery, technology, and so on; and this right is given to individuals and corporations.

In my opinion, the role of Government in the area of freedom of enterprise is the role of a referee, not a participant along with private enterprise. I believe that to the extent that Government invades the arena as a participant rather than a referee, its role of referee is going to be inferior to what it should be.

Its role should be one of protector of the competitive rights of individuals and companies, to protect, with our antitrust laws, by judicial interpretations and lawsuits, the free competition of the free enterprise system.

So, we would see, in this case, companies being required, at the request of the Secretary, to provide interpretations of exploratory information at any time during the exploratory process—and I would like to stress that the exploratory process, particularly in the Outer Continental Shelf, is a continuing process from the time of a company becomes interested in bidding on tracts until it finally completely drills up a particular tract. They are apt to require from time to time additional geophysical information or basic geological information, and then interpret those data; and if this interpretation is required by the Secretary to be furnished on a confidential basis, but also on a basis under which he can release it as he sees fit and apparently when he sees fit, then I think there is going to be a very stark reduction in the contribution that will be made by the tremendous competition that takes place today, in the Outer Continental Shelf and elsewhere, in the drilling of wells.

I think that this is shown by the recent bidding that took place in the last six or so lease sales in the Outer Continental Shelf, in that 46 percent of the money bid was left on the table, showing that there was not collusion, showing that there is a great, wide variance in opinion as to the value of leases, obviously itself based on a wide variance in interpretation of basic data.

The interpretation of data is a stock in trade of the geologist, the geophysicist, the engineer, those who are responsible for conducting the exploratory efforts of an oil company.

When you compare this with the U.S. Government having this information, there is going to develop in the Government, just as there develops in a company, a certain way of interpretation, a certain manner of interpretation, a certain approach. And to the extent that the Federal Government invades the private sector competition in acquiring information and participating in the drilling of wells, there will be just that much, and it is a considerable amount, of reduction in competition. The Federal activity will be following one approach, one idea. It may change; and I do not think we could expect it to be very adventuresome. In the area of politics, I think it would be most difficult to expect the Secretary of the Interior or the head of the Energy Department to be extremely aggressive, to be a wildcatter who is going to stick his neck way out to drill a bunch of dry holes, to interpret and reinterpret. So, as I say, I see a real, significant reduction in competition.

What else will obviously happen? I believe that the companies are going to find an impediment, because of this requirement of releasing information, to encouraging them to do the amount of exploratory work that they have done for years. I think they would do it on a very restrictive basis, and decide to put their eggs in other baskets.

There are other baskets. Some of the baskets are in the interior of the United

States, in the deep basin natural gas, for instance, and some of the other baskets are in other nations, in other countries where there are not these unwise restrictions.

I think there would be a sharp reduction in the building up of data, because of the required release of the interpretation of it, that would greatly reduce the effort in the Outer Continental Shelf—just the opposite of the stated goals of the bill.

I think it would also lead to those with the companies involved not divulging fully their interpretations, which I think would be unfortunate, but I think this would be the result of this bad legislation, where they would try to fudge on what they would divulge to the Secretary.

I also think the Secretary is going to have a real security problem. If someone in his office—and there are bound to be a number of somebodies who would have access to the interpretative data—if it just appeared to one particular somebody that one man's interpretation was different from that of others, and that lo and behold, here is a great possibility of a large strike in a different part of this lease from what anyone else has thought, and he has that information, I think the temptation would be extremely great for him to dishonestly pass this on to interested parties.

So I do not think this is a good provision in the law. It is one that is not going to fulfill the goals desired by the committee and desired by Congress in having a new OCS bill.

I think it will reduce exploratory activity at a time when we want increased exploratory activity. I think it will reduce the activity of producing leases once they are discovered, for the same reason.

It is not that there would not be protection for the lease once production is found, but there is also the problem of adjoining leases which might be available for bidding.

So, Mr. President, I urge my colleagues to support this amendment. We are in no way proposing to limit the Secretary's access to the basic data. It is just the company's or individual's interpretation of the data. I believe this amendment is completely consistent with the approach this Nation has taken toward private enterprise, toward competition.

I think it is rather interesting in the description of the word "patent" by Webster's dictionary, that they use the words "the monopoly right, the full right, to produce, to sell, to obtain profit."

This is what we are interfering with. Interfering with this basic right, which is the driving force of private enterprise, will deter the efforts of those engaged in developing our Outer Continental Shelf resources.

Mr. President, I reserve the remainder of my time.

Mr. BUMPERS. Mr. President, this matter was debated extensively a couple of years ago. The Senate overwhelmingly adopted virtually the same language which is in the bill now. I will make my comments as brief as possible on this, but I would like my colleagues to be aware of just what we are talking about.

The bill provides that the Secretary is entitled to interpretive data. There are three kinds of data. There is raw data. That does not mean anything until it is put through a computer. Second, there is processed data, which is the raw data after it has been put through a computer. Interpretive data is the third type of data, and that is what we are talking about here.

The interpretive data is nothing more or less than what the oil company says. "These are our conclusions based on this seismic, geological, and geophysical information."

If this were going to be a matter of public record, Mr. President, I would agree with the Senator from Oklahoma and I would vote for his amendment. But I have two thoughts about it:

No. 1, these resources, as has been said no less than 100 times on this floor in the last 24 hours, belong to the people of the United States. They are entitled to know all they can find out about what they are.

No. 2, the Secretary has a right to lease or grant a permit. He can grant a permit to somebody to go onto certain tracts and explore them. They cannot go without his permission. Once the permittees go out and shoot off some blasts and do the other exploratory work, the permittee has to tell the Secretary what he found under this provision in the bill.

I do not see anything wrong with that. As a matter of fact, that person probably is going to wind up with a competitive advantage.

Let me give a scenario. Let us assume that I permit, under a written agreement, the Senator from Oklahoma, whom we will say is an oil company, to go out and explore a certain tract. He comes back with all kinds of good information. It looks good. The information indicates there is a structure which will produce either oil or gas, or both. He gives the Secretary that information. The Secretary will then subsequently offer this tract for lease. The Senator from Oklahoma has a right to bid. He and he alone would have access to this information. He would know what to bid for it.

Mr. President, I see absolutely nothing wrong with the Secretary acquiring this data. He is entitled to it. Nobody is put at a competitive disadvantage. Oil companies have argued—they have always argued—that this is proprietary information. But the point is, it should only be proprietary information if it pertains to their own property. The OCS is not their property.

There is not an oil company in the United States which would let somebody go on their property and do this kind of investigative and exploratory work without telling them what there was there. I do not think we ought to ask the U.S. Government to do less.

This is a good provision in the bill. I urge my colleagues to defeat the amendment of the Senator from Oklahoma.

Mr. HANSEN. Mr. President, the Freedom of Information Act clearly recognizes that certain information, obtained by private enterprise, has competitive value. As such, the law seeks to protect proprietary information, and requires Government—in certain cases—to maintain the confidentiality of the information it obtains. Any disclosure of data obtained at corporate expense and given to the Government in confidence could seriously impair the effort to collect OCS exploratory data.

The danger of exposure of confidential information probably would induce the companies to refrain from drilling exploratory wells, for fear that public disclosure of data might highlight for competitors the probability of potential reserves in adjacent open tracts. The decision not to conduct exploratory drilling and acquire information would thus lead to a lower bonus bid on the open tract when it is later put up for lease, because the risk is higher where such data are not available.

There also would be a strong incentive for individual companies not to conduct detailed seismic surveys after an initial group shoot. Why invest in the acquisition of proprietary information when it would be made available at no cost to every competitor? The probability is that companies would prefer to base their bids on less definitive information, thus accepting a higher risk on each tract and lowering their bonus bids accordingly. The collective effect of having less information will be lower bids generally—a result clearly contrary to the interests of the public.

Another important adverse effect would be a severe loss of business on the part of independent geophysical contractors. Geophysical contractors forecast a sharp decrease in the sale of nonexclusive geophysical surveys if mandatory disclosure is enacted into law. This would make less data available, especially to the independent oil and gas producer, who relies heavily on purchased information of this nature.

Currently, the Bureau of Land Management makes its own analysis of the presale value of individual tracts in order to arrive at what it considers a minimum acceptable bid for each tract. This is a realistic procedure which should be continued. Nevertheless, that analysis represents only one more estimate, which can be as wrong or as right as any single company's evaluation.

It is obvious that more competitive bids would result in a more accurate fair market value assessment. However, mandatory disclosure of proprietary data, and interpretations of those data, would discourage the collection and/or purchase of such information by companies. This would result in higher risks, fewer bids and lower bonuses. In fact, with individual companies each having access to the same data, competitive bidding would be substantially decreased.

The public interest—far from being better served by the disclosure of proprietary information and/or the elimination of the private sector from the exploratory phase of offshore operations—would be seriously impaired. The combined loss of revenues to the Treasury, and the adverse impact on petroleum exploration in the offshore, would deal a serious blow to the struggle for energy self-sufficiency.

I wholeheartedly support this amendment to limit the Secretary's subpena

power to simply basic offshore exploration and production data, and not interpretations.

Mr. President, if we could, I prefer to go to a vote right now because there are some Senators who are going to leave. Does the Senator want the yeas and nays?

Mr. BARTLETT. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. DURKIN). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HANSEN. Mr. President, I yield back the remainder of our time.

Mr. BUMPERS. Mr. President, I yield back the remainder of our time.

Mr. HATCH. Will the Senator withhold that?

Mr. HANSEN. I do not have any time.

Mr. HATCH. Will the Senator yield 1 minute?

Mr. BUMPERS. I will be happy to yield, Mr. President.

Mr. HATCH. I want to support the amendment by Senator BARTLETT, Mr. President. This bill gives such broad authority to the Government to acquire any sort of data it wants that I do not see why the Government ought to have the proprietary information or the interpretations of the companies involved.

The Secretary can conduct independent geological and geophysical investigations and gather and process all the data he wants. Why should he have access to the interpretive data of the independent private sector contractors with regard to this? That is the reason I want to support Senator BARTLETT. I think we have gone too far already in this particular bill. I do not see why we have to go all the way and have the Government become big brother in every sense of the word.

I thank the Senator.

ADDITIONAL STATEMENTS SUBMITTED

Mr. GRAVEL. Mr. President, as we look at this vital piece of legislation aimed at setting up an appropriate mechanism to guide our exploration and development of the Nation's Outer Continental Shelf, we must ask ourselves one question: What is the appropriate role of the Federal Government vis-a-vis the private enterprise system? We must weigh our views of the Government's and the public's right to know with the concept of proprietary information essential to the health of our capitalist system.

Mr. President, as my affirmative vote on the preceding Durkin amendment shows, I am very much in favor of allowing the Federal Government to have the data it needs to determine what the reserves of oil, gas, coal, and other energy minerals are and what they are anticipated to be. It may even be necessary to conduct some actual field tests to verify that data provided by industry. I do not happen to distrust that data provided by industry, but to the extent verification by a Government-sponsored independent source is helpful in showing the worth of that data, then I am all for it. My only question on the provision concerning industry data is why the Government does not use that which it already has. Witness the recent interchange between the Energy and Natural Resources Committee and the Energy Research and Development Administration concerning the withholding of vital statistics on gas reserves. Witness the President's overlooking of reserve estimates of oil and gas that the USGS and the National Petroleum Council have made available for some time. So the question is not whether the Government should have vital data, but rather it is whether it should have all types of data, and what the Government does with the data once it has it.

One type of data I do not think the Federal Government should have, and my views are supported by the Energy Information Act, is interpretive data derived as a result of geological and geophysical or other exploratory type activity. In most cases, the raw data is provided to the Federal Government, often gratuitously and often as a condition requisite to governmental authorization. The Government has its own analysts to determine the worth of the data and the value they will place on a prospect as a result of their own interpretation. Having the data owner's interpretation serves no real purpose other than to cause the risk of disclosure of that data to the press or to other competitive companies. You see, Mr. President, I am of the impression that we should encourage competition rather that to discourage competition. Since the interpretation of raw data is the real competitive edge in the petroleum business, I do not want to have the Federal Government interfering.

In short, I am afraid that in our zeal to make sure that the petroleum companies are not ripping us off by concealing information we have a right to, that we are being unreasonable to the point of jeopardizing the competitive system by requiring the disclosure to the Government of data that is not necessary or proper. The Federal Government will have the raw data on which to do its own analysis or to have an independent analysis run. The Government can base its decisions on its own interpretation. And as we can tell from the fact that different companies have differing interests in tracts under consideration both in the tract nomination process and in the bidding process, there is a great variance in interpretation of raw data. What useful purpose does it serve to have the actual interpretations when the Government is aware of the results of those interpretations through the bidding and nomination processes? After reserves are proved, the Government will receive necessary information in accordance with this act and appropriate regulations and requirements. It is the proprietary nature of the interpretation, as well as the yet undetermined need for such information, which prompts me to prod the conscience of the Senate to encourage their support of our amendment.

Mr. BARTLETT. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oklahoma. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Kentucky (Mr. FORD), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from North Carolina (Mr. MORGAN), the Senator from Maine (Mr. MUSKIE), and the Senator from Georgia (Mr. NUNN) are necessarily absent.

On this vote, the Senator from North Carolina (Mr. MORGAN) is paired with the Senator from Maine (Mr. MUSKIE).

If present and voting, the Senator from North Carolina would vote "yea" and the Senator from Maine would vote "nay."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Missouri (Mr. DANFORTH), the Senator from Michigan (Mr. GRIFFIN), the Senator from Illinois (Mr. PERCY), the Senator from Virginia (Mr. SCOTT), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

The result was announced—yeas 32, nays 54, as follows:

[Rollcall Vote No. 290 Leg.]

YEAS—32

Baker	Goldwater	Melcher
Bartlett	Gravel	Packwood
Bentsen	Hansen	Roth
Byrd, Harry F., Jr.	Hatch	Schmitt
	Hayakawa	Stafford
Chafee	Helms	Stevens
Chiles	Johnston	Stone
Curtis	Laxalt	Thurmond
Dole	Long	Tower
Domenici	Lugar	Wallop
Garn	McClure	Weicker

NAYS—54

Abourezk	Hart	Metzenbaum
Allen	Haskell	Moynihan
Bayh	Hatfield	Nelson
Biden	Hathaway	Pearson
Brooke	Heinz	Pell
Bumpers	Hollings	Proxmire
Burdick	Huddleston	Randolph
Byrd, Robert C.	Humphrey	Ribicoff
Cannon	Inouye	Riegle
Case	Jackson	Sarbanes
Church	Javits	Sasser
Clark	Kennedy	Schweiker
Cranston	Leahy	Sparkman
Culver	Magnuson	Stennis
DeConcini	Matsunaga	Stevenson
Durkin	McGovern	Talmadge
Eagleton	McIntyre	Williams
Glenn	Metcalf	Zorinsky

NOT VOTING—14

Anderson	Griffin	Nunn
Bellmon	Mathias	Percy
Danforth	McClellan	Scott
Eastland	Morgan	Young
Ford	Muskie	

So Mr. BARTLETT's amendment was rejected.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 661

Mr. JACKSON. Mr. President, I call up my technical amendments which are at the desk.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. JACKSON) proposes an unprinted amendment numbered 661.

Mr. JACKSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

1. Page 143, line 18, after the comma following the first "Act" insert "as amended".
2. Page 145, line 21, strike "in" and insert in lieu thereof "of".
3. Page 151, line 4, after "burial" insert "not consistent with regulations promulgated by the Secretary of Transportation under the Natural Gas Pipeline Safety Act of 1968,".
4. Page 153, strike lines 11 and 12 and insert in lieu thereof the following:
"(c) cash bonus bid, or work commitment bid based on a dollar amount for exploration with a fixed cash bonus, and a diminishing or"
5. Page 154, line 1, after "a" insert "fixed".
6. Page 155, line 3, beginning with "In" strike through line 7.
7. Page 167, lines 5 and 6, strike "including core and test drilling".
8. Page 179, in line 18, strike "are not consistent with the national interest" and insert the following: "provide or do not provide for a reasonable balance between the national interest and the well being of the citizens of the affected state".
9. Page 184, line 1, strike "this Section or in Section 22 of"; line 11, strike "interim".
10. Page 188, line 6, after "-sentative" insert "or the Attorney General,".
11. Page 200, lines 9 and 10, strike "in operating waters" and insert "or operating orders".
12. Page 204, line 13, after "lessee" insert "or permittee"; line 17, after "lessee" insert "or permittee"; lines 18 and 19, strike "or by a permittee".

Mr. JACKSON. Mr. President, I ask unanimous consent that they be considered en bloc. We have cleared this on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JACKSON. Mr. President, I yield back the remainder of my time.

Mr. HANSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 662

Mr. JACKSON. Mr. President, I call up my next amendment for myself and Mr. MUSKIE.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. JACKSON), for himself and Mr. MUSKIE, proposes an unprinted amendment No. 662:

On page 223, line 7, strike "damages were" and insert in lieu thereof "discharge was".

On page 223, line 21, strike "damages were" and insert in lieu thereof "discharge was".

On page 226, line 14, strike the comma and "and costs" and insert a period and the following: "(3) Costs".

On page 226, line 20, strike "(3)" and insert in lieu thereof "(4)".

The PRESIDING OFFICER. May we have order?

Mr. JACKSON. Mr. President, the first of these amendments, and I have one other, clarifies the provisions that there will be no limit on liability for damages where the discharge of oil is due to gross negligence or willful misconduct of the owner, operator, or person in charge of an offshore facility or a vessel. The bill had used the phrase "where such damages" were the result of such negligence or misconduct. The amendments simplify this by specifying that where the discharge itself results from gross negligence or willful misconduct, liability for damage is not limited.

The amendments also make it clear that cleanup costs resulting from the discharge of oil incurred pursuant to this act or State or local law can be paid by the fund. Cleanup costs paid by the owner or operator of an offshore facility or vessel where the discharge is caused by an act of war negligence on the part of the Federal Government is clearly a different category.

Mr. President, I yield back the remainder of my time.

Mr. HANSEN. I yield back the remainder of my time.

Mr. JACKSON. Vote!

The PRESIDING OFFICER. Both sides having yielded back the remainder of time, the question is on agreeing to the amendment of the Senator from Washington.

The amendment was agreed to.

UP AMENDMENT NO. 663

Mr. JACKSON. Mr. President, I call up my next amendment for myself and Mr. MUSKIE.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. JACKSON), for himself and Mr. MUSKIE, proposes unprinted amendment No. 663.

Mr. JACKSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 217, line 13, before "and which" strike the comma and insert "or in the navigable waters of the United States (as the term 'navigable waters' is defined in section 502 of the Federal Water Pollution Control Act),".

On page 217, line 14, strike the comma after "facility" and all that follows down through line 19, and insert in lieu thereof a period.

Mr. JACKSON. Mr. President, a separate amendment modifies this title to eliminate the change in liability that otherwise would result when a vessel transporting oil from an offshore facility passes from the waters above the Outer Continental Shelf into the navigable waters of the United States.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. May we have order in the galleries, as well?

Mr. JACKSON. The bill provides one measure of liability for such a vessel under this bill and apparently leaves in place the different liability provisions of section 311 of the Federal Water Pollution Control Act for the same vessel once it enters the navigable waters.

The amendment eliminates this distinction. Any vessel transporting oil directly from an offshore facility would be subject to the liability provisions of this bill until the oil is unloaded, regardless of the waters in which it is operating. Section 311's provisions would be superseded for such a vessel.

Mr. President, I yield back the remainder of my time.

Mr. HANSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded, the question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 664

Mr. HANSEN. Mr. President, I call up my amendment.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) on behalf of himself and Mr. BARTLETT proposes an unprinted amendment numbered 664.

Page 156, line 5, after the word "abandonment,'", insert the following:
"including the drilling of wells sufficient to determine the size and areal extent of any newly discovered field, and".

Mr. HANSEN. Mr. President, this clause was inadvertently not included when Senator BARTLETT proposed language to define what constitutes a work commitment—language which was accepted unchanged by committee.

Confirmation wells are an integral part of any exploration program, as no single well can adequately evaluate a discovery. The costs involved are substantial—every well drilled costs a little more than the one before. If we are to fulfill the intent of the work commitment provision of this bill—that is, to combat the huge front-end capital drain—then we should include the cost of these wells as a part of the commitment.

It is certainly not intended to include every field development well with this amendment. All that is intended—and the language is explicit on that point—is to include those wells "sufficient to determine the size and areal extent of any newly discovered field."

I strongly urge adoption of this amendment.

Mr. JACKSON. Mr. President, we have no objection to the amendment.

I yield back the remainder of my time.

Mr. HANSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HANSEN. Mr. President, section 26 of the bill, at the top of page 204, calls for the disclosure of not only basic offshore oil and gas exploration and production data, but also interpretations of that data—as we have previously discussed.

The language is ambiguous, however, in that it is unclear whether the interpretations to be disclosed are those existing at the time of the secretary's request, or whether a company might be required to make some interpretation at the request of the secretary.

Surely the latter is not contemplated. Such a requirement would be absurd on its face, and just as ridiculous upon further reflection.

I would appreciate it if the manager of the bill would confirm that, indeed, all that is contemplated in this provision is the disclosure to the secretary of data interpretations already in existence at the time of the secretary's request or an interpretation that the lessee or permittee might make later.

Mr. JACKSON. The answer to the Senator's question is "Yes."

Mr. HANSEN. I thank the manager of the bill.

UP AMENDMENT NO. 665

Mr. HATCH. Mr. President, I call up my unprinted amendment at this time.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 665.

Mr. HATCH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

Mr. METZENBAUM. Mr. President, I object. I would like to know what the amendment provides.

The assistant legislative clerk read as follows:

On page 162, strike out all of Subsection 8(c) beginning at line 24 and continuing through page 163, line 23; and in lieu thereof substitute the following:

"(c) Upon issuing a lease the Secretary shall notify the Federal Trade Commission of the issuance. Such notification shall contain such information as the Federal Trade Commission may require in order to determine whether such lease may create or maintain a situation inconsistent with the antitrust laws. The Federal Trade Commission may, by rule, exclude from the requirements of this subsection any class of lease which it determines would, if issued, be unlikely to create or maintain a situation inconsistent with the antitrust laws."

Mr. HATCH. Mr. President, this amendment would change section 205(c) of the proposed amendments to the Outer Continental Shelf Lands Act. The proposal now before the Senate requires that the Secretary of the Interior notify the Federal Trade Commission 30 days before any lease is to be awarded. The FTC makes a determination as to whether the lease may violate the antitrust laws and, if so, notifies the Secretary.

The Secretary must abide by the FTC's decision, unless he holds public hearings and finds that the overall public benefit outweighs the possible adverse effect upon competition, and there is no less adverse alternative. In short, the provision puts the Secretary in the business of antitrust enforcement. Worse, there is an immediate delay of 30 days, then an indefinite delay involving a hearing and possible challenges to the decisions of the FTC and the Secretary through the Federal courts. All this time, other bidders must wait to see if the firm which received the award actually can develop the land or whether the Secretary will have to make a new decision on another bidder.

My amendment simplifies the process and eliminates the delays.

I propose that the Secretary give the FTC whatever information it requires at the time he issues the lease award. Then the FTC can make the investigations it deems necessary without delaying the lease process. If the FTC then determines there may be an antitrust violation, other provisions elsewhere permit the FTC to take the action it decides upon.

In fact the FTC itself has testified before the House Ad Hoc Select Committee on the OCS that the provision which is now in the bill—and which I desire to modify—is not necessary. Walter T. Winslow, Jr., Assistant Director of the Bureau of Competition stated the following:

Since hundreds of offshore leases may be issued in any year, since it would be unusual for the issuance of any one lease to tend to create or maintain a situation inconsistent with the antitrust laws, the commission does not believe that antitrust review by the commission of proposed leases can or should be relied on to provide significant antitrust protection in this area.

In other words, it is unrealistic to expect that the FTC will come up with any finding of monopolistic effects from a single lease except in a very unusual case.

The FTC then advised the House that "the preferable means of maintaining competition with respect to offshore leases is to build antitrust protections into the Secretary's decisionmaking process." In other words, the Secretary of Interior's own method of offering, receiving, and selecting bids should incorporate built-in protections without the necessity of bringing in the FTC for consultation before issuing the lease. That is what my amendment will accomplish.

The FTC closed its discussion of this issue by declaring that the current OCS bill, "already contains provisions that should accomplish that purpose," without section 205(c).

I ask unanimous consent that Mr. Winslow's testimony before the House be printed at the conclusion of my remarks. The statement goes to great lengths to show that sufficient advisory and procedural safeguards already exist throughout the bill. Although the FTC does not oppose section 205(c), the FTC does make it clear that this provision is not needed to protect competition.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HATCH. To round out this issue, Mr. President, it should be noted that there are provisions in other recent legislation, not to mention the longstanding antitrust laws themselves, which provide further protection. For instance, assurance of no anticompetitive effects from lease sales has been included in the Department of Energy legislation, S. 82. Although we have not yet seen the Department in action, one of its many purposes, as stated in the bill, is "to foster and assure competition among parties engaged in the supply of energy fuels."

It has been suggested that the Energy Department's powers will adequately deal with the antitrust implications of OCS leasing policy, and that the provisions we are talking about in S. 9 may conflict. This inconsistency will only become clear as the Energy Department begins to assume its new role. There is a more immediate inconsistency before us, however, which I think must be addressed.

We are trying to expedite development of the OCS. What are we doing allowing this unneeded, time-wasting provision to remain in the bill? If we are trying to streamline development of one of America's greatest oil resources, how can we justify this hindrance? If we say we are worried about fairness and antitrust security we have the FTC's own testimony telling us there is no need for concern. Section 205(c) as now before us is not warranted.

Therefore, Mr. President, since monopolization is nearly impossible when hundreds of leases are involved, and since the FTC itself has found the provisions unnecessary given the bill's other safeguards, and in the light of our critical need to develop the offshore resources of this Nation, I urge my colleagues to vote to modify section 205(c) in accordance with my amendment.

EXHIBIT 1

STATEMENT BY WALTER T. WINSLOW, JR.

Good morning: I am Walter T. Winslow, Jr., and I am an Assistant Director of the Federal Trade Commission's Bureau of Competition. I appreciate this opportunity to present the views of the Commission on H.R. 1614, the Outer Continental Shelf Lands Act Amendments of 1977.

With me today are Darius W. Gaskins, Jr., Director of the Bureau of Economics, and David J. Saylor, an Assistant Director of the Bureau of Competition. After I present a somewhat abbreviated version of the Commission's written statement, Mr. Gaskins would like to make a brief statement on his own behalf, and then all three of us will be available to answer the Committee's questions.

H.R. 1614 represents a major effort to bring the Outer Continental Shelf Lands Act into accord with the United States' present energy and environmental needs. Although many aspects of this bill deal with matters outside the Commission's expertise, the Commission in general supports this Committee's efforts at comprehensive reform and in particular endorses the Committee's apparent commitment to bring about that reform in a manner that will maintain competition in this important aspect of the Nation's economy. The Commission has a number of specific comments on the provisions of the bill that, as noted in this Committee's March 15 letter to Chairman Collier, relate to the maintenance of competition.

AMENDED SECTION 5(a): CONSULTATION ON PROPOSED REGULATIONS

Section 204 of the bill would amend Section 5(a) of the Act and set forth a variety of requirements concerning the promulgation and enforcement of regulations necessary to implement the Act. "At each stage in the formulation and promulgation of regulations," the Secretary of the Interior is required to seek and duly consider the Attorney General's opinion of matters affecting competition, but there is no such requirement with respect to the Commission's views on competitive matters. The Commission also

notes that amended Section 5(a) would require the Secretary to "cooperate with the relevant agencies of the Federal Government and of the affected States" concerning the enforcement of safety, environmental, and conservation laws and regulations, but the Secretary would not be required to consult or cooperate with such agencies in the formulation and promulgation of such regulations.

The regulations to be issued by the Secretary would deal with a wide range of issues, and both the Commission and other agencies may wish to furnish advice to the Department of the Interior as proposed regulations are being formulated and promulgated. The Commission recommends that there be added to the bill's present provisions a general requirement that the Secretary furnish information to and consider the views of any agency that chooses to become involved in the formulation and promulgation of regulations.

AMENDED SECTION 8(a): BIDDING SYSTEMS

Section 205 of H.R. 1614 would amend Section 8(a) of the Outer Continental Shelf Lands Act in four ways that are of particular interest to the Commission: (1) it would authorize the Secretary to utilize a number of new oil and gas lease bidding systems [1]; (2) it would limit the amount of acreage that the Secretary could lease by cash bonus bid with a fixed royalty of not less than 12½ percent [2]; (3) it would require the Secretary to make an annual report to the Congress on the use of the various authorized bidding systems [3]; and (4) it would prohibit joint bidding on oil and gas leases in certain circumstances.[4] The Commission has comments on each of these amendments.

The Secretary is currently permitted, at his discretion, to offer oil and gas leases for bid either on the basis of a cash bonus with a fixed royalty of not less than 12½ percent per year or on the basis of a royalty of not less than 12½ percent per year with a fixed cash bonus.[5] Amended Section 8(a) would expand the Secretary's bidding alternatives to include, among others: variable royalty bidding with a fixed cash bonus,[6] cash bonus bidding with a fixed share of at least 30 percent of the bidder's profits from oil and gas produced on the leased area,[7] and net profit share bidding with a fixed cash bonus.[8] Amended Section 8(a) would also allow the Secretary to defer the payment of any part of a successful bidder's cash bonus bid for up to five years from the date of the lease sale or until such time as the bidder secures approval of his development and production plan, whichever of the two dates first occurs.[9]

In October 1975, the Commission published a Staff Report on Federal Energy Land Policy.[10] In that report, the Bureaus of Competition and Economics concluded that large cash bonus bids, coupled with high exploration costs, work to the relative disadvantage of smaller firms, which are either excluded altogether or virtually compelled to enter joint ventures.[11] The Commission is pleased that amended Section 8(a) seems to reflect some of the concerns expressed by the Commission's staff regarding the current cash bonus bidding system. In particular, the Commission supports the Committee's apparent desire to provide the Secretary with a wide variety of new bidding alternatives.

Although H.R. 1614 provides the Secretary with oil and gas lease bidding system options not currently available to him, the amendment is still of a limiting nature. The Commission is of the opinion that the Secretary should be free to experiment with variations of the bidding systems listed in amended Section 8(a) as well as with new bidding systems not so enumerated.[12] By such experimentation, the Secretary would be able to determine which system or systems are most consistent with the purposes and policies expressed in the bill, including the increasing of competition.[13]

An example of a bidding system that may have merit but does not appear to be available to the Secretary under amended Section 8(a) is the two-stage bidding system recommended by the Bureaus of Competition and Economics in the Commission's Staff Report on Federal Energy Land Policy.[14] Under such a system, exploration rights would be leased separately from development and production rights. Bids for exploration rights would require no "front-end" monetary payment, but instead would take the form of an agreement to accept a certain share of the bonus payment paid to the Government if and when the production and development rights to the property were leased. The firm agreeing to accept the lowest share of the Government's payment would receive the exploration rights to the property. If the property proved to be productive, the development and production rights to the property would then be offered to the firm bidding the highest cash bonus. A portion of this bonus payment would go to the firm holding the exploration rights to the property. If the property proved to be non-productive, its production and development rights would, of course, be valueless, and the firm holding the exploration rights would receive nothing.

It was the conclusion of the Staff Report that this two-stage bidding system would be the most competitive alternative to the current cash bonus system,[15] and the Commission understands that the Department of the Interior is presently studying a similar two-tier system.[16] The Commission believes that the Secretary should have these and other options available to him.

Section 205 of the bill would also amend Section 8(a) to prohibit the Secretary from leasing by cash bonus bid with a fixed royalty of not less than 12½ percent more than two-thirds of the total area offered for lease each year.[17] The Commission would support some such limitation to ensure that alternative bidding systems are utilized, but the Commission is not currently in possession of enough information to assess this "two-thirds rule."

Amended Section 8(a) would also require the Secretary to file an annual report to the Congress with respect to the utilization of the various authorized bidding systems.[18] The Commission supports the requirement that the Secretary include in his report a description of the benefits and costs associated with the various bidding systems and an analysis of the capability of each bidding system to increase competition.[19]

Section 205 would also amend Section 8(a) to prohibit joint bidding for oil and gas leases under certain circumstances. Joint bids could not be submitted if ". . . more than one of the joint bidders, directly or indirectly, controls or is chargeable worldwide with an average daily production of one million six hundred thousand barrels a day or more, or the equivalent, in crude oil, natural gas, and liquefied petroleum products." [20]

The Commission's Staff Report on Federal Energy Land Policy urged that serious consideration be given to the costs and benefits of prohibiting offshore oil and gas bidding ventures among the major oil companies.[21] Shortly after the Staff Report was published, the Congress enacted the Energy Policy and Conservation Act of 1975. Section 105 of that Act required the Secretary of the Interior to issue regulations that, in terms similar to those of amended Section 8(a), prohibit joint bidding by oil companies more than one of which produce on the average at least 1.6 million barrels per day of "crude oil, natural gas liquids equivalents, and natural gas equivalents." The Commission assumes that the Committee intends amended Section 8(a) to supersede Section 105 of the EPCA and the regulations issued thereunder, though the bill is not explicit on this point.

The 1.6-million-barrels-per-day test in the EPCA establishes a fixed limitation, but in amended Section 8(a) this same test would be used to fix only a maximum beneath which the Secretary could establish joint bidding restrictions by regulation.[22] The Commission is not in a position to state whether 1.6 million barrels per day is an appropriate maximum or whether any maximum is necessary, but the Commission agrees that the Secretary should have the ability to adjust the joint bidding restriction in light of changes in market conditions. Indeed, if the alternative bidding systems succeed in making it easier for small firms to submit bids on their own, the Commission believes that the Secretary should be required to issue regulations setting forth stricter restrictions on joint bidding. The Commission recommends that whether or not a maximum is adopted, the Secretary be required (perhaps on an annual basis) to consider adjusting the joint bidding restriction in light of changed market conditions.

PROPOSED SECTION 8(c): ANTITRUST REVIEW OF PROPOSED LEASES

Section 205(b) of the bill sets forth a proposed Section 8(c) that would require the Secretary to hold in abeyance for 30 days the initial issuance of any lease and to furnish the Attorney General and the Commission with such information as they may require in order to advise the Secretary whether the proposed lease "may create or maintain a situation inconsistent with the antitrust laws." Upon receipt within the 30-day period of advice from either agency that a lease may cause such antitrust problems, the Secretary could issue the lease only if he found, on the basis of a public hearing, "that the overall benefit to the public from the issuance or extension of such lease clearly outweighs any possible adverse effect upon competition and that there is no reasonable alternative which would have a lesser adverse effect upon competition."

Since hundreds of offshore leases may be issued in any year, and since it would be unusual for the issuance of any one lease to tend to create or maintain a situation inconsistent with the antitrust laws, the Commission does not believe that antitrust review by the Commission of proposed leases can or should be relied on to provide significant antitrust protection in this area. The preferable means of maintaining competition with respect to offshore leases is to build antitrust protections into the Secretary's decision-making process. H.R. 1614 already contains provisions that should accomplish that purpose. The requirement of antitrust advice concerning proposed regulations has already been discussed, and other opportunities for antitrust advice will be discussed at later points in this statement.

Given the Commission's reservations about the efficiency and necessity of antitrust review outside the Department of the Interior, the Commission is pleased to note that H.R. 1614 would not require the Commission to submit comments on all proposed leases. In fact, as the Commission interprets proposed Section 8(c), neither the Commission nor its staff would be required to consider every proposed lease. If the Committee shares this interpretation, the Commission has no objection to the provision, though the Commission is concerned about whether an antitrust review of a proposed lease can be accomplished in only 30 days. The Commission also recommends that in its report on H.R. 1614 the Committee make clear its intention that neither the Commission nor its staff be required to consider every proposed lease.

The Commission supports the standard enunciated by proposed Section 8(c), namely whether a lease "may create or maintain a situation inconsistent with the antitrust

Footnotes at end of article.

laws." This standard recognizes that the Commission's advice would be prospective and deal in probabilities. The Commission also endorses the use of the criterion of "inconsistency" with the antitrust laws: the public hearing process of Section 8(c)(1) should be set in motion when the Secretary is advised that certain proposed leases are discordant with the legal and economic policies underlying the antitrust laws, even if the reviewing agencies are unable to conclude that such leases would violate those laws.

Important to any analysis of proposed Section 8(c) is the provision in proposed Section 8(e) that nothing in the Act shall be deemed to immunize any person or business entity from civil or criminal antitrust liability or to create defenses to antitrust actions. The Commission vigorously supports this important provision which recognizes that the mere fact that the Commission and the Attorney General failed to object to a proposed lease under Section 8(c), or that the Secretary approved a lease after receiving negative antitrust advice, should not bar an antitrust suit. Under Section 8(c), the Commission, the Attorney General, and the Secretary will all be looking to the future and will necessarily speak in terms of probabilities. If new information or changed circumstances subsequently indicate that the issuance of a lease has created a situation inconsistent with the antitrust laws, there must exist the opportunity to bring an appropriate suit.

As presently drafted, Section 8(c)(2) empowers the Secretary to issue a lease despite negative antitrust advice from the Attorney General or the Commission if he finds, inter alia, that the public benefit of issuance "clearly outweighs any possible adverse effect upon competition." In the Commission's view, this language fails to allow for the fact that the Secretary will be dealing with future events: it would require him to predict whether the future public benefit of a not-yet-extant lease "clearly" outweighs any "possible" anticompetitive consequence of the lease. The Commission believes that a more administrable test that would accomplish antitrust objectives is whether the overall public benefit of a proposed lease outweighs all of the probable anticompetitive effects identified by the Commission, the Attorney General, and the Secretary. The Commission further believes that the Secretary's determination to issue a lease in this situation should be required to set forth with specificity the nature, likelihood, and severity of the anticompetitive effects and the reasons why the public benefit of the lease outweighs such effects.

AMENDED SECTION 15: REPORTS CONCERNING COMPETITION

Section 207 of the bill would amend Section 15 of the Act by requiring the Secretary to file additional annual reports with the Congress. In particular, amended Section 15(2) would require a report concerning such topics as competitive bidding systems, restrictions on joint bidding in promoting competition, and measures to encourage the entry of new competitors. In preparing the report, the Secretary is to consult with the Attorney General, whose own recommendations or findings regarding competition in the leasing of Outer Continental Shelf lands are to be incorporated into the report. Although this section does not call for consultation with the Commission, there is no apparent need for an amendment. If the Commission wishes to comment upon the Secretary's annual report, it can do so by reporting to the Congress on its own initiative.

PROPOSED SECTION 18: PROPOSED LEASING PROGRAM

Section 208 of the bill would add a new Section 18 to the Act. Section 18(d)(1) would permit the Attorney General to comment upon the anticipated competitive effects of the Outer Continental Shelf leasing program proposed by the Secretary. In addition, any state, local government, Regional Outer Continental Shelf Advisory Board, or other person may submit to the Secretary comments and recommendations regarding "any aspect" of such program. Section 18(d)(2) would then require the Secretary to submit to the President and the Congress the proposed leasing program and any comments received under Section 18(d)(1), and to explain why he rejected any specific recommendation of the Attorney General or of a state, a local government, or a Regional Outer Continental Shelf Advisory Board.

The Commission notes that the comment and recommendation mechanism of Section 18(d)(1) contains no reference to the Commission or to any of the agencies of the Federal Government (save the Attorney General). The Commission may well want to submit comments and recommendations regarding proposed leasing programs, as may other federal agencies, and the Commission urges the addition to Section 18(d)(1) of "Federal agency," between the words "any" and "State." Likewise, "Federal agency," should be inserted into Section 18(d)(2) between "a" and "State." Under such an approach, there would be no need to include a specific reference to the Commission.

MISCELLANEOUS COMMENTS

Finally, the Committee's letter to Chairman Collier called the Commission's attention to the provisions of the bill dealing with (1) citizen suits and judicial review and (2) affirmative action to preclude discrimination. The Commission supports the apparent enforcement and antidiscrimination purposes of these two provisions, but defers to the Department of Justice for a detailed statement of views.

FOOTNOTES

[1] This amendment would be contained in amended Section 8(a)(1)-(2) of the Act. Unless otherwise indicated, all section references hereinafter are to provisions of the Act as it would be amended by the bill.

[20] § 8(a)(7).

[21] Commission's Staff Report at 749.

[22] Another difference between the approach of the EPCA and the approach of amended Section 8(a) is that the EPCA permitted the Secretary to exempt from the prohibition leases that he determined to be "high-risk" or "high-cost" ventures, while amended Section 8(a) would apparently not permit any exemptions. An exemption for such ventures could as a theoretical matter result in more rapid development of the United States' offshore oil and gas resources without anticompetitive consequences, but the Commission does not possess sufficient information to determine whether as a practical matter an exemption is justified.

Mr. HATCH. I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATCH. I would like to yield, Mr. President, to the distinguished Senator from California.

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. I am grateful to the Senator from Utah. As I see it, his amendment is an attempt to simplify the legislation that has been presented, is that correct?

Mr. HATCH. That is correct.

Mr. HAYAKAWA. The Senator said the Federal Trade Commission and the Justice Department already have sufficient authorization in the committee bill to assure the public there will be no anticompetitive factors in the leasing.

Mr. HATCH. I could give the Senator three pages of citations giving them complete authority to take care of this without the present provisions in the bill.

Mr. HAYAKAWA. What are some of the safeguards?

Mr. HATCH. Well, section 204, amendment section 5(2) of the act says:

At each stage in the formulation and promulgation of regulations" the Secretary of Interior is required to seek and duly consider the Attorney General's opinion of matters affecting competition.

1. The bill contains a wide variety of new bidding alternatives, all commended by the FTC as helps toward expanding competition.

A certain portion of these new bidding alternatives are mandated to be used, including the filing of an annual report to Congress with respect to the utilization of these bidding systems, including an analysis of how each system increased competition (sec. 205, amended sec. 8(a)).

2. Section 205 amends section 8(a) to prohibit joint bidding for oil and leases under certain circumstances.

Also under the Energy Policy and Conservation Act of 1975, section 105 of that act requires the Secretary of Interior to issue regulations that also prohibit joint bidding by oil companies under certain circumstances (if more than one produces 1.6 million barrels per day crude oil, gas, or natural gas equivalents).

Section 205 of this bill builds on these regulations.

3. Section 207, amends section 15 of the act by requiring the secretary to file additional annual reports, particularly reports concerning competitive bidding systems, restrictions on joint bidding to promote competition, and measures to encourage new competitors. (see 15(2)).

The Secretary, in preparing the report, must consult the Attorney General whose recommendations regarding OCS competition are to be incorporated in the report.

4. Section 208, adding a new section 18(d)(1) to the act, permits Attorney General to comment upon anticipated competitive effects of OCS leasing program proposed by Secretary, but also any State, local govern-

ment or any other person may submit comments and recommendations regarding "any aspect" of the program. The Secretary must report to the President and the Congress on his actions responding to these recommendations.

5. Section 205, adding section 8(e); provides that nothing in the bill or act shall be deemed to immunize any person or business entity from civil or criminal antitrust liability or to create defenses to antitrust actions.

This assures that even if section 205 8(c) did not exist, an antitrust suit could not be barred at any time in the OCS procedure.

If new information or changed circumstances subsequently indicate that the issuance of a lease has created antitrust problems, the opportunity always exists for an FTC or Justice Department suit.

Thus:

There is ample reason for the FTC to comment that the OCS bill ". . . already contains provisions that should accomplish . . ." the purpose of ". . . significant antitrust protection in this area." Without section 205, 8(c).

I have already commented on a variety of other measures in my original statement.

Mr. HAYAKAWA. Mr. President, will the Senator from Utah yield further?

Mr. HATCH. Yes, I would be happy to yield to the Senator from California.

Mr. HAYAKAWA. I asked a simple question for a simple answer and I got an avalanche in reply.

I thank the Senator from Utah.

Mr. HATCH. I thank the distinguished Senator from California, and I reserve the remainder of my time.

Mr. JACKSON. Mr. President, the committee reviewed this matter very carefully. I would point out that the Federal Trade Commission did not testify on this provision. Their testimony was related to the original bill, not the bill now before the Senate.

The language in the bill on page 163 makes it clear that the Federal Trade Commission can specify the class of leases it wishes to review, and I will read it, on line 5, page 163:

The Federal Trade Commission may, by rule, exclude from the requirements of this subsection any class of lease which it determines would, if issued, be unlikely to create or maintain a situation inconsistent with the antitrust laws. If the Federal Trade Commission advises the Secretary, within such thirty-day period, that a proposed lease may create or maintain a situation inconsistent with the antitrust laws, the Secretary may issue such lease . . .

Mr. President, I think it speaks for itself, and I am prepared to yield back the remainder of my time.

May I inquire what the time situation is? It was 15 minutes all told for both sides.

Mr. METZENBAUM. Mr. President, will the Senator from Washington yield?

Mr. JACKSON. It is 7½ minutes to a side; is that not correct?

The PRESIDING OFFICER. That is correct.

Mr. METZENBAUM. Will the Senator, Mr. President, permit me to take 1 minute, please?

Mr. JACKSON. I yield 1 minute.

Mr. METZENBAUM. I would hope the Senate would not see fit to accept this amendment, because what we are really talking about is whether or not the Federal Trade Commission is going to have the right to determine the antitrust implications of the OCS leasing program. There is a procedure established. It will not be a lengthy procedure. They may exclude a class of leases if necessary. But to delete all of this language as proposed by the distinguished Senator from Utah from the bill would truly do violence to the beliefs of those of us who do believe that the antitrust laws of this country should be enforced, should be applied, and should have a relevance in connection with the OCS leases.

I hope very much the Senate will not see fit to accept this amendment.

Mr. HATCH. Mr. President, will the distinguished Senator from Ohio yield for a question?

Mr. METZENBAUM. Certainly.

Mr. HATCH. Is the Senator aware this does not do away with the antitrust laws applicability in this case nor does it do away with the Federal Trade Commission's—my amendment does not do away with the Federal Trade Commission's—right to bring an enforcement action? All it does is to do away with the 30-day delay, which does not benefit anybody anyway. It is basically a technical amendment, and the FTC has made it clear they have every ability to do everything they need to do anyway. Why have another 30-day delay?

Mr. METZENBAUM. I have great respect for the legal ability of the distinguished Senator from Utah. I will say that although the FTC might have every legal right to do everything you say they do, including the language in the law as it is proposed in the legislation, it will mean that the FTC will have a special kind of obligation in connection with these leases, and it cannot turn its back on the question, and the question is whether or not one would hope for the normal procedures to be effectuated for the FTC to come into a situation or whether in drafting this bill we think the FTC has a special kind of responsibility in order to see that anticompetitive aspects of these lease awards are not negated.

Mr. JACKSON. Mr. President, I am prepared to yield back the remainder of my time. I think all time will have expired.

Mr. HATCH. If I could just finish with one statement.

The PRESIDING OFFICER. The Senator has 1 minute.

Mr. HATCH. The only thing I care to add is that, frankly, this denies the FTC in no way—the FTC has an obligation to do this, has an obligation to make sure there are no anticompetitive practices and, frankly, admits it is very unlikely they will ever have to utilize their authority. Therefore, I think it is almost ridiculous to have a 30-day delay. That is what this amendment does, it does away with that but does not deprive the FTC or anybody else in curbing anticompetitive practices to do what they should do.

I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Kentucky (Mr. FORD), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from North Carolina (Mr. MORGAN), the Senator from Maine (Mr. MUSKIE), and the Senator from Georgia (Mr. NUNN) are necessarily absent.

I further announce that, if present and voting, the Senator from Maine (Mr. MUSKIE), and the Senator from North Carolina (Mr. MORGAN) would each vote "nay."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Missouri (Mr. DANFORTH), the Senator from Michigan (Mr. GRIFFIN), the Senator from Illinois (Mr. PERCY), and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

The result was announced—yeas 22, nays 63, as follows:

[Rollcall Vote No. 291 Leg.]

YEAS—22

Allen	Hansen	McClure
Baker	Hatch	Schmitt
Bartlett	Hayakawa	Thurmond
Curtis	Helms	Tower
Domenici	Javits	Weicker
Garn	Laxalt	Young
Goldwater	Long	
Gravel	Lugar	

NAYS—63

Bayh	Hart	Pearson
Bentsen	Haskell	Pell
Biden	Hatfield	Proxmire
Brooke	Hathaway	Randolph
Bumpers	Heinz	Ribicoff
Burdick	Hollings	Riegle
Byrd, Harry F., Jr.	Huddleston	Roth
	Humphrey	Sarbanes
Byrd, Robert C.	Inouye	Sasser
Cannon	Jackson	Schweiker
Case	Kennedy	Sparkman
Chafee	Leahy	Stafford
Chiles	Magnuson	Stennis
Church	Matsunaga	Stevens
Clark	McGovern	Stevenson
Cranston	McIntyre	Stone
Culver	Melcher	Talmadge
DeConcini	Metcalf	Wallop
Dole	Metzenbaum	Williams
Durkin	Moynihan	Zorinsky
Eagleton	Nelson	
Glenn	Packwood	

NOT VOTING—15

Abourezk	Ford	Morgan
Anderson	Griffin	Muskie
Bellmon	Johnston	Nunn
Danforth	Mathias	Percy
Eastland	McClellan	Scott

So Mr. HATCH's amendment was rejected.

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. MATSUNAGA). The Senator from Alaska.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. STEVENS. I yield to the majority leader.

TIME LIMITATION AGREEMENTS ON AMENDMENTS

Mr. ROBERT C. BYRD. Mr. President, I take the floor at this time to ascertain, if it is possible to do so, the number of amendments that remain, and whether or not it will be possible to get a reduction in time on those amendments, keeping in mind that we must finish this bill today, and then we have scheduled the legislative appropriation bill to follow it today. There is a time limitation agreement on that bill, and I would not anticipate its taking too long. Could we have a show of hands as to amendments still remaining?

Mr. STEVENS, Mr. THURMOND, and Mr. GLENN.

Mr. STEVENS. I will be glad to make mine 20 minutes, 10 minutes on a side.

Mr. BUMPERS. Mr. President, Senator MELCHER also has an amendment.

Mr. ROBERT C. BYRD. All right. The Senator from Alaska (Mr. STEVENS) has agreed to 20 minutes on his amendment, to be equally divided.

Mr. JACKSON. What about 15 minutes?

Mr. STEVENS. Some Senators may have questions.

Mr. ROBERT C. BYRD. I make that request; not to exceed 20 minutes, equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. GLENN tells me he has three amendments. He suggests 20 minutes, equally divided, on each of those three amendments. He said he will not take that much time. I make that request.

Mr. STEVENS. Mr. Majority Leader, for the benefit of some of the other Senators, we are under a unanimous-consent agreement right now to vote by 6 o'clock. Senator GLENN's three amendments, in the unlikely event he would take the full hour, would take until 10 past 5. That would leave Senator THURMOND, Senator MELCHER, and Senator STEVENS 50 minutes for their amendments.

Mr. ROBERT C. BYRD. The Senator assures me he will not take that much time. I make the request on behalf of Mr. GLENN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. THURMOND?

Mr. THURMOND. Mr. President, I might make a brief statement. We have five amendments. We feel that they have merit in them, but one of those amendments concerns attorneys' fees, a matter now being considered by the Judiciary Committee. I have received assurance from the managers of the bill that when the Judiciary Committee acts on this bill, if it does, concerning attorneys' fees, they would agree then to a position on attorneys' fees in this bill and other legislatin that might be affected.

The other amendments were mostly concerning the erosion of the power of the Attorney General of the United States. I feel that this bill does erode his power. On the other hand, he has not contacted, I believe, anyone here in the Senate about that. He is a Democratic Attorney General, and I presume he would have, if he felt strongly about it; and in view of the fact that we have received no information from him in this respect, I am not going to push my amendments, for the reason that I think in conference some of these things can be ironed out. Others might be straightened out in the Judiciary Committee, and I feel sure the Attorney General will make contact with whomever he chooses if he finds that the action included in this bill is too repugnant to his office.

In view of that, I will not offer my amendments.

Mr. President, I want to say also that one reason I am doing that is the lateness of the hour, and the desire of Senators to go home, because it is Friday afternoon. I felt, in the spirit of cooperation, that that was appropriate.

Mr. ROBERT C. BYRD. I thank the Senator. Does the Senator from Montana (Mr. MELCHER) wish to reduce the time on his amendment?

Mr. MELCHER. Mr. President, what is the suggestion of the majority leader?

Mr. ROBERT C. BYRD. The minimum time the Senator would be satisfied with.

Mr. MELCHER. Under the previous order, what is the maximum time?

Mr. ROBERT C. BYRD. The Senator has 1 hour.

Mr. MELCHER. There are two or three amendments, Mr. President, and it is obvious they cannot all take an hour. I would suspect that 25 minutes, equally divided, would be sufficient.

Mr. DURKIN. Mr. President, I am going to have to resist that amendment, because it is to undo what was done this morning.

Mr. ROBERT C. BYRD. Would 30 minutes, equally divided, then, be sufficient, realizing the power of the Senator's arguments, and the gravity with which the Senator can state them?

Mr. DURKIN. Equally divided, I would say that is plenty of time.

Mr. ROBERT C. BYRD. I make the request, for 30 minutes equally divided on the Melcher amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I inquire of the minority leader whether he feels it might be possible to reduce the time on rollcalls for the remainder of the day to 10 minutes.

Mr. BAKER. Mr. President, while we are trying to get that, I wonder if the Senator from Arkansas will yield to me, so that I might ask a question of the majority leader.

Mr. BUMPERS. I am glad to yield.

Mr. BAKER. Mr. President, we will be hard put to finish even with the consideration of those matters within the time limits as we have now stipulated by 6 o'clock. Even after that, we have the legislative appropriation bill to be considered. Would it be possible to ask the majority leader to have an arrangement so that we could debate the legislative appropriation bill this afternoon, and postpone the vote until sometime on Monday?

Mr. ROBERT C. BYRD. It might be that those votes will be voice votes. It would be agreeable with me, if it is agreeable with the manager of the bill (Mr. HUDDLESTON) and the ranking minority member (Mr. SCHWEIKER), that if any rollcall votes are ordered on that bill, they go over until Monday.

Mr. BAKER. I will make that unanimous-consent request.

Mr. ROBERT C. BYRD. I would rather not make the request until I clear it.

Mr. BAKER. Very well.

Mr. STEVENS. Mr. President, I have an amendment at the desk.

Mr. BUMPERS. Mr. President, if the Senator from Alaska will withhold that for a moment, will the Senator yield to the Senator from Massachusetts? He has a conference report.

Mr. STEVENS. I yield.

HEALTH PLANNING AND HEALTH SERVICES RESEARCH AND STATISTICS EXTENSION ACT OF 1977—CONFERENCE REPORT

Mr. KENNEDY. Mr. President, I submit a report of the committee of conference on H.R. 4975 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. MATSUNAGA). The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate to the bill (H.R. 4975) to amend the Public Health Service Act to extend through the fiscal year ending September 30, 1978, the assistance programs for health services research; health statistics; comprehensive public health services; hypertension programs; migrant health; community health centers; medical libraries; cancer control programs; the National Cancer Institute; heart, blood vessel, lung, and blood disease prevention and control programs; the National Heart, Lung, and Blood Institute; National Research Service Awards; population research and voluntary family planning programs; sudden infant death syndrome; hemophilia; national health planning and development; and health resources development; to amend the Community Mental Health Centers Act to extend it through the fiscal year ending September 30, 1978; to extend the assistance programs for home health services; and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of July 14, 1977.)

Mr. KENNEDY. Mr. President, I ask unanimous consent that the printing requirement be waived, since the conference report was printed in the House of Representatives.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I am pleased to bring up for consideration the conference report on H.R. 4975. The Senate and House conferees have met and agreement has been reached on all matters. The major purpose of this legislation is to extend for 1 year, fiscal year

1978, the numerous expiring health authorities under the Public Health Service Act and the Community Mental Health Centers Act without making major substantive revisions in the programs. This approach was taken to meet the May 15 reporting requirement of the Budget Act and at the same time give the Congress and administration a reasonable period of time to develop proposals for substantive improvements in these important programs. These programs will be substantively reevaluated in the months ahead by the Subcommittee on Health and Scientific Research.

At the conference, the conferees agreed to delay the effective date of the capitation condition with respect to the transfer of U.S. citizens from foreign medical schools until the school year 1978–79 under the Health Professions Educational Assistance Act of 1976. The conferees agreed that final resolution of this issue should occur shortly.

Finally, I wish to draw to the attention of the Senate an important technical and clarifying amendment made by the conferees to section 707 of the Public Health Service Act. This section, which became law last October, was and is intended to recentralize the performance of most health manpower functions in Washington, D.C. I am very concerned at the seeming inability of the Department of HEW to comply with the clear intent of the Congress regarding the administration of the health manpower program on a national basis from its central offices. It has now been 9 months since the enactment of Public Law 94–484, and the one transitional year, which the Congress deliberately built into this legislation in order to provide for an orderly changeover from the old law to the sweeping revisions contained in Public Law 94–484, is almost over. And yet, incredibly, the Department has yet to provide to the Central Office of the Bureau of Health Manpower the essential resources it will need to effectively implement the new law. This technical and clarifying amendment adopted by the conferees is explicitly designed to finally resolve this issue.

This is urgently needed legislation so that our Nation's vital health programs can continue to operate. I move that the conference report be adopted.

Mr. CRANSTON. Mr. President, the Health Assistance Programs Extension Act of 1977 conference report authorizes the continuation of several important health programs for 1 year without substantive change. During the coming year, we will be developing legislation including proposals for substantive improvements in those programs to be effective in fiscal year 1979. In the meantime, the many people who are dependent upon the services provided through such programs as migrant health centers, neighborhood health centers, and community mental health centers, family planning centers, alcoholism and drug treatment centers, among other programs, can be assured of continued availability of health care.

FAMILY PLANNING

I would like to express my deep appreciation to the conferees for agreeing to an appropriations authorization of $140 million for title X family planning services. This $140 million consists of $136,400,000 for project grants for family planning services, $3,000,000 for training programs in family planning services, and $600,000 for family planning information and education programs.

In addition, special recognition should be given to Senator JAVITS, Senator WILLIAMS, Senator PACKWOOD, and Senator RIEGLE for their vigorous support of adequate family planning services programs.

Special thanks are due the distinguished Senator from Massachusetts (Mr. BROOKE) for his steadfast and effective support of an adequate level of funding for these programs. It was his floor amendment to H.R. 4975 which increased the level of authorizations for these programs $10 million over the $130 million included in the Senate Human Resources Committee bill pursuant to my amendment in committee.

Then in the Appropriations Subcommittee consideration of H.R. 7555, the Labor-HEW Appropriations Act for fiscal year 1978, Senator BROOKE was successful in amending that act to provide appropriation of the full $140 million amount authorized by Senate action on H.R. 4975 for fiscal year 1978. The conference report figure sustains the Senate appropriations level.

FAMILY PLANNING SERVICE PROGRAMS

Mr. President, I am sure the Members of the Senate are well aware of the magnitude of the need for family planning services. The population for whom this program is especially intended consists of 5.8 million women between the ages of 15 and 45 whose incomes are below 150 percent of the poverty level. In addition, there are 2.2 million teenagers above that income level who face obstacles other than income in obtaining family planning services, such as shyness about approaching the family physician because of suspected lack of confidentiality, the lack of personal income of a teenager, and their ineligibility for third-party coverage without parental consent or knowledge. There are an additional 3.4 million women with incomes between 150 percent and 200 percent of the poverty level who are between the ages of 15 and 45. In addition, it is estimated that there are 420,000 sexually active girls under the age of 15 of whom 30,000 are now receiving family planning services.

It is estimated further, Mr. President, that the organized programs receiving title X funds will reach 3 million women in fiscal year 1977. By adding the funds received from Social Security Act, title V—Maternal and Child Health—and title XIX—Medicaid—organized programs were able to reach 4,200,000 women. Thus, the PHS Act title X funds support by far the bulk of services provided through organized programs.

According to HEW that the average cost of providing family planning services in organized settings to an individual is $72 of which $36 is Federal funds. In an urban area, the cost will be considerably less, while in rural areas it is higher. As more teenagers are brought into the program, the costs increase since few of them are eligible for Medicaid reimbursement and providing services to teenagers requires more counseling, information, and education services. Hence, the need for greater funding to reach more teenagers.

The appropriation of $136.4 million would permit services to be provided to an additional 622,000 women over the 3 million currently served with title X funds. It would also avoid any need for tens of thousands of abortions.

REDUCING ABORTIONS

In 1976 it was estimated that about 1 million abortions were performed. Data indicate that one-third are in the 20-to-24 age group. These are the primary age population groups served by organized family planning programs. Approximately 30 percent of patients in title X programs are teenagers, and 38 percent are between the ages of 20 and 24.

Expanding the family planning services provided under organized family planning programs to an additional 622,000 women not now utilizing family planning services would thus be expanding these services primarily to that group of women most likely to be faced with an unwanted pregnancy that would be terminated by an abortion.

It is estimated that the availability of family planning services last year to teenagers led to a 20-percent increase in the proportion of teenagers using contraceptives. Based on previous data, it is estimated that at least 90,000 abortions have been avoided and 330,000 unwanted pregnancies have so far been avoided among teenagers through these expanded programs.

Organized family planning programs meet the special needs of the teenager in that they are open evenings and Saturdays. They provide counseling and information which a private physician normally does not provide. With greater frequency, teenage males also are obtaining information on contraceptives from organized clinics.

Thus, Mr. President, the services provided through title X funded programs are of special importance in reducing unwanted pregnancies and abortions among the teenage population.

The appropriations authorizations level for family planning services agreed to in conference will thus permit major advances to be made against the tragic social problem of teenage pregnancy.

FAMILY PLANNING PROGRAM TRAINING

I am also pleased that the conference report continues the support of grants and contracts for training individuals representing all elements of the family planning clinic staff, with special attention being given to regional and local staff priorities in the establishment of training programs. Among the key personnel trained under this authority are family planning nurse practitioners, who have proven to be an invaluable asset in the provision of family planning services, as well as outreach workers who have been instrumental in making individuals in remote areas aware of the availability of these services. These individuals are essential if established family planning

programs are to succeed in their efforts to expand their services to surrounding areas with limited health care resources.

FAMILY PLANNING INFORMATION AND EDUCATION PROGRAM

The bill authorizes the appropriation of $600,000 for information and education programs. Planned Parenthood reports that at least 1 million young women below age 20 become pregnant each year, and the vast majority of these pregnancies are not planned. In addition, that organization reports that less than 40 percent of single teenage women know the period of time during which they are likely to become pregnant, and 30 percent of teenage women are unaware of where they can obtain family planning services. These figures make compelling arguments for an informational and educational program that can reach these young people.

POPULATION RESEARCH

The bill authorizes the appropriation of $68.5 million for research in the biomedical, contraceptive development, behavioral, and program implementation fields related to family planning and population.

Appropriation of $68.5 million for fiscal year 1978, an increase of approximately $14 million over the amount appropriated in fiscal year 1977, will permit a modest expansion in population research, after the inflation factor and the costs of administration are taken into consideration.

Few medical research efforts promise the social and economic returns which can be obtained through investments in population research; the less effective our contraceptive technology is, the higher costs of family planning services will be.

The House-passed bill contained a provision which clarifies that the existing prohibition on the use of funds appropriated under authorities of the Public Health Service Act other than section 1004—relating to authorizations of appropriations for family planning research—included the administrative costs of family planning research activities. The Senate agreed to this provision. However, we do not intend this provision to result in the reduction of the amount of funds available for population research excluding administrative costs, and the statement of managers accompanying the conference report makes this clear. The National Institute on Child Health and Human Development should therefore allocate the funds appropriated in such a way as to assure at least the maintenance of the existing population research program level after taking into account the need for increased funding necessitated by inflation.

I am pleased that the Senate has recommended the appropriation of the full amount authorized for each of these family planning activities in the Senate-passed appropriations bill for fiscal year 1978.

SUDDEN INFANT DEATH SYNDROME—SIDS

I would also like to express my gratitude for the action taken in conference on the authorizations level for the sudden infant death syndrome program. In conference we agreed to authorize the appropriation of $3,650,000 in fiscal year 1978, a substantial increase over the amount currently appropriated. Again, Senator BROOKE is due a heartfelt thanks for his unflagging support of an adequate authorizations level as well as for obtaining an appropriation in the Senate of the full amount authorized in amendments he offered to both H.R. 4975, and H.R. 7555, the Labor-HEW Appropriations Act for fiscal year 1978.

Some 7,000 infants die each year in this country of sudden infant death syndrome—also called crib death. This is a mysterious disease which strikes apparently healthy infants, quickly and unexpectedly. Parents of these infants bear emotional scars that remain with them forever. They are plagued by self-doubts and worry that through some oversight or neglect they contributed to the infant's death.

As I indicated earlier, Mr. President, the Senate bill was amended on the floor by Senator BROOKE with the cosponsorship of Senator WILLIAMS, Senator JAVITS, Senator RIEGLE, and myself to authorize the appropriation of adequate funds for the support of programs to provide education and training to social workers, police, doctors, and others who come into contact with families who have lost infants to SIDS, and to encourage the coordination of community resources for providing the necessary counseling and emotional support to those families. The program is supported currently at an appropriation level of $2 million. With the $3,650,000 recommended to be appropriated by the Senate, HEW would be able to establish programs in some of the 23 States in which no programs to assist these families now exist. Additional funds would also help in gathering the data so urgently needed on the children who die to determine if there is a pattern which might lead to early recognition of susceptibility to crib death and its prevention.

I support the conference report and urge the Members of the Senate to approve it.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1977

The Senate continued with the consideration of S. 9.

UP AMENDMENT NO. 666

The PRESIDING OFFICER. The clerk will report the amendment of the Senator from Alaska.

The legislative clerk read as follows:

The Senator from Alaska proposes an unprinted amendment numbered 666.

Mr. STEVENS. Mr. President, I ask that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 154 between lines 8 and 9 insert the following:

"(2) The Secretary may utilize leasing systems in which exploration lessees share in the costs of exploration and the consideration received from sale of subsequent leases for development and production, notwithstanding any inconsistent provisions of section 8(b)(4), 8(K) and section 9 of this Act, provided that payments shall not exceed amounts appropriated for that purpose by Congress."

The remaining subsections in section 205 shall be renumbered accordingly.

On page 135, line 9, immediately after the words "authorizes exploration for," delete the word "and".

On page 135, line 10, immediately after the word "development" delete the word "and" and insert in lieu thereof the word "or", and immediately after the word "production" delete the word "of," and insert in lieu thereof ", or any combination thereof or".

Mr. STEVENS. Mr. President, this amendment is designed to expedite exploration in remote areas where development is expensive and risky, without having the Federal Government pay the total cost of exploration and keeping the management decisions in the private sector; 70 percent of the Federal Outer Continental Shelf lies off the coasts of my home State, Alaska. We want our national petroleum resources explored and developed, and in areas where development is risky, as it is in Alaska, I do not want the Federal Government deciding where to drill. My colleagues who have argued so eloquently for federally contracted exploration, for competition in the offshore area, and for a fair return for the sale of public resources should find this amendment acceptable.

Under my amendment, the Department of the Interior would be authorized to issue separate exploration and production leases—this is not allowed under S. 9. Here is how it would work: An exploratory lease would be awarded by competitive bidding under one of the systems authorized by the act. The exploratory lessee would bid to share with the Government the costs of the exploratory drilling program, which would be managed by the lessee, in exchange for a share of the revenues received by the Government from a subsequently issued production lease.

The resulting exploratory information would be available to all potential bidders for production leases. This should provide for more competition on the production leases, and more money for the Federal Treasury. Smaller companies would be able to participate in both the exploration lease and the production lease.

Geophysical firms, for example, which cannot afford to take the risk of bidding on a conventional lease because of the great amount of cash required, and because of the risk due to the lack of knowledge, could bid on an exploration lease. The risk would be far less since the Government would be sharing the cost, yet the Government would not be footing the entire exploration bill, and they would be guaranteed a share of the production profits. It is an ideal opportunity for geophysical firms with their vast exploration experience to get involved.

Production leases offered after exploratory information has been made

available to all on an equal basis, would permit small companies to come in with the same information as the big companies. This should increase bids since new companies have to reduce their bids to account for risk induced by uncertainty.

While this information would be publicly available, it is attractive because the drilling would be managed by the private sector with appropriate incentives for efficient exploration.

Perhaps it would be helpful if I explained the dual leasing system in greater detail. Bidders for exploration leases bid to become partners with the Government by absorbing a percentage of the costs of exploration in return for a percentage of the bonus or other Government revenues received from the sale of subsequent leases which would allow continued exploration, development, and production. The terms of the sharing of exploration costs and revenues from subsequent leases and the conditions governing the decision to sell development leases would be spelled out in the exploratory leases.

The information collected by the exploration lessee is made available to all potential bidders and to the public before the sale of subsequent leases. If it has been collected with proper consideration for its payoff, it should reduce bids on poor prospects and increase them on good prospects. At the same time it should encourage greater competition for subsequent leases because smaller firms which might otherwise not bid because of the great risks will know more about the prospects available. Better information will also result in smaller "risk discounts"—the amount by which firms reduce their bids because of the great uncertainty about the resource—and thus increase the bids.

Such a leasing system may prove to be advantageous in collecting resource data because it allows management of exploratory drilling by the private sector under the appropriate incentives for efficient exploration while still making the resource information publicly available.

This gives the advantages of Government exploration—improved competition, higher revenues, and better resource information—while avoiding some of the difficulties involved in management of exploratory drilling under contract.

The provision of authority to use such "dual leasing" systems along with other systems to be authorized would be advantageous now, even though the design and evaluation of such systems has not been completed. This would allow the Secretary to further evaluate and if it proves to be feasible, to test such systems. Under the current law, and current pending bill, the Secretary would not be permitted to test such a dual leasing system.

My State has 70 percent of the Outer Continental Shelf. I know the desirability of dual leasing is questionable in some other areas, but in our State we would like to see dual leasing take place. We lease vast areas at one time and the cost of the environmental assessment of those areas, if it is related to both exploration and development, is horrendous.

In addition to that, we feel there are some areas in my State which are so risky that perhaps private capital would not go into them at all unless they have some assistance. If we have the exploration phase under a separate lease and then have a discovery there will in fact be the incentive for private capital to come in and develop. The alternative is to have all exploration in those areas conducted by the Federal Government because these are areas where the private capital, as I said, is going to be very reluctant to go at all.

I have discussed this matter with the manager of the bill. I realize that in committee there was considerable controversy about it. My good friend from Wyoming has a suggestion. If he wishes me to modify this amendment I will be pleased to do so, so we can have a test at least in my area. Is that the desire of the Senator?

Mr. HANSEN. Yes, it is.

Mr. President, if the Senator will permit me to make that request, I would move to modify the amendment so as to cause it to read this way:

The Secretary may, notwithstanding the lease limitations of Section 201(C), utilize leasing systems in the Outer Continental Shelf off Alaska in which exploration lessees share in the costs of exploration and the consideration received from sale of subsequent leases for development and production, notwithstanding any inconsistent provisions of Section B(b)(4), 8(K) and Section 9 of this Act, provided that payments shall not exceed amounts appropriated for that purpose by Congress.

And then, "The remaining sections shall be numbered accordingly."

We would strike the second section.

The PRESIDING OFFICER. Will the Senator from Alaska send the modification to the desk?

Mr. STEVENS. I will send to the desk the modification of the Senator from Wyoming and ask that my amendment be modified accordingly.

The PRESIDING OFFICER. The amendment will be so modified.

The amendment, as modified, is as follows:

On page 154 between lines 8 and 9 insert, the following:

"(2) The Secretary may, notwithstanding the lease limitations, in section 201(c), utilize leasing systems, in the Outer Continental Shelf off Alaska, in which exploration lessees share in the costs of exploration and the consideration received from sale of subsequent leases for development and production, notwithstanding any inconsistent provisions of section 8(b)(4), 8(K) and section 9 of this Act, provided that payments shall not exceed amounts appropriated for that purpose by Congress."

The remaining subsections in section 205 shall be renumbered accordingly.

Mr. STEVENS. Mr. President, this is acceptable to me and I think will be reluctantly acceptable to the administration. This will give an opportunity to test the dual leasing systems approach in the area where there is the highest risk and greatest cost to engage in either exploration or development. I think it would be in the best interest of my State to see to it that development of Alaska proceeds in accordance with this system. After we use the yardstick in Alaska, if it works, I am sure they will be back with an amendment to make it applicable everywhere else. It will be a good test.

Mr. JACKSON. As I understand it, the Senator has modified his amendment so that it applies only to the Outer Continental Shelf off Alaska.

Mr. STEVENS. That is correct.

Mr. JACKSON. Mr. President, under the circumstances, we are prepared to accept the amendment. I yield back the remainder of my time.

Mr. HANSEN. Mr. President, I yield back the remainder of my time.

Mr. STEVENS. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska, as modified.

The amendment, as modified, was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment, as modified, was agreed to.

Mr. JACKSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. GLENN. I ask unanimous consent that Lyle Morris and Leonard Bickwit, of my staff, be granted the privileges of the floor during the consideration of the pending measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 667

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment No. 667.

Mr. GLENN. Mr. President, I ask that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 152, after line 8 add a new subparagraph to read as follows:

(3)(A) The Energy Policy and Conservation Act (P.L. 94–163) is amended by adding at the end of section 106(a)(1) the following:

"The Secretary shall by December 1, 1977 publish in the Federal Register final rules of general applicability governing determination of the maximum efficient rate of production."

Mr. GLENN. Mr. President, this deals with the MER establishment, the final rules governing the establishment of MER.

My amendment would amend section 106 of the Energy Policy and Conservation Act—EPCA—so as to require that the final rules governing the determination of the maximum efficient rate of production of oil and gas on Federal lands be set by December 1, 1977.

The Department of Interior has been working for some time on this for the last year or so, as I understand it.

The Interior Department has not moved quickly to set MER's. The Department is presently in the process of arriving at an acceptable definitional framework for the MER's, and I am afraid that if that process is not completed as soon as possible no MER's will be set this winter. I am very much concerned that we are likely to face another severe natural gas crisis this winter. Because of that distinct possibility, we should be doing everything we can now to insure that as much gas as possible will be available at that time. Establishing MER's could help provide additional production when we need it. Setting December 1 as a deadline for determining what MER should be will help expedite this process.

This has been discussed with leaders on both sides of the aisle. I hope it is acceptable to them. I do not require a vote on this. I hope that both the floor managers of the bill will be willing to accept that amendment.

The PRESIDING OFFICER. Who yields time?

Is there any objection to the amendment?

Mr. HANSEN. Mr. President, let me say that, insofar as this side of the aisle is concerned, we have no objection to Senator GLENN's amendment.

Mr. GLENN. I thank the distinguished Senator from Wyoming.

The PRESIDING OFFICER. Is there objection?

Mr. BUMPERS. Mr. President, the amendment offered by the Senator from Ohio is acceptable to me. I have talked to the chairman of the committee; it is also acceptable to him.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 668

Mr. GLENN. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes unprinted amendment No. 668.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 154, at line 4 strike out "or".

On page 154, at line 8 strike out the period and insert in lieu thereof "; or".

On page 154, after line 8 add a new subparagraph to read as follows:

"(H) Subject to the requirements of paragraph (2) of this subsection any modification of bidding systems authorized in subparagraphs (A) through (G) or any other systems of bid variables, terms and conditions which the Secretary determines to be useful to accomplish the purposes and policies of this section.

"(2)(A) The Secretary shall submit any bidding system authorized in subparagraph (H) of paragraph (1) to the Senate and House of Representatives. The Secretary may institute such bidding system unless the Senate and the House of Representatives pass a concurrent resolution of disapproval within thirty days after receipt of the bidding system.

"(B) Clauses (c) through (j) of this subparagraph are enacted by Congress—

"(I) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but they are applicable only with respect to the procedures to be followed in that House in the case of resolutions described by this subparagraph, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(II) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

"(c) A resolution disapproving a bidding system shall immediately be referred to a committee (and all resolutions with respect to the same request shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(d) If the committee, to which has been referred any resolution disapproving the bidding system of the Secretary to exceed the limitation has not reported the resolution at the end of 10 calendar days after its referral, it shall be in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to the same bidding system which has been referred to the committee.

"(e) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same recommendation), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(f) If the motion to discharge is agreed to, or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same request.

"(g) When the committee has reported, or has been discharged from further consideration of, a resolution as provided, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(h) Debate on the resolution is limited to not more than 2 hours, to be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

"(i) Motions to postpone, made with respect to the discharge from the committee, or the consideration of a resolution with respect to a bidding system, and motions to proceed to the consideration of other business, shall be decided without debate.

"(j) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives as the case may be, to the procedure relating to a resolution with respect to a request shall be decided without debate."

On page 154, at line 9, strike "(2)" and insert in lieu thereof "(3)".

On page 154, at line 17, strike "(3)" and insert in lieu thereof "(4)".

On page 154, at line 21 strike "(4)" and insert in lieu thereof "(5)".

On page 155, at line 8, strike "(5)" and insert in lieu thereof "(6)".

On page 156, at line 17, strike "(6)" and insert in lieu thereof "(7)".

On page 160 at line 18, strike "(7)" and insert in lieu thereof "(8)".

Mr. GLENN. Mr. President, this amendment would permit the Secretary of the Interior to modify the bidding systems specified in the bill and utilize other bidding systems not specifically provided for if he feels that they would be beneficial in accomplishing the bill's objectives. In order to provide Congress with an opportunity to scrutinize any new or revised bidding system before it is instituted, the amendment requires that the Secretary send the proposal to the Congress so that both Houses may disapprove within 30 days.

One of the purposes of this bill is to test new, previously untried, bidding systems to determine whether they could stimulate exploration and development of our OCS oil and gas resources to a greater extent than would be the case under the present cash-bonus bidding system. While S. 9 provides for a number of potentially worthwhile alternative bidding systems, the Secretary should be permitted the option of revising those systems or formulating new ones to suit the particular circumstances involved. Nevertheless, the Secretary will not be given a totally free hand under the amendment. The congressional veto mechanism will provide the Congress sufficient opportunity to watch his actions closely on this matter.

This amendment also has been discussed with people on both sides of the aisle. I hope it is acceptable to the floor managers of the bill. I do not require a record vote on this, either.

Mr. BUMPERS. Mr. President, I personally favor this amendment. I supported it in committee. I should have to say that an amendment similar to this did not survive the committee. The Senator from Ohio has changed this amendment substantially from the one that was presented to the committee, and he has provided for a congressional veto of these combination bidding systems.

I also say that the Secretary of the Interior strongly endorses the amendment of the Senator.

Mr. GLENN. That is correct.

Mr. BUMPERS. I, personally, endorse it, but I understand the other side of the aisle has some reservations on it. I shall not say anything further on it.

Mr. HANSEN. Mr. President, I regret to have to oppose the amendment, but I do so because the drafting of these provisions written into the bill, as reported by the Energy and Natural Resources Committee, resulted after hearings and after a long debate. It seems to me that, if we were to adopt this amendment, we would largely be undoing the actions of the committee, which I think were responsible and, certainly, reflected in great detail all of the ramifications of the systems under which the Secretary now can operate. For those reasons, I do have to oppose this amendment.

The trouble with trying to consider something hastily on the floor, as we are now called upon to do, is that it seems to me to deny to Members an opportunity to hear the detailed arguments, which it was the opportunity of the members of the Energy and Natural Resources Committee to have heard and considered before they drafted the language in the bill. I hope that the amendment will not be adopted.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, the purpose of this bill was to take care of any of the propositions or any combinations that had not been covered in the bill previously. While the committee did long and diligent work on this and did come up, in the bill, with quite a number of different options, I do not feel that that, necessarily, is a complete list.

The Secretary of the Interior, whom we have discussed this with, feels that there might be other combinations that might be very useful in encouraging Outer Continental Shelf drilling. That is the reason we put this in. We feel that, while the committee did its work—and I should not quarrel with the distinguished floor manager of the bill on the minority side in that regard—I think there may be others that were not covered. We present this to make sure that the Secretary does not go off in some direction we did not want by giving two-House disapproval within 30 days of any proposition that the Secretary might come up with.

Does the distinguished minority floor manager call for a vote on this? What is his wish?

Mr. HANSEN. I should be constrained to call for a vote on it.

On page 160 of the bill, if Senators will read beginning with line 18, there is provision in the bill, as offered now to Congress, to give the Secretary an opportunity at the—may I just read some of the language:

> Within six months after the end of each fiscal year, the Secretary shall report to the Congress, as provided in section 15 of this Act, with respect to the use of the various bidding options provided for in this subsection.

Here specifically in the bill is the kind of authority I think is proper and appropriate.

If the Secretary determines that there may be a better way of doing something, he has the option at the end of each fiscal year to submit those options to the Congress and to give the Congress an option to examine them, to review them, to hear both sides of the argument, and then address them in the judgment of the Congress which would be incorporated into the law.

The trouble with the veto that is provided in the distinguished Senator's amendment seems to me to be that we are going to be acting upon a provision that has been implemented by the Secretary.

We have 30 days in which to veto it. We have 10,000 things to do. In all likelihood we are not going to be able to understand it nearly as clearly as I think will be the case if we follow the language in the bill.

Mr. METZENBAUM. Mr. President, this amendment was considered in committee, but not with the language in it providing for a possible veto by the Congress.

I think that adds to the strength of the amendment. I think the amendment gives the Secretary of the Interior the authority that he needs and wants.

I think what everybody wants in considering this bill is that the Secretary of the Interior be put in a position to get the best possible bidding arrangement that will serve this Nation.

I think with Senator GLENN's amendment, which gives him that authority, which makes it possible for a variation and a combination with respect to the bids that are accepted, it is a major step in the right direction.

I think the precautionary procedure that is provided for, making it possible for Congress to veto the action of the Secretary of the Interior and providing time limits or time constraints within which such action must be taken, provides the necessary safeguards.

Therefore, I hope that this amendment will be accepted. I think it will help much to strengthen the legislation.

Mr. GLENN. I thank my colleague.

The PRESIDING OFFICER. Who yields time?

Mr. JACKSON. Mr. President, I wonder if we can yield back the remainder of time on both sides?

Mr. GLENN. Does the distinguished Senator from Wyoming have any further comment or is he prepared to yield back?

Mr. HANSEN. I do not have any further comment.

The PRESIDING OFFICER. Does the Senator from Wyoming yield back his time?

Mr. GLENN. If the Senator from Wyoming does not concur, I would be forced to ask, Mr. President, for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. JACKSON. Not a sufficient second?

Mr. HANSEN addressed the Chair.

Mr. GLENN. I withhold that temporarily.

Mr. HANSEN. Would the distinguished Senator from Ohio agree to changing his amendment so as to have it read:

> The action of the Secretary can be overturned by a vote of either House of the Congress.

Mr. GLENN. Yes. That would be acceptable to me.

I felt in regard to what happened here over the last few days in other legislation there had been some indications that support would be broader if it was two Houses.

I would accept one.

Mr. HANSEN. On that basis I will not ask for a rollcall vote.

The PRESIDING OFFICER. Will the Senator send his modification to the desk?

Mr. GLENN. I will accept that modification to my amendment.

The PRESIDING OFFICER. And send it to the desk, please.

Mr. GLENN. I send it to the desk, Mr. President.

The PRESIDING OFFICER. The modification will be stated.

Mr. ROBERT C. BYRD. Will the Senator yield to me briefly?

Mr. GLENN. Yes.

UNANIMOUS-CONSENT AGREEMENTS—LEGISLATIVE APPROPRIATIONS

Mr. ROBERT C. BYRD. Mr. President, I have now been able to get certain clearances on the legislative appropriations bill.

I ask unanimous consent that if any rollcall votes are ordered on that bill, or on amendments or motions in relation thereto, today, such rollcall votes go over until Monday, with the following proviso, that the Senate work its way through such amendments and debate on the bill today, to the end that if rollcall votes are required, not only will they be put over until Monday, but that on Monday there will be no further debate or amendments to that bill.

Mr. BAKER. Mr. President, reserving the right to object, I wonder if the majority leader would consider including within his request that we proceed to third reading on the legislative appropriations bill today?

Mr. ROBERT C. BYRD. I think the way I have worded it had a reason, because I think there may be an amendment which would require a rollcall vote on Monday, which would mean we could not proceed to third reading today.

But the way I worded the request would mean we would only have those rollcall votes on Monday without further amendments and without further debate.

Mr. METZENBAUM addressed the Chair.

Mr. ROBERT C. BYRD. Which, in essence, would virtually do what the Senator is suggesting, except that we could not technically go to third reading today.

Mr. BAKER. If I understand the request, and while we would not proceed to third reading because there would be a vote on an amendment——

Mr. ROBERT C. BYRD. There might be.

Mr. BAKER. There might be a vote on an amendment to occur on Monday; we would have the functional equivalent of that; that is, on Monday, no other amendments would be in order.

Mr. ROBERT C. BYRD. Exactly.

Mr. BAKER. And third reading would be automatic.

Mr. ROBERT C. BYRD. Automatic, and the rollcall vote on final passage, if ordered.

Mr. BAKER. I might advise the majority leader that there will be a call for the yeas and nays on final passage of the legislative appropriations bill on Monday.

Mr. ROBERT C. BYRD. There will be?

Mr. BAKER. On final passage.

Mr. JACKSON. Do it now.

Mr. ROBERT C. BYRD. The Senator is sure of this?

Mr. BAKER. I am advised there will be a request for the yeas and nays on final passage.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent it be in order to order the yeas and nays on the final passage of the legislative appropriations bill at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, on that basis, I am delighted with that request and I join in it. We have no objection.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Ohio reserve the right to object?

Mr. METZENBAUM. Reserving the right to object, may I ask the distinguished majority leader, am I correct in assuming that those rollcall votes will not be before 4 o'clock on Monday?

Mr. ROBERT C. BYRD. I am prepared to ask unanimous consent that no rollcall votes occur before 3:30 on Monday. Would that satisfy the Senator?

Mr. METZENBAUM. I think my plane gets in at 3. Yes, 3:30 would be all right.

Mr. ROBERT C. BYRD. I make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Four o'clock?

Mr. ROBERT C. BYRD. The Senator wants 4 o'clock?

Mr. BAKER. Four o'clock.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that no rollcall votes occur on Monday prior to the hour of 4 o'clock p.m., except such rollcall votes as may be required in connection with the securing of a quorum, which is not likely.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Ohio.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1977

The Senate continued with the consideration of S. 9.

UP AMENDMENT NO. 668, AS MODIFIED

Mr. GLENN. Mr. President, my modified amendment is at the desk. I believe it is acceptable to the distinguished floor manager of the bill, and I ask for its immediate consideration. It will not require a record vote.

Mr. METZENBAUM. Mr. President, which amendment are we now talking about?

Mr. GLENN. This is on the unspecified bidding system. The Senator indicated that it was acceptable. The distinguished floor manager, on the other side of the aisle, indicated that if we went to a one-House veto, it would be acceptable to him.

Mr. METZENBAUM. This is the Senator's second amendment?

Mr. GLENN. Yes.

Mr. METZENBAUM. I have no objection.

Mr. GLENN. Mr. President, I yield back the remainder of my time.

Mr. HANSEN. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to, as follows:

On page 154, at line 4 strike out "or".

On page 154, at line 8 strike out the period and insert in lieu thereof "; or".

On page 154, after line 8 add a new subparagraph to read as follows:

"(H) Subject to the requirements of paragraph (2) of this subsection, any modification of bidding systems authorized in subparagraphs (A) through (G) or any other systems of bid variables, terms and conditions which the Secretary determines to be useful to accomplish the purposes and policies of this section.

"(2)(A) The Secretary shall submit any bidding system authorized in subparagraph (H) of paragraph (1) to the Senate and House of Representatives. The Secretary may institute such bidding system unless either the Senate or the House of Representatives pass a resolution of disapproval within thirty days after receipt of the bidding system.

"(B) Clauses (c) through (j) of this subparagraph are enacted by Congress—

"(I) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively but they are applicable only with respect to the procedures to be followed in that House in the case of resolutions described by this subparagraph, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(II) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

"(c) A resolution disapproving a bidding system shall immediately be referred to a committee (and all resolutions with respect to the same request shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(d) If the committee, to which has been referred any resolution disapproving the bidding system of the Secretary to exceed the limitation has not reported the resolution at the end of 10 calendar days after its referral, it shall be in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to the same bidding system which has been referred to the committee.

"(e) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same recommendation), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(f) If the motion to discharge is agreed to, or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same request.

"(g) When the committee has reported, or has been discharged from further consideration of, a resolution as provided, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(h) Debate on the resolution is limited to not more than 2 hours, to be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

"(i) Motions to postpone, made with respect to the discharge from the committee, or the consideration of a resolution with respect to a bidding system, and motions to proceed to the consideration of other business, shall be decided without debate.

"(j) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives as the case may be, to the procedure relating to a resolution with respect to a request shall be decided without debate."

On page 154, at line 9. strike "(2)" and insert in lieu thereof "(3)".

On page 154, at line 17, strike "(3)" and insert in lieu thereof "(4)".

On page 154, at line 21, strike "(4)" and insert in lieu thereof "(5)".

On page 155, at line 8, strike "(5)" and insert in lieu thereof "(6)".

On page 156, at line 17, strike "(6)" and insert in lieu thereof "(7)".

On page 160, at line 18, strike "(7)" and insert in lieu thereof "(8)".

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 669

Mr. MELCHER. Mr. President, I ask unanimous consent to amend the Durkin amendment No. 507.

Mr. DURKIN. Mr. President, reserving the right to object, may we have it read?

The PRESIDING OFFICER. Does the Senator from New Hampshire reserve the right to object?

Mr. DURKIN. I want to hear it.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment 669:

Page 4, line 2, insert after "agencies" "where the President determines that such exploration is the only means of obtaining adequate reserve and resource data;"

Mr. DURKIN. Mr. President, I join the Senator from Montana. I think this clarifies the intent of the amendment that was adopted this morning. I believe it solves a possible problem and misconception. So I join the Senator from Montana in offering this amendment and ask that it be adopted.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Mr. President, I state this as clarification of the need for the amendment: In adopting this morning Durkin amendment No. 507, it concerned a number of us that the language authorized and directed the President to use Federal agencies not only in the process of gathering data but also for the purposes of geophysical explorations, which had been identified as also including drilling. This concerns many of us, because we know that the independents are ready and willing to wildcat wherever possible, wherever there is any likelihood of finding oil or gas, and do not need a Federal agency doing that.

So, in order to make certain that this was not the thrust of paragraph (2) of (c)—(2) occurs on pages 3 and 4—in order to make sure that was not the thrust, to put the Federal agencies in the business of drilling wells when independents are available and would like to drill those wells, we inserted this language. I am pleased that the Senator from New Hampshire has accepted it.

Mr. DURKIN. I state for the record that there was absolutely no intent to shut out the wildcatters. The intent of my amendment was to authorize and direct the President to conduct a study of the extent of our oil and gas reserves and, only where necessary in order to get adequate data, to allow geophysical and geological explorations to be authorized by the President.

The amendment of the Senator from Montana clarifies that, and it solves the problem with the wildcatters and enables this country to get adequate information by the best method available.

Mr. STEVENS. Mr. President, reserving the right to object, I should like to hear the amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

Mr. STEVENS. Mr. President, I withdraw my objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Without objection, the amendment is agreed to.

Is there further amendment?

Mr. HANSEN. Yes. I am sure the Senator from Alaska has an amendment.

Mr. STEVENS. I wanted to comment on the amendment of the Senator from Ohio, but he offered it.

The PRESIDING OFFICER. Is there further amendment?

UP AMENDMENT NO. 670

Mr. GLENN. Mr. President, I have one more unprinted amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 670.

Mr. GLENN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 156, after line 16, add a new paragraph to read as follows:

"(6) In addition to each of the bid procedures hereinabove stated, the Secretary may, in the event he sets a fixed bonus under (B), (E) or (G), provide for the deposit in an escrow account an amount not to exceed 75% of the fixed cash bonus received and may grant to the lessee of any area leased pursuant to that paragraph such amounts of such funds as the lessee may need to finance a percentage, as determined by the Secretary, of the cost of drilling on the lease area: *Provided, however,* That no grants shall be made in excess of the cash bonus deposited in the escrow account for the leased area. In return for any such grant, the Secretary shall require an appropriate increase in the amount of royalty payments, profit share, or other compensation received from the lessee for the use of such lease area."

On page 156, at line 17 strike "(6)" and insert in lieu thereof "(7)".

On page 160, at line 18 strike "(7)" and insert in lieu thereof "(8)".

Mr. GLENN. Mr. President, this amendment would permit the Secretary to set up escrow accounts consisting of an amount not to exceed 75 percent of any fixed cash bonus funds received from successful lease bidders. The funds then would be drawn upon on a matching basis so as to help finance the costs of drilling. The large front-end cash bonus payments could thereby be put to productive use—not just put off in the Treasury—to partially offset the large capital requirements of drilling.

In order to compensate the Federal Government for providing grants from the escrow accounts, the Secretary shall require an appropriate increase in the amount of royalty payments, profit share, or other compensation received from the lessee for the use of such lease area.

This escrow account procedure should be available to the Secretary to utilize at his discretion because of the potential benefits of increased drilling which could result through its use.

Mr. President, what this does is to take the money and start drilling holes with it. It is to prevent situations such as we ran into in the eastern part of the Gulf of Mexico a few years ago, where we sold the leases for $1.4 billion.

Then the producers drilled on what they thought was the most productive leases they had purchased and ran into six straight dry holes and stopped drilling, while we sat with $1.4 billion in the Federal Treasury.

I am for upping the Federal Treasury, but I am concerned that when money is put out, it is put out for drilling holes, to get us out of our energy crisis. That is what this would do. It also would have the effect of helping smaller companies get into the oil business and be competitive, because it would let some of their lease bid money come back to them on a matching fund basis, to help drill more wells.

I think this would be a great step forward, with a potential of making sure that we drill the maximum wells in these leases because it makes the maximum use of this capital on a matching basis.

I hope the amendment is acceptable to both sides. We have modified it to be acceptable to the majority side. I believe it is acceptable to them.

I will accept any comments.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. GLENN. I yield.

Mr. RANDOLPH. The able Senator from Ohio is saying something that needs to be said thousands and thousands of times, and that is we must do what he is intending to be done here, to have a greater activity in drilling, drilling for oil, drilling for gas.

Mr. JACKSON. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. RANDOLPH. Yes. I thank the Senator very much.

Mr. JACKSON. Mr. President, I ask for the yeas and nays on final passage of the pending bill.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. JACKSON. I thank the Senator.

Mr. STEVENS. Mr. President, will the Senator yield? The Senate has just adopted the amendment that provides for a leasing option provision whereby the Secretary may lease in my State for exploration only, in which he participates in the exploration phase, and then bring about the cash bidding at the time of the drilling lease.

I would respectfully state to my friend I think you are going in the wrong way. If I put up a large cash bid and did not get the award, and if I knew my competitor was going to use my money from an escrow fund to develop the lease I am not going to bid.

I think this is a counterproductive thing. What we ought to do is devise a system which, I think, we are trying to devise in the amendment that will be applicable to Alaska; a no-cash bidding at the exploration phase, and a cash bidding at the drilling phase. I would urge you to let that system be tried before you do this which, in effect, I think will result in no substantial cash bids at all.

Mr. GLENN. Mr. President, if the distinguished Senator will yield for a comment, this would be the winning bidder. Seventy-five percent is his winning bid which would be put in escrow to help him drill. It would not be other people's money coming back to a wholly separate driller or producer.

Mr. STEVENS. Why should not that money go into the Treasury in any event? We sit on the Appropriations Committee, and we see that the budget has over $4 billion estimated in receipts to go into the Treasury for those who want to participate in this process. I see no reason—

this is really backdoor financing. It says 75 percent of the money going into the Treasury will be available to those who would do the drilling, and the Government is really taking 75 percent of the risk and sharing in 75 percent of the strike if oil comes in from that drilling or whatever percentage the Secretary works out.

Mr. GLENN. If the Senator will recall in my statement I also had that—

The Secretary shall require an appropriate increase in the amount of royalty payments, profit-share, or other compensation received from the lessee for the use of such lease area.

What we are doing is making the best use of our capital. That is the purpose of this. We are saying in these areas we will share in the risks as one of the options, but we will also share in the profits, or in the increased royalty, if there is a strike, and I think this will encourage drilling. It means our capital will be out there drilling holes instead of taking off into the Federal Treasury.

Mr. STEVENS. I could not agree with you more about eliminating the requirement for the exploration phase. I am not going to ask for a vote, but I just respectfully disagree with the concept that takes money that ought to go into the Treasury, and puts it out in a risk situation and requires it to be paid by the successful producer, if he does produce. You do not get the money back unless you discover, you know, so 75 percent of our money is at risk, and with the record we have had with successes in drilling it means about seven-eighths of the money is never going to come back, and what does come back will be the one-eighth, and that will increase the price of the oil in the end result to the consumer.

I think, respectfully, this is the wrong way. The way is to eliminate the bidding at the present exploration phase, and then have the bidding and competition at the drilling phase. That is my preference and it is what my amendment has done.

Mr. GLENN. I say to the Senator from Alaska this also would apply to the production. Once the well is in, it is producing, then the Government would share in the royalty or on a sharing basis once a strike is made. What I am saying is we are sharing the risks, we are sharing in the profits.

Mr. HANSEN. If the Senator will withhold, Mr. President, it seems to me we are finally getting at the real danger in this whole idea. I do not know how better you can get the Government into the oil business than precisely through this mechanism.

For a long time I have contended that the worst thing we can do is to take on the same attitude in Government that other countries have taken on, where the Government has gotten into the business, as England has and many other countries have. They do not begin to approach the success and the effective production of energy that we have in this country. That, just very frankly, Mr. President, frightens me no end. If we are going to have the incentive on the part of this law offering the Secretary of Interior encouragement to participate, as he can under this amendment, with the implied—not implied assurance—but with the guaranteed assurance that if you bring on a big strike the Government is going to get 75 percent of the money or up to that amount, then I should think there will be intense pressure on the Government of the United States to get into this kind of an operation.

I submit there is nothing we could do more certainly to insure the failure of our energy program—there has been a lot of criticism of it already—but if we want to put the capstone on and to insure we are going absolutely down the wrong way, I would say this is the way we ought to go. We are going to put the Government in the oil business right then and there.

I would hope very much that the Senate would reject this idea.

Mr. STEVENS. I say again to my friend, seventh-eighth of this money is never going to come back because that historically has been the amount of money invested in drilling. That money should go into the Treasury.

Your amendment will mean we are going to take the risk with money that should belong to the taxpayers, and it is back-door financing because if they came to our Appropriations Committee and asked for that money—I was told of one area where there were over 30 wells drilled in one leasehold—do you think the Appropriations Committee would give them—my good friend from West Virginia, do you think we would give them—money year after year to drill 30 wells in one leasehold? No.

But the people who take risks in this business were willing to take it until they finally found one of the large basins on the North American Continent—that was not in my State, by the way. But we have had repeated wells drilled in our State that were dry. They just plugged a $41 million dry hole off the shore of Alaska in the Yakutat area.

If we had put up 75 percent of that money we would have 75 percent of $41 million down the rathole, and that is not the way to do business as far as I am concerned.

I just do not see any reason to take money that should go to the Treasury and let it go out the backdoor through an escrow account concept.

I appreciate what you are trying to do. Let us just eliminate those bids at the exploration phase. That is what I tried to do, and as I said yesterday it has now been done for Alaska, and let us have a year or two to prove that system, and eventually I think the whole country will go to the concept where you have a lease for exploration and then you have competitive bids for a separate lease at the time of development.

Mr. GLENN. I would submit to my friend from Alaska if he is correct we are going to lose all the time on this, then that means the company would lose all the time and nobody will ever go drill to begin with.

What this is is a shared risk and shared profit, and does not put the Government into the oil business. We are not sending rigs out to do our own drilling. This is merely trying to use our capital to drill the most holes possible, and if we take all the money in the lease bids, cash bonus bids, off and put it in the Treasury there are going to be fewer holes drilled because there will be less capital available to drill holes.

All I was trying to do with this is to make certain we make the maximum use of our capital, drill the most holes we can, and where we take the risk with a company, where we take it with a company, not on our own, then if we lose we have lost some of our cash bonus bid money, but if they hit then we share in the profits from that well.

To say we would never get our money back would be to say that anyone going out and putting money into a well, capital into a well, will never get his money back because we would be sharing on the same basis as the company on whatever percentage we put into it with our capital and whatever they bid to begin with. All it does is make better use of the capital available to drill the maximum number of wells.

I have heard the Senator from Alaska in the Interior Committee, when I was on it last year, express himself forcefully about the amount of capital necessary to drill wells, and I share with him completely that concern that we are not going to have enough capital to drill the number of wells we should. This is a means of taking that capital and drilling more holes with it. We share on the basis of the profits if the wells are hit. That is the purpose of this amendment. I did not think there was any misunderstanding on this to begin with.

Mr. STEVENS. We share the common goal, but I disagree with the means.

Mr. HANSEN. I know Senator JACKSON is very eager to get a vote on this, but I think it is more important if we have to take a little more time so that if people do not understand what they are voting on at least those of us who do not agree with this amendment may have something in this RECORD to say why we voted as we did.

Let me read this amendment to you or just a little bit of it:

In addition to each of the bid procedures hereinabove stated, the Secretary may, in the event he sets a fixed bonus—

Under these different provisions—

provide for the deposit in an escrow account an amount not to exceed 75 percent . . .

This language does not say "he shall," it says "he may," and I can recall way back in the dim dark ages we had a Teapot Dome scandal. It seems to me we are opening this door wide open for all kinds of hanky-panky.

What is wrong with telling everyone and anyone who wants to bid what the rules are and say to them, "You are not going to have the use of this money, if you are going to bid more than you can afford to put in, and then put in the front end money to do the drilling, you better not be bidding."

But to be offered the opportunity to go to the Secretary and say, "It would make good sense, Mr. Secretary, if you would exercise your discretion and set aside 75 percent of the money," I can

see where all kinds of mischief can slip in.

This does not say, "You shall do it." It says, "You may do it."

I submit that that is not a very good way to do business.

Mr. GLENN. Mr. President, will the Senator from Wyoming yield?

Mr. HANSEN. I am happy to yield.

Mr. GLENN. The Senator only read part of the amendment. I ask the Senator to continue.

Mr. HANSEN. I am glad to. Senator JACKSON is in a hurry to get a vote, I do not mind.

Mr. GLENN. I did not point out the time. The Senator from Wyoming did. I did not hear Senator JACKSON on his feet objecting to anything in debate.

If the Senator will proceed he will find that the Secretary then, having set that aside and using that as a drawdown to help finance drilling " * * * shall require an appropriate increase in the amount of royalty payments, profit share, or other compensation received from the lessee * * * ."

Mr. HANSEN. Boy, and what does that mean? What all does that mean?

Mr. GLENN. I think it is beautiful. That is what I think.

Mr. HANSEN. It sure sounds like to me he could write any kind of law he wanted. I am even more frightened. I am glad the Senator read that because I did not realize how insidious this amendment really could be. I do not mean to imply at all that my good friend from Ohio is not possessed of the best intention. I am looking to see what a skillful lawyer could do. An astronaut and a farmer are not lawyers. But there could be people who might want to take advantage.

Mr. STEVENS. Mr. President, will the Senator yield on one thing?

Mr. GLENN. Mr. President, if the Senator from Wyoming will yield, please do not level a charge of being a lawyer at me here.

Mr. HANSEN. I did not.

Mr. STEVENS. As a lawyer, let me ask a question.

When does he have to set this aside, before the bid?

Mr. HANSEN. We are checking with the lawyers.

Mr. STEVENS. As one lawyer I tell Senators that it does not say. When we have to set money aside. It only says in the event he accepts the bid he has to establish escrow funds.

Mr. GLENN. If that is a problem, we are glad to change the language to add on the fourth line there * * * cash bonus received and may provide, in advance of the taking of bids, that he will grant to the lessee of any area * * *"

Mr. STEVENS. With all due respect I have lived with the Mineral Leasing Act of 1920 and the extensions of the Outer Continental Shelf for over 25 years. I urge the Senator not to write provisions like this in the Chamber.

Mr. GLENN. I ask the Senator from Alaska does he want to up the capital requirements for drilling in this Nation when we are on our backs from lack of energy? Does he want to make billions of dollars going off into the U.S. Treasury rather than drilling holes?

Mr. HANSEN. No one is forcing anyone to bid so much.

Mr. GLENN. I am trying to find a way to drill holes, not to take it to the U.S. Treasury.

Mr. HANSEN. Yes, I know the Senator is.

Mr. GLENN. All the spectres of Teapot Dome and everything that the distinguished Senator from Wyoming brings up is a bunch of poppycock. We are not trying to do that, and he knows that.

Mr. HANSEN. I know the Senator is not trying to do that and I was completely misunderstood if the Senator infers I was suggesting that.

Mr. GLENN. I did not suggest it. The Senator is the one who raised the spectre of Teapot Dome, not me.

Mr. HANSEN. I know that. I attribute nothing but the best of intentions to my friend from Ohio.

When we try to write a bill in the Chamber like this, it is not these little nuances in the language that bothers me; it is the whole concept of the amendment.

Mr. President, the fact is no one tells any company or individual or anyone else what he has to bid. There is nothing in the law that says what you have to bid. If it is a cash bonus bid you have to bid over one buck. You can bid one buck or $1 billion. But the point is that we are leaving a lot of discretion, it seems to me, to the Secretary of the Interior in here, and I suggest that that is a terrible way to be doing business. I think that everyone is going to be on the same starting line if we say to them:

> We are calling for a cash bonus bid. You can bid as much or as little as you want. But understand this: the rules are clear and distinct now and they are not going to be made up later on subject to the discretion of the Secretary of the Interior as to how much money you may get back or what other arrangements may be made.

Mr. GLENN. If the Senator will yield, I will be happy to put that requirement in that that be understood at the beginning of the bidding.

Mr. HANSEN. What worries me is the whole concept.

Mr. STEVENS. Mr. President, will the Senator yield one more time to me? I will just try once more.

Mr. HANSEN. I am sorry.

Mr. STEVENS. If the Senator from Ohio will let me simply say what my worry is I think we have the same goal, as I said. If you have an independent small company that wants to build in the OCS or drill in the OCS and they want to bid under the existing system, not in Alaska now——

Mr. ROBERT C. BYRD. May we have order in the Senate?

Mr. STEVENS. I thank the Senator.

In Alaska you will have exploration space and drilling space, but everywhere else in the U.S. offshore if you had a small company that wanted to be involved and had just enough money to put up for the bid and did not have an enormous company behind them they would come in and make a bid, say, of $1 million. They have a company that is ready to put up the money for the bidding process and they also have the capital in the bank to deal with drilling process.

So they say:

> Hey, he has announced he is going to put up 75 percent in the bank, and we can draw it out anyway, so we can bid $1,750,000 right now, and this guy only has $1 million; that is all he can put up is $1 million.

The net result of what the Senator is doing is a reverse curve in terms of the process of trying to get small people involved in the Outer Continental Shelf.

I tried all my life to get more involvement there in terms of trying to eliminate this up front money. That is what my amendment just did.

It says in Alaska the Secretary of the Interior may lease for exploration and then, when there is discovery, he leases on the basis of competitive bid reducing the risk of drilling and the risk of development or delay of development.

Respectfully I say to my friend that he is turning this over and he is telling us that whoever puts up the money and has the most capital to start with is the one who is going to win the bid because that 75 percent is——

The PRESIDING OFFICER (Mr. ZORINSKY). All the time of the opponents has expired.

The Senator from Ohio has 1 minute remaining.

Mr. STEVENS. I thank you.

Mr. GLENN. Mr. President, in summary of the positions here, all I am trying to do with the amendment and what I believe it would do is it would make the maximum use of our capital. The Senator from Alaska, I think, is guaranteeing no small companies cannot get in unless we do something like this. What this will do is say if there are companies that are not the huge companies or are not the giants of the world there is a chance for them to get in and some of this money under a royalty arrangement that the Secretary could work out can use that and help finance their drilling. I think this would expand. I think it would enhance drilling completely. I think there would be many more holes drilled because we are going to have a limited amount of capital in the world with which to drill, and I think this makes the maximum use of that capital and as far as discretion goes we are allowing the Secretary of every department considerable discretion in whatever use of the funds.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. All time has expired.

Mr. DURKIN addressed the Chair.

Mr. METZENBAUM. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. METZENBAUM. Has the Senator from Ohio offered the amendment to his amendment?

The PRESIDING OFFICER. Is there a sufficient second?

Mr. HANSEN. The yeas and nays.

Mr. GLENN. Mr. President, I submit an amendment to my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. JACKSON. Mr. President, let him amend it first before the Senator asks for the yeas and nays.

Mr. STEVENS. Let him modify it.

Mr. JACKSON. Mr. President, I ask unanimous consent that the Senator may perfect his amendment.

Mr. GLENN. This is a perfecting amendment to my amendment that provides——

Mr. HANSEN. How much time do we have on this, Mr. President?

The PRESIDING OFFICER. Thirty minutes equally divided.

Mr. HANSEN. How much?

The PRESIDING OFFICER. Thirty minutes equally divided.

Mr. HANSEN. The Senator asked for it.

The PRESIDING OFFICER. The amendment will be stated.

The modified amendment is as follows:

On page 156, after line 16, add a new paragraph to read as follows:

(6) "In addition to each of the bid procedures hereinabove stated, the Secretary may in the event he sets a fixed bonus under (B) (E) or (G), provide for the deposit in an escrow account an amount not to exceed 75% of the fixed cash bonus received and may provide, in advance of the taking of bids, that he will grant to the lessee of any area leased pursuant to that paragraph such amounts of such funds as the lessee may need to finance a percentage, as determined by the Secretary, of the cost of drilling on the lease area:, *Provided, however*, That no grants shall be made in excess of the cash bonus deposited in the escrow account for the leased area. In return for any such grant, the Secretary shall require an appropriate increase in the amount of royalty payments, profit share, or other compensation received from the lessee for the use of such lease area."

On page 156, at line 17 strike "(6)" and insert in lieu thereof "(7)".

On page 160, at line 18 strike "(7)" and insert in lieu thereof "(8)".

Mr. GLENN. This is a perfecting amendment.

Mr. HANSEN. I know it is—30 minutes worth.

Mr. GLENN. I suggest to the Senator from Wyoming that this changes it as the Senator from Wyoming suggested a while ago might be more acceptable.

Mr. ROBERT C. BYRD addressed the Chair.

Mr. HANSEN. What I like most of all is to have the Senator withdraw the amendment. I hope it will be defeated, if not.

Mr. ROBERT C. BYRD. Mr. President, were the yeas and nays ordered on the amendment?

The PRESIDING OFFICER. They were not.

Mr. HANSEN. Mr. President, I ask for the yeas and nays on the perfecting amendment.

Mr. STEVENS. On the perfecting amendment?

Mr. HANSEN. Yes.

The PRESIDING OFFICER. The perfecting amendment that has been sent up is not in order in its drafting.

The question is on agreeing to the original amendment.

Mr. DURKIN addressed the Chair.

Mr. GLENN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. DURKIN. Mr. President, I move to table the Glenn amendment.

Mr. HANSEN. What is it?

Mr. DURKIN. I move to table the Glenn amendment.

Mr. GLENN. I suggest the absence of a quorum.

Mr. HANSEN. I ask for the yeas and nays. The yeas and nays, Mr. President.

The PRESIDING OFFICER. The absence of a quorum has been suggested, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I ask unanimous consent that I may be permitted to withdraw the perfecting amendment.

Mr. ROBERT C. BYRD. Mr. President, the Senator does not need unanimous consent. The yeas and nays have not been ordered.

Mr. GLENN. I withdraw the perfecting amendment.

The PRESIDING OFFICER. The perfecting amendment has never been called up.

Mr. GLENN. Mr. President, all time having expired, I ask for the yeas and nays on the original amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HANSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HANSEN. Was the perfecting amendment accepted?

The PRESIDING OFFICER. No.

Mr. GLENN. No, I withdrew it.

The PRESIDING OFFICER. The perfecting amendment was never called up. There is pending a motion to lay on the table offered by the Senator from New Hampshire.

Mr. DURKIN. Well, they want to go up or down.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GLENN. Has a motion been made to table the amendment?

The PRESIDING OFFICER. It has been.

Mr. HANSEN. I ask for the yeas and nays.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from New Hampshire withdraw his motion, and let us have a vote up or down on the amendment? Otherwise, we may have two rollcalls.

Mr. DURKIN. Mr. President, deferring to the wisdom of the distinguished majority leader, I withdraw the motion to lay on the table.

The PRESIDING OFFICER. The motion is withdrawn. The question is on agreeing to the amendment of the Senator from Ohio. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Kentucky (Mr. FORD), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from North Carolina (Mr. MORGAN), the Senator from Maine (Mr. MUSKIE), the Senator from Georgia (Mr. NUNN), the Senator from Rhode Island (Mr. PELL), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) would vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Missouri (Mr. DANFORTH), the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), and the Senator from Virginia (Mr. Scott) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

The result was announced—yeas 26, nays 54, as follows:

[Rollcall Vote No. 292 Leg.]

YEAS—26

Bentsen	Huddleston	Randolph
Brooke	Humphrey	Ribicoff
Case	Jackson	Riegle
Chiles	Javits	Sarbanes
Cranston	Magnuson	Sparkman
DeConcini	Metcalf	Stennis
Eagleton	Metzenbaum	Weicker
Glenn	Moynihan	Williams
Hart	Proxmire	

NAYS—54

Abourezk	Gravel	Melcher
Allen	Hansen	Nelson
Baker	Haskell	Packwood
Bartlett	Hatch	Pearson
Bayh	Hatfield	Roth
Biden	Hathaway	Sasser
Bumpers	Hayakawa	Schmitt
Burdick	Heinz	Schweiker
Byrd, Harry F., Jr.	Helms	Stafford
	Hollings	Stevens
Byrd, Robert C.	Inouye	Stone
Chafee	Kennedy	Talmadge
Clark	Laxalt	Thurmond
Culver	Leahy	Tower
Curtis	Long	Wallop
Domenici	Lugar	Young
Durkin	Matsunaga	Zorinsky
Garn	McGovern	
Goldwater	McIntyre	

NOT VOTING—20

Anderson	Ford	Muskie
Bellmon	Griffin	Nunn
Cannon	Johnston	Pell
Church	Mathias	Percy
Danforth	McClellan	Scott
Dole	McClure	Stevenson
Eastland	Morgan	

So the amendment was rejected.

ADDITIONAL STATEMENTS SUBMITTED BEFORE FINAL PASSAGE

Mr. HATCH. Mr. President, perhaps it is a little peculiar to say, but the things which have been done in these 2 days in this Chamber to the Outer Continental Shelf Act sadden me. As a Senator from Utah, I do a good deal of flying over my State. Of course we have

no Outer Continental Shelf to worry about, but we are simliar to the Coastal States which do in that, just as the Outer Continental Shelf lands are controlled by the Federal Government, some 70 percent of the surface area of my State is also directly owned by the Federal Government. And, like the Outer Continental Shelf, those lands also contain rich mineral deposits which are of importance for the energy future of our country.

The situation with the Outer Continental Shelf is that our resources in that area have been developed very satisfactorily under the 1953 law for many years. One cannot avoid the belief that the bill as reported out of committee—and especially as amended in the work of these 2 days—is designed to do one or both of two things. One is to delay and hinder private exploitation of the oil and gas resources on the Continental Shelf; the other is to involve the Government more and more intimately in the business of actually producing oil and gas. And this, of course, is a giant step in the direction of nationalization of oil and gas production.

Mr. President, recently I had occasion to read an article on Federal leasing of lands containing mineral deposits in the May 1977 issue of Mining Engineering. In that article there is a remarkable graph showing the acreage leased competitively per year from public and acquired lands for the exploration and development of coal, potash, phosphate, and sodium. From a high point in 1968, the graph drops to a flat zero in 1969, following the passage of the National Environmental Protection Act. Thereafter a recovery began, but it was never very strong, and it seems to have been aborted by such legislation as the Federal Coal Leasing Amendments Act of 1975. In their minority report to that act, Senators Paul Fannin and DEWEY BARTLETT wrote that, if this bill became law, "much western coal will not be mined not only because of the reclamation restrictions, but because it will raise the cost of coal and thus be uneconomic in the marketplace. The desired goal of bringing coal from Federal lands into the marketplace at reasonable costs while fostering competition in the coal industry will be lost." The graphs on the leasing of Federal mineral-bearing lands confirm this melancholy prediction: the restrictions which were in part presented as a means of increasing production have in fact diminished it. And that is because the interests of energy production are forced to take third or fourth place to all sorts of other considerations.

Mr. President, I submit that the passage of the Outer Continental Shelf lands amendments will lead to very similar results. Most of us in this Chamber at least pay lipservice to the need for increased energy production, and express dismay at the energy shortages under which our country suffers. But all we have to do is look at the graphs, such as those reproduced in the May issue of Mining Engineering, to see how consistently legislation passed by this Congress has reduced and eliminated energy production. In my view, legislation such as the Clean Air Act amendments, and now these amendments on the Outer Continental Shelf lands, will simply make a bad situation worse from the point of view of energy supply.

When the lights grow dim more frequently, and the wheels of industry turn more and more slowly, and our people huddle in their dark and unheated houses, let us remember that those who vote for final passage of this bill today are responsible.

Mr. DOLE. Mr. President, the bill we are considering today, the Outer Continental Shelf Lands Act amendments, is represented by its sponsors as a decisive step toward the solution of our national energy problems. I wish that were so. This bill is very similar to legislation considered by this body in July of 1975, which I voted against at that time. The earlier bill was never enacted. The measure before us today is essentially left-over legislation which is out of tune with the Nation's current energy needs, and since it has not been modified satisfactorily, I will vote against it again today.

ACCELERATION IN OFF-SHORE LEASING

Twenty-four years ago, this Congress enacted the Outer Continental Shelf Lands Act, authorizing the Secretary of the Interior to grant mineral leases on the Outer Continental Shelf and to prescribe regulations for their administration. Since then, 40 lease sales have been held, most of which have been offshore Louisiana and Texas. Just recently, leasing has been accelerated, opening up exploration and development in frontier areas previously unexplored. The continental margin of the United States is believed to contain very large amounts of undiscovered oil and gas resources, although it has not yet been determined what portion may prove to be economically recoverable.

CURRENT LAWS SATISFACTORY

Under the 1953 act, this country has established an excellent record of oil and gas production while at the same time maintaining a commendable record for environmental protection. The effectiveness of existing laws governing exploration and development of the shelf make major regulatory modifications apparently unnecessary and perhaps even counterproductive.

It is my understanding that, since 1953, the Federal Government has realized almost $20 billion in Outer Continental Shelf revenues. The total value of all the oil and gas produced during this period was only $23 billion, which means that the Government share has been about 85 percent of the total revenues generated. And, as of the end of 1974, total private industry funds invested in OCS activities exceeded revenues by about $13 billion.

COMPETITION INCREASING

There is an effort underway to require increased use of experimental lease bidding techniques. It is argued that new bidding devices—such as pure royalty bidding—are advisable to reduce the massive initial capital outlay required for shelf leases, so that participation and competition among smaller companies may be stimulated.

In fact, however, there is no clearly demonstrated need for any new bidding techniques. There is no evidence that small companies are being closed out of OCS areas. Actually, I understand that competition for Continental Shelf resources is increasing and the Federal Government is benefiting greatly from it. Joint ventures among small operators or in conjunction with one of the seven largest companies has allowed a variety of interested companies to get a share of the OCS action. Smaller operators have been quite successful, accounting for 41 percent of OCS oil production in 1975, compared to 29 percent in 1970. Thus, there appears to be no decline in the eagerness of new companies to enter the bidding for OCS leases.

I was glad to see that the royalty bid language which was reported out of committee does at least address the potential problem of undercapitalized speculators, by requiring either a fixed cash payment or a work commitment obligation in conjunction with the royalty approach.

But, in the absence of any evidence of need, or of any assurance that the new bidding techniques are workable, it is inadvisable to mandate a fixed minimum percentage of future lease sales according to such techniques.

UNNECESSARY OBSTACLES

There are many minor provisions of the bill which, taken as a whole, would result in delays, confusion, and inequities in development of the Outer Continental Shelf resources. They can only contribute to the thwarting of efficient energy development procedures. For example, major problems are raised by the fact that the bill separates the exploration phase from the development and production phases.

After a lessee finds significant reserves during the exploratory phase, a development and production plan must be submitted and approved by the Interior Department before actual development and production can begin. Coastal State Governors would have the authority to review these plans which would contribute to delay and uncertainty for the lessee. Any time we require more paperwork of an enterprise, we are contributing to additional delays and expenses.

We also contribute to additional outside control of resource production. Past experience demonstrates that the American petroleum industry, in general, is continuing to do an outstanding job of bringing the Nation's OCS resources ashore in a safe, efficient, and environmentally sound manner, and at the same time providing a fair share of the value of these resources to the Government. It is regrettable to see unnecessary and dilatory regulatory devices used to hinder efficient extraction of our valuable oil and natural gas resources.

The only sure way to permanently reduce dependence on foreign energy sources is to assure that domestic exploration, development, and production of our own resources is carried out expeditiously by the private sector. This is true of Outer Continental Shelf reserves as much as those inland. Increased Government involvement is not in the national interest, and should not be enacted without clear necessity. I share the view of many of my colleagues that there is no

necessity for that involvement at this time.

Mr. ROTH. Mr. President, I am pleased to see the Senate adopt a comprehensive policy governing liability for oil spills as a result of OCS operations. I am particularly pleased with the provisions of S. 9 because they are much closer to the approach I have favored.

As some Senators may recall, when S. 521 was under consideration in 1975 I offered a floor amendment relating to oil spill liability. S. 521 was, of course, the Outer Continental Shelf bill which the Senate passed during the 94th Congress, but which failed to become law because of strong opposition in the House.

In any event, the essentials of my floor amendment and the provisions of S. 9 are the same. Specifically, each provides for the following:

First, each would impose strict liability without regard to fault for oil spills which occur because of OCS operations.

Second, the liability extends to both the owners and operators of leases as well as the owners and operators of vessels transporting oil.

Third, the persons eligible to recover for damages include both coastal area property owners and other parties, such as fishermen, who suffer economic damages. It makes no difference that a fisherman has no property right in uncaught fish or that a resort owner has no property right to the lost business. Each can recover damages.

The differences between S. 9 and my original proposal are minor. Although I had proposed the creation of a program of Federal insurance for OCS leaseholders and vessel owners, S. 9 has accomplished the same end by creating the Offshore Oil Pollution Compensation Fund. It is sustained by a 3 cents per barrel tax on oil produced from the Outer Continental Shelf, while my insurance would have been paid by private premiums.

Frankly, Mr. President, I thought the oil spill provisions contained in the OCS bill which we passed 2 years ago needed improvement. I withdrew my floor amendment then only because of assurances from other Senators that improvements would be made. I am pleased to see that the chairman and members of the committee have in fact, improved the bill's spill liability provisions, as I had hoped they would.

That is not to say that this is all we need to do in the area of oil spill liability. On the contrary, comprehensive legislation is required as soon as possible. But in the interim, this legislation will provide coastal States such as mine with invaluable protection.

Mr. JACKSON. Mr. President, I ask for third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. ROBERT C. BYRD. Mr. President, there will be no rollcall votes beyond this present rollcall vote disposing of the OCS bill.

The PRESIDING OFFICER. All time is yielded back. The bill having been read the third time, the question is, Shall the bill pass? The yeas and nays have been ordered. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. STENNIS (when his name was called). Mr. President, on this vote, I have a pair with the Senator from Louisiana (Mr. JOHNSTON), who cannot be present for this rollcall.

Mr. President, if he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." Therefore, I withhold my vote.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Kentucky (Mr. FORD), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from North Carolina (Mr. MORGAN), the Senator from Maine (Mr. MUSKIE), the Senator from Georgia (Mr. NUNN), the Senator from Rhode Island (Mr. PELL), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Minnesota (Mr. HUMPHREY), the Senator from North Carolina (Mr. MORGAN), and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Missouri (Mr. DANFORTH), the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

I further announce that, if present and voting, the Senator from Kansas (Mr. DOLE) would vote "nay."

The result was announced—yeas 60, nays 18, as follows:

[Rollcall Vote No. 293 Leg.]

YEAS—60

Abourezk	Durkin	Matsunaga
Allen	Eagleton	McGovern
Bayh	Glenn	McIntyre

Stennis, for.

NOT VOTING—21

Anderson	Ford	Morgan
Bellmon	Griffin	Muskie
Cannon	Humphrey	Nunn
Church	Johnston	Pell
Danforth	Mathias	Percy
Dole	McClellan	Scott
Eastland	McClure	Stevenson

So the bill (S. 9) was passed as follows:

S. 9

An act to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Outer Continental Shelf Lands Act Amendments of 1977".

TABLE OF CONTENTS

TITLE I—FINDINGS AND PURPOSES WITH RESPECT TO MANAGING THE RESOURCES OF THE OUTER CONTINENTAL SHELF

Sec. 101. Findings.
Sec. 102. Purposes.

TITLE II—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

Sec. 201. Definitions.
Sec. 202. National policy for the Outer Continental Shelf.
Sec. 203. Laws applicable to the Outer Continental Shelf.
Sec. 204. Outer Continental Shelf exploration and development administration.
Sec. 205. Revision of bidding and lease administration.
Sec. 206. Outer Continental Shelf oil and gas exploration.
Sec. 207. Annual report.
Sec. 208. New sections of the Outer Continental Shelf Lands Act.
"Sec. 18. Outer Continental Shelf leasing program.
"Sec. 19. Coordination with affected States and local Governments.
"Sec. 20. Baseline and monitoring studies.
"Sec. 21. Safety regulations.
"Sec. 22. Enforcement of environmental and safety regulations.
"Sec. 23. Citizen suits.
"Sec. 24. Remedies and penalties.
"Sec. 25. Oil and gas development and production.
"Sec. 26. Outer Continental Shelf oil and gas information program.
"Sec. 27. Federal purchase and disposition of oil and gas.
"Sec. 28. Limitation on export.
"Sec. 29. Restrictions of employment."

TITLE III—OFFSHORE OILSPILL POLLUTION FUND

Sec. 301. Definitions.
Sec. 302. Establishment of the Fund and the revolving account.
Sec. 303. Prohibition.
Sec. 304. Notification.
Sec. 305. Removal of discharged oil.
Sec. 306. Duties and powers.
Sec. 307. Recoverable damages.

Sec. 308. Cleanup costs and damages.
Sec. 309. Disbursements from the revolving account.
Sec. 310. Fee collection; deposits in revolving account.
Sec. 311. Financial responsibility.
Sec. 312. Trustee of natural resources.
Sec. 313. Claims procedure.
Sec. 314. Judicial review.
Sec. 315. Class actions.
Sec. 316. Representation.
Sec. 317. Jurisdiction and venue.
Sec. 318. Access to records.
Sec. 319. Public access to information.
Sec. 320. Annual report.
Sec. 321. Authorization of appropriations.
Sec. 322. Relationship to other law.
TITLE IV—FISHERMEN CONTINGENCY FUND
Sec. 401. Definitions.
Sec. 402. Establishment of the Fisherman's Contingency Fund.
Sec. 403. Fishermen's Claims Board.
Sec. 404. Duties and powers of the Secretary.
Sec. 405. Recoverable damages and subrogation of rights.
Sec. 406. Burden of proof.
Sec. 407. Fee collection—Deposits in revolving account.
Sec. 408. Judicial review.
Sec. 409. Jurisdiction and venue.
Sec. 410. Representation.
Sec. 411. Access to records.
Sec. 412. Annual report.
Sec. 413. Authorization of appropriations.
TITLE V—MISCELLANEOUS PROVISIONS
Sec. 501. Review of shut-in or flaring wells.
Sec. 502. Review and revisions of royalty payments.
Sec. 503. Natural gas distribution.
Sec. 504. Antidiscrimination provisions.
Sec. 505. Sunshine in Government.
Sec. 506. Coastal Zone Management Act.
Sec. 507. Coastal energy impact program.
Sec. 508. Authorization of appropriations.
Sec. 509. Relationship to existing law.
Sec. 510. Relationship to Department of Energy.
Sec. 511. Investigation of availability of domestic crude oil and natural gas.

TITLE I—FINDINGS AND PURPOSES WITH RESPECT TO MANAGING THE RESOURCES OF THE OUTER CONTINENTAL SHELF

FINDINGS

SEC. 101. The Congress finds and declares that—

(1) the demand for energy in the United States is increasing and will continue to increase for the foreseeable future;

(2) domestic production of oil and gas has declined in recent years;

(3) the United States has become increasingly dependent upon imports of oil from foreign nations to meet domestic energy demand;

(4) increasing reliance on imported oil is not inevitable, but is rather subject to significant reduction by increasing the development of domestic sources of energy supply;

(5) consumption of natural gas in the United States has greatly exceeded additions to domestic reserves in recent years;

(6) technology is or can be made available which will allow significantly increased domestic production of oil and gas without undue harm or damage to the environment;

(7) the Outer Continental Shelf contains significant quantities of petroleum and natural gas and is a vital national resource reserve which must be carefully managed so as to realize fair value, to preserve and maintain competition, and to reflect the public interest;

(8) there presently exists a variety of technological, economic, environmental, administrative, and legal problems which tend to retard the development of the oil and natural gas reserves of the Outer Continental Shelf;

(9) environmental and safety regulations relating to activities on the Outer Continental Shelf should be reviewed in light of current technology and information;

(10) the development, processing, and distribution of the oil and gas resources of the Outer Continental Shelf, and the siting of related energy facilities, may cause adverse impacts on various States;

(11) policies, plans, and programs developed by States in response to activities on the Outer Continental Shelf cannot anticipate and ameliorate such adverse impacts unless such States are provided with timely access to information regarding activities on the Outer Continental Shelf and an opportunity to review and comment on decisions relating to such activities;

(12) funds must be made available to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf and for any damages to public or private interests caused by such spills or discharges;

(13) because of the possible conflicts between exploitation of the oil and gas resources in the Outer Continental Shelf and other uses of the marine environment, including fish and shellfish growth and recovery, and recreational activity, the Federal Government must assume responsibility for the minimization or elimination of any conflict associated with such exploitation;

(14) it is recognized that the hydrocarbon resources of the Outer Continental Shelf are limited, nonrenewable resources which must be developed in a manner which takes into consideration the Nation's long-range energy needs and also assures adequate protection of the renewable resources of the Outer Continental Shelf which are a continuing and increasingly important source of food and protein to the Nation and the world; and

(15) funds must be made available to pay for damage to commercial fishing vessels and gear resulting from activities involving oil and gas exploration, development, and production on the Outer Continental Shelf.

PURPOSES

SEC. 102. The purposes of this Act are to—

(1) establish policies and procedures for managing the oil and natural gas resources of the Outer Continental Shelf which are intended to result in expedited exploration and development of that area in order to achieve national economic and energy policy goals, assure national security, reduce dependence on foreign sources, and maintain a favorable balance of payments in world trade;

(2) preserve, protect, and develop oil and natural gas resources in the Outer Continental Shelf in a manner which is consistent with the need (A) to make such resources available to meet the Nation's energy needs as rapidly as possible, (B) to balance orderly energy resource development with protection of the human, marine, and coastal environments, (C) to insure the public a fair and equitable return on the resources of the Outer Continental Shelf, and (D) to preserve and maintain free enterprise competition;

(3) encourage development of new and improved technology for energy resource production which will eliminate or minimize risk of damage to the human, marine, and coastal environments;

(4) provide States which are impacted by Outer Continental Shelf oil and gas exploration, development, and production with comprehensive assistance in order to anticipate and plan for such impact, and thereby to assure adequate protection of the human environment;

(5) assure that States have timely access to information regarding activities on the Outer Continental Shelf, and opportunity to review and comment on decisions relating to such activities, in order to anticipate, ameliorate, and plan for the impacts of such activities;

(6) assure that States which are directly affected by exploration, development, and production of oil and natural gas are provided an opportunity to participate in policy and planning decisions relating to management of the resources of the Outer Continental Shelf;

(7) minimize or eliminate conflicts between the exploration, development, and production of oil and natural gas, and the recovery of other resources such as fish and shellfish;

(8) establish an oilspill liability fund to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf and for any damages to public or private interests caused by such spills or discharges;

(9) insure that the extent of oil and natural gas resources of the Outer Continental Shelf is assessed at the earliest practicable time; and

(10) establish a Fishermen's Contingency Fund to pay for damages to commercial fishing vessels and gear due to Outer Continental Shelf activities.

TITLE II—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

DEFINITIONS

SEC. 201. (a) Paragraph (c) of section 2 of the Outer Continental Shelf Lands Act (43 U.S.C. 1331) is amended to read as follows:

"(c) The term 'lease' means any form of authorization which is issued under section 8 or maintained under section 6 of this Act and which authorizes exploration for, and development and production of, deposits of oil, gas, or other minerals including geothermal resources.".

(b) Such section is further amended—

(1) in subsection (d), by striking out the period and inserting in lieu thereof a semicolon;

(2) by adding at the end thereof the following new paragraphs:

"(e) The term 'coastal zone' means the coastal water (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of the several coastal States, and includes islands, transition and intertidal areas, salt marshes, wetlands, and beaches, which zone extends seaward to the outer limit of the United States territorial sea and extends inland from the shorelines to the extent necessary to control shorelands, the uses of which have a direct and significant impact on the coastal waters, and the inward boundaries of which may be identified by the several coastal States, pursuant to the authority of section 305(b)(1) of the Coastal Zone Management Act of 1972 (16 U.S.C. 1454(b)(1));

"(f) The term 'affected State' means, with respect to any program, plan, lease sale, or other activity, proposed, conducted, or approved pursuant to the provisions of this Act, any State—

"(1) the laws of which are declared, pursuant to section 4(a)(2) of this Act, to be the law of the United States for the portion of the outer Continental Shelf on which such activity is, or is proposed to be, conducted;

"(2) which is or is proposed to be directly connected by transportation facilities to any artificial island or structure referred to in section 4(a)(1) of this Act;

"(3) which is receiving, or in accordance with the proposed activity, will receive, oil for processing, refining, or transshipment which has extracted from the outer Continental Shelf and transported by means of vessels or by a combination of means including vessels;

"(4) which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in the social, governmental, or economic infrastructure, resulting from the exploration, development, and pro-

duction of oil and gas anywhere on the outer Continental Shelf; or

"(5) in which the Secretary finds that because of such activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine or coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines, or other transshipment facilities;

"(g) The term 'marine environment' means the physical, atmospheric, and biological components, conditions, and factors which interactivity determine the productivity, state, condition, and quality of the marine ecosystem, including the waters of the high seas, the contiguous zone, transitional and intertidal areas, salt marshes, and wetlands within the coastal zone and on the outer Continental Shelf of the United States;

"(h) The term 'coastal environment' means the physical, atmospheric, and biological components, conditions, and factors which interactively determine the productivity, state, condition, and quality of the terestrial ecosystem from the shoreline inward to the boundaries of the coastal zone;

"(i) The term 'human environment' means the physical, social, and economic components, conditions, and factors which interactively determine the state, condition, and quality of living conditions, employment, and health of those affected, directly or indirectly, by activities occurring in the outer Continental Shelf of the United States;

"(j) The term 'Governor' means the Governor of a State, or the person or entity designed by, or pursuant to, State law to exercise the powers granted to such Governor pursuant to this Act;

"(k) The term 'exploration' means the process of searching for oil, natural gas, or other minerals, including (1) geophysical surveys where magnetic, gravity, seismic, or other systems are used to detect or imply the presence of such resources, and (2) any drilling, whether on or off known geological structures, including the drilling of a well in which a discovery of oil or natural gas in commercial quantities is made, the drilling of any additional delineation well after such discovery which is needed to delineate any reservoir and to enable the lessee to determine whether to proceed with development and production;

"(l) The term 'development' means those activities which take place following discovery of oil, natural gas, or other minerals in commercial quantities, including geophysical activity, drilling, platform construction, and operation of all on-shore support facilities, and which are for the purpose of ultimately producing the resources discovered;

"(m) The term 'production' means those activities which take place after the successful completion of any means for the removal of resources, including such removal, field operations, transfer of oil, natural gas, or other minerals to shore, operation monitoring, maintenance, and work-over drilling;

"(n) The term 'antitrust law' means—

"(1) the Act entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies', approved July 2, 1890 (15 U.S.C. 1 et seq.);

"(2) the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes,, approved October 15, 1914 (15 U.S.C. 12 et seq.);

"(3) the Federal Trade Commission Act (15 U.S.C. 41 et seq.);

"(4) sections 73 and 74 of the Act entitled 'An Act to reduce taxation, to provide revenue for the Government, and for other purposes', approved August 27, 1894 (15 U.S.C. 8 and 9); or

"(5) the Act of June 19, 1936, chapter 592 (15 U.S.C. 13, 13a, 13b, and 21a);

"(o) The term 'fair market value' means the value of any oil, gas, or other mineral (1) computed at a unit price equivalent to the average unit price at which such mineral was sold pursuant to a lease during the period for which any royalty or net profit share is accrued or reserved to the United States pursuant to such lease, or (2) if there were no such sales, or if the Secretary finds that there were an insufficient number of such sales to equitably determine such value, computed at the average unit price at which such mineral was sold pursuant to other leases in the same region of the outer Continental Shelf during such period, or (3) if there were no sales of such mineral from such region during such period, or if the Secretary finds that there are an insufficient number of such sales to equitably determine such value, at an appropriate price determined by the Secretary; and

"(p) The term 'major Federal action' means any action or proposal by the Secretary which is subject to the provisions of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C))."

NATIONAL POLICY FOR THE OUTER CONTINENTAL SHELF

SEC. 202. Section 3 of the Outer Continental Shelf Lands Act (43 U.S.C. 1332) is amended to read as follows:

"SEC. 3. NATIONAL POLICY FOR THE OUTER CONTINENTAL SHELF.—It is hereby declared to be the policy of the United States that—

"(1) the subsoil and seabed of the outer Continental Shelf appertain to the United States and are subject to its jurisdiction, control, and power of disposition as provided in this Act;

"(2) this Act shall be construed in such a manner that the character of the waters above the outer Continental Shelf as high seas and the right to navigation and fishing therein shall not be affected;

"(3) the outer Continental Shelf is a vital national resource reserve held by the Federal Government for the public, which should be made available for expenditious and orderly development, subject to environmental safeguards, in a manner which is consistent with the maintenance of competition and other national needs;

"(4) since exploration, development, and production of the mineral resources of the outer Continental Shelf will have significant impacts on coastal and noncoastal areas of the coastal States, and on other affected States, and, in recognition of the national interest in the effective management of the marine, coastal, and human environments—

"(A) such States may require assistance in protecting their coastal zones and other affected areas from any temporary or permanent adverse effects of such impacts; and

"(B) such States are entitled to an opportunity to participate, to the extent consistent with the national interest, in the policy and planning decisions made by the Federal Government relating to exploration for, and development and production of, mineral resources of the outer Continental Shelf;

"(5) the rights and responsibilities of all States to preserve and protect their marine, human, and coastal environments through such means as regulation of land, air, and water uses, of safety, and of related development and activity should be considered and recognized; and

"(6) operations in the outer Continental Shelf should be conducted in a safe manner by well-trained personnel using technology, precautions, and techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstruction to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health.".

LAWS APPLICABLE TO THE OUTER CONTINENTAL SHELF

SEC. 203. (a) Section 4(a)(1) of the Outer Continental Shelf Lands Act (43 U.S.C. 1333 (a)(1)) is amended—

(1) by striking out "and fixed structures" and inserting in lieu thereof ", and all installations and other devices permanently or temporarily attached to the seabed,"; and

(2) by striking out "removing, and transporting resources therefrom" and inserting in lieu thereof "or producing resources therefrom, or any such installation or other device (other than a ship or vessel) for the purpose of transporting such resources".

(b) Section 4(a)(2) of such Act is amended by redesignating paragraph (2) as (2)(A) and by adding at the end of that paragraph the following:

"(B) Within one year after the date of enactment of this paragraph, the President shall establish procedures for settling any outstanding international boundary dispute respecting the outer Continental Shelf.".

(c) Section 4(d) of such Act is amended to read as follows:

"(d) For the purposes of the National Labor Relations Act, as amended, any unfair labor practice, as defined in such Act, occurring upon any artificial island, installation, or other device referred to in subsection (a) of this section shall be deemed to have occurred within the judicial district of the State, the laws of which apply to such artificial island, installation, or other device pursuant to such subsection, except that until the President determines the areas within which such State laws are applicable, the judicial district shall be that of the State nearest the place of location of such artificial island, installation, or other device.".

(d) Section 4 of such Act is amended—

(1) in paragraph (1) of subsection (e), by striking out "the islands and structures referred to in subsection (a)", and inserting in lieu thereof "the artificial islands, installations and other devices referred to in subsection (a)";

(2) in subsection (f), by striking out "artificial islands and fixed structures located on the outer Continental Shelf" and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)"; and

(3) in subsection (g), by striking out "the artificial islands and fixed structures referred to in subsection (a)' and inserting in lieu thereof "the artificial islands, installations, and other devices referred to in subsection (a)".

(e) Section 4(e)(1) of such Act is amended by striking out "head" and inserting in lieu thereof "Secretary".

(f) Section 4(e)(2) of such Act is amended to read as follows:

"(2) The Secretary of the Department in which the Coast Guard is operating may mark for the protection of navigation any artificial island, installation, or other device referred to in subsection (a) whenever the owner has failed suitably to mark such island, installation, or other device in accordance with regulations issued under this Act, and the owner shall pay the cost of such marking.".

(g) Section 4 of such Act is further amended by striking out subsection (b) and relettering subsections (c), (d), (e), (f), and (g) as subsections (b), (c), (d), (e), and (f), respectively.

OUTER CONTINENTAL SHELF EXPLORATION AND DEVELOPMENT ADMINISTRATION

SEC. 204. Section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334 et seq.) is amended to read as follows:

"SEC. 5. ADMINISTRATION OF LEASING OF THE OUTER CONTINENTAL SHELF.—(a) The Secretary shall administer the provisions of this

Act relating to the leasing of the outer Continental Shelf and shall prescribe such regulations as necessary to carry out such provisions, and the Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources of the outer Continental Shelf, and the protection of correlative rights therein. Such regulations shall, as of the date of their promulgation, apply to all operations conducted under any lease issued or maintained under the provisions of this Act and shall be in furtherance of the policies of this Act. In the enforcement of safety, environmental, and conservation laws and regulations, the Secretary shall cooperate with the relevant agencies of the Federal Government and of the affected States. In the formulation, promulgation and enforcement of regulations, the Secretary shall request and give due consideration to the views of the Attorney General with respect to matters which may affect competition. The regulations prescribed by the Secretary under this subsection shall include, but not be limited to, provisions—

"(1) for the suspension or temporary prohibition of any operation or activity, including production, pursuant to any lease or permit (A) at the request of a lessee, in the interest of conservation, to facilitate proper development of a lease, or to allow for the unavailability of transportation facilities, or (B) if there is a threat of serious, irreparable, or immediate harm or damage to life (including aquatic life), to property, to any mineral deposits (in areas leased or not yet leased), or to the marine, coastal, or human environment, and for the extension of any permit or lease affected by such suspension or prohibition by a period equivalent to the period of such suspension or prohibition, except that no permit or lease shall be so extended when such suspension or prohibition is the result of gross negligence or willful violation of such lease or permit, or of regulations issued concerning such lease or permit;

"(2) for the cancellation of any lease or permit, at any time, when it is determined by the Secretary, after hearing, that continued activity pursuant to such lease or permit would probably cause serious harm or damage to life including aquatic life, to property, to any mineral deposits in areas leased or not yet leased, to the national security or defense, or to the marine, coastal, or human environments, and if he determines that the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time and if he determines that the advantages of cancellation of the lease or permit outweigh the advantages of development and production, except that the cancellation of any lease pursuant to such regulations (A) shall not occur unless and until operations under such lease or permit shall have been under suspension, or temporary prohibition, by the Secretary, with due extension of any lease or permit term continuously for a period of five years, or for a lesser period upon request of the lessee, and (B) shall entitle the lessee to receive such compensation as he shows to the Secretary as being equal to the lesser of (i) the fair value of the cancelled rights as of the date of cancellation, taking account of both anticipated revenues from the lease and anticipated costs, including costs of compliance with all applicable regulations and operating orders, liability for cleanup costs or damages, or both, in the case of an oil-spill, and all other costs reasonably anticipated on the lease, or (ii) the excess, if any, over the lessee's revenues, from the lease (plus interest thereon from the date of receipt to date of reimbursement) of all consideration paid for the lease and all direct expenditures made by the lessee after the date of issuance of such lease and in connection with exploration or development, or both, pursuant to the lease (plus interest on such consideration and such expenditures from date of payment to date of reimbursement): *Provided*, That with respect to leases issued before the date of enactment of this Act, such compensation shall be equal to the amount specified in item (i) of this sentence: *Provided further*, That in the case of joint leases which are canceled due to the failure of one or more partners to exercise due diligence, the innocent parties shall have the right to seek damages for such loss from the responsible party or parties and the right to acquire the interests of the negligent party or parties and be issued the lease in question;

"(3) for the assignment or relinquishment of leases;

"(4) for the sale of royalty, net profit share, or purchased oil and gas accruing or reserved to the United States in accordance with section 27 of this Act;

"(5) for the utilization of different bidding systems in accordance with section 8(a) of this Act;

"(6) for the procedures for citizen suits in accordance with section 23 of this Act;

"(7) for unitization, pooling, and drilling agreements;

"(8) for subsurface storage of oil and gas other than by the United States Government;

"(9) for drilling or easements necessary for exploration, development, and production; and

"(10) for the prompt and efficient exploration and development of a lease area.

"(b) The issuance and continuance in effect of any lease, or of any extension, renewal, or replacement of any lease, under the provision of this Act shall be conditioned upon compliance with the regulations issued under this Act if the lease is issued under the provisions of section 8 hereof, or with the regulations issued under the provisions of section 6(b), clause (2), hereof, if the lease is maintained under the provisions of section 6 hereof.

"(c) Whenever the owner of a nonproducing lease fails to comply with any of the provisions of this Act, or of the lease, or of the regulations issued under this Act if the lease is issued under the provisions of section 8 hereof, or of the regulations issued under the provisions of section 6(b), clause (2), hereof, if the lease is maintained under the provisions of section 6 hereof, such lease may be canceled by the Secretary, subject to the right of judicial review as provided in this Act, if such default continues for the period of thirty days after mailing of notice by registered letter to the lease owner at his record post office address.

"(d) Whenever the owner of any producing lease fails to comply with any of the provisions of this Act, or of the lease, or of the regulations issued under this Act if the lease is issued under the provisions of section 8 hereof, or of the regulations issued under the provisions of section 6(b), clause (2), hereof, if the lease is maintained under the provisions of section 6 hereof, such lease may be forfeited and canceled by an appropriate proceeding in any United States district court having jurisdiction under the provisions of this Act.

"(e) Rights-of-way through the submerged lands of the outer Continental Shelf, whether or not such lands are included in a lease maintained or issued pursuant to this Act, may be granted by the Secretary for pipeline purposes for the transportation of oil, natural gas, sulfur, or other mineral under such regulations and upon such conditions as may be prescribed by the Secretary, including assuring maximum environmental protection by utilization of the best available and safest technology, including the safest practices for pipeline burial not consistent with regulations promulgated by the Secretary of Transportation under the Natural Gas Pipeline Safety Act of 1968, and upon the express condition that such oil or gas pipelines shall transport or purchase without discrimination, oil or natural gas in such proportionate amounts as the Federal Power Commission, in the case of gas, and the Interstate Commerce Commission, in consultation with the Administrator of the Federal Energy Administration, in the case of oil, may, after a full hearing with due notice thereof to the interested parties, determine to be reasonable, taking into account, among other things, conservation and the prevention of waste. Failure to comply with the provisions of this section or the regulations and conditions prescribed under this section shall be ground for forfeiture of the grant in an appropriate judicial proceeding instituted by the United States in any United States district court having jurisdiction under the provisions of this Act.

"(f)(1) Every permit, license, easement, right-of-way or other grant of authority for the transportation by pipeline on or across the Outer Continental Shelf of oil or gas shall require that the pipeline be operated in accordance with the following competitive principles:

"(A) The pipeline must provide open and nondiscriminatory access to both owner and nonowner shippers; and

"(B) Any shipper, owner or nonowner, able to provide a guaranteed level of throughput must have the unilateral right to demand expansion of throughput capacity within technological limits and economic feasibility.

"(2) The Secretary shall consult with and give due consideration to the views of the Attorney General and the Federal Trade Commission on specific conditions to be included in any permit, license, easement, right-of-way, or grant of authority in order to insure that pipelines are operated in accordance with such competitive principles.

"(3) The Energy Policy and Conservation Act (PL 94–163) is amended by adding at the end of section 106(a)(1) the following: 'The Secretary shall by December 1, 1977, publish in the Federal Register final rules of general applicability governing determination of the maximum efficient rate of production.'

"(g)(1) The lessee shall produce any oil or gas, or both, obtained pursuant to an approved development and production plan, at rates consistent with any rule or order issued by the President in accordance with any provision of law.

"(2) If no rule or order referred to in paragraph (1) has been issued, the lessee shall produce such oil or gas, or both, at rates consistent with any regulation promulgated by the Secretary which is to assure the maximum rate of production which may be sustained without loss of ultimate recovery of oil or gas, or both, under sound engineering and economic principles, and which is safe for the duration of the activity covered by the approved plan. The Secretary may permit the lessee to vary such rates if he finds that such variance is necessary.

"(h) After the date of enactment of this section, no holder of any oil and gas lease issued or maintained pursuant to this Act shall be permitted to flare natural gas from any well unless the Secretary finds that there is no practicable way to complete production of such gas, or that such flaring is necessary to alleviate a temporary emergency situation or to conduct testing or work-over operations."

REVISION OF BIDDING AND LEASE ADMINISTRATION

SEC. 205. (a) Subsections (a) and (b) of section 8 of the outer Continental Shelf Lands Act (43 U.S.C. 1337) are amended to read as follows:

"(a)(1) The Secretary is authorized to grant to the highest responsible qualified bidder or bidders by competitive bidding, under regulations promulgated in advance, any oil and gas lease on submerged lands of the outer Continental Shelf which are not covered by leases meeting the requirements of subsection (a) of section 6 of this Act. The bidding shall be by sealed bid and, at the discretion of the Secretary, on the basis of—

"(A) cash bonus bid with a royalty at not less than 12½ per centum fixed by the Secretary in amount or value of the production saved, removed, or sold;

"(B) variable royalty bid based on a per centum in amount or value of the production saved, removed, or sold, with either a fixed work commitment based on dollar amount for exploration or a fixed cash bonus as determined by the Secretary, or both;

"(C) cash bonus bid, or work commitment bid based on a dollar amount for exploration with a fixed cash bonus, and a diminishing or sliding royalty based on such formulae as the Secretary shall determine as equitable to encourage continued production from the lease area as resources diminish, but not less than 12½ per centum at the beginning of the lease period in amount or value of the production saved, removed, or sold;

"(D) cash bonus bid with a fixed share of the net profits of no less than 30 per centum to be derived from the production of oil and gas from the lease area;

"(E) fixed cash bonus with the net profit share reserved as the bid variable;

"(F) cash bonus bid with a royalty at no less than 12½ per centum fixed by the Secretary in amount or value of the production saved, removed, or sold and a fixed per centum share of net profits of no less than 30 per centum to be derived from the production of oil and gas from the lease area;

"(G) work commitment bid based on a dollar amount for exploration with a fixed cash bonus and a fixed royalty in amount or value of the production saved, removed or sold; or

"(H) Subject to the requirements of paragraph (2) of this subsection, any modification of bidding systems authorized in subparagraphs (A) through (G) or any other systems of bid variables, terms and conditions which the Secretary determines to be useful to accomplish the purposes and policies of this section.

"(2)(A) The Secretary shall submit any bidding system authorized in subparagraph (H) of paragraph (1) to the Senate and House of Representatives. The Secretary may institute such bidding system unless either the Senate or the House of Representatives passes a resolution of disapproval within thirty days after receipt of the bidding system.

"(B) Clauses (C) through (J) of this subparagraph are enacted by Congress—

"(I) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively but they are applicable only with respect to the procedures to be followed in that House in the case of resolutions described by this subparagraph, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(II) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

"(C) A resolution disapproving a bidding system shall immediately be referred to a committee (and all resolutions with respect to the same request shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(D) If the committee, to which has been referred any resolution disapproving the bidding system of the Secretary to exceed the limitation has not reported the resolution at the end of ten calendar days after its referral, it shall be in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to the same bidding system which has been referred to the committee.

"(E) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same recommendation), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(F) If the motion to discharge is agreed to, or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same request.

"(G) When the committee has reported, or has been discharged from further consideration of, a resolution as provided, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(H) Debate on the resolution is limited to not more than two hours, to be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

"(I) Motions to postpone, made with respect to the discharge from the committee, or the consideration of a resolution with respect to a bidding system, and motions to proceed to the consideration of other business, shall be decided without debate.

"(J) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives as the case may be, to the procedure relating to a resolution with respect to a request shall be decided without debate.

"(3) The Secretary may, notwithstanding the lease limitations of section 201(c), utilize leasing systems in the Outer Continental Shelf off Alaska, in which exploration lessees share in the costs of exploration and the consideration received from sale of subsequent leases for development and production, notwithstanding any inconsistent provisions of section 8(b)(4), 8(K) and section 9 of this Act, provided that payments shall not exceed amounts appropriated for that purpose by Congress.

"(4) The Secretary may, in his discretion, defer any part of the payment of the cash bonus, as authorized in paragraph (1) of this subsection, according to a schedule announced at the time of the announcement of the lease sale, but such payment shall be made in total no later than five years from the date of the lease sale or no later than the date of the approval of the development and production plan, whichever date first occurs.

"(5) The Secretary may, in order to promote increased production on the lease area, through direct, secondary, or tertiary recovery means, reduce or eliminate any royalty or net profit share set forth in the lease for such area.

"(6) At least ninety days prior to notice of any lease sale under subparagraphs (D), (E), and (F) of paragraph (1), the Secretary shall by regulation establish rules to govern the calculation of net profits. In the event of any dispute between the United States and a lessee concerning the calculation of the net profits under the regulation issued pursuant to this paragraph, the burden of proof shall be on the lessee.

"(7) After an oil and gas lease is granted pursuant to subparagraph (B) or the work commitment option of subparagraph (B) or (C) of paragraph (1) of this section—

"(A) the lessee, at its option, shall deliver to the Secretary upon issuance of the lease either (i) cash deposit for the full amount of the exploration work commitment or, (ii) a performance bond, in form and substance and with a surety satisfactory to the Secretary, in the principal amount of such exploration work commitment assuring the Secretary that such commitment shall be faithfully discharged in accordance with this section, the regulation, and the lease. As provided in the regulation, the principal amount of such cash deposit or bond may be periodically reduced upon proof, satisfactory to the Secretary, that a portion of the exploration work commitment has been satisfied.

"(B) all exploration expenditures on, or directly related to, the lease including, but not limited to (i) geological investigations and related activities, (ii) geophysical investigations including seismic, geomagnetic, and gravity surveys, data processing and interpretation, and (iii) exploratory drilling, core drilling, redrilling, and well completion or abandonment, including the drilling of wells sufficient to determine the size and areal extent of any newly discovered field, and including the cost of mobilization and demobilization of drilling equipment, shall be included in satisfaction of the commitment. The lessee's general overhead cost shall not be so included against the work commitment, but its cost (including employee benefits) of employees directly assigned to such exploration work shall be so included.

"(C) if at the end of the primary term of the lease, including any extension thereof, the full dollar amount of the exploration work commitment has not been satisfied, the balance shall then be paid in cash to the Secretary.

"(8)(a) Except as provided in clause (b), the bidding system authorized by subparagraph (A) of paragraph (1) of this subsection shall not be applied to more than 50 per centum of the total area offered for lease each year, during the five-year period beginning on the date of enactment of this subsection, in each region where there has been no development of oil and gas prior to October 1, 1975, including the outer Continental Shelf region off southern California. The Secretary shall define such regions of the outer Continental Shelf.

"(b) The lease tracts to which the bidding systems authorized by subparagraphs (B) through (G) of paragraph (1) of this subsection are to be applied shall be chosen by random selection following receipt by the secretary of public nominations of lease tracts to be included in a proposed lease sale, but prior to the initial announcement by the Bureau of Land Management of the tracts selected for inclusion in the proposed lease sale. The Secretary shall immediately following such selection publish a notice in the Federal Register designating the lease tracts selected and the alternative bidding system or systems which shall be used for each such tract.

"(c) If, during the first year following enactment of this subsection, the Secretary finds that compliance with the limitation set forth in clause (a) would unduly delay development of the oil and gas resources of the outer Continental Shelf, he may exceed that limitation after he submits to the Senate and the House of Representatives a report stating his finding and the reasons therefor. If, in any other year following the date of enactment of this subsection, the Secretary finds that compliance with the limitation set forth in clause (a) would unduly delay efficient development of the oil and gas resources of the outer Continental Shelf, result in less than a fair return to the Federal Government, or result in a reduction of competition, he shall submit to the Senate and House of Representatives a report stating his specific findings and detailed reasons therefor. The Secretary may, unless either the Senate or the House of Representatives passes a resolution of disapproval of the Secretary's findings within thirty days after receipt of such report (not including days when Congress is not in session), thereafter, for that year, exceed such limitation.

"(d) Clauses (e) through (l) of this subparagraph are enacted by Congress—

"(I) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but they are applicable only with respect to the procedures to be followed in that House in the case of resolutions described by this subparagraph, and they supersede other rules only to the extent that they are inconsistent therewith; and

"(II) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

"(e) A resolution disapproving the request of the Secretary to exceed the limitation shall immediately be referred to a committee (and all resolutions with respect to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(f) If the committee, to which has been referred any resolution disapproving the request of the Secretary to exceed the limitation has not reported the resolution at the end of ten calendar days after its referral, it shall be in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to the same request which has been referred to the committee.

"(g) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same recommendation), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(h) If the motion to discharge is agreed to, or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same request.

"(i) When the committee has reported, or has been discharged from further consideration of, a resolution as provided, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(j) Debate on the resolution is limited to not more than 2 hours, to be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

"(k) Motions to postpone, made with respect to the discharge from committee, or the consideration of a resolution with respect to a request, and motions to proceed to the consideration of other business, shall be decided without debate.

"(l) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to a request shall be decided without debate.

"(9) Within six months after the end of each fiscal year, the Secretary shall report to the Congress, as provided in section 15 of this Act, with respect to the use of the various bidding options provided for in this subsection. Such report shall include—

"(a) the schedule of all lease sales held during such year and the bidding system or systems utilized;

"(b) the schedule of all lease sales to be held the following year and the bidding system or systems utilized;

"(c) the benefits and costs associated with conducting lease sales using the various bidding systems;

"(d) if applicable, the reasons why a particular bidding system has not been or will not be utilized; and

"(e) if applicable, the reasons why more than 66⅔ per centum of the area leased in the past year, or to be offered for lease in the upcoming year, was or is to be leased under the bidding system authorized by subparagraph (A) of paragraph (1) of this subsection.

"(b) An oil and gas lease issued pursuant to this section shall—

"(1) be for a tract consisting of a compact area not exceeding five thousand seven hundred and sixty acres, as the Secretary may determine, unless the Secretary finds that a larger area is necessary to comprise a reasonable economic production unit;

"(2) be for an initial period of—

"(A) five years; or

"(B) not to exceed ten years where the Secretary finds that such longer period is necessary to encourage exploration and development in areas of unusually deep water or unusually adverse weather conditions, and as long after such initial period as oil or gas may be produced from the area in paying quantities, or drilling or well reworking operations as approved by the Secretary are conducted thereon.

"(3) require the payment of amount or value as determined by one of the bidding procedures set forth in subsection (a) of this section;

"(4) entitle the lessee to explore, develop, and produce the oil and gas resources contained within the lease area, conditioned upon due diligence requirements and the approval of the development and production plan required by this Act;

"(5) provide for suspension or cancellation of the lease pursuant to section 5 of this Act;

"(6) contain such rental and other provisions as the Secretary may prescribe at the time of offering the area for lease; and

"(7) provide a requirement that the lessee offer 20 per centum of the crude oil, condensate, and natural gas liquids produced on such lease, at the market value and point of delivery applicable to Federal royalty oil, to small and independent refiners as defined in the Emergency Petroleum Allocation Act of 1973.".

(b) Section 8 of the Outer Continental Shelf Lands Act (43 U.S.C. 1337) is further amended by striking out subsection (j), by relettering subsections (c) through (i), and all references thereto, as subsections (g) through (m), respectively, and by inserting immediately after subsection (b) the following new subsections:

"(c) No lease may be issued for an initial period until at least thirty days after the Secretary notifies the Federal Trade Commission of the proposed issuance. Such notification shall contain such information as the Federal Trade Commission may require in order to advise the Secretary as to whether such lease may create or maintain a situation inconsistent with the antitrust laws. The Federal Trade Commission may, by rule, exclude from the requirements of this subsection any class of lease which it determines would, if issued, be unlikely to create or maintain a situation inconsistent with the antitrust laws. If the Federal Trade Commission advises the Secretary, within such thirty-day period, that a proposed lease may create or maintain a situation inconsistent with the antitrust laws, the Secretary may issue such lease only if—

"(1) he commences a public hearing on the record within sixty days after the date of the receipt of such advice, in accordance with chapter 5 of title 5, United States Code; and

"(2) he makes a finding, pursuant to such hearing, that the overall benefit to the public from the issuance or extension of such lease clearly outweighs any possible adverse effect upon competition and that there is no reasonable alternative which would have a lesser adverse effect upon competition.

"(d) No application for a lease may be submitted if the Secretary finds, after notice and hearing, that the applicant is not meeting due diligence requirements on other leases.

"(e) Nothing in this Act shall be deemed to convey to any person, association, corporation, or other business organization immunity from civil or criminal liability, or to create defenses to actions, under any antitrust law.

"(f)(1) At the time of soliciting nominations for the leasing of lands within three miles of the seaward boundary of any coastal State, the Secretary shall provide the Governor of any such State—

"(A) an identification and schedule of the areas and regions offered for leasing;

"(B) all information concerning the geographical, geological, and ecological characteristics of such regions;

"(C) an estimate of the oil and gas reserves in the areas proposed for leasing; and

"(D) an identification of any field, geological structure, or trap located within three miles of the seaward boundary of a coastal State.

"(2) After receipt of nominations for any area of the outer Continental Shelf within three miles of the seaward boundary of any coastal State, the Secretary shall inform the Governor of such coastal State of any such area which the Secretary believes should be given further consideration for leasing. The Secretary in consultation with the Governor of the coastal State, shall determine whether any such area may contain one or more oil or gas pools or fields underlying both the outer Continental Shelf and lands subject to State jurisdiction. If the Secretary selects a tract or tracts which may contain one or more oil or gas pools or fields underlying both the outer Continental Shelf and lands subject to State jurisdiction the Secretary shall offer the Governor of such

coastal State the opportunity to enter into an agreement concerning the disposition of revenues which may be generated by a Federal lease within such area in order to permit their fair and equitable division between the State and Federal Government.

"(3) Within ninety days after the offer by the Secretary pursuant to paragraph (2) of this subsection, the Governor shall elect whether to enter into such agreement and shall notify the Secretary of his decision. If the Governor accepts the offer, the terms of any lease issued shall be consistent with the provisions of this Act, with applicable regulations, and, to the maximum extent practicable, with the applicable laws of the coastal State. If the Governor declines the offer, or if the parties cannot agree to terms concerning the disposition of revenues from such lease (by the time the Secretary determines to offer the area for lease), the Secretary may nevertheless proceed with the leasing of the area.

"(4) Regardless of any other provision of this Act the Secretary shall impound, in whole or in part, in a separate account in the Federal treasury all bonuses, royalties, and other revenues attributable to oil and gas pools underlying both the outer Continental Shelf and submerged lands subject to State jurisdiction until such time as the Secretary and the Governor of such coastal State agree on, or if the Secretary and the Governor of such coastal State cannot agree the United States district court determines, the fair and equitable disposition of such revenues and any interest which has accrued and on the proper rate of payments to be deposited in the treasuries of the Federal Government and such coastal State.".

(c) Subsection (c) of section 105 of the Energy Policy and Conservation Act of 1975 (42 U.S.C. 6213) is amended to read as follows:

"(c) If the Secretary determines that exploration and development will occur only if the exemption is granted, he may exempt bidding for leases for lands located in frontier or other areas determined by the Secretary to be extremely high risk lands or to present unusually high cost exploration, or development problems.

OUTER CONTINENTAL SHELF OIL AND GAS EXPLORATION

SEC. 206. Section 11 of the Outer Continental Shelf Lands Act (43 U.S.C. 1340) is amended to read as follows:

"SEC. 11. OUTER CONTINENTAL SHELF OIL AND GAS EXPLORATION.—(a) (1) The Secretary or any agency of the United States, and any person whom the Secretary by permit or regulation may authorize, may conduct geological and geophysical explorations, in the outer Continental Shelf, which do not interfere with or endanger actual operations pursuant to any lease issued or maintained pursuant to this Act, and which are not unduly harmful to the marine environment.

"(2) The provisions of paragraph (1) of this subsection shall not apply to any person conducting explorations pursuant to an approved exploration plan on any area under lease to such person pursuant to the provisions of this Act.

"(b) Except for those leases on which a drilling permit had been issued prior to the enactment of this subsection, exploration pursuant to any oil and gas lease issued or maintained under this Act must be undertaken in accordance with (1) the provisions of this section, and (2) any regulations which the Secretary may promulgate pursuant to this section.

"(c) (1) Prior to commencing exploration pursuant to any oil and gas lease issued or maintained under this Act, the holder thereof shall submit an exploration plan to the Secretary for approval. Such plan may apply to more than one lease held by a lessee in any one region of the outer Continental Shelf, or by a group of lessees acting under a unitization, pooling, or drilling agreement, and shall be approved by the Secretary if he finds that such plan is consistent with the provisions of this Act, regulations prescribed under this Act, and the provisions of such lease. The Secretary shall require such modifications of such plan as are necessary to achieve such consistency. The Secretary shall approve such plan, as submitted, or modified, within thirty days of its submission, except that if the Secretary determines that (A) any proposed activity under such plan would result in any condition which would permit him to suspend such activity pursuant to regulations prescribed under section 5(a)(1) of this Act, and (B) such proposed activity cannot be modified to avoid such condition, he may delay the approval of such plan.

"(2) An exploration plan submitted under this subsection shall include, in the degree of detail which the Secretary may by regulation require—

"(A) a schedule of anticipated exploration activities to be undertaken;

"(B) a description of equipment to be used for such activities;

"(C) the general location of each well to be drilled; and

"(D) such other information deemed pertinent by the Secretary.

"(3) The Secretary may, by regulation, require that such plan be accompanied by a general statement of development and production intentions which shall be for planning purposes only and which shall not be binding on any party.

"(d) The Secretary may, by regulation, require any lessee operating under an approved exploration plan to obtain a permit prior to drilling any well in accordance with such plan.

"(e)(1) If a revision of an exploration plan approved under this subsection is submitted to the Secretary, the process to be used for the approval of such revision shall be the same as set forth in subsection (c) of this section.

"(2) All exploration activities pursuant to any lease shall be conducted in accordance with an approved exploration plan or an approved revision of such plan.

"(f) The Secretary may, within ninety days after the date of enactment of this section, provide for the approval under subsection (c) of any plan submitted prior to such date of enactment which he finds is in substantial compliance with the provisions of such subsection, and may require the submission of any additional information necessary to bring such plan into such compliance.".

ANNUAL REPORT

SEC. 207. (a) Section 15 of the Outer Continental Shelf Lands Act (43 U.S.C. 1344) is amended to read as follows:

"SEC. 15. ANNUAL REPORT BY SECRETARY TO CONGRESS.—Within six months after the end of each fiscal year, the Secretary shall submit to the President of the Senate and the Speaker of the House of Representatives the following reports:

"(1) a report on the leasing and production program in the outer Continental Shelf during such fiscal year, which shall include—

"(A) a detailed accounting of all moneys received and expended;

"(B) a detailed accounting of all exploration, exploratory drilling, leasing, development, and production activities;

"(C) a summary of management, supervision, and enforcement activities;

"(D) a list of all shut-in and flaring wells; and

"(E) recommendations to the Congress (i) for improvements in management, safety, and amount of production from leasing and operations in the outer Continental Shelf, and (ii) for resolution of jurisdictional conflicts or ambiguities.

"(2) a report prepared after consultation with the Attorney General, with recommendations for promoting competition in the leasing of outer Continental Shelf lands, which shall include any recommendations or findings by the Attorney General and any plans for implementing recommended administrative changes and drafts of any proposed legislation, and which shall contain—

"(A) an evaluation of the competitive bidding systems permitted under the provisions of section 8 of this Act, and, if applicable, the reasons why a particular bidding system has not been utilized;

"(B) an evaluation of alternative bidding systems not permitted under section 8 of this Act, and why such system or systems should or should not be utilized;

"(C) an evaluation of the effectiveness of restrictions on joint bidding in promoting competition and, if applicable, any suggested administrative or legislative action on joint bidding;

"(D) an evaluation of present measures and a description of any additional measures to encourage entry of new competitors; and

"(E) an evaluation of present measures and a description of additional measures to increase the supply of oil and gas to independent refiners and distributors.".

NEW SECTIONS OF THE OUTER CONTINENTAL SHELF LANDS ACT

SEC. 208. The Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 18. OUTER CONTINENTAL SHELF LEASING PROGRAM.—(a) The Secretary, pursuant to procedures set forth in subsections (c) and (d), shall prepare and periodically revise, and maintain an oil and gas leasing program to implement the policies of this Act. The leasing program shall indicate as precisely as practicable the size, timing, and location of leasing activity which he determines will best meet national energy needs for the five-year period following its approval or reapproval. Such leasing program shall be prepared and maintained in a manner consistent with the following principles:

"(1) management of the outer Continental Shelf shall be conducted in a manner which considers economic, social, and environmental values of the renewable and nonrenewable resources contained in the outer Continental Shelf, and the potential impact of oil and gas exploration on other resource values of the outer Continental Shelf and the marine, coastal, and human environments.

"(2) timing and location of exploration, development, and production of oil and gas among the oil- and gas-bearing physiographic regions of the outer Continental Shelf shall be based on a consideration of—

"(A) existing information concerning the geographical, geological, and ecological characteristics of such regions;

"(B) an equitable sharing of developmental benefits and environmental risks among the various regions;

"(C) the location of such regions with respect to, and the relative needs of, regional and national energy markets;

"(D) the location of such regions with respect to other uses of the sea and seabed, including fisheries, intracoastal navigation, existing or proposed sealanes, potential sites of deepwater ports, and other anticipated uses of the resources and space of the outer Continental Shelf;

"(E) the interest of potential oil and gas resources as indicated by exploration of nomination;

"(F) laws, goals, and policies of affected States which have been specifically identified by the Governors of such States as relevant matters for the Secretary's consideration;

"(G) policies and plans promulgated by coastal States pursuant to the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.).

"(3) the Secretary shall elect the timing and location of leasing, to the maximum extent practicable, so as to obtain a proper balance between the potential for environmental damage, the potential for the discovery of oil and gas, and the potential for adverse impact on the coastal zone.

"(4) leasing activities shall be conducted to assure receipt of fair market value for the oil and gas owned by the Federal Government.

"(b) The leasing program shall include estimates of the appropriations and staff required to—

"(1) obtain resource information and any other information needed to prepare the leasing program required by this section;

"(2) analyze and interpret the exploratory data and any other information which may be compiled under the authority of this Act;

"(3) conduct environmental baseline studies and prepare any environmental impact statement required in accordance with this Act and with section 102(2)(C) of the National Environmental Policy Act of 1967 (42 U.S.C. 4332(2)(C)); and

"(4) supervise operations conducted pursuant to each lease in the manner necessary to assure due diligence in the exploration and development of the lease area and compliance with the requirements of applicable law and regulations, and with the terms of the lease.

"(c)(1) During the preparation of any proposed leasing program under this section, the Secretary shall invite and consider suggestions for such program from the Governor of any State which may become an affected State under such proposed program. The Secretary may also invite or consider suggestions from any other person.

"(2) After such preparation and at least sixty days prior to publication of a proposed leasing program in the Federal Register pursuant to paragraph (3) of this subsection, the Secretary shall transmit a copy of such proposed program to the Governor of each affected State for review and comment. If any such comment is received by the Secretary at least fifteen days prior to submission to the Congress pursuant to such paragraph (3) and includes a request for any modification of such proposed program, the Secretary shall reply in writing, granting or denying such request in whole or in part, or granting such request in such modified form as the Secretary considers appropriate, and stating his reasons therefor. All such correspondence between the Secretary and the Governor of any affected State, together with any additional information and data relating thereto, shall accompany such proposed program when it is submitted to the Congress.

"(3) Within nine months after the date of enactment of this section, the Secretary shall submit a proposed leasing program to the Congress, the Attorney General, the Governors of affected States, and shall publish such proposed program in the Federal Register.

"(d)(1) Within ninety days after the date of publication of a proposed leasing program, the Attorney General shall submit comments on the anticipated effects of such proposed program upon competition, and any State, local government, or other person may submit comments and recommendations as to any aspect of such proposed program.

"(2) At least sixty days prior to approving a proposed leasing program, the Secretary shall submit it to the President and the Congress, together with any comments received. Such submission shall indicate why any specific recommendation of the Attorney General or a State or local government was not accepted.

"(3) After the leasing program has been approved by the Secretary, or after eighteen months following the date of enactment of this section, whichever first occurs, no lease shall be issued unless it is for an area included in the approved leasing program and unless it contains provisions consistent with the approved leasing program, except that leasing shall be permitted to continue until such program is approved and for so long thereafter as such program is under judicial or administrative review pursuant to the provisions of this Act.

"(e) The Secretary shall review the leasing program approved under this section at least once each year, and he may revise and reapprove such program, at any time, in the same manner as originally developed.

"(f) The Secretary shall, by regulation, establish procedures for—

"(1) receipt and consideration of nominations for any area to be offered for lease or to be excluded from leasing;

"(2) public notice of and participation in development of the leasing program;

"(3) review by State and local governments which may be impacted by the proposed leasing;

"(4) periodic consultation with State and local governments, oil and gas leases and permittees, and representatives of other individuals or organizations engaged in activity in or on the Outer Continental Shelf, including those involved in fish and shellfish recovery, and recreational activities; and

"(5) coordination of the program with the management program being developed by any State for approval pursuant to section 305 of the Coastal Zone Management Act of 1972 and consistency, to the extent practicable, with the management program of any State which has been approved pursuant to section 306 of such Act.

Such procedures shall be applicable to any revision or reapproval of the leasing program.

"(g) The Secretary may obtain from public sources, or purchase from private sources, any survey, data, report, or other information (including interpretations of such data, survey, report, or other information) which may be necessary to assist him in preparing any environmental impact statement and in making other evaluations required by this Act. The Secretary shall maintain the confidentiality of all proprietary data or information for such period of time as is provided for in this Act, established by regulation, or agreed to by the parties.

"(h) The heads of all Federal departments and agencies shall provide the Secretary with any nonproprietary information he requests to assist him in preparing the leasing program. In addition, the Secretary shall utilize the existing capabilities and resources of such Federal departments and agencies by appropriate agreement.

"SEC. 19. COORDINATION WITH AFFECTED STATES AND LOCAL GOVERNMENTS.—

"(a) Any Governor of any affected State may submit recommendations to the Secretary regarding the size, timing, or location of a proposed lease sale or with respect to a proposed development and production plan.

"(b) Such recommendations shall be submitted within sixty days after notice of such proposed lease sale or receipt of such development and production plan.

"(c) The Secretary shall accept such recommendations if he determines, after having provided the Governor the opportunity for full consultation, that they provide for a reasonable balance between the national interest and the well-being of the citizens of the affected State. For the purposes of this subsection, a determination of the national interest shall be based on the desirability of obtaining oil and gas supplies in a balanced manner and on the findings, purposes, and policies of this Act. The Secretary shall communicate to the Governor, in writing, the reasons for his determination to accept or reject such Governor's recommendations, or to implement any alternative means identified in consultation with the Governor to provide for a reasonable balance between the national interest and the well-being of the citizens of the affected State. The Secretary's determination that recommendations provide or do not provide for a reasonable balance between the national interest and the well being of the citizens of the affected State shall be final and shall not, alone, be a basis for invalidation of a proposed lease sale or a proposed development and production plan in any suit or judicial review pursuant to section 23 of this Act, unless found to be arbitrary or capricious.

"(d) The Secretary is authorized to enter cooperative agreements with affected coastal States for purposes which are consistent with this Act, and applicable Federal law. Such agreements may include the sharing of information, the joint utilization of available expertise, the facilitating of permitting procedures, joint planning and review, and the formation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws, regulations and stipulations relevant to outer Continental Shelf operations both on and offshore.

"SEC. 20. BASELINE AND MONITORING STUDIES.—(a)(1) The Secretary shall conduct a study of any area or region included in any lease sale in order to establish baseline information concerning the status of the human, marine, and coastal environments of the outer Continental Shelf and the coastal areas which may be affected by oil and gas development in such area or region.

"(2) Each study required by paragraph (1) shall be commenced not later than six months from the date of enactment of this section with respect to any area or region where a lease sale has been held before such date of enactment, and not later than six months prior to the holding of a lease sale with respect to any area or region where no lease sale has been held before such date of enactment. The Secretary may utilize information collected in any study prior to the date of enactment of this section in conducting any such study.

"(3) In addition to developing baseline information, any study of an area or region, to the extent practicable, shall be designed to predict impacts on the marine biota resulting from chronic low level pollution or large spills associated with outer Continental Shelf production, from the introduction of drill cuttings and drilling muds in the area, and from the laying of pipe to serve the offshore production area, and the impacts of development offshore on the affected and coastal areas.

"(b) Subsequent to the leasing and developing of any area or region, the Secretary shall conduct such additional studies to establish baseline information as he deems necessary and shall monitor the human, marine, and coastal environments of such area or region in a manner designed to provide time-series and data trend information which can be used for comparison with any previously collected data for the purpose of identifying any significant changes in the quality and productivity of such environments, for establishing trends in the areas studied and monitored, and for designing experiments to identify the causes of such changes.

"(c) The Secretary shall, by regulation, establish procedures for carrying out his duties under this section, and shall plan and carry out such duties in full cooperation with affected States. To the extent that other Federal agencies have prepared environmental

impact statements, are conducting studies or are monitoring the affected human, marine, or coastal environment, the Secretary may utilize the information derived therefrom in lieu of directly conducting such activities. The Secretary may also utilize information obtained from any State or local government entity, or from any person, for the purposes of this section. For the purpose of carrying out his responsibilities under this section, the Secretary may by agreement utilize, with or without reimbursement, the services, personnel, or facilities of any Federal, State, or local government agency.

"(d) As soon as practicable after the end of each fiscal year, the Secretary shall submit to the Congress and make available to the general public an assessment of the cumulative effect of activities conducted under this Act on the human, marine, and coastal environments.

"(e) In executing his responsibilities under this section the Secretary is authorized and directed, to the maximum extent practicable, to enter into appropriate arrangements to utilize on a reimbursable basis the capabilities of the Department of Commerce. In carrying out such arrangements the Secretary of Commerce is authorized to enter into contracts or grants with any person, organization or entity with funds appropriated to the Secretary pursuant to this Act.

"SEC. 21. SAFETY REGULATIONS.—(a) Upon the enactment of this section, the Secretary, the Secretary of Labor, and the Secretary of the department in which the Coast Guard is operating shall, in consultation with each other and other agency heads as appropriate, promptly commence a study of the adequacy of existing safety regulations, and of the technology, equipment, and techniques available for the exploration, production, and development of natural resources, with respect to the outer Continental Shelf. The results of this study shall be submitted to the President who shall submit to the Congress a plan of action which he proposes to take to promote safety and health in the exploration, production, and development of natural resources of the outer Continental Shelf.

"(b) In exercising their respective responsibilities for floating, temporarily fixed or permanently fixed structures for the exploration, production, and development of the natural resources of the outer Continental Shelf, the Secretary, and the Secretary of the department in which the Coast Guard is operating, shall require the use of the best available and safest technology which the Secretary determines to be economically achievable, taking into account the incremental costs and benefits of utilizing such technology, wherever failure of equipment would have a significant effect on safety, health, or the environment, on all new drilling and production operations and, wherever practicable, on existing operations.

"(c) Nothing in this Act shall affect the authority provided by law to the Secretary of Labor for the protection of occupational safety and health, except as it applies to diving practices; the authority provided by law to the Administrator of the Environmental Protection Agency for the protection of the environment; or the authority provided by law to the Secretary of Transportation with respect to pipeline safety.

"(d) The Secretary of the Department in which the Coast Guard is operating with the assistance of the Secretary of Labor shall establish and promulgate regulations or standards applying to the diving activities in the waters above the outer Continental Shelf. Notwithstanding section 4(b)(1) of the Occupational Safety and Health Act of 1970, such regulations shall be promulgated and enforced by the two agencies. The two agencies shall coordinate their activities in a manner which avoids duplication of effort and maximizes protection of employees.

"(e) The Secretary of Commerce, in cooperation with the Secretary of the Department in which the Coast Guard is operating, and the Director of the National Institutes of Occupational Safety and Health, shall conduct studies of underwater diving techniques and equipment suitable for protection of human safety and improvement of diver performance. Such studies shall include but not be limited to: decompression and excursion table development and improvement; all aspects of diver physiological restraints, and protective gear for exposure to hostile environments.

"SEC. 22. ENFORCEMENT OF ENVIRONMENTAL AND SAFETY REGULATIONS.—(a) The Secretary and the Secretary of the Department in which the Coast Guard is operating shall consult with each other regarding the enforcement of environmental and safety regulations promulgated pursuant to this Act, and each may by agreement utilize, with or without reimbursement, the services, personnel, or facilities of any Federal agency, for the enforcement of their respective regulations.

"(b) The Secretary and the Secretary of the Department in which the Coast Guard is operating shall individually, or jointly if they so agree, promulgate regulations to provide for—

"(1) scheduled onsite inspection at least once a year of each facility on the outer Continental Shelf which is subject to any environmental or safety regulation promulgated pursuant to this Act, which inspection shall include all safety equipment designed to prevent or ameliorate blowouts, fires, spillages, or other major accidents; and

"(2) periodic onsite inspection without advance notice to the operator of such facility to assure compliance with such environmental or safety regulations.

"(c) The Secretary, the Secretary of the Department in which the Coast Guard is operating or their authorized repesentatives, upon presenting appropriate credentials to the owner or operator of a facility subject to subsection (b), shall be authorized—

"(1) to enter without delay any part of the facility; and

"(2) to examine such documents and records as are pertinent to such an inspection.

"(d)(1) The Secretary or the Secretary of the Department in which the Coast Guard in operating, as applicable, shall make an investigation and public report on each major fire and major oil spillage occurring as a result of operations conducted pursuant to this Act. For the purpose of this subsection, the term 'major oil spillage' means any discharge from a single source of more than two hundred barrels of oil over a period of thirty days or of more than fifty barrels over a single twenty-four hour period. In addition, such Secretary may make an investigation and report of any lesser oil spillage.

"(2) In any investigation conducted pursuant to this subsection, the Secretary of the Department in which the Coast Guard is operating shall have the power to subpena witnesses and to require the production of books, papers, documents, and any other evidence relating to such investigation.

"SEC. 23. CITIZEN SUITS.—(a) Except as provided in subsection (b) of this section, any person having a valid legal interest which is or may be adversely affected may commence a civil action on his own behalf to compel compliance with this Act—

"(1) against any person including—

"(A) the United States,

"(B) any other governmental instrumentality or agency to the extent permitted by the eleventh amendment to the Constitution who is alleged to be in violation of the provisions of this Act or the regulations promulgated thereunder; or

"(C) any other person who is alleged to be in violation of any rule, regulation, order, or permit issued pursuant to this Act; or

"(2) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty under this Act which is not discretionary with the Secretary or with the appropriate.

"(b) No action may be commenced—

"(1) under subsetcion (a)(1) of this section—

"(A) prior to sixty days after the plaintiff has given notice in writing under oath of the violation (i) to the Secretary, and (ii) to any alleged violator; or

"(B) if the Secretary or his authorized representative or the Attorney General, has commenced and is diligently prosecuting a civil action in a court of the United States or a State to require compliance with the provisions of this Act, or any rule, regulation, order, or permit issued pursuant to this action, but in any such action in a court of the United States any person having a legal interest which is or may be adversely affected may intervene as a matter of right; or

"(2) under subsection (a)(2) of this section prior to sixty days after the plaintiff has given notice in writing under the oath of such action to the Secretary, in such manner as the Secretary shall by regulation prescribe, except that such action may be brought immediately after such notification in the case where the violation or order complained of constitutes an imminent threat to the health or safety of the plaintiff or would immediately affect a legal interest of the plaintiff,

"(c)(1) Except as provided in subsection (g) of this section, any action pursuant to this section may be brought only in the judicial district having jurisdiction under section 4(b) of this Act.

"(2) In such action under this section, the Secretary, if not a party, may intervene as a matter of right.

"(d) The court, in issuing any final order in any action brought pursuant to subsection (a) of this section, may award costs of litigation, including reasonable attorney and expert witness fees to any party, whenever the court determines such award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in sufficient amount to compensate for any losses or damages suffered in accordance with the Federal Rules of Civil Procedure.

"(e) Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any of the provisions of this Act and the regulations thereunder, or to seek any other relief (including relief against the Secretary).

"(f) Any resident of the United States who is injured in any manner through the failure of any operator to comply with any rule, regulation, order, or permit issued pursuant to this Act may bring an action for damages (including reasonable attorney and expert witness fees) only in the judicial district having jurisdiction under section 4(b) of this Act.

"(g)(1) Any action of the Secretary to approve a leasing program pursuant to section 18 of this Act shall be subject to judicial review only in the United States Court of Appeals for the District of Columbia.

"(2) Any action of the Secretary to approve, require modification of, or disapprove any exploration plan or any development and production plan under this Act shall be subject to judicial review only in a United States court of appeals for a circuit in which an affected State is located.

"(3) The judicial review specified in paragraphs (1) and (2) of this subsection shall be available only to a person who (A) participated in the administrative proceedings

related to the actions specified in such paragraphs, (B) is adversely affected or aggrieved by such action, (C) files a petition for review of the Secretary's action within sixty days after the date of such action, and (D) promptly transmits copies of the petition to the Secretary and to the Attorney General of the United States.

"(4) Any action of the Secretary specified in paragraph (1) or (2) shall only be subject to review pursuant to the provisions of this subsection, and shall be specifically excluded from citizen suits which are permitted pursuant to subsection (a).

"(5) The Secretary shall file in the appropriate court the record of any public hearings required by this Act and any additional information upon which the Secretary based his decision, as required by section 2112 of title 28, United States Code. Specific objections to the action of the Secretary shall be considered by the court only if such objections have been submitted to the Secretary during the administrative proceedings related to the actions involved.

"(6) The court of appeals conducting a proceeding pursuant to this subsection shall consider the matter under review solely on the record made before the Secretary. The findings of the Secretary, if supported by substantial evidence on the record considered as a whole, shall be conclusive. The court may affirm, vacate, or modify any order or decision or may remand the proceedings to the Secretary for such further action as it may direct.

"(7) Upon the filing of the record with the court, pursuant to paragraph (5), the jurisdiction of the court shall be exclusive and its judgment shall be final, except that such judgment shall be subject to review by the Supreme Court of the United States upon writ of certiorari.

"(h) Except as to causes of action which the court considers of greater importance, any action under this section shall take precedence on the docket over all other causes of action and shall be set for hearing at the earliest practical date and expedited in every way.

"SEC. 24. REMEDIES AND PENALTIES.—(a) At the request of the Secretary, the Secretary of the Army, or the Secretary of the Department in which the Coast Guard is operating, the Attorney General or a United States attorney shall institute a civil action in the district court of the United States for the district in which the affected operation is located for a temporary restraining order, injunction, or other appropriate remedy to enforce any provision of this Act or any regulation or order issued under this Act.

"(b) If any person fails to comply with any provision of this Act, or any regulation or order issued under this Act, after notice of such failure and expiration of any reasonable period allowed for corrective action, such person shall be liable for a civil penalty of not more than $10,000 for each day of the continuance of such failure. The Secretary, the Secretary of the Army, or the Secretary of the Department in which the Coast Guard is operating, as applicable, may assess, collect, and compromise any such penalty. No penalty shall be assessed until the person charged with a violation has been given an opportunity for a hearing.

"(c) Any person who knowingly and willfully (1) violates any provision of this Act, or any regulation or order issued under the authority of this Act designed to protect health, safety, or the environment or conserve natural resources, (2) makes any false statement, representation, or certification in any application, record, report, or other document filed or required to be maintained under this Act, (3) falsifies, tampers with, or renders inaccurate any monitoring device or method of record required to be maintained under this Act, or (4) reveals any data or information required to be kept confidential by this Act shall, upon conviction, be punished by a fine of not more than $100,000, or by imprisonment for not more than ten years, or both. Each day that a violation under clause (1) of this subsection continues, or each day that any monitoring device or data recorder remains inoperative or inaccurate because of any activity described in clause (3) of this subsection, shall constitute a separate violation.

"(d) Whenever a corporation or other entity is subject to prosecution under subsection (c) of this section, any officer or agent of such corporation or entity who knowingly and willfully authorized, ordered, or carried out the proscribed activity shall be subject to the same fines or imprisonment, or both, as provided for under subsection (c) of this section.

"(e) The remedies and penalties prescribed in this section shall be concurrent and cumulative and the exercise of one shall not preclude the exercise of the others. Further, the remedies and penalties prescribed in this section shall be in addition to any other remedies and penalties afforded by any other law or regulation.

"SEC. 25. OIL AND GAS DEVELOPMENT AND PRODUCTION.—(a)(1) Prior to development and production pursuant to an oil and gas lease issued or maintained after the enactment of this section, or issued or maintained prior to the enactment of this section upon which no oil or gas has been discovered in commercial quantities prior to the effective date of this section, in any region of the outer Continental Shelf, other than the Gulf of Mexico, the lessee shall submit a development and production plan (hereinafter in this section referred to as a 'plan') to the Secretary, for approval pursuant to this section.

"(2) A plan shall be accompanied by a statement describing all facilities and operations, other than those on the outer Continental Shelf, proposed by the lessee and known by him (whether or not owned or operated by such lessee) which will be constructed or utilized in the development or production of oil or gas from the lease area, including the location and site of facilities and operations, the land, labor, material, and energy requirements associated with such facilities and operations, and all environmental and safety safeguards to be implemented.

"(3) Except for interpretive data, which, pursuant to regulations prescribed by the Secretary, constitute confidential or privileged information, the Secretary, within ten days after receipt of a plan and statement, shall (A) submit such plan and statement to the Governor of any affected State, and (B) make such plan and statement available to any other appropriate interstate regional entity, the executive of any affected local government area, and the public.

"(b) After the date of enactment of this section, no oil and gas lease may be issued pursuant to this Act in any region of the outer Continental Shelf, other than the Gulf of Mexico, unless such lease requires that development and production of reserves be carried out in accordance with a plan which complies with the requirements of this section.

"(c) A plan may apply to more than one oil and gas lease, and shall set forth, in the degree of detail established by regulations issued by the Secretary—

"(1) the specific work to be performed;

"(2) a description of all offshore facilities and operations proposed by the lessee or known by him (whether or not owned or operated by such lessee) to be directly related to the proposed development, including the location and size of such facilities and operations, and the land, labor, material, and energy requirements associated with such facilities and operations;

"(3) the environmental safeguards to be implemented on the outer Continental Shelf and how such safeguards are to be implemented;

"(4) all safety standards to be met and how such standards are to be met;

"(5) an expected rate of development and production and a time schedule for performance; and

"(6) such other relevant information as the Secretary may by regulation require.

"(d)(1) The Secretary shall at least once, prior to approving a development and production plan in any area or region, as defined by the Secretary, of the outer Continental Shelf, other than the Gulf of Mexico, declare approval of such plan to be a major Federal action.

"(2) The Secretary may require lessees on adjacent or nearby leases to submit preliminary or final plans for their leases, prior to or immediately after a determination by the Secretary that the procedures under the National Environmental Policy Act of 1969 shall commence.

"(e) The Secretary shall transmit for review and comment the draft environmental impact statement or the development and production plan if approval of such plan has not been declared to be a major Federal action, to the Governor of any affected State, the executive of any affected local government area, or any interested person. Comments on development and production plans shall be returned to the Secretary within sixty days. The draft environmental impact statement or the comments on the development and production plan shall be available to the general public.

"(f)(1) After reviewing the record of any public hearing held with respect to a plan pursuant to the National Environmental Policy Act of 1969 or the comments and recommendations submitted under subsection (e) of this section, the Secretary shall, within sixty days after the release of the final environmental impact statement prepare pursuant to the National Environmental Policy Act of 1969 in accordance with subsection (d) of this section, or one hundred and twenty days after the period provided for comment under subsection (f) of this section, approve, disapprove, or require modifications of the plan. The Secretary shall require modification of a plan if he determines that the lessee has failed to make adequate provision in such plan for safe operations on the lease area or for protection of the human, marine, or coastal environment. Any modification required by the Secretary which affects land use and water use of the coastal zone of affected States with coastal zone management programs approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) shall be consistent with such program unless the Secretary of Commerce makes the finding authorized by section 307(c)(3)(B)(iii) of that Act. The Secretary shall disapprove a plan—

"(A) if the lessee fails to demonstrate that he can comply with the requirements of this Act or other applicable Federal law;

"(B) if those activities described in the plan which affect land use and water use of the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) are not concurred with by such State pursuant to section 307(c) of such Act; and the Secretary of Commerce does not make the finding authorized by section 307(c)(3)(B)(iii) of that Act;

"(C) if operations threaten national security of national defense; or

"(D) if in the Secretary's determination, because of exceptional geological conditions in the lease area, exceptional resource values in the marine or coastal environment, or other expectional circumstances, implemen-

tation of the plan would probably cause serious harm or damage to life (including aquatic life), to property, to any mineral deposits in areas leased or not yet leased, or to the marine, coastal or human environments, and if he determines that the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time and if he determines that the advantages of disapproving the plan outweigh the advantages of development and production. If a plan is disapproved under clause (A), the lessee shall not be entitled to compensation because of such disapproval. If a plan is disapproved under clause (B), the lessee shall not be entitled to compensation because of such disapproval unless (i) the lease was issued and (ii) the lessee had submitted to the Secretary a development and production plan before approval of the coastal zone management program pursuant to the Coastal Zone Management Act of 1972 (16 U.S.C. 1455). If a plan is disapproved under clause (C) or (D) or under clause (B) where (i) the lease was issued and (ii) the lessee had submitted to the Secretary a development and production plan before approval of the coastal zone management program, the term of the lease shall be duly extended, and at any time within five years after said disapproval, the lessee may reapply for approval of the same or a modified plan, and the Secretary shall approve, disapprove, or require modifications of a plan in accordance with this subsection. Upon expiration of such five-year period, or at an earlier time upon request of a lessee, if the Secretary has not approved a plan, the Secretary shall cancel the lease, and the lessee shall be entitled to receive such compensation as he shows to the Secretary is equal to the lesser of (i) the fair value of the canceled rights as of the date of cancellation, taking account of both anticipated revenues from the lease and anticipated costs, including cost of compliance with all applicable regulations or operating orders, liability for cleanup costs or damages, or both, in the case of an oil spill, and all other costs reasonably anticipated with respect to the lease, or (ii) the excess, if any, over the lessee's revenues from the lease (plus interest thereon from date of receipt to date of reimbursement) of all consideration paid for the lease and all direct expenditures made by the lessee after the date of issuance of such lease, and in connection with exploration or development, or both, pursuant to the lease (plus interest on such consideration and such expenditures from the date of payment to the date of reimbursement): *Provided,* That with respect to leases issued before the date of enactment of this Act, such compensation shall be equal to the amount specified in item (i) of this sentence. The Secretary may, at any time within the five-year period, described in subparagraph (C), require the lessee to submit a plan of development and production for approval, disapproval, or modification. If the lessee fails to submit a required plan expeditiously and in good faith, the Secretary shall find that the lessee has not been duly diligent in pursuing his obligations under the lease, and shall immediately cancel such lease, without compensation, under the provisions of section 5(c) of this Act.

"(2) The Secretary shall, from time to time, review each plan approved under this section. Such review shall be based upon changes in available information and other onshore or offshore conditions affecting or impacted by development and production pursuant to such plan. If the review indicates that the plan should be revised to meet the requirements of this subsection, the Secretary shall require such revision.

"(g) The Secretary may approve any revision of an approved plan proposed by the operator if he determines that such revision will lead to greater recovery of oil and natural gas, improve the efficiency, safety, and environmental protection of the recovery operation, is the only means available to avoid substantial economic hardship to the lessee, or is otherwise not inconsistent with the provisions of this Act, to the extent such revision is consistent with protection of the marine and coastal environments. Any revision of an approved plan which the Secretary determines is significant shall be reviewed in accordance with subsections (d) through (f) of this section.

"(h) Whenever the owner of any lease fails to submit a plan in accordance with regulations issued under this section, or fails to comply with an approved plan, the lease may, after notice to such owner of such failure and expiration of any reasonable period allowed for corrective action, and after an opportunity for a hearing, be forfeited, canceled, or terminated, subject to the right of judicial review, in accordance with the provisions of section 23(b) of this Act. Termination of a lease because of failure to comply with an approved plan, including required modifications or revisions, shall not entitle a lessee to any compensation.

"(i) If any development and production plan submitted to the Secretary pursuant to this section provides for the production and transportation of natural gas, the lessee shall contemporaneously submit to the Federal Power Commission that portion of such plan which relates to production of natural gas and the facilities for transportation of natural gas. The Secretary and the Federal Power Commission shall agree as to which of them shall prepare an environmental impact statement pursuant to the National Environmental Policy Act of 1969 applicable to such portion of such plan, or conduct studies as to the effect on the environment of implementing it. Thereafter, the findings and recommendations by the agency preparing such environmental impact statement or conducting such studies pursuant to that agreement shall be adopted by the other agency, and such other agency shall not independently prepare another environmental impact statement or duplicate such studies with respect to such portion of such plan, but the Federal Power Commission, in connection with its review of an application for a certificate of public convenience and necessity applicable to such transportation facilities pursuant to section 7 of the Natural Gas Act (15 U.S.C. 717), may prepare such environmental studies or statement relevant to certification of such transportation facilities as have not been covered by an environmental impact statement or studies prepared by the Secretary. The Secretary, in consultation with the Federal Power Commission, shall promulgate rules to implement this subsection, but the Federal Power Commission shall retain sole authority with respect to rules and procedure applicable to the filing of any application with the Commission and to all aspects of the Commission's review of, and action on, any such application.

"SEC. 26. OUTER CONTINENTAL SHELF OIL AND GAS INFORMATION PROGRAM.—(a)(1)(A) Any lessee or permittee conducting any exploration for, or development or production of, oil or gas pursuant to this Act shall provide the Secretary access to all data obtained from such activity and shall provide copies of such specific data, and any interpretation of any such data, as the Secretary may request. Such data and interpretation shall be provided in accordance with regulations which the Secretary shall prescribe.

"(B) If an interpretation provided pursuant to subparagraph (A) of this paragraph is made in good faith by the lessee or permittee, such lessee or permittee shall not be held responsible for any consequence of the use of or reliance upon such interpretation.

"(C) Whenever any data is provided to the Secretary, pursuant to subparagraph (A) of this paragraph—

"(i) by a lessee or permittee, in the form and manner of processing which is utilized by such lessee in the normal conduct of his business, the Secretary shall pay the reasonable cost of reproducing such data; and

"(ii) by a lessee or permittee, in such other form and manner of processing as the Secretary may request, the Secretary shall pay the reasonable cost of processing and reproducing such data, pursuant to such regulations as he may prescribe.

"(2) Each Federal agency shall provide the Secretary with any data obtained by such Federal agency conducting exploration pursuant to section 11 of this Act, and any other information which may be necessary or useful to assist him in carrying out the provisions of this Act.

"(b)(1) Information provided to the Secretary pursuant to subsection (a) of this section shall be processed, analyzed, and interpreted by the Secretary for purposes of carrying out his duties under this Act.

"(2) As soon as practicable after information provided to the Secretary pursuant to subsection (a) of this section is processed, analyzed, and interpreted, the Secretary shall make available to the affected States a summary of data designed to assist them in planning for the onshore impacts of possible oil and gas development and production. Such summary shall include estimates of (A) the oil and gas reserves in areas leased or to be leased, (B) the size and timing of development if and when oil or gas, or both, is found, (C) the location of pipelines, and (D) the general location and nature of onshore facilities.

"(c) The Secretary shall prescribe regulations to (1) assure that the confidentiality of privileged information received by the Secretary under this section will be maintained, and (2) set forth the time periods and conditions which shall be applicable to the release of such information. Such regulations shall include a provision that no such information will be transmitted to any affected State unless the lessee, or the permittee and all persons to whom such permittee has sold such information under promise of confidentiality, agree to such transmittal.

"(d)(1) The Secretary shall transmit to any affected State—

"(A) a copy of all revelant actual or proposed programs, plans, reports, environmental impact statements, tract nominations (including negative nominations) and other lease sale information, any similar type of relevant information, and all modifications and revisions thereof and comments thereon, prepared or obtained by the Secretary pursuant to this Act, but no information transmitted by the Secretary hereunder shall identify any particular tract with the name or names of any particular party so as not to compromise the competitive position of any party or parties participating in the nominations;

"(B)(i) the summary of data prepared by the Secretary pursuant to subsection (b)(2) of this section, and (ii) any other processed, analyzed, or interpreted data prepared by the Secretary pursuant to subsection (b)(1) of this subsection, unless the Secretary determines that transmittal of such data prepared pursuant to subsection (b)(1) would unduly damage the competitive position of the lessee or permittee who provided the Secretary with the information which the Secretary had processed, analyzed, or interpreted; and

"(C) any relevant information received by the Secretary pursuant to subsection (a) of this section, subject to any applicable re-

quirements as to confidentiality which are set forth in regulations prescribed under subsection (c) of this section.

"(2) Notwithstanding the provisions of any regulation required pursuant to the second sentence of subsection (c) of this section, the Governor of any affected State may designate an appropriate State official to inspect, at a regional location which the Secretary shall designate, any privileged information received by the Secretary regarding any activity adjacent to such State, except that no such inspection shall take place prior to the sale of a lease covering the area in which said activity was conducted. Knowledge obtained by such State during such inspection shall be subject to applicable requirements as to confidentiality which are set forth in regulations prescribed under subsection (c) of this section.

"(e) Any provision of State or local law which provides for public access to any privileged information received or obtained by any person pursuant to this Act is expressly preempted by the provisions of this section, to the extent that it applies to such information.

"(f) If the Secretary finds that any State cannot or does not comply with the regulations issued under subsection (c) of this section, he shall thereafter withhold transmittal and deny inspection of privileged information to such State until he finds that such State can and will comply with such regulations.

"(g) The regulations prescribed pursuant to subsection (c) of this section, and the provisions of subsection 552(b)(9) of title 5, United States Code, shall not apply to any information obtained in the conduct of geological or geophysical explorations by any Federal agency (or any person acting under a service contract with such agency) pursuant to section 11 of this Act.

"(h) Except for any tract on which there is a lease outstanding, where the Secretary determines that exploratory or stratigraphic drilling by the United States is necessary to obtain more accurate information regarding the oil and gas resources of the outer Continental Shelf, he shall contract for such drilling: *Provided*, That no funds shall be appropriated for such drilling prior to the fiscal year beginning October 1, 1978: *Provided further*, That budget requests for the funds necessary to implement this subsection shall be displayed as a separate line item and appropriately justified, as part of the department's annual budget request; and that no such budget request may be made to the Congress until the Secretary has made every reasonable effort to avoid such Federal expenditures and has published in the Federal Register, a request that potential permittees apply for a permit to participate in a continental offshore stratigraphic test or other such test drilling operations as are authorized by regulation. Nothing in this subsection shall be interpreted to prevent the Secretary from leasing any area of the outer Continental Shelf which has not been drilled pursuant to this subsection where he determines that such leasing is consistent with the provisions of this Act.

"(i) The Secretary shall include, in his annual report pursuant to section 15 of this Act, costs of the drilling program, staffing required to administer the program, and a detailed description of the progress of the program.

"SEC. 27. FEDERAL PURCHASE AND DISPOSITION OF OIL AND GAS.—(a)(1) Except as may be necessary to comply with the provisions of sections 6 and 7 of this Act, all royalties or net profit shares, or both, accruing to the United States under any oil and gas lease or permit issued or maintained in accordance with this Act, shall, on demand of the Secretary, be paid in oil or gas.

"(2) The United States shall have the right to purchase not to exceed 16⅔ per centum by volume of the oil and gas produced pursuant to a lease or permit issued in accordance with this Act, at the regulated price, or, if no regulated price applies, at the fair market value at the well-head of the oil and gas saved, removed or sold, except that any oil or gas obtained by the United States as royalty or net profit share shall be credited against the amount that may be purchased under this subsection.

"(3) Title to any royalty, net profit share, or purchased oil or gas may be transferred, upon request, by the Secretary to the Secretary of Defense, to the Administrator of the General Services Administration, or to the Administrator of the Federal Energy Administration, for disposal within the Federal Government.

"(b)(1) The Secretary, pursuant to such terms as he determines and in the absence of any provision of law which provides for the mandatory allocation of such oil in amounts and at prices determined by such provision, or regulations issued in accordance with such provision, may offer to the public and sell by competitive bidding for not more than its regulated price, or, if no regulated price applies, not less than its fair market value any part of the oil (A) obtained by the United States pursuant to any lease as royalty or net profit share, or (B) purchased by the United States pursuant to subsection (a)(2) of this section.

"(2) Whenever, after consultation with the Administrator of the Federal Energy Administration, the Secretary determines that small refiners do not have access to adequate supplies of oil at equitable prices, the Secretary may dispose of any oil which is taken as a royalty or net profit share accruing or reserved to the United States pursuant to any lease issued or maintained under this Act, or purchased by the United States pursuant to subsection (a)(2) of this section, by conducting a lottery for the sale of such oil, or may equitably allocate such oil among the competitors for the purchase of such oil, at the regulated price, or if no regulated price applies, at its fair market value. The Secretary shall limit participation in any lottery or allocated sale to assure such access and shall publish notice of such sale, and the terms thereof, at least thirty days in advance of such sale. Such notice shall include qualifications for participation, the amount of oil to be sold, and any limitation in the amount of oil which any participant may be entitled to purchase.

"(3) Whenever a provision of law is in effect which provides for the mandatory allocation of such oil in amounts or at prices determined by such provisions, or regulations issued in accordance with such provision, the Secretary may only sell such oil in accordance with such provision of law or regulations.

"(c)(1) Except as provided in paragraph (2) of this subsection, the Secretary, pursuant to such terms as he determines, may offer to the public and sell by competitive bidding for not more than its regulated price, or, if no regulated price applies, not less than its fair market value any part of the gas (A) obtained by the United States pursuant to a lease as royalty or net profit share, or (B) purchased by the United States pursuant to subsection (a)(2) of this section.

"(2) Whenever, after consultation with and advice from the Administrator of the Federal Energy Administration and the Chairman of the Federal Power Commission, the Secretary determines that an emergency shortage of natural gas is threatening to cause severe economic or social dislocation in any region of the United States and that such region can be serviced in a practical, feasible, and efficient manner by royalty, net profit share, or purchased gas obtained to the provisions of this subsection, the Secretary may allocate or conduct a lottery for the sale of such gas, and shall limit participation in any allocated or lottery sale of such gas to any person servicing such region, but he shall not sell any such gas for more than its regulated price, or, if no regulated price applies, less than its fair market value. Prior to allocating any gas pursuant to this paragraph, the Secretary shall consult with the Federal Power Commission.

"(d) The lessee shall take any Federal oil or gas for which no acceptable bids are received, as determined by the Secretary, and which is not transferred pursuant to subsection (a)(3) of this section, and shall pay to the United States a cash amount equal to the regulated price, or, if no regulated price applies, the fair market value of the oil or gas so obtained.

"(e) As used in this section—

"(1) the term 'regulated price' means the highest price—

"(A) at which Federal oil may be sold pursuant to the Emergency Petroleum Allocation Act of 1973 and any rule or order issued under such Act;

"(B) at which natural gas may be sold to natural-gas companies pursuant to the Natural Gas Act and any rule or order issued under such Act; or

"(C) at which either Federal oil or gas may be sold under any other provision of law or rule or order thereunder which sets a price (or manner for determining a price) for oil or gas produced pursuant to a lease or permit issued in accordance with this Act; and

"(2) the term 'small refiner' means an owner of an existing refinery or refineries, including refineries not in operation, who qualifies as a small business concern under the rules of the Small Business Administration and who is unable to purchase in the open market an adequate supply of crude oil to meet the needs of his existing refinery capacities.

"(f) Nothing in this section shall prohibit the right of the United States to purchase any oil or gas produced on the Outer Continental Shelf, as provided in section 12(b) of this Act.

"SEC. 28. LIMITATION ON EXPORT.—(a) Except as provided in subsection (d), any oil or gas produced from the outer Continental Shelf shall be subject to the requirements and provisions of the Export Administration Act of 1969 (50 App. U.S.C. 2401 et seq.).

"(b) Before any oil or gas subject to this section may be exported under the requirements and provisions of the Export Administration Act of 1969, the President shall make and publish an express finding that such exports will not increase reliance on imported oil or gas, are in the national interest, and are in accord with the provisions of the Export Administration Act of 1969.

"(c) The President shall submit reports to the Congress containing findings made under this section, and after the date of receipt of such report Congress shall have a period of sixty calendar days, thirty days of which Congress must have been in session, to consider whether exports under the terms of this section are in the national interest. If the Congress within such time period passes a concurrent resolution of disapproval stating disagreement with the President's finding concerning the national interest, further exports made pursuant to such Presidential findings shall cease.

"(d) The provisions of this section shall not apply to any oil or gas which is either exchanged in similar quantity for convenience or increased efficiency of transportation with persons or the government of a foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States.

"SEC. 29. RESTRICTIONS OF EMPLOYMENT.—

No full-time officer or employee of the Department of the Interior who directly or indirectly discharged duties or responsibilities under this Act, and who was at any time during the twelve months preceding the termination of his employment with the Department compensated under the Executive Schedule or compensated at or above the annual rate of basic pay for grade GS–16 of the General Schedule, shall accept, for a period of two years after the date of termination of employment with the Department, employment or compensation, directly or indirectly, from any person, persons, association, corporation, or other entity subject to regulation under this Act.".

TITLE III—OFFSHORE OILSPILL POLLUTION FUND

DEFINITIONS

SEC. 301. As used in this title, unless the context indicates otherwise, the term—

(1) "cleanup costs" means all reasonable and actual costs, including administrative and other costs, to the Federal Government, to any State or local government, or to any foreign government, or to their contractors or subcontractors, of (A) removing or attempting to remove oil discharged from any offshore facility or vessel, or (B) taking other measures to prevent such discharge, or to reduce or mitigate damages to the public health or welfare, or to public property, including shorelines, beaches, and the natural resources of the marine environment;

(2) "damages" means compensation sought pursuant to this title by any person suffering any direct and actual injury proximately caused by the discharge of oil from an offshore facility or vessel, except that such term does not include clean-up costs;

(3) "discharge" includes any spilling, leaking, pumping, pouring, emptying, or dumping, regardless of whether it occurred intentionally or unintentionally;

(4) "offshore facility" includes any oil refinery, drilling structure, oil storage or transfer terminal, or pipeline, or any appurtenance related to any of the foregoing, which is used to drill for, produce, store, handle, transfer, process, or transport oil produced from the Outer Continental Shelf (as the term Outer Continental Shelf is defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a))), and is located on the Outer Continental Shelf, except that such term does not include (A) a vessel, or (B) a deepwater port (as the term deepwater port is defined in section 3(10) of the Deepwater Port Act of 1974 (33 U.S.C. 1502));

(5) "Fund" means the Offshore Oil Pollution Compensation Fund established under section 302(a) of this title;

(6) "owner" means (A) with respect to an offshore facility, any person owning such facility, whether by lease, permit, contract, license, or other form of agreement, (B) with respect to any facility abandoned without prior approval of the Secretary of the Interior, the person who owned such facility immediately prior to such abandonment, and (C) with respect to a vessel, any person owning such vessel;

(7) "operator" means (A) with respect to an offshore facility, any person operating such facility, whether by lease, permit, contract, license, or other form of agreement, and (B) with respect to a vessel, any person operating or chartering by demise such vessel;

(8) "person" means an individual, a public or private corporation, partnership, or other association, or a government entity;

(9) "person in charge" means the individual immediately responsible for the operations of an offshore facility or vessel;

(10) "Secretary" means the Secretary of Transportation;

(11) "revolving account" means the account in the Treasury of the United States which is established under section 302(b) of this title;

(12) "incident" means any occurrence or series of related occurrences, involving one or more offshore facilities or vessels, which cause or pose an imminent threat of oil pollution; and

(13) "vessel" means every description of watercraft or other contrivance, whether or not self-propelled, which is operating in the waters above the Outer Continental Shelf (as the term "outer Continental Shelf" is defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)), or in the navigable waters of the United States (as the term "navigable waters" is defined in section 502 of the Federal Water Pollution Control Act), and which is transporting oil directly from an offshore facility.

ESTABLISHMENT OF THE FUND AND THE REVOLVING ACCOUNT

SEC. 302. (a) There is established within the Department of Transportation an Offshore Oil Production Compensation Fund. The Fund may sue or be sued in its own name.

(b) There is established in the Treasury of the United States a revolving account, without fiscal year limitation, which shall be available to the Fund to carry out the provisions of this title.

PROHIBITION

SEC. 303. The discharge of oil from any offshore facility or vessel, in quantities which the President under section 311(b) of the Federal Water Pollution Control Act (33 U.S.C. 1321(b)) determines to be harmful, is prohibited.

NOTIFICATION

SEC. 304. (a) Any person in charge of an offshore facility or vessel shall, as soon as he has knowledge of any discharge of oil from such offshore facility or vessel which may be in violation of section 303 of this title, immedaitely notify the Secretary of such discharge.

(b) Any person in charge of an offshore facility or vessel who fails to immediately notify the Secretary, as required by subsection (a) of this section, shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than one year, or both, except that no person convicted under this section shall also be convicted for the same failure to notify under section 311(b)(5) of the Federal Water Pollution Control Act.

(c) Notification received pursuant to this section or information obtained by the exploitation of such notification shall not be used against any person providing such notification in any criminal case, except a prosecution for perjury or for giving a false statement.

REMOVAL OF DISCHARGED OIL

SEC. 305. (a) Whenever any oil is discharged from any offshore facility or vessel in violation of section 303 of this title, the President shall act to remove or arrange for the removal of such oil, unless he determines such removal will be done properly and expeditiously by the owner or operator of such offshore facility or vessel.

(b) Removal of oil and actions to minimize damage from oil discharged shall, to the greatest extent possible, be in accordance with the National Contingency Plan for removal of oil and hazardous substances established pursuant to section 311(c)(2) of the Federal Water Pollution Control Act.

(c) Whenever the President acts to remove a discharge of oil pursuant to this section, he is authorized to draw upon the money available in the revolving account. Such money shall be used to pay promptly for all cleanup costs incurred by the President in removing such oil or in minimizing damage caused by such oil discharge.

DUTIES AND POWERS

SEC. 306. (a) In order to carry out the purposes of this title, the Secretary shall—

(1) administer and maintain the Fund, in accordance with the provisions of this title;

(2) establish regulations and provide for the fair and expeditious settlement of claims, in accordance with section 313 of this title;

(3) provide public access to information, in accordance with section 319(a) of this title;

(4) submit an annual report, in accordance with section 320 of this title; and

(5) perform such other functions as are prescribed by law.

(b) In the performance of his duties under this title, the Secretary is authorized to—

(1) utilize, with the consent of the agency concerned, the services or personnel, on a reimbursable or replacement basis or otherwise, of any Federal Government agency, of any State or local government agency, or of any organization, to perform such functions on behalf of the Fund as are necessary or appropriate;

(2) make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this title;

(3) conduct such studies and investigations, obtain such data and information, and hold such meetings or public hearings as may be necessary or appropriate to facilitate the exercise of any authority granted to, or the performance of any duty imposed on, the Fund under this title;

(4) enter into such contracts, agreements, and other arrangements as are deemed necessary or appropriate for the acquisition of material, information, or other assistance related to, or required by, the implementation of this title; and

(5) issue and enforce orders during proceedings conducted pursuant to this title, including issuing subpenas, administering oaths, compelling the attendance and testimony of witnesses and the production of books, papers, documents, and other evidence, and the taking of depositions.

RECOVERABLE DAMAGES

SEC. 307. Damages may be recovered under this title for—

(1) the value of any loss or injury, at the time such loss or injury is incurred, with respect to any real or personal property which is damaged or destroyed as a result of a discharge of oil;

(2)(A) the cost to the owner of restoring, repairing, or replacing any real or personal property which is damaged or destroyed by a discharge of oil, (B) any income necessarily lost by such owner during the time such property is being restored, repaired, or replaced, and (C) any reduction in the value of such property caused by such discharge;

(3) any loss of income or impairment of earning capacity for a period of not to exceed five years due to damages to real or personal property, or to natural resources, without regard to ownership of such property or resources, which are damaged or destroyed by a discharge of oil, if the claimant derives at least 25 per centum of his earnings from activities which utilize such property or natural resources;

(4) any costs and expenses incurred by the Federal Government or any State government in the restoration, repair, or replacement of natural resources which are damaged or destroyed by a discharge of oil; and

(5) any loss of tax revenue by the Federal Government or any State or local government for a period of not to exceed one year due to injury to real or personal property resulting from a discharge of oil.

CLEANUP COSTS AND DAMAGES

SEC. 308. (a) All cleanup costs incurred by the President, the Secretary, or any other Federal, State, or local official or agency, in connection with a discharge of oil shall be borne by the owners and operator of the

offshore facility or vessel from which the discharge occurred.

(b) Notwithstanding any other provision of law and except as provided in subsection (d) of this section, the owner and operator of an offshore facility shall be held jointly and severally liable, without regard to fault, for damages which result from a discharge of oil from such offshore facility. Such liability shall not exceed $35,000,000, except that if it can be shown that (1) such discharge was the result of gross negligence or willful misconduct within the privity and knowledge of such owner or operator, or of the person in charge of such offshore facility, or (2) such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations, such owner and operator shall be jointly and severally liable for the full amout of such damages.

(c) Notwithstanding any other provision of law and except as provided in subsection (d) of this section, the owner and operator of a vessel shall be jointly and severally liable, without regard to fault, for damages which result from a discharge of oil from such vessel. Such liability shall not exceed $150 per gross registered ton, except that if it can be shown that (1) such discharge was the result of gross negligence or willful misconduct within the privity and knowledge of such owner or operator, or of the person in charge of such vessel, or (2) such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations, such owner and operator shall be jointly and severally liable for the full amount of such damages.

(d) No liability shall be imposed under subsection (b) or (c) of this section to the extent the owner or operator establishes that the discharge of oil or that any damages resulting from such discharge were caused by (1) an act of war, or (2) the negligent or intentional act of the damaged party or of any third party (including any government entity).

(e)(1) To the extent that liability is not imposed, pursuant to subsection (d)(2) of this section, on the owner or operator of an offshore facility or vessel for cleanup costs or damages resulting from a discharge of oil from such facility or vessel, the damaged party or third party whose negligent or intentional act caused such discharge or any damages resulting from such discharge shall, if such damaged party or third party is also an offshore facility or vessel, be liable for such cleanup costs or damages to the same extent as if such discharge had occurred from the offshore facility or vessel of such damaged party or third party.

(2) Payment of cleanup costs or damages by the owner or operator of any offshore facility or vessel to any person pursuant to this title shall be subject to such owner or operator acquiring by subrogation all rights of such person to recover such cleanup costs or damages from any other person.

(3) The provisions of this section shall not in any way affect or limit any rights which an owner or operator of an offshore facility or vessel, or the Fund, may have against any third party whose acts may have caused or contributed to a discharge of oil.

(f) Notwithstanding any other provision of this title, no person shall be liable under this title for payment of cleanup costs or damages to any government of a foreign country, or any citizen of a foreign country not a resident of the United States, unless (1) such payment is authorized by a treaty or executive agreement between such country and the United States, or (2) the Secretary of State, in consultation with the Attorney General, certifies that such country provides an adequate and substantially similar remedy for United States claimants for cleanup costs and damages related to discharges of oil produced from the Continental Shelf of such country.

(g) Any owner or operator of any offshore facility or vessel liable for damages to any person pursuant to subsection (b), (c), or (e)(1) of this section shall also be liable to such person for interest on the amount of such damages for which such owner or operator is liable, at the existing commercial interest rate, from the date the claim or amended claim including such damages was presented to the date on which the damages are paid. Such interest shall not be subject to any limitation of liability specified in subsection (b) or (c) of this section.

DISBURSEMENTS FROM THE REVOLVING ACCOUNT

SEC. 309. (a) Amounts in the revolving account shall be available for disbursement and shall be disbursed by the Fund for only the following purposes:

(1) Administrative and personnel expenses of the Fund.

(2) Cleanup costs resulting from the discharge of oil which are incurred pursuant to this title or pursuant to any State or local law.

(3) Costs of the removal of oil incurred by the owner or operator of an offshore facility or vessel to the extent that the discharge of such oil was caused solely by an act of war or negligence on the part of the Federal Government in establishing and maintaining aids to navigation.

(4) Subject to the provisions of section 313 of this title, all damages not actually compensated pursuant to section 308(b) or (c) of this title.

(b) Payment of compensation by the Fund shall be subject to the Fund acquiring by subrogation all rights of the claimant to recover cleanup costs or damages from the person responsible for such discharge. The Fund shall diligently pursue recovery for any such subrogated rights.

(c) Notwithstanding any other provision of this section, the Fund shall not be liable to pay (1) cleanup costs and damages of any claimant to the extent that the discharge of oil or any damages resulting from such discharge were caused by the negligent or intentional act of the damaged party, or (2) damages of any claimant to the extent that the discharge of oil or any damages resulting from such discharge were caused by an act of war.

(d) In all claims or actions by the Fund against the owner, operator, or person providing financial responsibility, the Fund shall recover (1) except as otherwise provided in this title, the amount the Fund has paid to the claimant or to any government entity undertaking cleanup operations, without reduction, (2) interest on that amount, at the existing commercial interest rate, from the date upon which the request for reimbursement was issued from the Fund to the owner, operator, or such person, to the date on which the Fund is paid by such owner, operator, or person, and (3) all reasonable and actual administrative costs incurred by the Secretary and disbursed by the Fund in connection with such claim or action, including costs of investigation, processing, hearings, appeals, and collection. Costs recovered pursuant to clause (3) of this subsection shall not be subject to any limitation of liability applicable to such owner, operator, or person providing financial responsibility, under the provisions of subsection (b) or (c) of section 308 of this title.

(e) Whenever the amount in the revolving account is not sufficient to pay cleanup costs and damages for which the Fund is liable pursuant to this section, the Fund may issue, in an amount not to exceed $500,000,000, notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such notes or other obligations shall bear interest at a rate to be determined by the Secretary of the Treasury on the basis of the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notes or other obligations. Moneys obtained by the Fund under this subsection shall be deposited in the revolving account, and redemptions of any such notes or other obligations shall be made by the Fund from the revolving account. The Secretary of the Treasury shall purchase any such notes or other obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under this subsection. The Secretary of the Treasury may sell any such notes or other obligations at such times and prices and upon such terms and conditions as he shall determine in his discretion. All purchases, redemptions, and sales of such notes or other obligations by such Secretary of the Treasury shall be treated as public debt transactions of the United States.

FEE COLLECTION; DEPOSITS IN REVOLVING ACCOUNT

SEC. 310. (a)(1) The Secretary shall levy and the Secretary of the Treasury shall collect a fee of not to exceed 3 cents per barrel on oil obtained from the Outer Continental Shelf, which shall be imposed on the owner of the oil when such oil is produced.

(2) The collection of the fee imposed pursuant to paragraph (1) of this subsection shall continue until the amount in the revolving account totals at least $100,000,000, whereupon imposition of such fee may be suspended by the Secretary. Thereafter, the Secretary shall from time to time and in accordance with the limitation set forth in the first sentence of paragraph (1) of this subsection, modify by regulation the amount of the fee, if any, to be collected under this subsection in order to maintain the revolving account at a level of not less than $100,000,000 and not more than $200,000,000. For purposes of this paragraph, all sums deposited pursuant to subsection (b) of this section shall be included in the calculation of the balance in the revolving account.

(b) All sums received through fee collection, reimbursements, fines, penalties, investments, and judgments pursuant to this title shall be deposited in the revolving account.

(c) All sums not needed for the purposes specified in this title shall be prudently invested in income-producing securities issued by the United States and approved by the Secretary of the Treasury.

FINANCIAL RESPONSIBILITY

SEC. 311. (a) Each owner or operator of an offshore facility shall establish and maintain, under rules and regulations prescribed by the President, evidence of financial responsibility based on the capacity of the offshore facility and other relevant factors. Financial responsibility may be established by any one, or a combination of, the following methods acceptable to the President: (1) evidence of insurance, (2) surety bonds, (3) qualifications as a self-insurer, or (4) other evidence of financial responsibility satisfactory to the President.

(b) Each owner or operator of a vessel over three hundred gross registered tons (other than a vessel which is not self-propelled and which does not carry oil as cargo of fuel) shall establish and maintain, under rules and regulations prescribed by the Federal Maritime Commission, evidence

of financial responsibility based on the liability requirements of this title and the tonnage of the vessel. In cases where an owner or operator owns, operates, or charters more than one such vessel, financial responsibility need only be established to meet the maximum liability to which the largest of such vessels could be subjected. Financial responsibility may be established by any one, or combination, of the following methods acceptable to the President: (1) evidence of insurance, (2) surety bonds, (3) qualifications as a self-insurer, or (4) other evidence of financial responsibility satisfactory to the President.

(c) Any claim for cleanup costs and damages by any claimant or by the Fund may be brought directly against the surety, the insurer, or any other person providing financial responsibility.

(d) Any person who fails to comply with the provisions of this section or any regulation issued under this section shall be subject to a fine of not more than $25,000.

(e) The President shall adjust the requirements established under this section and the limit of liability under section 308 of this title annually, by an amount equal to the annual percentage change in the wholesale price index.

(f) No owner or operator of an offshore facility or vessel who establishes and maintains evidence of financial responsibility in accordance with this section shall be required under any State law, rule, or regulation to establish any other evidence of financial responsibility in connection with liability for the discharge of oil from such offshore facility or vessel. Evidence of compliance with the financial responsibility requirement of this section shall be accepted by a State in lieu of any other requirement of financial responsibility imposed by such State in connection with liability for the discharge of oil from such offshore facility or vessel.

TRUSTEE OF NATURAL RESOURCES

SEC. 312. (a) The President, or the authorized representative of any State, shall act on behalf of the public as trustee of the natural resources to recover for damages to such resources. Sums recovered shall be used to restore, rehabilitate, or acquire the equivalent of such natural resources by the appropriate agencies of the Federal Government or the State government.

CLAIMS PROCEDURE

SEC. 313. (a) The Secretary shall prescribe, and may from time to time amend, regutions for the filing, processing, settlement, and adjudication of claims for cleanup costs and damages resulting from the discharge of oil from an offshore facility or vessel.

(b)(1) Whenever the Secretary receives information from any person alleging the discharge of oil from any offshore facility or vessel in violation of section 303 of this title, he shall notify the owner and operator of such offshore facility or vessel of such allegation. Such owner or operator may, within five days after receiving such notification, deny such allegations, or deny liability for damages for any of the reasons set forth in section 308(d) of this title.

(2) Any denial made pursuant to paragraph (1) of this subsection shall be adjudicated in accordance with the provisions of subsection (i) of this section.

(c)(1) If a denial is not made pursuant to subsection (b)(1) of this section, the owner and operator, or the person providing financial responsibility, shall advertise, in accordance with regulations promulgated by the Secretary, in any area where damages may occur, the procedures under which claims may be presented to such owners and operator or such person providing financial responsibility. The Secretary shall publish the text of such advertisement, in modified form if necessary, in the Federal Register. If any person fails to make any advertisement required by this paragraph, the Secretary shall do so and such person shall pay the costs of such advertisement.

(2) If a denial is made pursuant to subsection (b) of this section, the Secretary shall advertise and publish procedures under which claims may be presented to the Secretary for payment by the Fund from the revolving account.

(3) Any advertisement made under this subsection shall commence no later than fifteen days after the date of the notification and shall continue for a period of no less than thirty days. Such advertisement shall be repeated thereafter in such modified form as may be necessary, but not less frequently than once each calendar quarter for a total period of five years.

(d)(1) Any claim presented to any person under subsection (c)(1) of this section, or to the Secretary for payment from the Fund, shall be presented within one year after the date of discovery of any damages for which such claim is made, except that no such claim may be presented after the end of the five-year period beginning on the date on which advertising was commenced pursuant to subsection (c) of this section.

(2) Each person's damage claims arising from one incident which are presented to the Secretary shall be slated in one form, which may be amended to include new claims as they are discovered. Damages which are known or reasonably should be known, and which are not included in the claim at the time compensation is made, shall be deemed waived.

(e)(1) Except as provided in subsection (f) of this section, all claims shall be presented (A) to the owner and operator, or (B) to the person providing financial responsibility.

(2) Any person to whom a claim has been presented pursuant to paragraph (1) of this subsection shall promptly notify the claimant of the rights which such claimant may have under this title and notify the Secretary of receipt of such claim.

(f) The following claims may be presented to the Secretary for payment by the Fund from the revolving account:

(1) Any claim for damages resulting from any discharge with respect to which a denial has been made pursuant to subsection (b)(1) of this section.

(2) Any claim which has been presented to any person pursuant to subsection (c)(1) of this section, if such person—

(A) has not accepted liability for such claim for any reason,

(B) submits to the claimant a written offer for settlement of the claim, which the claimant rejects for any reason, or

(C) has not settled such claim by agreement with the claimant within sixty days after the date on which (i) such claim was presented, or (ii) advertising was commenced pursuant to subsection (c) of this section, whichever date is later.

(g) In the case of a claim which has been presented to any person under subsection (e)(1) of this section, and which may be presented to the Secretary under subsection (f)(2) of this section, such person shall, within two days after a request by the claimant, transmit directly to the Secretary such claim and such other supporting documents as the Secretary may by regulation prescribe, and such claim shall be deemed presented to the Secretary for payment by the Fund.

(h)(1) Except as provided in paragraph (2) of this subsection, the Secretary shall use the facilities and services of private insurance and claims adjusting organizations in administering this section and may contract to pay compensation for such facilities and services. Any contract made under the provisions of this paragraph may be made without regard to the provisions of section 3709 of the Revised Statutes, upon a showing by the Secretary that advertising is not reasonably practicable, and advance payments may be made. A payment to a claimant, for a single claim in excess of $100,000, or two or more claims aggregating in excess of $200,000, shall be first approved by the Secretary.

(2) In extraordinary circumstances in which the services of such private organizations are inadequate, the Secretary may use Federal personnel to administer the provisions of this section, to the extent necessitated by such extraordinary circumstances.

(i) The following matters in dispute shall be submitted to the Secretary and adjudicated pursuant to the provisions of this section:

(1) Upon the petition of a claimant, in the case of a claim which has been presented to the Secretary for payment by the Fund, and in which the Secretary—

(A) has, for any reason, denied liability for such claim; or

(B) has not settled such claim by agreement with such claimant within ninety days after the date on which (i) such claim was presented to the Secretary, or (ii) advertising was commenced pursuant to subsection (c)(2) of this section, whichever date is later.

(2) Upon the petition of the owner and operator or the person providing financial responsibility, who is or may be liable for cleanup costs and damages pursuant to section 308 of this title—

(A) any denial made pursuant to subsection (b)(1) of this section;

(B) any objection to an exception to the limit of liability set forth in section 308 (b) or (c) of this title; and

(C) the amount of any payment or proposed payment by the Fund which may be recovered from such owner and operator, or such person providing financial responsibility, pursuant to section 309(d) of this title.

(j)(1) Upon receipt of any matter in dispute submitted for adjudication pursuant to subsection (i) of this section, the Secretary shall refer such matter to a hearing examiner appointed under section 3105 of title 5, United States Code. Such hearing examiner shall promptly adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code.

(2) For purposes of any hearing conducted pursuant to this subsection, the hearing examiner shall have the power to administer oaths and subpena the attendance and testimony of witnesses and the production of books, records, and other evidence relative or pertinent to the issues presented for determination.

(3) A hearing conducted under this subsection shall be conducted within the United States judicial district within which the matter in dispute occurred, or, if such matter occurred within two or more districts, in any of the affected districts or, if such matter in dispute occurred outside of any district, in the nearest district.

(k) Upon a decision by the hearing examiner and in the absence of a request for judicial review, any amount to be paid from the revolving account shall be certified to the Fund which shall promptly disburse the award. Such decision shall not be reviewable by the Secretary.

JUDICIAL REVIEW

SEC. 314. (a) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of a hearing examiner may, no later than sixty days after such decision is made, seek judicial review of such decision (1) in the United States court of appeals for the circuit in which the damage occurred, or, if such damage occurred outside of any circuit, in the United States

court of appeals for the nearest circuit, or (2) in the United States Court of Appeals for the District of Columbia.

(b) In any case in which the person responsible for the discharge, or the Fund, seeks judicial review, attorneys' fees and court costs shall be awarded to the claimant if the decision of the hearing examiner is affirmed.

CLASS ACTIONS

SEC. 315. (a) The Attorney General may act on behalf of any group of damaged citizens which the Secretary determines would be more adequately represented as a class in the recovery of claims under this title. Sums recovered shall be distributed to the members of such group, except that the reasonable and actual costs incurred by the Attorney General in representing such class shall be paid out of such sums recovered, and shall be deposited in the Treasury of the United States, and credited to miscellaneous receipts. The Attorney General shall not commence any action under this subsection against the Fund or any other department, agency, or instrumentality of the United States.

(b) If, within ninety days after a discharge of oil in violation of section 303 of this title has occurred, the Attorney General fails to act on behalf of a group who may be entitled to compensation, any member of such group may maintain a class action to recover such damages on behalf of such group. Failure of the Attorney General to act in accordance with this subsection shall have no bearing on any class action maintained in accordance with this subsection.

(c) In any case in which the number of members of the class seeking the recovery of claims under this title exceeds one thousand, publishing notice of the action in the Federal Register and in local newspapers serving the areas in which the damaged parties reside shall be deemed to fulfill the requirement for public notice established by rule 23(c)(2) of the Federal Rules of Civil Procedure.

REPRESENTATION

SEC. 316. The Secretary shall initially request the Attorney General to promptly institute court actions and to appear and represent the Fund for all claims under this title. Unless the Attorney General notifies the Secretary that he will institute such action or will otherwise appear within a reasonable time, attorneys appointed by the Secretary shall appear and represent the Fund.

JURISDICTION AND VENUE

SEC. 317. (a) The United States district courts shall have original jurisdiction over all controversies arising under this title, without regard to the citizenship of the parties or the amount in controversy.

(b) Venue shall lie in any district (1) wherein the damage complained of occurred, or, if such damage occurred outside of my district, in the nearest district, or (2) wherein the defendant resides, may be found, or has its principal office. For the purposes of this section, the Fund shall reside in the District of Columbia.

ACCESS TO RECORDS

SEC. 318. (a) Each person responsible for contributing to the Fund in accordance with this title shall keep such records and furnish such information as the Secretary shall prescribe in regulations. Collection shall be at such times and in such manner as shall be prescribed in such regulations.

(b) The Secretary shall have access to any books, documents, papers, and records of such person relevant to the administration of this title, and shall undertake regular examinations of and audits on the collection of fees.

(c) The Comptroller General shall have access to any books, documents, papers, records, and other information of any person liable to contribute to the Fund, relevant to the administration of this title, and to all books, documents, papers, records, and other information of the Fund.

PUBLIC ACCESS TO INFORMATION

SEC. 319. (a) Copies of any communication, document, report, or information transmitted between any official of the Federal Government and any person concerning liability and compensation for damages resulting from the discharge of oil from an offshore facility or vessel shall be made available to the public for inspection, and shall be available for the purpose of reproduction at a reasonable cost, to the public upon identifiable request.

(b) Nothing contained in this section shall be construed to require the release of any information of the kind described in subsection (b) of section 552 of title 5, United States Code, or which is otherwise protected by law from disclosure to the public.

ANNUAL REPORT

SEC. 320. Within six months after the end of each fiscal year, the Secretary shall submit to the President of the Senate and the Speaker of the House of Representatives (1) a report on the administration of the Fund during such fiscal year, (2) a summary of the management and enforcement activities of the Fund, and (3) recommendations to the Congress for such additional legislative authority as may be necessary to improve the management of the Fund and the administration of the liability provisions of this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 321. (a) There is authorized to be appropriated for the administration of this title $10,000,000 for the fiscal year ending September 30, 1978, $5,000,000 for the fiscal year ending September 30, 1979, and $5,000,000 for the fiscal year ending September 30, 1980.

(b) There are also authorized to be appropriated to the Fund from time to time such amounts as may be necessary to carry out the purposes of the applicable provisions of this title, including the entering into contracts pursuant to section 306(b)(4) of this title, any disbursements of funds pursuant to section 309(a) of this title, and the issuance of notes or other obligations pursuant to section 309(e) of this title.

(c) Notwithstanding any other provision of this title, the authority to make contracts pursuant to section 306(b)(4) of this title, to make disbursements pursuant to section 309(a) of this title, to issue notes of other obligations pursuant to section 309(e) of this title, and to charge and collect fees pursuant to section 310(a) of this title shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this title.

(d) There are hereby authorized to be appropriated to the Fund such sums as may be necessary to reimburse the Fund for amounts paid for cleanup costs and damages in connection with discharges of oil caused by the negligent or intentional act of any department, agency, or instrumentality of the United States.

RELATIONSHIP TO OTHER LAW

SEC. 322. (a) Except as otherwise provided in this title, this title shall not be interpreted to preempt the field of liability or to preclude any State from imposing additional requirements or liability for any discharge of oil resulting in damages or cleanup costs within the jurisdiction of any State.

(b) Any person who receives compensation for damages or cleanup costs pursuant to this title shall be precluded from recovering compensation for the same damages or cleanup costs pursuant to any other State or Federal law. Any person who receives compensation for damages or cleanup costs pursuant to any other State or Federal law shall be precluded from receiving compensation for the same damages or cleanup costs under this title.

TITLE IV—FISHERMEN CONTINGENCY FUND

DEFINITIONS

SEC. 401. As used in this title, the term—

(1) "citizen of the United States" means any person who is a United States citizen by law, birth, or naturalization, any State, any agency of a State or a group of States, or any corporation, partnership, or association organized under the laws of any State which has as its president or other chief executive officer and as its chairman of the board of directors, or holder of a similar office, a person who is a United States citizen by law, birth, or naturalization, and which has at least 75 per centum of the interest of therein owned by citizens of the United States. Seventy-five per centum of the interest in the corporation shall not be deemed to be owned by citizens of the United States—

(A) if the title to 75 per centum of its stock is not vested in such citizens free from any trust of fiduciary obligation in favor any person not a citizen of the United States;

(B) if 75 per centum of the voting power in such corporation is not vested in citizens of the United States;

(C) if through any contract or understanding it is so arranged that more than 25 per centum of the voting power may be exercised, directly or indirectly, in behalf of any person who is not a citizen of the United States; or

(B) if by any other means whatsoever control of any interest in the corporation in excess of 25 per centum is conferred upon or permitted to be exercised by any person who is not a citizen of the United States;

"(2) "commercial fishing" means all aspects of commercial harvesting and handling of living marine resources; and

(3) "Secretary" means the Secretary of Commerce.

ESTABLISHMENT OF THE FISHERMEN'S CONTINGENCY FUND

SEC. 402. (a) There is established within the Department of Commerce, a Fishermen's Contingency Fund (hereinafter referred to as the "Fund") for the purpose of providing compensation for damages to commercial fishing vessels and gear and resulting loss of profits due to activities of oil and gas exploration, development, and production on the Outer Continental Shelf. The Fund may sue or be sued in its own name by citizens of the United States.

(b) There is established in the Treasury of the United States a revolving account without fiscal year limitation, which shall be available to the Fund to carry out the provisions of this title.

(c) Amounts in the revolving account shall be available for disbursement and shall be disbursed by the Fund for only the following purposes:

(1) administrative and personnel expenses of the Fund; and

(2) the payment of any claim in accordance with the decision of the Secretary pursuant to this title.

FISHERMEN'S CLAIMS BOARD

SEC. 403. (a) There is established a Fishermen's Claims Board (hereafter called the Board) for the purpose of investigating and recommending to the Secretary the amount to be paid on claims against the Fund.

(b) The Board shall consist of one representative from each of the National Oceanic and Atmospheric Administration, the Coast Guard, and the Bureau of Land Manage-

ment and three representatives each of the fishing industry and the oil industry.

(c) Selection and appointment of the members of the Board shall be as follows:

(1) Representatives of Government agencies shall be appointed by the head of the department in which such agency is located.

(2) Representatives of the oil industry shall be appointed by the Secretary of the Interior.

(3) Representatives of the fishing industry shall be appointed by the Regional Fishing Management Councils in accordance with a procedure established by the Secretary.

(d) Each representative shall serve on the Board for a period of three years, except that one-third of the Board, as determined by the Secretary, shall be replaced every year starting one year after the Board is established.

(e) Administrative and other expenses incurred by the Board and its members in carrying out its responsibilities shall be paid out of the Fund.

(f) The representatives of the Board shall meet from time to time or whenever necessary to carry out the provisions of this section.

(g) The minimum number of representatives necessary to investigate and recommend on a claim shall be one member for each of the government agencies, oil industry, and fishing industry.

DUTIES AND POWERS OF THE SECRETARY

SEC. 404. (a) In order to carry out the purposes of this title, the Secretary shall—

(1) prescribe, and may from time to time amend, regulations for the filing, processing, and the fair and expeditious settlement of claims pursuant to this title, including a time limitation on the filing of such claims;

(2) establish and classify all potential hazards to commercial fishing caused by Outer Continental Shelf activities, including all obstructions on the bottom, throughout the water column, and on the surface;

(3) establish regulations for all materials, equipment, tools, containers, and all other items used on the Outer Continental Shelf to be properly stamped or labeled with the owners' identification prior to actual use.

(4) administer and maintain the Fund, in accordance with the provisions of this title; and

(5) perform such other functions as are necessary to carry out the provisions of this title.

(b) In the performance of his duties under this title, the Secretary is authorized to—

(1) utilize, with the consent of the agency concerned, the services or personnel, on a reimburseable or replacement basis or otherwise, of any Federal Government agency, of any State or local government agency, or of any organization, to perform such functions on behalf of the Fund as are necessary or appropriate;

(2) make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this title;

(3) conduct such studies and investigations, obtain such data and information, and hold such meetings or public hearings as may be necessary or appropriate to facilitate the exercise of any authority granted to, or the performance of any duty imposed on, the Fund under this title;

(4) enter into such contracts, agreements, and other arrangements as are deemed necessary or appropriate for the acquisition of material, information, or other assistance related to, or required by, the implementation of this title; and

(5) issue and enforce orders during proceedings conducted pursuant to this title, including issuing subpenas, administering oaths, compelling the attendance and testimony of witnesses and the production of books, papers, documents, and other evidence, and the taking of depositions.

RECOVERABLE DAMAGES AND SUBROGATION OF RIGHTS

SEC. 405. (a) Damages and loss to profit to commercial fishing vessels and gear may be recovered under this title for—

(1) the replacement value of any loss of all or part of a commercial fishing vessel which is damaged or destroyed as a result of oil and gas exploration, development, or production on the Outer Continental Shelf;

(2) the replacement value of any loss of all or part of gear used for commercial fishing as a result of oil and gas exploration, development, or production on the Outer Continental Shelf; and

(3) the loss of revenue to a commercial fishing vessel and crew due to oil and gas exploration, development, or production on the Outer Continental Shelf; such loss of revenue shall be based on the average daily revenue of the affected vessel and crew averaged over the previous year, and the vessel and crew shall be compensated for each day that it can be proven that the losses occurred.

(b) Payment of compensation by the Fund shall be subject to the Fund acquiring by subrogation all rights of the claimant to recover for damages and losses so compensated for. The Secretary shall diligently pursue recovery for any such subrogated rights.

(c) Those persons involved in Outer Continental Shelf activities, identified as having caused damages to a fishing vessel, gear, or loss of revenue shall reimburse the Fund for such amounts that it has paid to the claimant for such damage.

BURDEN OF PROOF

SEC. 406. In any claim pursuant to this title there shall be a presumption in favor of such claim if the claimant establishes—

(1) that the vessel and crew were actually fishing in an area prescribed by the Secretary of Commerce as an area affected by Outer Continental Shelf activities;

(2) that an immediate report on the location of any obstacle and the nature of the damage was made;

(3) that there was no previous or existing record on nautical charts or the Notice to Mariners that such an obstacle exists in the area; and

(4) in lieu of a record of such an obstacle, no proper surface marker or lighted buoy was attached or closely anchored to the obstacle;

(5) that the damage or loss of revenue was received after the enactment of this Act.

FEE COLLECTION—DEPOSITS IN REVOLVING ACCOUNT

SEC. 407. (a)(1) The Secretary, with the cooperation of the Secretary of the Interior, shall levy and the Secretary of the Treasury shall collect a fee of not to exceed 1 cent per barrel of oil and fifty-six hundred cubic feet of gas obtained from the Outer Continental Shelf, which shall be imposed on the owner of the oil when such oil is produced.

(2) The collection of the fee imposed pursuant to paragraph (1) of this subsection shall continue until the amount in the revolving account of the Fund totals at least $2,000,000, whereupon imposition of such fee may be suspended by the Secretary. Thereafter, the Secretary shall from time to time and in accordance with the limitation set forth in the first sentence of paragraph (1) of this subsection, modify by regulation the amount of the fee, if any, to be collected under this subsection in order to maintain the revolving account at a level of not less than $2,000,000 and not more than $5,000,000. For purposes of this paragraph, all sums deposited pursuant to subsection (b) of this section shall be included in the calculation of the balance in the revolving account.

(b) All sums received pursuant to this title shall be deposited in the revolving account.

(c) All sums not needed for the purposes specified in this title shall be prudently invested in income-producing securities issued by the United States and approved by the Secretary of the Treasury.

JUDICIAL REVIEW

SEC. 408. (a) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of the Secretary on a claim under this title may, no later than sixty days after such decision is made, seek judicial review of such decision (1) in the United States court of appeals for the circuit in which the damage occurred, or, if such damage occurred outside of any circuit, in the United States court of appeals for the nearest circuit, or (2) in the United States Court of Appeals for the District of Columbia.

(b) In any case in which the person responsible for damage to commercial fishing vessels or gear seeks judicial review, attorneys' fees and court costs shall be awarded to the claimant if the decision of the Secretary is affirmed.

JURISDICTION AND VENUE

SEC. 409. (a) The United States district courts shall have original jurisdiction over all controversies arising under this title other than those described in section 408, without regard to the citizenship of the parties or the amount in controversy.

(b) Venue shall lie in any district (1) wherein the damage complained of occurred, or, if such damage occurred outside of any district, in the nearest district, or (2) wherein the defendant resides, may be found, or has its principal office. For the purposes of this section, the Fund shall reside in the District of Columbia.

REPRESENTATION

SEC. 410. The Secretary shall initially request the Attorney General to promptly institute court actions and to appear and represent the Fund for all claims under this title. Unless the Attorney General notifies the Secretary that he will institute such action or will otherwise appear within a reasonable time, attorneys appointed by the Secretary shall appear and represent the Fund.

ACCESS TO RECORDS

SEC. 411. (a) Each person responsible for contributing to the Fund in accordance with this title shall keep such records and furnish such information as the Secretary shall prescribe in regulations. Collection shall be at such times and in such manner as shall be prescribed in such regulations.

(b) The Secretary shall have access to any books, documents, papers, and records of such person relevant to the administration of this title, and shall undertake regular examinations of and audits on the collection of fees.

(c) The Comptroller General shall have access to any books, documents, papers, records, and other information of any person liable to contribute to the Fund, relevant to the administration of this title, and to all books, documents, papers, records, and other information of the Fund.

ANNUAL REPORT

SEC. 412. Within six months after the end of each fiscal year, the Secretary shall submit to the President of the Senate and the Speaker of the House of Representatives (1) a report on the administration of, and payments from, the Fund during such fiscal year, and (2) recommendations to the Congress for such additional legislative author-

ity as may be necessary to improve the management of the Fund and the administration of the liability provisions of this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 413. (a) There is authorized to be appropriated for the administration of this title $200,000 for each fiscal year ending prior to October 1, 1990.

(b) There is also authorized to be appropriated as an initial deposit and to maintain the revolving account of the Fund amounts not exceeding $500,000. Further amounts are authorized to be appropriated to maintain the Fund not to exceed $500,000 until fees pursuant to subsection 407(a)(1) can be collected. Such amounts shall be repaid by the Fund to the Treasury as soon as practicable with interest in an amount determined by the Secretary of the Treasury using the average rate of interest paid on indebtedness by the Treasury.

(c) Notwithstanding any other provision of this title, the authority to pay claims pursuant to section 407 shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this title.

TITLE V—MISCELLANEOUS PROVISIONS

REVIEW OF SHUT-IN OR FLARING WELLS

SEC. 501. (a) In a report submitted within six months after the date of enactment of this Act, and his annual report thereafter, the Secretary shall list all shut-in oil and gas wells and wells flaring natural gas on leases issued under the Outer Continental Shelf Lands Act. Each such report shall be submitted to the Comptroller General and shall indicate why each well is shut-in or flaring natural gas, and whether the Secretary intends to require production on such a shut-in well or order cessation flaring.

(b) Within six months after receipt of the Secretary's report, the Comptroller General shall review and evaluate the methodology used by the Secretary in allowing the wells to be shut-in or to flare natural gas and submit his findings and recommendations to the Congress.

REVIEW AND REVISION OF ROYALTY PAYMENTS

SEC. 502. As soon as feasible and no later than ninety days after the date of enactment of this Act, and annually thereafter, the Secretary of the Interior shall submit a report or reports to the Congress describing the extent, during the two-year period preceding such report, of delinquent royalty accounts under leases issued under any Act which regulates the development of oil and gas on Federal lands, and what new auditing, post-auditing, and accounting procedures have been adopted to assure accurate and timely payment of royalties and net profit shares. Such report or reports shall include any recommendations for corrective action which the Secretary of the Interior determines to be appropriate.

NATURAL GAS DISTRIBUTION

SEC. 503. The Federal Power Commission shall, pursuant to its authority under section 7 of the Natural Gas Act, permit any natural gas distributing company which engages, directly or indirectly, in development and production of natural gas from the Outer Continental Shelf to transport to its service area for distribution any natural gas obtained by such natural gas distributing company from such development and production. For purposes of this section, the term "natural gas distributing company" means any person (1) engaged in the distribution of natural gas at retail, and (2) regulated or operated as a public utility by a State or local government.

ANTIDISCRIMINATION PROVISIONS

SEC. 504. Each agency or department given responsibility for the promulgation or enforcement of regulations under this Act or the Outer Continental Shelf Lands Act, shall take such affirmative action as deemed necessary to assure that no person shall, on the grounds of race, creed, color, national origin, or sex, be excluded from receiving or participating in any activity, sale or employment, conducted pursuant to the provisions of this Act or the Outer Continental Shelf Lands Act. The agency or department shall promulgate such rules as it deems necessary to carry out the purposes of this section, and any rules promulgated under this section, through agency and department provisions and rules which shall be similar to those established and in effect under title VI of the Civil Rights Amendments of 1964.

SUNSHINE IN GOVERNMENT

SEC. 505. (a) Each officer or employee of the Department of the Interior who—

(1) performs any function or duty under this Act or the Outer Continental Shelf Lands Act, as amended by this Act; and

(2) has any known financial interest in any person who (A) applies for or receives any permit or lease under, or (B) is otherwise subject to the provisions of this Act or the Outer Continental Shelf Lands Act, shall, beginning on February 1, 1978, annually file with the Secretary of the Interior a written statement concerning all such interests held by such officer or employee during the preceding calendar year. Such statement shall be available to the public.

(b) The Secretary of the Interior shall—

(1) within ninety days after the date of enactment of this Act—

(A) define the term "known financial interest" for purposes of subsection (a) of this section; and

(B) establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Secretary of such statements; and

(2) report to the Congress on June 1 of each calendar year with respect to such disclosures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, the Secretary may identify specific positions within the Department of the Interior which are of a nonregulatory or nonpolicymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section shall be fined not more than $2,500 or imprisoned not more than one year, or both.

COASTAL ZONE MANAGEMENT ACT

SEC. 506. The Coastal Zone Management Act of 1972 (86 Stat, 1280), as amended, is further amended by deleting clause (i) of subparagraph (B) of Section 308(b)(4) thereof and inserting in lieu thereof:

"(i) necessary to provide new or improved public facilities and public services which are required as a result of outer Continental Shelf energy activity, provided that the Secretary may, pursuant to criteria promulgated by rule, describe geographic areas in which such public facilities and such public services are presumed to be required as a result of outer Continental Shelf energy activity for purposes of disbursing the proceeds of grants under this subsection.".

COASTAL ENERGY IMPACT PROGRAMS

SEC. 507. The Coastal Zone Management Act of 1972 (86 Stat. 1280), as amended, is further amended by adding a new section 308(b)(6) as follows:

"(6) Nothing in this section shall affect the applicability of the National Environmental Policy Act to grants made pursuant to this subsection.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 508. The Coastal Zone Management Act of 1972 (86 Stat. 1280), as amended, is further amended by deleting section 318(a)(3) and inserting in lieu thereof the following:

"(3) such sums, not to exceed $50,000,000 for the fiscal year ending September 30, 1977 and not to exceed $75,000,000 for each of the eight fiscal years occurring during the period beginning October 1, 1977 and ending September 30, 1984, as may be necessary for grants under section 308(b);".

RELATIONSHIP TO EXISTING LAW

SEC. 509. Except as otherwise expressly provided in this Act, nothing in this Act shall be construed to amend, modify, or repeal any provision of the Coastal Zone Management Act of 1972, the National Environmental Policy Act of 1969, the Mining and Mineral Policy Act of 1970, or any other Act.

RELATIONSHIP TO DEPARTMENT OF ENERGY

SEC. 510. Upon the effective date of the provisions of the law creating a Department of Energy, or upon the effective date of this Act, whichever is later, the functions vested in the Secretary by this Act related to those Federal leasing functions designated for transfer from the Secretary to the Secretary of Energy in such law creating a Department of Energy shall be transferred to and vested in the Secretary of Energy.

INVESTIGATION OF AVAILABILITY OF DOMESTIC CRUDE OIL AND NATURAL GAS

SEC. 511. (a) The Congress hereby finds that—

(1) there is a serious lack of adequate basic energy information available to Congress and the President with respect to the availability of domestic crude oil and natural gas;

(2) there is currently an urgent need for such information;

(3) the existing collection of energy data and information relevant to the determination of crude oil and natural gas availability by Federal agencies is uncoordinated, is jurisdictionally limited in scope, and relies too heavily on unverified information from industry sources;

(4) adequate, reliable, and comprehensive information with respect to the availability of domestic crude oil and natural gas resources wherever located is essential to the national security of the United States; and

(5) this lack of adequate reserve data requires a reexamination of past data as well as the acquisition of adequate current data.

(b) The purpose of this section is to enable the President and Congress to gain the best possible knowledge of the status of crude oil and natural gas reserves, resources, productive capacity, and production available to meet current and future energy supply emergencies, to gain accurate knowledge of the potential quantity of domestic natural gas and crude oil resources which could be made available to meet such emergencies, and to aid in establishing energy pricing and conservation policies.

(c) The President is authorized and directed to conduct a continuing investigation, based on data and information which he determines has been adequately and independently audited and verified, for the purpose of determining the availability of all natural gas and crude oil produced or located in the United States or in any State, including all crude oil and natural gas on the Outer Continental Shelf, onshore Federal lands, and all non-Federal lands.

(d) The investigation conducted pursuant to this section shall include, among other items—

(1) an independent determination of the MER (maximum efficient rate) and MPR (maximum production rate) in relation to the actual production from the fields, res-

ervoirs, and wells in this study commencing with the twelve-month period immediately prior to the date of enactment of this section, and the President shall direct that an independent estimate shall be made indicating whether production from these fields, reservoirs, and wells has been less than the maximum efficient rate and maximum production rate, and, if so, the reason for this difference;

(2) an independent estimate of total discovered reserves, including proved and indicated reserves, and undiscovered resources, including hypothetical and speculative reservoirs based on, where necessary, geological and geophysical explorations carried out by Federal or other appropriate agencies, where the President determines that such exploration is the only means of obtaining adequate reserve and resource data;

(3) a determination of the utilization of natural gas and crude oil in terms of end-use markets so as to ascertain the consumption by different classes and types of end users; and

(4) the relationship of any and all such information to the requirements of conservation, industry, commerce, and the national defense;

(5) an independent evaluation of trade association estimates of reserves, ultimate recovery, and productive capacity from 1965 onward. This evaluation shall be accompanied by a detailed description of procedures used by the associations and how their data relate to the results yielded in this study. In order to provide maximum opportunity for evaluation and continuity, the President shall obtain all of the available data and other records which the trade associations have used in compiling their reserves data.

(e) In order to obtain information required by this section, the President may utilize the authority to collect energy information granted to the Administrator of the Federal Energy Administration in the Energy Supply and Environmental Coordination Act of 1974, as amended (15 U.S.C. 791 et seq.), and the Federal Energy Administration Act of 1974, as amended (15 U.S.C. 761 et seq.), the authority granted to the Federal Power Commission in the Natural Gas Act (15 U.S.C. 717 et seq.), and the authority granted to the Federal Trade Commission in the Federal Trade Commission Act (15 U.S.C. 41 et seq.), and the authority granted to the Secretary of the Interior in the Energy Conservation and Policy Act (42 U.S.C. 6214 et seq.), and the authority granted to the Director of the United States Geological Survey in the Geological Survey Act (43 U.S.C. 31 et seq. as amended), and any authority which may be necessary to carry out the provisions of this section.

(f) The President shall submit an initial report to Congress on the results of the continuing investigation required under this section not later than six months after the date of enactment of this section, and shall submit subsequent reports annually thereafter. The initial report shall include cost estimates for the separate components of the continuing investigation and a time schedule for meeting all of its specifications. The schedule shall provide for producing all the required information for the Outer Continental Shelf within a year after the enactment of this section, for other areas under Federal jurisdiction within eighteen months after the enactment of this section, for all major actual or potential producing areas within twenty-four months, and for all United States lands offshore and onshore within thirty months. There shall be separate reports on past data as follows:

(1) within six months on the acquisition and details of trade association data and information;

(2) within twelve months an evaluation of the trade association materials and within eighteen months the relationship between trade association data and the new data collected under this section.

(g) The President shall consult with the Federal Trade Commission regarding categories of information collected from companies pursuant to this section. Notwithstanding other provisions of law, the President shall, upon request of the Federal Trade Commissioner, make available to the Federal Trade Commissioner such information acquired by the President under this section.

(h) The President may delegate all or any portion of the authority granted to him under this section to such executive agencies (within the meaning of 5 U.S.C. 105) or officers of the United States he determines appropriate, and may authorize such redelegation as may be appropriate. Except with respect to section 552 of title 5 of the United States Code, any officer or executive agency of the United States to which authority is delegated or redelegated under this section shall be subject only to such procedural requirements respecting the exercise of such authority as the President would be subject to if such authority were not so delegated.

(i) Prior to a final judgment, no court shall have jurisdiction to grant any injunctive relief to stay or defer the implementation of this Act, or action taken by the President under this Act.

(j) If any provision of this Act, or the application of such provision to any person or circumstance, shall be held invalid, the remainder of this Act, or the application of such provisions to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 9.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. Jackson, I ask unanimous consent that S. 9 be ordered printed as passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, S. 9, the Outer Continental Shelf Lands Acts Amendment of 1977, is possibly as important if not more important in terms of mitigating this Nation's oil and gas supply problems than any single provision of the energy legislation we will consider this session. The administration's energy package has been criticized widely for deemphasizing the production side of our energy problems. S. 9 should enable our petroleum companies to accelerate their efforts to explore the Outer Continental Shelf.

Most of our country's promising frontier areas are located in the Federal Outer Continental Shelf. The bill will maximize the number of companies which would be entitled to drill on OCS lands, and it will encourage acceleration of drilling rates consistent with sound engineering and economic principles.

The bill also will improve significantly the ability of the Secretary of the Interior to assess realistically the value of oil and gas resources on public OCS lands. Thus, the public can be more confident of earning a fair rate of return in the sale of leases of its land. Petroleum companies acquiring the leases will be in a better position to allocate their scarce capital resources more efficiently, and they can manage their exploratory and developmental operations more effectively while minimizing damage to the environment.

The Committee on Energy and Natural Resources and its predecessor or Interior Committee held exhaustive hearings on the provisons of S. 9. The Senate considered a similar measure in 1974. In 1975, we passed two OCS measures which the House adopted in 1976. The measures were sidetracked when the House rejected the conference report by a narrow margin.

The need for S. 9 has never been greater than at the present time. Eleven percent of our domestic oil is produced in the Outer Continental Shelf as is 18 percent of natural gas, all of which is dedicated to the supply-short interstate gas markets. No precise correlation has been shown between drilling rates and production rates. The only way to ascertain the amount of producible reserves, however, is to maximize the number of companies drilling and their drilling rates.

The administration recognizes the importance of S. 9 to our national energy policy. Much work has been done in the Senate as well as in the House to safeguard the rights of interested parties while refining the bill's provisions to make it more effective. Today we have taken advantage of the opportunity to bring this vital component of our national energy policy closer to fruition.

I congratulate the Senate on having acted deliberately and with careful debate on the bill, and I commend the Senator from Washington (Mr. JACKSON) and the Senator from Wyoming (Mr. HANSEN) on the skill, competence, and dedication which they have demonstrated in the handling of this bill from the committee arena to the present moment.

LEGISLATIVE APPROPRIATIONS, 1978

Mr. ROBERT C. BYRD. Mr. President, under the order that has previously been entered, I ask that the Chair now lay before the Senate H.R. 7932, the legislative appropriations bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7932) making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations with amendments.

Mr. HUDDLESTON. Mr. President, I yield to the distinguished majority leader.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Kentucky.

ORDER FOR RECESS UNTIL 10:15 A.M. ON MONDAY, JULY 18, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:15 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR CURTIS AND SENATOR BAKER ON MONDAY, JULY 18, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday, after the two leaders or their designees have been recognized under the standing order, Mr. CURTIS and Mr. BAKER be recognized, each for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—H.R. 7933

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as the Department of Defense appropriation bill is called up and made the pending business before the Senate, the following time agreement be observed.

Mr. President, I ask unanimous consent there be a time limitation on the bill of 4 hours, to be equally divided between Mr. MCCLELLAN and Mr. YOUNG, that there be a time limitation on any amendment of 1 hour, that there be a time limitation on any amendment dealing with the B–1 of 2 hours, that there be a time limit, if there is an amendment dealing with the civilian firing range, of 2 hours, and that the agreement be in the usual form as to the division and control of the time.

Mr. ALLEN. Mr. President, reserving the right to object, it is my purpose, when a request is made that the bill be laid before the Senate and that the Senate amendments be adopted as the original text, to object to the adoption of certain of the committee amendments. I would be glad to specify for the record, and as to those amendments I would reserve an objection and make an objection to a time limit on those amendments. But if the unanimous-consent request is modified to include my request, I will have no objection.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. ALLEN. I will give the areas I have in mind. I am not being capricious about this matter.

As the Senate knows, on an appropriation of this sort, most of the——

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Will the Senator simply evaluate the amendments? I would like to get on with the legislative appropriation bill.

Mr. ALLEN. I should like to explain why I am doing this, and I ask 2 minutes to make the explanation.

Mr. ROBERT C. BYRD. Of course, I am not going to object to that.

Mr. ALLEN. I appreciate the Senator's courtesy.

Most of the amounts in an appropriation bill are covered in the report rather than in the bill itself. They might have an item of $8 billion or $7 billion and no way to reach it because the matter is covered in the report itself. So it is necessary sometimes to amend several sections in order to cover a one-line item.

As to the amendments I am going to ask not be agreed to—of course, if this request is not made, I still want to object to these amendments when they come up—there are two amendments resulting in reductions for the Civil Air Patrol. That is reached at two points in the bill. There is an amendment or amendments resulting in a reduction for the BMD program. Then there is an amendment adding section 857 to the bill and the amendments resulting therefrom, changing appropriations at various points in the bill.

I request that there be no time limit on these amendments or amendments thereto. It is not my purpose to hold up the Senate, but because of the intricate nature of the amendments, it is necessary that I have some flexibility. I am hopeful that most of these matters can be worked out with the managers of the bill.

Mr. STENNIS. Mr. President, if the Senator will yield, I ask the Senator to repeat the second item he mentioned.

Mr. ALLEN. The second item is the amendment resulting in reduction of the BMD program in the bill.

Mr. ROBERT C. BYRD. Mr. President, I modify my request as follows:

That the 1-hour limitation on those four amendments may be waived by Mr. ALLEN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. There would be no limit in these areas, then.

Mr. ROBERT C. BYRD. There will be, unless the Senator from Alabama waives on Monday. It is within his power to vitiate the 1-hour limitation on any one of those four.

Mr. ALLEN. I thank the Senator.

Mr. ROBERT C. BYRD. I have talked to the distinguished Senator prior to this. As he has stated, he has no intention to delay the Senate. He simply wants to be protected in this regard; and this request, as it is now modified, would amply provide that.

Mr. ALLEN. I thank the distinguished majority leader, and I thank the distinguished manager of the bill, Mr. STENNIS. I tried to find an opportunity to talk to Mr. STENNIS about some of these matters, but, as we know, he has been heavily burdened with other legislation.

Mr. HART. Mr. President, will the majority leader repeat the part of the request having to do with unspecified amendments? Was there an hour?

Mr. ROBERT C. BYRD. A 1-hour limitation.

Mr. HART. On all those that the majority leader did not specify—generally?

Mr. ROBERT C. BYRD. The Senator is correct.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

(Later the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, with further respect to the Department of Defense appropriation bill, that there be a time limitation on any amendment to an amendment, debatable motion, appeal, or point of order, if such is submitted to the Senate or if debate is entertained thereon by the Chair, of 30 minutes to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement is as follows:

Ordered, That when the Senate proceeds to the consideration of H.R. 7933 (Order No. 304), the Department of Defense Appropriation bill, debate on any amendment in the first degree (except any amendment dealing with the B–1, on which there shall be 2 hours; any amendment deleting funds for the Civilian Firing Range, on which there shall be 2 hours; and the following committee amendments, on each of which there shall be a one hour limitation unless the limitation is disapproved by the Senator from Alabama (Mr. ALLEN): two amendments resulting in the reduction of funds for the Civil Air Patrol; amendments resulting in the reduction of funds for the BMD Program; and an amendment adding section 857 and any amendment changing appropriations, occasioned by adding section 857) shall be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any amendment in the second degree, debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: Provided, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the Minority Leader or his designee.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 4 hours, to be equally divided and controlled, respectively, by the Senator from Arkansas (Mr. McClellan) and the Senator from North Dakota (Mr. Young): Provided, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendments, debatable motion, appeal, or point of order.

(July 15, 1977)

ORDER FOR CONSIDERATION OF DEFENSE APPROPRIATION BILL ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday, following the special orders for the recognition of Senators, the Senate proceed to the consideration of the Defense appropriation bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 10:30 A.M. ON MONDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10:30 a.m. on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank all Senators, and I particularly thank the distinguished Senator from Kentucky (Mr. HUDDLESTON) and the distinguished Senator from Pennsylvania (Mr. SCHWEIKER) for their patience.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I yield.

CLINCH RIVER BREEDER REACTOR

Mr. BAKER. Mr. President, I make one observation to the distinguished majority leader for the purpose of scheduling the work of the Senate.

As he knows from our pevious conversation, it had been my intention at some point to move for the discharge of the Appropriations Committee from further consideraion of a resolution of disapproval of a deferral message transmitted to the Senate by the President of the United States dealing with the Clinch River breeder reactor.

I say to the majority leader that I have now talked to Dr. Schlesinger and he, in turn, has talked to other representatives of the administration. We have reached an agreement now on how the proposed deferral will be handled, so that the deferral as suggested by the President is not interpreted as a cancellation of the project or used as the basis for significant reduction of personnel until Congress has worked its will in the matter of the Clinch River breeder reactor.

I advise the majority leader that I have no intention to ask for the discharge of the committee, as provided in the rules or otherwise, to proceed with the resolution of disapproval.

Mr. ROBERT C. BYRD. I thank the minority leader.

LEGISLATIVE APPROPRIATIONS, 1978

The Senate continued with the consideration of H.R. 7932.

The following Senators requested and, by unanimous consent, the privilege of the floor was granted in behalf of the following staff members: Mr. SCHWEIKER, Dick Vodra: Mr. HART, Howard Sherlock and Don Smith; Mr. PROXMIRE, Ron Tannen and William Kincaide.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc and that the bill, as thus amended, be regarded for the purpose of amendment as original text, provided that no point of order shall be considered to have been waived by reason of agreement to this order.

The PRESIDING OFFICER. Without objection, it is so ordered.

TOTAL OF THE BILL

Mr. HUDDLESTON. The total amount of the bill is $991 million which is within the $1 billion ceiling established for the bill in the First Concurrent Resolution and $143 million below the budget estimate.

WEST FRONT

The principal item of decrease relates to the budget request of $55 million for extension of the West Front of the Capitol. This item has been deleted from the House bill. Instead, the Senate bill includes language authorizing the Architect of the Capitol:

To conduct a study of space utilization in the Capitol with a view to identifying those activities which could be removed, for example, document rooms, libraries, and so forth to the Senate and House office buildings; and

To prepare drawings and specifications on each of the seven alternative proposals for restoration so that precise cost estimates can be ascertained. Testimony before the committee included restoration suggestions ranging from $3 million to $45 million.

"CONGRESSIONAL" PAY RAISE

The so-called "congressional" pay raise of March 1, 1977, also raised salaries in the executive and judicial branches. The total cost government-wide will be $118.6 million of which:

$96 million will be for raises for executive branch employees;

$14.8 million will be for judicial branch employees; and

$7.8 million will be for legislative branch employees.

The total maximum cost of the Senate pay raises is $2.25 million. However, in most cases actual raises fell far short of the maximum allowable. Consequently, the committee is recommending that virtually all fiscal year 1977 costs associated with the March 1 pay raise be absorbed through savings. This is comparable to the position being taken by the Carter administration for the executive branch.

For example the committee is recommending against the 1977 supplemental budget request for $828,400 in new budget authority to cover the Members' pay raises for the remainder of this year. Instead, the committee has included language in the bill authorizing the Secretary of the Senate to pay the Members' salaries for the remainder of fiscal year 1977 out of savings in other Senate accounts.

My colleagues may also be interested to know that the President signed S. 964 late Monday. This legislation provided that the salaries of Members and high-level Federal employees shall not be increased by the next pay comparability adjustment scheduled for October 1, 1977.

CONSOLIDATION OF SENATORIAL ALLOWANCES FOR EMPLOYMENT OF PERSONNEL

The Official Conduct Amendments of 1977, S. Res. 110, requires the committee to look into the various senatorial allowances. Section 111 of the bill merges clerk-hire with so-called S. Res. 60 allowances, while retaining the S. Res. 60 provisions for accessibility to committee files and meetings and certain reductions for committee chairmen and ranking minority members. The effective date is October 1, 1977.

OFFICIAL OFFICE EXPENSE ACCOUNT

S. Res. 110 requires the committee to look into office expense accounts. The committee has received suggestions from most of the Members on possible adjustments.

Currently, Members may be reimbursed for seven categories of expenses. The bill would add per diem and travel for Members and staff in the United States on official business; travel on official business in Washington, D.C. and in the vicinity of the home State office; and set aside one-tenth of each Member's allowance to meet any other official office expense.

In addition, each Senator would be eligible for two WATS telephone lines to be paid out of the contingent fund of the Senate. Although the consumer price index has risen 42.5 percent since these allowances were last adjusted, the committee is recommending a more modest 10-percent increase. The effective date of the increase and the WATS telephone line provisions are January 1, 1977.

The other provisions would be effective upon the date of enactment. Even with these increases in allowances, the committee has been able to reduce the 1978 budget request for Senate activities by $12 million—from $166 million to $154 million.

REDUCTIONS AND ELIMINATIONS OF "PERKS"

The bill eliminates funds for several so-called "perks" that have traditionally been provided Members—although many were not aware of some of them. Among items eliminated are free shaving mugs, hairbrushes, combs, and shipping trunks for Senators. The bill also requires that the personalized name stamping on the Congressional Directory be cut back and that a supplement be printed during the second session of Congress for a savings of approximately $400,000 per Congress.

Free copies of the CONGRESSIONAL RECORD are reduced from 100 to 50 for each Senator and designated recipients are limited to public agencies and institutions for an annual savings of $500,000. The bill also eliminates a requested $250,000 subsidy for the Senate Restaurant, with the intent of balancing the budget through price increases and improved management, while protecting the jobs of the employees during recesses and adjournment.

The 34 elevator operator jobs on automatic elevators have been phased out at a savings of $292,000.

The bill also provides for the Joint Committee on Printing to conduct a study and take a good hard look at the so-called free and subsidized distribution of Government publications—with a goal of eliminating unnecessary and wasteful printing expenditures.

CONCLUSION

Mr. President, I do not believe it is necessary to go into further detail on this

bill. I shall be pleased to answer any questions the Members may wish to pose after I yield.

Before yielding, however, I should like to compliment my colleague, the senior Senator from Pennsylvania and ranking minority member of the subcommittee, Senator SCHWEIKER. He was faithful in his attendance during the long hours of the hearing process. During the discussions and meetings preceding the markup of the bill, I found his experienced advice to be sound and very helpful to me in my first year as chairman of the Legislative Branch Appropriations Subcommittee. His counsel was especially helpful in our efforts to eliminate unnecessary expenditures, such as the $292,000 reduction in the bill associated with eliminating 34 elevator operators on automatic elevators.

I now yield to the ranking minority member of the subcommittee, Senator SCHWEIKER.

Mr. SCHWEIKER. Mr. President, I thank the distinguished chairman of our subcommittee for yielding, and I also want to say I think he has done an outstanding job in bringing this bill to the floor in view of some difficult features which originally were involved in this bill.

Mr. President, I thank the chairman for his very able summary of this bill. Before making a very brief additional comment, I want to take this opportunity to commend the Senator from Kentucky for the excellent job he has done in his first year as chairman of the Subcommittee on Legislative Appropriations. His task is largely a thankless one. Yet he has brought to it a very noticeable dedication and has devoted many, many long hours to it. It is a pleasure to work with the Senator.

Mr. President, I do want to stress a few things about this bill. We have tried hard to find the fat and eliminate it. Many requests have been trimmed back. In addition, we have gone after some of the perquisites which Senators have been able to receive for years and for which there is no justification. The free shaving mugs, hairbrushes, combs and shipping trunks will be no more. We have not allowed any funds to subsidize the Senate Restaurants because we feel they should be paying their own way. Under the able new management, the restaurant deficits have been coming down, but we are not providing for any for fiscal year 1978. We have cut in half the number of free subscriptions to the CONGRESSIONAL RECORD which a Senator can dispense and have restricted distribution of the remaining subscriptions to public agencies and institutions.

I want to call Senator's attention, also to the savings achieved as the result of our move last year, led by the Senator from Oklahoma (Mr. BARTLETT) with my strong support, to cut back on the force of elevator operators used to operate automatic elevators. Annual savings of $293,400 for 34 positions will now be realized.

Mr. President, the distinguished chairman summarized in detail our efforts to bring out a responsible measure, which he had a great deal to do with, and I want to commend him for that and to stress these points.

Mr. President, I concur in the comments of the distinguished chairman of the Legislative Appropriations Subcommittee, Mr. HUDDLESTON. I also want to commend the chairman for his detailed inquiry into the activities contained in this bill and his keen insight in recommendng the funding levels for the various activities contained in the bill.

Mr. President, we have all been plagued by the high rate of inflation over the past few years. This inflation has impacted on the items in this legislative appropriations bill just like it has on our individual expenditures, businesses and other Government agencies. It was this inflationary effect that resulted in the estimates for this bill to total $1,134,721,600. This could be called the first year for a bilion dollar Congress. However, as the chairman has indicated, the subcommittee has been able to reduce the funding in this bill to less than $1 billion.

Mr. President, the $991.2 million recommended in this bill includes funding for not only the Senate but many other activities. For purposes of comparison I would like to mention these activities so that our Members will understand not only what is in the total bill but how much is being spent on the Senate alone. The committee has recommended $153.2 million to provide for the salaries and all of the activities of the Senate. This compares to $282.6 million for the House of Representatives. The joint committees and other joint activities of the two houses require $57.1 million. The committee has recommended $49.3 million for the Architect of the Capitol and $71.6 million for the Government Printing Office. Funding for the Library of Congress, including the Congressional Research Service, amounts to $151.5 million. Lastly, the General Accounting Office will require $167 million for fiscal year 1978.

Although the above list does not include some of the smaller items that are funded in this bill, I believe that the Members can compare the costs of the Senate to the major activities that are funded in this bill.

Mr. President, the chairman of the subcommittee has provided in detail items of interest relative to the necessary allowance for the Members of the Senate to carry out their responsibilities. Unfortunately, we are not able to make provision in the bill to accommodate all of the Members' requests. It is hoped, however, that we have satisfied the most pressing needs of our colleagues.

I urge all of my colleagues to support the bill as recommended by the committee.

I thank the Chair.

Mr. BARTLETT. Mr. President, I would like to commend the members of the Senate and House Appropriation Committees for carrying through the amendment which I added to the Legislative Appropriation Act of 1977, Public Law 94–440. This amendment provided for the reduction of elevator operators in the Capitol complex by 62 positions.

I note that as of this date the total has been reduced by 51 positions, leaving only 11 slots to be eliminated by attrition. The resulting saving at this point is $415,500.

I am not introducing an amendment to this legislative appropriation bill because it appears that the elimination of the additional 11 positions will be carried out. Of course, it is important that we continue to review this situation to determine if additional cuts can and should be made after this first reduction is complete.

Again, I would like to particularly thank the floor manager of this bill, the members of the subcommittee, and the members of the full committee for their efforts in this reduction.

Mr. President, I ask unanimous consent to insert the report of the Architect of the Capitol on the Status of Elevator Operator Positions in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ARCHITECT OF THE CAPITOL—PATRONAGE BREAKDOWN, FISCAL YEAR 1978

	As requested		Base reduction		Available for 1978		Limitation of positions	Additional positions to be abolished	
	Positions	Amount	Positions	Amount	Positions	Amount		Positions	Amount
Capitol buildings	52	$430,600	6	$50,600	46	$380,000	46		
House side	(22)	(185,800)			(22)	(185,800)	(22)		
Senate side	(30)	(244,800)	(6)	(50,600)	(24)	(194,200)	(24)		
Senate office buildings	48	422,200	28	236,900	20	185,300	16	4	$33,800
House office buildings	52	439,000	71	143,500	35	295,500	28	7	59,100
Total	152	1,291,800	51	431,000	101	860,800	90	11	92,900

Note: Figures in parentheses equals nonadd.

ELEVATOR OPERATORS

The Legislative Branch Appropriation Act, 1977, Public Law 94–440 approved October 1, 1976, contains the following provision:

AUTOMATIC ELEVATOR OPERATORS

No part of the funds appropriated under this Act shall be used for the payment of compensation for more than forty-six elevator operator positions under the heading "Architect of the Capitol, Capitol Buildings"; sixteen elevator operator positions under the heading "Architect of the Capitol, Senate

Office Buildings"; and twenty-eight elevator operator positions under the heading "Architect of the Capitol, House Office Buildings": Provided, That such provision shall not be applicable to present incumbents of elevator operator positions."

Originally there were 152 operators assigned to the Legislative group of buildings and Public Law 94-440 requires that this number be reduced by 62 positions, leaving a total of 90 operators.

The number of operators in the House Office Buildings will be reduced from 52 to 28 positions, a reduction of 24 positions; in the Capitol from 52 positions to 46, a reduction of 6 positions; and in the Senate Office Buildings, from 48 positions to 16 positions, a reduction of 32 positions.

As of this date, 51 positions have been abolished, leaving a total of 11 positions to be abolished, through attrition, pursuant to Public Law 94-440.

Funds in the amount of $430,000 are included in the bill for operators in the Capitol, and $296,000 for operators in the House Office Buildings, a total of $726,000. These funds will be used to employ elevator operators who are assigned to elevators located at strategic points in the Capitol Complex. Those areas include elevators which are for general use, except when they are restricted to Member use during voting periods and Roll Calls. It is imperative that the use of these elevators be restricted if Members are to be expected to reach the Chamber in time to vote. Operators are also required in areas where there is a heavy concentration of traffic such as occurs at the Capitol end of the Rayburn Subway, and the north side of the Longworth Building. On the House Side of the Capitol, there is one elevator, for example, that serves a passenger-freight function by providing service to the House Administration Committee on the third floor and the House Document Room storage area on the fourth floor. Because of the urgency of Committee business, it is necessary to have an operator on the elevator to prevent the elevator from being monopolized by trucks carrying material to the storage area.

The need for elevator operators is greatest at the heavily traveled areas of the buildings and on those elevators which are dedicated to general use, except during voting periods when they are reserved for Members only, and operators will be assigned to elevators located in those areas.

UP AMENDMENT NO. 671

Mr. CURTIS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER (Mr. ALLEN). The clerk will please state the amendment.

The legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes unprinted amendment No. 671.

Mr. CURTIS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with, and that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, after line 24, insert the following new section:

Section 113: Notwithstanding any other provision of law appropriated funds are available for payment to an individual of pay from more than one position, each of which is in the office of a Senator and the pay for which is disbursed by the Secretary of the Senate, if the aggregate gross pay from those positions does not exceed the amount specified in section 105(d)(2)(ii) of the Legislative Appropriations Act of 1968, as amended and modified.

Mr. CURTIS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CURTIS. Mr. President, I will only take a very few minutes to explain the amendment. I understand the vote will be Monday.

The purpose of this amendment, Mr. President, is to allow an employee to be on the payroll of more than one Senator. I believe it will be a matter of economy. It will be a matter of efficiency.

The best argument I can make is to give a few illustrations. Suppose two Senators from one State wish to operate an office in the State and they are willing to do it with one employee. They can put that employee on the payroll for a given amount, each one, and the total is his pay.

The amendment provides that it is subject to the same aggregate limits of all others.

I can cite another illustration. Suppose three or four individuals want some research done. It may be in the field of taxation, it may be environment, it may be in some other line. They are not able each one to hire an expert. Maybe they do not have the funds. Maybe there are not that many competent people available. It also might well be true that each Senator did not have a need for a full-time employee. So this would permit, say, three or four or more Senators to pick out an employee, and if his salary was to be $20,000 a year, and there were four of them participating, they could put him on the payroll, each one of them, for $5,000. It would be subject to all the rules and limitations as if he worked for one.

Mr. President, the question arises why can they not do that just by rotating? Well, it may well be that someone wants to participate in the services of a special employee, and he does not have enough money left in his allowance so that he can put the employee on for a full month. Even if he does that, under the present cumbersome arrangement if four Senators wanted to utilize the services of one staff member, and it happened that all four could afford to put him on for the entire month, it means all that paperwork in the disbursing office to transfer him from one payroll to another month after month.

This is a matter of economy; it is a matter of efficiency; it is a practice that has prevailed in the House of Representatives all through the years.

There is not any chance of any abuse of it any more than any other payroll. I assume that an incompetent or a person who does not perform very much work now and then can get on a payroll. I think the chances of it occurring under this arrangement are less because there would be more than one person directing and watching his services.

I think it is a reasonable request. I do not believe there is any logical argument against it. I think it will save money, it will save paperwork. It will provide Members with some expert services that they otherwise could not get.

I am thoroughly convinced that in the operation of home State offices where two Senators wish to employ one person it will be a great saving because it will be saving in other matters than just the salary.

Mr. President, that is all I wish to say about it. All the arguments that are presented to the effect that it is hard to administer are just so many words. The House of Representatives has been doing it all through the years, and it has caused no problem.

Mr. President, I yield the floor.

Mr. HUDDLESTON. Mr. President, the subcommittee considered the proposition that has been offered by the distinguished Senator from Nebraska. We recognize that it is being done now on a limited basis through the rotating plan, but we were constrained to feel that a major move such as this, regarding the employment of personnel of the Senate, required a considerable amount of study.

There are several problems that will immediately come to mind on this proposition. For one thing, if the total gross annual salary is to exceed $11,050 then the dual compensation law would have to be amended, a law which prohibits an individual from being on two or more Senate payrolls concurrrently.

Second, we felt that hearings ought to be held on what all the ramifications and potential problems might be; whether or not a group of Senators could form something of a shadow committee employing their own personnel, what it might lead to, was just not clear to us and, consequently, we feel like we have to oppose this suggestion at this time.

There are other administrative problems that are immediately at hand. The payroll mechanism of the Senate is not set up so that it can accommodate payment being charged to two or more Senate offices for one employee.

So, we would oppose this amendment as being in our judgment at this time not clearly defined enough as to its ramifications and not being in the best interest of the efficient operation of the payroll system of the Senate.

Mr. CURTIS. Mr. President, may I be recognized?

The PRESIDING OFFICER. Yes.

Mr. CURTIS. There is one additional illustration I shall present.

Suppose the minority members of a committee wanted to hire someone to assist all of them. Take, for instance, the minority members of the Finance Committee. Suppose we had need for an actuary. Certainly we do not need seven or eight actuaries. The minority does not have as many employees by a long ways as the majority. This would enable the members to select one and to prorate the cost.

In this day and age when you can do anything with computers and machines, and so on, I am astounded that any Senator would stand here and say you have administrative problems.

There is not any administrative problem to have four Senators paying an employee $5,000 each. I think a good sixth

grader could work that out. It is not very difficult mathematics. He could probably record it and carry it out.

I wish that we could dispel this idea that there would be shadow committees put up. No such thing at all. This is for working staff of the Senate. It is to enable Senators from the same State to establish an office in their State. The distinguished Senators from New Mexico are not here right now, but I am offering this today at the request of one of them because they are in the process of establishing some offices in their State along this line.

It saves a lot of expense. It saves telephone expense. It saves space. It is a saving of time, and I am sure a saving in the salary itself to have two Senators rely on one employee.

Two years ago this amendment was offered. There was whispering around this Chamber that it was something sinister, that it was to help a Presidential candidate. It was all nonsense. It was not true. But you could not stop it.

All I am asking for is the same thing the House of Representatives is doing.

Mr. President, I hope that by the time the roll is called on Monday Members will have a chance to read the RECORD because this is a reasonable request. It does not increase the expenses by one dime. I am thoroughly convinced it will save money.

Mr. CRANSTON. Mr. President, I assume that time is concluded on this amendment.

Mr. HUDDLESTON. I wish to make one further response if the Senator will yield.

Mr. CRANSTON. I yield.

Mr. HUDDLESTON. The reason why we find difficulty in adopting the automatic payroll system to conform to the suggestion that the Senator made, is that the automatic payroll system is set up to conform with the law—which prohibits dual compensation. The law does not permit what the Senator suggests to happen. We are not dealing with a legislative act here. We are dealing with an appropriations act. What the Senator suggests requires the amending of two different laws.

There also have been suggestions by those who are supporting the amendment of the Senator from Nebraska that perhaps a congressional delegation, the Senators and Representatives from the same State, might want to join together and employ a person. This opens up all kinds of difficulties and problems that we can foresee.

Mr. CURTIS. That is not in the Senator's amendment offered today.

Mr. HUDDLESTON. It is not in the amendment, but it is leading down the road. Until we can have some hearings to determine precisely what the ramifications of this amendment might be, I think it would be unwise for the Senate at this time to open this door, particularly when the Senate has already gone a long way to provide every Member of this body with personnel for each committee that he serves on. That is the old so-called Senate Resolution 60 personnel. In this bill itself we are liberalizing the office expense accounts to the extent of 10 percent. So additional funds are available to each Senator.

Consequently, on behalf of the subcommittee I have to say that we do not believe that is a wise course to take at this time.

Mr. CURTIS. Mr. President, I shall not take a great deal longer. But we are not asking for more money. This is a matter of better utilization of the money that is spent. It is a matter of economy. It is a matter of cooperative work for better results. And I cannot understand the stubborn resistance of the subcommittee to a proposal as reasonable as this. It is a very reasonable proposal.

Mr. President, I have nothing further to say on it, but I do believe that those on the subcommittee who are opposing this are misguided in it. It has not caused any problem in the House of Representatives. It is a reasonable request. It is in the interest of saving money, securing better help, and is a matter of efficiency and convenience.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. Mr. President, I yield back the remainder of my time.

Mr. CURTIS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The vote on this amendment under the unanimous-consent agreement will occur at 4 p.m. on Monday.

The Chair recognizes the distinguished Senator from California (Mr. CRANSTON).

AMENDMENT NO. 509

Mr. CRANSTON. Mr. President, I call up amendment No. 509 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON) for himself, Mr. BENTSEN, and Mr. PACKWOOD, proposes amendment No. 509.

On page 28, line 6, beginning with "other", strike out all through "expenses" in line 7 and insert "such other official expenses as the Senator determines are necessary".

Mr. CRANSTON. Mr. President, I shall explain this amendment very, very briefly.

Its purpose is to make explicit that the Senator himself, each Senator, has the authority to decide what are the legitimate expenses to be paid from the new category of the official office expense account entitled "Other Official Office Expenses."

The committee's purpose in setting up this new category was to allow Senators to decide what other expenses are necessary and legitimate to run their offices and to cover the variety of official business expenses which presently do not fall within the enumerated categories.

Our amendment makes the committee's intent totally clear and beyond any question or doubt.

I applaud the committee's action in taking steps to get away from the arbitrary list.

I understand that the committee is prepared to accept this amendment. I thank Senator BENTSEN and Senator PACKWOOD for their cooperation in offering this, and some 50 other Senators who joined in a general position, much of which has been adopted by the committee, for which we thank the committee very much, and we do have three amendment that cover somewhat modest points that are not fully covered by the committee. Some points they did not cover we are not seeking to cover by amendment.

Mr. BENTSEN. Mr. President, will the Senator yield?

Mr. CRANSTON. I yield to my good friend and colleague from Texas.

Mr. BENTSEN. I join with my distinguished colleague from California and thank the Senator from Kentucky, Senator HUDDLESTON, and the Senator from Pennsylvania, Senator SCHWEIKER, for their efforts, first, to hold down the increases in the cost for the Senate offices and also to give us increased flexibility, when we are charged with exercising the judgment of the expenditures of billions of dollars for our Nation, and to speak for the fact that we have severe limitations on any discretion as to how we handle the expenses within the office on legitimate expenses. I am delighted to see that this kind of correction is being made and am appreciative of the efforts of the manager of the bill and minority manager of the bill.

Mr. HUDDLESTON. Mr. President, I have reviewed this amendment by the Senator from California. It is clarifying language that I think is appropriate, and we are prepared to accept this amendment.

I point out that there is a requirement that these expenditures be strictly accountable and filed by invoice and voucher with the Secretary of the Senate and published in a report twice each year.

I think the possibility for abuse of this section is very remote.

Mr. BENTSEN. Mr. President, as I understand it, he is also restricted against the utilization of it for anything such as entertainment expense; just necessary Government expenditures?

Mr. CRANSTON. The Senator is correct. No entertainment, no meals.

Mr. SCHWEIKER. Mr. President, I join with the chairman of the committee in accepting this amendment. I commend the Senator from California and the Senator from Texas, because they have been in the forefront of this effort to provide all Senators, particularly newer Senators, a better opportunity to manage their accounts and their offices in a businesslike way, and improve the efficiency of their work. I think this is a worthy effort, and I join in accepting the amendment.

Mr. HUDDLESTON. Mr. President, I yield back the remainder of my time.

Mr. CRANSTON. I yield back the reaminder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment was agreed to.

AMENDMENT NO. 510

Mr. CRANSTON. Mr. President, I call up my amendment No. 510.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON), for himself, Mr. BENTSEN, and Mr. PACKWOOD, proposes amendment No. 510:

On page 27, after line 22, insert the following:

"(2) by striking out 'procured through the State stationery room' in paragraph (2);".

On page 27, line 23, strike out "(2)" and insert "(3)".

On page 28, line 20, strike out "(3)" and insert "(4)".

Mr. CRANSTON. Mr. President, this seems to be a quite minor matter, and it really is, and yet it is one that has caused difficulty to Senators time after time and year after year.

All it does is permit Senators to be reimbursed for stationery and office supplies purchased outside the stationery room.

The stationery room—from time to time—does run out of supplies. Should a Senator who needs those supplies immediately be forced to wait for the stationery room to obtain them—which sometimes takes considerable time—instead of simply going outside to a stationery store to buy the supplies at the time they are needed, when they can be obtained elsewhere?

The stationery room does not carry every item in stock. Shouldn't a Senator who finds that he needs an unstocked item be able to go to an outside stationery store to get the item?

Generally, the stationery room is cheaper than a private stationery store.

However, certain items occasionally may be purchased more economically in the open market—especially when they are purchased in bulk. Should not a Senator be able to choose to purchase the cheaper supplies?

Under present regulations the Senator cannot be reimbursed when he goes to a private stationery store to obtain supply items, even though they may be legitimate and necessary office expenses.

A Senator receives, as we all know, a limited office expense allowance. Under those circumstances, a Senator is going to be very careful and prudent with regard to how he spends those funds. Limiting his stationery purchases to the Senate stationery room is unrealistically restrictive and does not encourage the most prudent use of Senate funds.

That is the reason for the amendment.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield for a question?

Mr. CRANSTON. I am delighted to yield.

Mr. ROBERT C. BYRD. Has this amendment been discussed with the chairman of the Rules Committee (Mr. CANNON)?

Mr. CRANSTON. No, it has not.

Mr. ROBERT C. BYRD. The reason why I ask the question is that I am a member of the Rules Committee, and I have the feeling that this amendment ought to be discussed with the members of the Rules Committee.

Mr. CRANSTON. The reason why I did not do so is that this measure came direct to Legislative Appropriations, and the Rules Committee chairman was aware of certain matters that we are bringing up here, which we first set forth in a letter that was signed by some 50 Senators. The chairman was aware that the whole matter was going to go over to the Legislative Appropriations Committee for its approval, and then to the Senate floor, and he raised no objection to it going that way.

Mr. BENTSEN. Mr. President, will the Senator yield for a comment?

Mr. CRANSTON. Yes.

Mr. BENTSEN. I rise in support of the amendment. I had a specific case some time ago where I obtained some bids on some stationery items, and found I could have obtained them substantially cheaper than had I bought them at the Senate stationery store.

If we are going to have proper exercise of the authorization of this expense account, it seems we should not be locked in to having to buy at the company store. In addition, I think the company store ought to have the discipline of that kind of competitive purchasing by Members, particularly where we do not find the item in stock, or the Member will find he can buy it cheaper elsewhere. We ought to be able to get the best buy we can for the taxpayers, and in expending our stationery allowance.

Mr. CRANSTON. The Senator has added a very helpful point, and I thank him for his support.

Mr. HUDDLESTON. Mr. President, we find, again, that we have to oppose the amendment by the Senator from California, although I recognize that he, along with the Senator from Texas and many others, has worked hard at trying to make the office allowances more flexible and more usable by the Members of the Senate.

However, we find here a situation where the major way that the Senate has of controlling expenditures is through purchases through the stationery store. I know there are occasions when the stationery store may be out of various items. We have discussed this with the Secretary of the Senate, He assures us that the facilities there are going to be expanded, and the likelihood of them being out of the articles will be less and less as time goes on.

The new 10-percent requirement that we are adding into this bill—that is, each Member having 10 percent of his total office allowance to use as he determines is best suited for his office operations—gives some leeway and some opportunity to do just what the Senator from California is requesting.

He says, of course, that no Senator would abuse this privilege, that he would not favor a contracting friend or a particular seller in his purchases, and I do not dispute that. But, you know, there is an old adage that even an honest man arouses suspicion when he stoops to tie his shoelaces in a melon patch. We are in a melon patch here, in the public eye, and I think it is essential that we make every effort to assure that these opportunities for abuses do not occur unless it is absolutely essential to an efficient operation.

I do not believe, in this case, that this proposal is essential. I think there is enough leeway with the 10 percent that we are allowing for flexible operation, and I think the potential for abuse is just too great to move in this direction at this particular time.

Mr. CRANSTON. Mr. President, I would like to point out that if the melon patch is in the Senator's home State, he is permitted to stoop, and he is more apt to have friends and cronies and people in business from whom he would like to buy things in his home State than he is around Washington.

The present law says that reimbursement to each Senator for official office expenses incurred in his State—other than equipment and furniture—is permitted. So you do not have to buy from a stationery store, in Kentucky or California or elsewhere.

Mr. HUDDLESTON. The reason for that, of course, is that the stationery store is somewhat nonaccessible to the operation of an office out in the State.

Mr. CRANSTON. Did the Senator receive any assurances from the stationery store that they would be more cooperative than I gather they have been in the past in procuring items they do not carry in stock for Senators who may need the items?

Mr. HUDDLESTON. I think this is a matter that should be taken up with the Rules Committee, and a determination made as to what items might be more essential.

Mr. BENTSEN. Mr. President, I would say to the distinguished Senator from Kentucky that all one has to do is go over to the stationery store of the House of Representatives and see the vastly expanded number of different types of things that should be used within an office available there, as compared to what we have in the Senate stationery store.

If we had the discipline of the outside competition, perhaps we would find that we had a better source of supply.

Mr. HUDDLESTON. Let me just say that from my observation there might be a serious question as to whether or not the Senate wants to establish a commissary or department store for the use of its Members, or whether we want to try and stick to items which are normally believed to be essential in the operations of an office. This is an area, I think, which is open to serious abuse if we are not very careful how we handle it.

It is the opinion of the committee that we ought to hold the line here to the fullest extent possible, while at the same time giving the Member the 10-percent leeway that they have if he cannot find items in the store that are suitable to him. He has the 10-percent which will range anywhere from $4,000 to $14,000. That seems to us to be adequate at this time.

Mr. CRANSTON. If the Senator will yield, I would like to say I do not think this is such a momentous matter that we should have a rollcall vote on it. I am trying to discourage rollcall votes. I would be happy to go by whatever decision we get on a voice vote, but I have not counted the votes.

Mr. ROBERT C. BYRD. Mr. President, I recognize the arguments in support of the amendment. I am a little concerned about the amendment. As a member of the Rules Committee, I would have to say

that it is all right with me to go to a voice vote, depending on the outcome. Otherwise, I would be constrained to ask for the yeas and nays on this amendment, Mr. President.

The PRESIDING OFFICER. Does the Senator request the yeas and nays?

Mr. ROBERT C. BYRD. I do not yet. I am waiting to see what happens.

Mr. CRANSTON. I would suggest that we let it go over until Monday, like other amendments. Perhaps we can talk to the chairman of the Rules Committee in the interim and perhaps resolve the matter.

Mr. BENTSEN. And perhaps we can get some assurances as to what is going to be done with that stationery store, whether they are going to give us a full line of supplies, such as the House supplies.

Mr. ROBERT C. BYRD. I believe that would be appropriate.

ORDER FOR YEAS AND NAYS ON AMENDMENTS AND TABLING MOTIONS ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order on Monday to order the yeas and nays on any amendment which is carried over and on any tabling motion which may be made at that time.

The PRESIDING OFFICER. Is there objection to the request? Hearing no objection, it is so ordered.

Mr. CRANSTON. I would like to add one point. We do not want any big department store on Capitol Hill, obviously. I am prepared to yield back the remainder of my time.

Mr. HUDDLESTON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, the vote will occur on Monday.

Mr. HUDDLESTON. Mr. President, I yield to the Senator from Indiana.

LEGISLATIVE APPROPRIATIONS, 1978

The Senate continued with the consideration of H.R. 7932.

AMENDMENT NO. 508

Mr. CRANSTON. Mr. President, I have one further amendment, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON), for himself, Mr. BENTSEN, and Mr. PACKWOOD, proposes amendment No. 508.

On page 28, line 16, strike out "ten" and insert in lieu thereof "fifteen".

Mr. CRANSTON. Mr. President, my amendment No. 508 would increase the percentage of a Senator's total office account which can be spent in the new discretionary category from 10 to 15 percent.

Let me stress immediately that this amendment in no way increases the total amount of office expenses a Senator receives.

It in no way increases the appropriations.

All it does is give a Senator greater flexibility in determining how his official office funds are expended.

When Senator BENTSEN and I introduced S. 1275, we argued that Senators should be able to decide what are legitimate expenses to be paid for from their official office accounts.

The current practice of limiting our expenditures to an arbitrary list—based on outdated traditions and subject to interpretive rulings by various Senate employees—is absurd.

Fifty six of our colleagues joined us in a letter to the distinguished chairman of the Legislative Appropriations Subcommittee urging that the principle of Senatorial discretion be applied to a Senator's total office account.

The Appropriations Committee's response has been to provide that 10 percent of a Senator's official account can be expended in the manner we suggested.

Appropriate safeguards and disclosure requirements are included in the committee bill.

I for one am willing to accept a less than 100 percent figure because I believe a year or two experiment with allowing Senators to decide how a portion of their official office accounts are spent will convince Senators that this principle can be extended to the entire office accounts.

This experiment will demonstrate that Senators will expend official funds wisely, prudently, and with self-discipline.

It will demonstrate that press and public scrutiny of the detailed reports of expenses reimbursed will be more than adequate to discourage any unreasonable or inappropriate uses of public funds.

It will demonstrate that the current arbitrary and bureaucratic limitations on office account expenditures are totally and completely unjustifiable.

Because I want this experiment with a discretionary fund to prove these conclusions, I feel increasing the portion from 10 to 15 percent will give us a more adequate demonstration of Senators' ability to manage their own office accounts.

There is no magic in any of these numbers; 20 to 25 percent would give us a better test than 15 percent; just as 15 percent gives us a better test than 10 percent.

But I do believe 15 percent is preferable to 10 percent and I urge my colleagues to join in supporting this amendment.

I yield with pleasure to my colleague from Texas.

Mr. BENTSEN. I say to my distinguished friend that he has covered the subject so well there is nothing more I can add than to say that I support him in his efforts.

Mr. CRANSTON. I thank the Senator very much.

Mr. SCHWEIKER. Mr. President, I rise reluctantly to oppose this amendment for a couple of reasons.

I do believe we on the committee made a good faith effort to try to give more flexibility to individual Senators. By setting up the 10 percent official office expense limitation we do permit Senators under the proposal now before us to have an opportunity to have that flexibility, depending on the size of the office account they are entitled to, of any figure from $4,000 to $14,000. It varies by the other allowances they are entitled to and the other conditions which make up the consolidated office allowance. I really think that is a very flexible approach.

We do not know, frankly, whether or not this is going to add a cost to the way of the Senate doing business. I hope it will not substantially change it.

We can make the argument that since it is out of a consolidated allowance it will therefore not raise the cost of it. But I have to believe that certainly some increase will be involved because it does make it more convenient to manage the office more efficiently. While we may save money in the long run it may cost some money in the short run.

I think a prudent and fair way would be to proceed on the basis of the 10 percent figure that the chairman and I have approved and see what that costs, and then take another look at it next year to see if that gives us the managerial flexibility. If it does not, then come back with cost figures. I hate to come in with a new procedure, which I happen to think is an improvement, is constructive and flexible in terms of managing an office, but just increase it to a higher figure until we know what the cost will be.

On the basis of cost and knowing what we are doing, and on the basis that a range of $4,000 to $14,000 gives plenty of flexibility now, I would have to oppose the amendment.

Mr. HUDDLESTON. Mr. President, I join my colleague from Pennsylvania in opposition to this amendment, recognizing that it might seem somewhat arbitrary that the committee settled on a 10-percent figure. I believe this is somewhat of a drastic departure from the system that we have been operating under, the seven categories that have been used to determine office expenditures. We felt that we should, while opening the door, while generally in agreement with the Senator from California and the Senator from Texas and others who have proposed more flexibility—we felt that we ought to experiment some, give this a trial, see what kind of expenditures develop when we take off the restraints, and see whether or not this is the direction that we ought to go in in future years. Certainly, we can, as time goes on.

The argument that this does not cost any more money, of course, cannot always be substantiated, because, while it certainly would not increase the authorization, the likelihood is that it would increase the expenditures, just as would some other suggestions that have been made here this evening as not increasing the costs. All offices do not use all the funds available in these various categories and in the total office operations.

We oppose the amendment, believing that we have taken a major step toward opening up the expenditure processes and the operations of the offices to give the Senators some discretion in how certain amounts of these funds will be spent.

We settled on the 10 percent figure. We believe that is appropriate for this first step. We should like to hold to that figure. Therefore, we oppose the amendment.

I yield back the remainder of my time.

Mr. CRANSTON. I shall be glad to yield back the remainder of mine and maybe decide this on a voice vote. I

would just as soon go with a voice vote.

Mr. HUDDLESTON. Let me check the House. There are not many voices.

Mr. CRANSTON. Very few. More momentous issues than this have been decided with fewer Senators on the floor.

The PRESIDING OFFICER (Mr. GRAVEL). The question is on agreeing to the amendment.

Mr. HUDDLESTON. I should prefer not to decide on a voice vote with so few Members present. I think this is something that we ought to vote on if the Senator feels strongly that he wants a vote. I hope that he will withdraw his amendment and allow us to give this trial year of operation. Perhaps we shall be in a better position next year to extend the program.

Mr. CRANSTON. How would the Senator feel about a compromise at 12.5 percent?

Mr. HUDDLESTON. I think we are getting down now to the nitpicking stage.

Mr. CRANSTON. I am just trying to avoid pushing it, but I would as soon resolve it now, if we can.

Mr. HUDDLESTON. I think the committee—speaking for the committee, and I certainly would be glad to hear from the minority member. I think we gave this a great deal of consideration and, as the Senator knows, met with Members of the Senate who are interested in this item. We thoroughly considered it and agreed on this figure, which was accepted by the full Appropriations Committee and I prefer to leave it there unless the Senate itself holds otherwise.

Mr. CRANSTON. In the interest of accommodation and in recognition of all the progress made in this measure and the serious attention that the committee, led by the two Senators on the floor—the Senator from Kentucky and the Senator from Pennsylvania—have given to the desires of many Senators to improve life in the Senate, and in recognition of all that has been accomplished in those directions, I withdraw the amendment.

Mr. HUDDLESTON. I thank the distinguished Senator.

The amendment was withdrawn.

UP AMENDMENT NO. 672

Mr. HART. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Colorado (Mr. HART) proposes unprinted amendment No. 672.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert the following new section:

SEC. 411. (a) Effective January 1, 1978, each member of the Senate and the House of Representatives, each officer or employee of the Senate or the House or of the Congress, and each other individual who is accorded the privilege of parking a private motor vehicle on a permanent or regular basis within an area which (1) is within the Capitol Grounds, or otherwise subject to control by the Senate or House, any officer thereof, or the Architect of the Capitol (including the streets within any such area), and (2) is reserved for parking by such Members, officers, employees, and other individuals shall pay a monthly fee therefor as provided in this section.

(b) Except as provided in subsection (c), such monthly fee shall be—

(1) $10, in the case of an individual whose annual rate of compensation is less than $10,000;

(2) $25, in the case of an individual whose annual rate of compensation is $10,000 or more but less than $25,000; and

(3) $50, in the case of an individual whose annual rate of compensation is $25,000 or more.

(c) Except in the case of a Member of the Senate or the House of Representatives, priority in according parking privileges within any area described in subsection (a) shall be given to automobiles which regularly transport two or more individuals to and from work. The monthly fee for parking any such automobile shall be $10.

(d) The Sergeant at Arms of the Senate and the Sergeant at Arms of the House of Representatives shall each maintain at least one parking lot which shall be available to the individuals enumerated in subsection (a) and to the general public for parking on a daily basis at a fee of $3 per day.

(e) The Sergeant at Arms of the Senate and the Sergeant at Arms of the House of Representatives shall collect the fees required by this section and shall deposit them in the Treasury of the United States as miscellaneous receipts.

(f) For purposes of this section, the term "Member of the House of Representatives" includes a Delegate and the Resident Commissioner from Puerto Rico.

(g) The Sergeants at Arms of the Senate and the House of Representatives may further reduce the fees stipulated above by an additional 25 percent if individuals use "small cars".

Mr. HART. Mr. President, this amendment to the pending legislation is for one principal purpose. That is to establish a system for compensation for parking on the Capitol Grounds. Times change. Some systems that may have made sense in previous times, no longer make sense today.

The Senator from Kentucky, the distinguished floor manager, has cited the fact that the pending legislation has done away with the practice of providing free shaving mugs and hair brushes, combs, and shipping trunks to Senators. While I think that is a very good step for the committee to take, it obviously does not respond to the question of whether it makes sense in the last quarter of the 20th century to provide free parking spaces for thousands of employees who work on the Hill and for the Members of Congress themselves.

Mr. President, what this amendment will do is provide parking charges for all spaces which are owned, rented, or supervised by Congress. The fee would be graduated by the gross income levels of the Members of Congress and their staffs and employees. For those earning under $10,000 a year, there would be a $10 a month parking charge. For those receiving $10,000 to $25,000 a year, there would be a $25 a month parking charge. For those receiving compensation over $25,000 per year, there would be a $50 per month parking charge.

Carpooling would be encouraged. For those cars with two or more occupants, the rate would be $10 per month per car. The same system for allocation of parking spaces that we have today would prevail, so any feeling on the part of those who presently have parking spaces that this amendment will take those spaces away should be dispelled. Members of Congress would be given first priority; carpoolers second priority; and others third priority.

Provision is also made, Mr. President, in the amendment for daily parking rates for staff members, for constituents, and for visitors at $3 per day. Of course, all of us are familiar with the fact that when constituents arrive here, there is no place for them to park their cars if they have driven to the Hill.

What are the arguments in favor of this amendment, Mr. President? First of all, there is a definite necessity in urban life today to reduce the number of automobiles driven in the cities. That includes Washington. We have just gone through 7 days of air alerts. There is no heavy industry in this city. The air quality problems that we have here, that are having direct impact on the health of people who inhabit this community, are almost totally the product of automobiles being driven into the city. Air pollution is a major problem in the urban area of Washington, D.C.

Second, we have an energy crisis on our hands. The President of the United States has talked to us about that. We have all indicated that, one way or another, we believe that his assessment of the situation is roughly accurate. Something has to be done to reduce consumption of energy, particularly refined petroleum or gasoline as combusted in the automobile engine. Any time free parking spaces are offered to anyone, they are being encouraged to drive those automobiles and, therefore, consume more gasoline.

Mr. President, as of the last few weeks, we have a new form of alternative transportation with the introduction of the subway. That subway links parts of northern Virginia to the downtown area of Washington and the northeastern part of the District of Columbia. There is a stop or two on Capitol Hill. That subway is subsidized by the taxpayers of this country. Those same taxpayers are subsidizing the parking spaces given to Members of Congress and Senators and their employees on the Hill. As long as we have that subsidized parking, there is no encouragement to use the new mass transit system.

What do others pay in the urban area for parking? In the downtown parking areas in non-Government parking lots large cars are charged from $60 to $72 a month. Small cars are sometimes given a reduction, so are charged $50 per month.

In Government parking lots only carpoolers can get most of the valuable spaces. Carpoolers, with four or more riders per car are charged about $11 or $12 per month.

According to the Capitol Police there are 8,563 parking spaces controlled by the legislative branch. On the Senate side, there are 3,676 spaces. On the House side there are 4,887 spaces, giving us a total for both Houses of Congress of 8,563 parking spaces.

Mr. President, at an average monthly charge, at the commercial rate in downtown Washington of $70 per month for large cars, those spaces would be worth $7,188,720 per year.

What does it cost, in addition to the lost revenue from not renting those spaces out on Capitol Hill, to administer the system? We are informed by the head of the Capitol Police that, on the Senate side alone, about 78 Capitol policemen cover the 3,676 parking spaces. The cost for those policemen, just to watch over and control parking, is about $1 million a year.

The parking fees that their amendment would require would return about $25 per car, or about $1 million for all the parking spaces on the Senate side. Thus, the parking fees would barely reimburse the taxpayer for the cost of policing the parking lots.

If we were to extrapolate the above figures to include the House side, the revenue to the U.S. Government is estimated at $2 million to $3 million a year.

I do not know what we will save by cutting out the shaving mugs, combs and brushes, but I doubt it is $2 million or $3 million a year.

Here is an opportunity to return to the Treasury of the United States $2 million to $3 million, most of which could go back to cover the costs of administering the parking problem here on Capitol Hill.

Mr. President, for people who continue to drive to Capitol Hill, they would pay to park, but they would pay less than the comparable employees downtown.

Also, a feature of this amendment is that those in the lower income brackets of Capitol Hill employees would pay the least; $10 a month.

The Sergeant at Arms has conducted a survey of the congressional employees. With regard to paying a fee for parking on Capitol Hill, about one-third of those people contacted, 36 percent, favor a parking fee if spaces were guaranteed.

I do not undertake to solve the problem of guaranteed space in this amendment. That is a different matter. But I think it does indicate that people are not absolutely opposed to paying for the parking privilege.

Some 44 percent of the people surveyed indicated that they would, given the fact of the necessity of paying for the parking space, opt for taking the subway instead of driving.

I apologize to my colleagues for taking the time at this late hour on Friday, but given the unanimous-consent agreement entered into, there will not be an opportunity on Monday to make the record on behalf of this amendment.

It is my intention to take advantage further of the unanimous-consent agreement and seek a yea-and-nay rollcall vote on this amendment on Monday. I will ask for the yeas and nays on Monday for that purpose.

Obviously, this will cause and has caused some consternation on the part of employees on Capitol Hill. I think any time we become accustomed to one system of doing things and then change the rules to require some payment for what has been considered to be a privilege in the past we do not like it. I received some indication of the depth of unhappiness this may cause to people who work here. If it does cause a hardship on the part of people working on Capitol Hill, if it is considered to be a great chunk out of their incomes, then I think the appropriate committees can take under advisement the question of whether the compensation of Capitol Hill employees should be increased to counteract this.

But I would point out, Mr. President, that the bill does include Members of Congress who would obviously be paying at the highest of the three categories.

It also covers members of the press who I understand have access to some 180 free parking spaces.

A Member of the House, Congressman OBEY from Wisconsin, pointed out that some of those members of the press have taken us to task for perquisites and criticized us for the free parking, and so on.

I would only want the record to reflect there are almost 200 spaces on Capitol Hill reserved for the press; they would be required under this legislation to compensate for their use of that space.

This amendment would also attempt to solve the problem that plagues us with regard to our constituents: that is to allow for visitors and constituents who want to drive their cars to Capitol Hill and stay for a short time. For these people lots will be available at a daily rate.

Mr. ROBERT C. BYRD. Will the Senator yield for a question?

Mr. HART. Yes.

Mr. ROBERT C. BYRD. Would this include the members and the employees of the Supreme Court?

Mr. HART. Well, I would read the applicable portion, the first paragraph:

> Each member of the Senate and the House of Representatives, each officer or employee of the Senate or the House or of the Congress, and each other individual who is accorded the privilege of parking a private motor vehicle on a permanent or regular basis within an area which (1) is within the Capitol Grounds, or otherwise subject to control by the Senate or House, any officer thereof, or the Architect of the Capitol (including the streets within any such area), and (2) is reserved for parking by such Members, officers, employees.

I think the terms of the amendment are strictly confined to the two Houses of Congress.

Mr. ROBERT C. BYRD. Well, why not include the members and employees of the Supreme Court? They are almost within spitting distance of the Capitol here on Capitol Hill. Why single out the Members of the Senate and the House of Representatives?

I am not unsympathetic with the goal that the Senator is trying to achieve. I think there is much to be said for this amendment from the standpoint of the conservation of energy, and so forth. But it seems to me it might be a good idea to make it Government-wide.

Why single out the Congress and not include the Judiciary? As I say, I could probably throw a silver dollar—if I had one in my hand—as far as the Supreme Court Building.

Mr. HART. Not in the direction the Senator is pointing, unless he throws a mean curve.

Mr. ROBERT C. BYRD. I cannot throw quite as far as George Washington did when he was stated to have thrown—I guess it was a dollar—across the river.

Why not include the executive branch? Why should the legislative branch be singled out?

I do not mean this is criticism of the Senator.

Mr. HUDDLESTON. Will the Senator yield at that point?

Mr. ROBERT C. BYRD. Yes.

Mr. HUDDLESTON. I think what the distinguished majority leader points out by his question is the fact that there is no uniformity in parking regulations as far as Federal employees are concerned, here nor anywhere else in the country.

There are some 41,000 federally owned parking spaces here in the central part of the metropolitan area. About 75 percent of them are free.

Federal employees in my home town, Elizabethtown, Ky., park free.

Visitors to the national parks all over the United States generally park free.

It seems to me, before we take this step at this particular time, there should be additional study.

I, too, am not totally unsympathetic with the objective of the Senator from Colorado. However, I think it is worth pointing out that providing free parking space is not an uncommon practice in this country, in the private sector as well as in the Government sector.

Mr. STEVENS. Will the Senator yield?

Mr. HUDDLESTON. It is not uncommon at all for the factories. Employees park free. It is part of their benefits, part of their negotiating rights, perhaps.

But this is not something that is unusual to do here in the Capitol for the employees of the Senate or the Congress.

Mr. STEVENS addressed the Chair.

Mr. HART. I believe I have the floor, Mr. President.

Mr. STEVENS. Let me——

Mr. HART. Mr. President, I believe I have the floor.

Let me respond to the majority leader and then I will yield to the Senator from Alaska.

The obvious answer to the Senator's question is, I say to the majority leader, that the bill before us is legislative appropriations and not judicial, or any other appropriation.

Mr. ROBERT C. BYRD. If the Senator will yield, of course, the obvious answer is that a point of order can be made against the Senator's amendment, to start with. The Senator is correct, the bill does deal with the legislative branch. I agree with that. But it can be the vehicle for legislation also dealing with the judicial and executive branches. My question was somewhat rhetorical, not meant to be critical of the Senator. As I say, I have some sympathy with the goal he is trying to achieve. But I think the Senator from Kentucky really stated my point best. Perhaps as a result of a study, the thrust of the Senator's effort can be made Governmentwide, or should be.

Mr. HART. The parliamentary question of the point of order, I think, may be quite complex. We may have an opportunity to find that out. This bill is a legislative appropriation; therefore, my amendment is applying to the legislative

branch. Perhaps the same kind of amendment could be attached to the judicial appropriations and the other branches of Government.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Kentucky has 15 minutes.

Mr. HUDDLESTON. I yield to the Senator from Alaska.

Mr. HART. Will the Senator yield me 1 minute?

Mr. HUDDLESTON. I yield the Senator 1 minute.

Mr. HART. Many of the agencies of the executive branch do charge their employees. I understand that the State Department and many of the other agencies already have this kind of system. It works extremely well. All the employees are covered, and it works very efficiently. I think that in the case of the State Department, with thousands of employees affected, it takes two to five people to administer the program. And the program results in substantially increased carpooling.

Mr. HUDDLESTON. I yield 2 minutes to the Senator from Alaska.

Mr. STEVENS. Mr. President, I hope the Senator from Colorado will not pursue this.

My colleague, the distinguished Senator from Alaska, is in the chair at this time. The two of us know that we are proceeding with a new building in Anchorage and one in Fairbanks for Federal activities. We will have offices in those buildings. One of the requirements of local government in our State is that the Federal Government must provide offstreet parking for employees who are going to work in those buildings.

As a matter of fact, I think it is a requirement of this city that led to the increased parking facilities that are available for people in all three branches of the Federal Government.

I do not have a conflict of interest, because I now live about three blocks away. I do not drive, and do not need a parking space here. But it is hard as the devil to find parking space outside my house. The net result is that these people who have to pay are not going to pay. They will occupy the streets. That is why the District of Columbia moved to require these parking spaces.

The net effect will be that our employees will park two or three blocks farther away and so congregate along the streets of the District of Columbia that it will be impossible to handle the traffic in the downtown area.

I think the parking is for the convenience of everybody concerned, to get these cars out of the way; and it is following a traditional pattern throughout the local government, as I understand it, throughout the country.

I hope the Senator will look into the question of the study that has been suggested. If there is an appropriate way to deter people from driving alone to these executive, judicial, and legislative offices, I will join him. But I do not see that as the way to do it, to impose a burden on our people that will result in the end in their parking on the streets, where we do not want them. We want them to be off the streets.

I think the Senator will agree that the worst thing that could happen to the Senate and the House would be to have more cars parked out here in the streets. The tourists can hardly find a place to park now. That is what would be the result of the Senator's amendment. People will not pay these fees. They will just park where there is free parking and will take the space that is allocated to tourists.

I think this goes in the wrong direction. Perhaps we can have a program to encourage buses, to encourage pooling of cars, and lead the country in this regard.

Mr. SCHWEIKER. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I yield the Senator 2 minutes.

Mr. SCHWEIKER. Mr. President, I oppose the amendment. I feel that we do not know enough to legislate in this way.

The area I come from in my State, when I worked for the private sector, had a free parking space for my constituents: the factories did, the schools did, the hospitals did. You could not build a facility without building the parking facilities free for the people involved. So a good many of my constituents have free parking.

In addition, in many areas there is a zoning requirement that you cannot build apartments or houses or other buildings if you do not have the offstreet parking.

So I think this strikes unfairly against one group of employees, when, in fact, many sectors of our population get free parking in many areas, particularly the areas where the zoning is effective. They mandate it as a basic right for the person who teaches school or for the person who works at the hospitals or for the person who works at a factory, without any question.

I think this proposal is a step backward.

Mr. HUDDLESTON. Mr. President, I have a couple of items that I think will indicate that more study is needed in this proposition before we legislate in this field.

First, for example, is that we have 2,841 parking spaces on the Senate side, and we issue 4,589 permits for them. This works fairly well, although there is some congestion and some difficulty in finding space. However, if we were to issue a permit for which someone paid, we would have to guarantee him a parking space, and that means we would only be able to sell 2,841 parking spaces, and they might be empty a third of the time. But we could not put another car in that space because somebody has paid for it, and we could not accommodate as many of our employees as we are accommodating now.

The Senator from Colorado has mentioned that this possibly would bring in revenue. He also pointed out, I think very wisely, that we would be faced—I am sure very quickly—with requests for increasing salaries to accommodate this extra expense. In that case, there would be no saving. As a matter of fact, there would be an expense because of the expense of operating the program.

Somebody has to check those cars. Somebody has to see that a sticker is on every car. Somebody has to know when employees change and when they leave the employment of the Senate. What happens then to that particular space, and where does the sticker go, and who gets it?

So it is not something that can be handled very easily, with the size of the operation we have here.

Another point should be made, and it is that employees on Capitol Hill—some of whom are here now, at 7 minutes after 7, and some were here early this morning; last night many were here after 9 o'clock—work unusual hours. I think they are entitled to have a place where they can park their car as near as possible to the Capitol and not be required either to pay or to do without a parking space here. They do work unusual hours. It is not like any other office in town. It is not like any other business that exists anywhere else.

I do not believe, in spite of the fact that on occasion some newspaper editor or reporter will refer to the parking privileges that are available to the Members of the Senate and to employees, that the general public is very much exercised over the fact that employees of the U.S. Government, the Senate and the House, have available to them parking spaces, if they can get into one without having to pay for it.

However, I do think it is a question that merits study; and I am willing to say to the Senator that our subcommittee will see that there is further study. The Sergeant at Arms already has begun looking into this matter and has conducted a survey, to which the Senator referred.

It might well be something we need to consider, but I believe we need an awful lot more information on it. We need to know how it fits into the total picture of Federal employee parking throughout the land, rather than instituting legislative action here now in this particular bill.

Mr. HART. Mr. President, will the Senator yield for a question?

Mr. HUDDLESTON. Yes.

Mr. HART. First of all, I am pleased that the Senator mentioned the Sergeant at Arms study because I think much of the study he seeks has been done. The amendment would not take effect until January 1, 1978. So it gives 5½ months to study the matter further as to how it can be implemented.

The Senator mentioned the number of permits that exceed the number of places. Does the Senator believe that the net effect of this amendment would be that people would park way off some place else. The effect would, in fact, be to get together with their fellow employees in the neighborhood and carpool, which is what we are trying to get all Americans to do.

Mr. HUDDLESTON. I have no basis to believe that would happen. How would these employees here carpool with other employees who left here at 5 o'clock this afternoon? I just do not believe the activity that occurs here in the Capitol lends itself to carpooling where everybody comes to work at the same time and

punches in and out. That is a carpool situation.

Mr. HART. Of course, as the Senator well knows, each of us has allotted to us a certain number of positions for staff people and key people who are required to stay extraordinary hours, so I think that situation certainly would not change. But in this amendment it does not——

Mr. HUDDLESTON. It is this point: The group here tonight is not necessarily the same group who were here last night, so you have to change your procedures every day. Most of these people probably did not know they were going to be here at 7:10 tonight when they came to work this morning.

Mr. HART. Well, I also think it is important to point out that none of this has to do with any parking anywhere else or any other Federal employees other than on Capitol Hill, so all of this discussion about parking places in Alaska and some place else is somewhat irrelevant to this discussion.

Mr. HUDDLESTON. The subcommittee did not feel it was irrelevant to treat Federal employees who happen to be working for Congress in a manner vastly different from Federal employees who may be working some place else. That is why we felt it ought to be looked into further and more study given before we legislated.

I yield back the remainder of my time.

Mr. HART. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HART. The Senator from Colorado understands that under the unanimous-consent agreement now the majority leader has entered into that the yeas and nays may be sought on Monday on these amendments that are put over.

Mr. HUDDLESTON. That is correct.

The PRESIDING OFFICER. That is correct.

Mr. HART. I thank the Chair.

Mr. ROBERT C. BYRD. I ask further unanimous consent that amendments to amendments may be in order on Monday, of course, with the understanding that there be no debate, but that amendments to amendments may be in order and that points of order may not be waived by the order that has been entered into heretofore today, and that the yeas and nays may be ordered on amendments to amendments on Monday, and likewise the yeas and nays may be ordered on any appeal from the ruling of the Chair with respect to points of order.

Mr. HUDDLESTON. Mr. President, will the Senator yield?

Mr. ROBERT. C. BYRD. Yes.

Mr. HUDDLESTON. Will the Senators motion include motions to table?

Mr. ROBERT C. BYRD. I have already gotten that earlier, am I correct, may I ask the Chair?

The PRESIDING OFFICER. Yes, that is correct.

Mr. ROBERT C. BYRD. Has the Chair ruled on my request?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. May I say to the distinguished Senator from Colorado, if I may have a moment on the bill—

Mr. STEVENS. Mr. President, will the Senator yield? It is my understanding that amendments to amendments would be in order without debate; that it does not change the concept that following the votes we will go automatically to third reading. There will be no further amendments to be available.

Mr. ROBERT C. BYRD. That is correct.

Mr. STEVENS. Just amendments to amendments presented today; is that correct?

Mr. ROBERT C. BYRD. The Senator has raised a question that I think should be clarified. Under the order previously entered no amendments would be in order on Monday unless they had been offered today.

I ask unanimous consent that amendments to amendments may be in order on Monday even if not offered today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHWEIKER. But no debate.

Mr. ROBERT C. BYRD. But no debate.

I said I had gotten this order because I think I should say to the distinguished Senator from Colorado that the idea certainly has some appeal, and to achieve the goal he is seeking to achieve has appeal, but there may be someone who might want to include the Supreme Court in this amendment even though it is a legislative appropriations bill, and such amendments would constitute legislation on an appropriation bill. That does not prevent the Senate from including the judicial branch in the amendment. I do not intend to offer such an amendment, but I think the way should be left open for Senators to offer such a amendment to the amendment if they so desire on Monday.

Mr. HART. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. HART. In the long and profound experience of the Senator from West Virginia, would it be his opinion that such an amendment to this amendment would be in order on a legislative appropriation bill?

Mr. ROBERT C. BYRD. Well, yes. If the amendment itself by the Senator—if no point of order is raised against his amendment, why, what is to keep a Senator from adding the judicial branch? A point of order can be made against either, but a point of order made against the Senator from Colorado's amendment would cause any amendment to his amendment to fall if such point of order is sustained.

Mr. HART. The Senator from Colorado did not phrase the question properly. The question really was, Would an attempt to expand this amendment to other branches of Government survive a point of order in the judgment of the distinguished majority leader?

Mr. ROBERT C. BYRD. Well, what I am saying is that the amendment offered by the Senator from Colorado is certainly subject to a point of order.

Mr. HART. But for a different reason.

Mr. ROBERT C. BYRD. Because it constitutes legislation on an appropriations bill.

Mr. HART. Yes.

Mr. ROBERT C. BYRD. If nobody raises that point of order, the Chair will not raise it automatically. I think a Senator should be able—which he would otherwise be able to do but for the order previously entered today—to offer an amendment to the Senator's amendment. If he wants to broaden it to cover the judiciary, he may do so. It is all subject to a point of order.

Mr. HART. But for different reasons.

Mr. HUDDLESTON. But that in itself would be subject to a point of order because this is not a judiciary——

Mr. HART. Precisely the Senator from Colorado's point.

Mr. HUDDLESTON. We are not dealing with the judiciary.

Mr. ROBERT C. BYRD. That is right. It would be subject to a point of order. But the point of order that could be raised is that it is legislation on an appropriations bill.

Mr. HUDDLESTON. Correct. I understand that applies to both.

Mr. ROBERT C. BYRD. That is right. The fact that my amendment, if I were to offer it, dealing with the judiciary would not be germane to the Senator's amendment——

Mr. HART. Or the pending legislation.

Mr. ROBERT C. BYRD. Or to the pending legislation is not the point of order that one would need to raise.

Mr. HART. But could.

Mr. ROBERT C. BYRD. But could.

Mr. HART. Yes.

Mr. ROBERT C. BYRD. He also could raise the question of germaneness regarding the Senator's amendment once a point of order were raised against its being legislation on an appropriation bill. But if the Senate wanted to go in that direction, what is to keep it from legislating with respect to the judiciary on a legislative appropriation? Nothing, unless someone raises a point of order and the point of order is sustained. The Senate by majority vote could override the Chair.

Mr. HART. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HART. On the pending appropriation measure, has there been an authorization bill prior to the introduction of this appropriation measure?

The PRESIDING OFFICER. There is never an authorization bill for a legislative appropriation bill.

Mr. HART. I thank the Chair.

Mr. STEVENS. Mr. President, if I might just ask a question for clarification, and I have not objected to the majority leader's request, but I want to make certain the amendments to the amendments that are in order on Monday apply only to amendments on which the vote has not been taken and, therefore, disposition has not been final.

Mr. ROBERT C. BYRD. The Senator is correct. They would apply only to amendments still pending on Monday.

Mr. STEVENS. I thank the Chair.

UP AMENDMENT NO. 673

Mr. HUDDLESTON. Mr. President, I call up an amendment on behalf of the

distinguished Senator from Alabama (Mr. ALLEN) who had to leave, an unprinted amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON) for the Senator from Alabama (Mr. ALLEN) proposes unprinted amendment No. 673:

At the end of line 3, page 65 add the following: On or before September 1, 1977, or as soon thereafter as practicable the Public Printer shall notify each Member of the House and Senate of the names and addresses of all those receiving the CONGRESSIONAL RECORD that are charged to each Member of the Senate and House

Mr. HUDDLESTON. Mr. President, this relates to the provision in this act that reduces the number of CONGRESSIONAL RECORDS available to each Member of the Senate from 100 daily to 50 daily, and further requires that those 50 be made available on a free basis only to public institutions.

The Senator from Alabama brought up a very good question and that is that many Members—some of these lists are quite old, and many Members—are not fully aware of the individuals who are now receiving the CONGRESSIONAL RECORD on a daily basis.

They would like to have that information so they could so inform that individual as to why his CONGRESSIONAL RECORD is being discontinued. We think this is reasonable and will facilitate changing this procedure.

We are prepared to accept the amendment.

Has the Senator from Pennsylvania any comments?

Mr. SCHWEIKER. Mr. President, I certainly agree with the Senator and am willing to accept the amendment.

Mr. HUDDLESTON. I yield back the time on the amendment and move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT 674

Mr. SCHWEIKER. Mr. President, I send an amendment to the desk on behalf of my colleague, the distinguished Senator from Kansas (Mr. DOLE).

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. SCHWEICKER), for Mr. Dole, proposes unprinted amendment No. 674.

Mr. SCHWEIKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, after line 24, insert the following:

Sec. 113. (a) The Sergeant at Arms of the Senate shall provide for a one-year trial installation of a telecommunication device for use by Senators and members of their staffs to receive communications from deaf persons and persons with speech impairment through the use of a device keyboard sending capacity.

(b) The printed copy produced by any communication from a deaf person or a person with a speech impairment which is received by the device installed under this section shall be transmitted to the Senator designated in such communication.

(c) The device installed under this section shall have keyboard sending capacity to permit the Senator who receives a communication under subsection (b) to reply to the person sending such communication through the use of such device.

(d) The Sergeant at Arms of the Senate shall establish such procedures as may be necessary to carry out the provisions of this section.

(e) Expenses incurred in carrying out this section shall be paid out of the contingent fund of the Senate upon vouchers approved by the Sergeant at Arms of the Senate.

Mr. SCHWEIKER. Mr. President, I offer this for Senator DOLE. He had expected to offer it but because of the late hour and commitments he made he asked that I offer it for him.

Basically, his amendment is to provide for the installation of a teletypewriter that people who are deaf or have speech impairment may use to communicate with their Senator.

This is a new technique that has now become possible so that constituents who are deaf or who have speech impairments can converse over the telephone, and the suggestion in this amendment is to set up a 1-year trial under the direction of the Sergeant at Arms Office so that the Senators who have constituents of this type can have an opportunity for them to communicate on key matters just as any other constituent communicates.

It is a fairly inexpensive thing because one piece of equipment, which is all we are talking about, can be secured for less than $1,500.

In addition, it would be my suggestion, Mr. President, that the communications lines be used in a way that after an inquiry is made here to the Capitol the Sergeant at Arms would use the Government WATS line to call back on so that no further telephone expense would be incurred. I think on that basis we could do it on a very reasonable way and yet accomplish the objective for which I certainly commend the distinguished Senator from Kansas for opening up a line of communications for us to our people who are deaf and people who have speech impairments back home.

Mr. HUDDLESTON. Mr. President, I concur in the amendment that is being offered by the Senator from Pennsylvania. The subcommittee, as the minority member recalls, considered this issue. We did not have sufficient information before markup on the bill to make a decision on it. I think on this limited basis and as a trial period it certainly justifies the very small expenditure that it involves. I think this could be a very useful instrument for a good many citizens in the country, and I move the adoption of the amendment.

Mr. DOLE. Mr. President, the amendment I am offering today calls for the Sergeant at Arms to install a toll-free teletypewriter so that Members of the Senate can have telephone communication with deaf and hearing impaired constituents.

DEFINITION OF TELETYPEWRITER

A teletypewriter is a piece of equipment which enables deaf persons to "talk" over the telephone. It was first created several years ago when a keyboard was attached to a regular telephone and an acoustic coupling device was added. Deaf persons could then converse with one another by alternately typing and receiving messages. My amendment would provide for the purchase of a teletypewriter so that deaf and hearing impaired constituents could communicate by telephone with their Senators in the same manner as hearing constituents do.

For years, most persons have been able to telephone their Congressmen to discuss a problem or to voice their opinion on a bill. In my view, our present setup discriminates against the deaf, for we do not provide for this service to those with hearing problems. My amendment, however, would help end this discrepancy.

IRONIC TWIST

Telephone communication has become a fundamental part of American life. Telephones are used in commercial businesses, government processes, delivery of health services, and for any number of personal reasons. Because it is relied on so extensively, the telephone has proven to be one of the biggest communication barriers deaf persons have to fight. It is ironic that the inventor of this barrier, Alexander Graham Bell, developed it as a means to communicate with his deaf wife.

THE DEAF POPULATION

Through my work with the handicapped, I have gained a special appreciation for the unique problems encountered day in and day out by persons with some type of hearing impairment. In most instances, these persons are cut off from communicating with the world around them. Very rarely does a person with normal hearing understand what it is like to be deaf, and to be totally shut off from all forms of oral communication.

An estimated 1.85 million Americans are deaf. An additional 4.8 million persons have a significant bilateral hearing impairment, making a total of 6.7 million Americans who find it impossible or extremely difficult to communicate by telephone. To help compensate for this, the teletypewriter device was developed for use in lieu of the standard telephone, thus allowing the hearing impaired to enjoy more of the benefits and pleasures of telephonic communication.

With a teletypewriter, the deaf person can "talk" with other deaf persons, or with a hearing person. When using a teletypewriter, one party types the message, which is converted into impulses. At the receiving end, these impulses are converted into signals and transmitted onto a screen in written form.

COST AND NUMBERS OF TELETYPEWRITERS

There are approximately 10,000 teletypewriter machines in use throughout the country. Some of these are individually owned. Others are owned and operated by schools, churches, hospitals, or public service organizations. Now, I propose to have one operated in the Senate.

There messages would be received and relayed on to the proper office in much the same way as a telegram is delivered. However, the teletypewriter is more satisfactory than a telegram for it permits immediate, continuing teletype communication.

The cash outlay for such a machine is not large. Teletypewriters range in cost from $50 for a rebuilt model to $1,500 for a deluxe edition. The deluxe model will print the message and has a built-in recording and answering service. Although I do not know exactly how the Sergeant at Arms will provide for the delivery of messages, it seems to me that the operation of the teletypewriter would cost no more than $10,000 or $15,000, maximum. Of course, the benefits that a teletypewriter provides cannot be given a cost value.

Because the cost is so slight, I propose that expenses be paid out of the contingent fund.

TELETYPEWRITERS IN THE GOVERNMENT

This will not be the first teletypewriter operated by the Government in Washington. The IRS, the FCC, the President's Committee on Employment of the Handicapped, the Office of Deafness and Communicative Disorders—HEW, and the National Visitors' Center have these machines. Moreover, the National Bureau of Standards and the General Accounting Office have installed teletypewriters for their deaf employees. I think it is inexcusable if the Senate does not recognize the need for such a service and provide it to the hearing impaired. I see no excuse for perpetuating this oversight.

CONCLUSION

I am hopeful that by providing this opportunity for the hearing impaired to share with us their needs and concerns, we as legislators will gain a better understanding of what it means to have a hearing impairment. Then, we can offer programs tailored to meet the needs of this element of our constituency.

Gradually, the Congress and the American people are becoming more aware of the needs of handicapped citizens. The recommendations coming from the White House Conference on Handicapped Individuals should promote an even stronger awareness of these special needs.

But, no matter how well we intellectually understand the problems, the largest barrier is one of attitudes, of feelings. This amendment is important, for it recognizes that deaf persons should have a voice in our democracy, and that we should allow this constituency the same means of expression that we give to others. I trust that my colleagues will join in support of my amendment to provide this service to deaf and hearing impaired constituents.

Mr. SCHWEIKER. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HUDDLESTON. Mr. President, I do not know of any further amendments and if there are other Members who wish to offer amendments tonight, of course, this is the time to do so as they will be precluded on Monday.

Not hearing any further amendments, I believe that will complete action on this measure for today.

Mr. ROBERT C. BYRD. Mr. President, may I clarify for the record the situation now as to further action on this bill on Monday?

The yeas and nays have been ordered on final passage already.

Have the yeas and nays been ordered on any amendment?

The PRESIDING OFFICER. Just one amendment of the Senator from Nebraska.

Mr. ROBERT C. BYRD. I thank the Chair.

The vote will occur on the amendment offered by the Senator from Nebraska at 4 p.m. on Monday. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Following that vote there can be no further amendments in the first degree offered, and there can be no further debate on the bill or on amendments thereto under the order previously entered. Am I correct?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Amendments to amendments will be in order on Monday without debate, of course. Motions to table will be in order. Points of order will be in order. Appeals from the ruling of the Chair on points of order will be in order. All of these would be without debate and in addition thereto, the yeas and nays may be ordered on Monday to any amendment that is carried over, to any amendment offered on Monday to an amendment, to any motion to table, and to any appeal from the ruling of the Chair on Monday. Am I correct in all of this?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, I should also state that upon the disposition of all amendments to the legislative appropriations bill on Monday the third reading is automatic and the vote on final passage will occur immediately after the third reading without any intervening motions or debate. Am I correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

ADDITIONAL STATEMENT SUBMITTED

Mr. DOMENICI. Mr. President, on behalf of the distinguished senior Senator from Oklahoma (Mr. BELLMON) in his capacity as ranking minority member of the Budget Committee, I want to commend the members and staff of the Subcommittee on Legislative Branch Appropriations. I feel they are to be highly commended for bringing to the floor a bill which, in spite of the considerable upward pressures, does not exceed either the targets contained in the first concurrent budget resolution or the allocations of budget authority and outlays to the subcommittee from the full Appropriations Committee. It is much easier to hold the line on expenditures of which you are not the beneficiary, than to be tough where you and your colleagues are involved. Accordingly, it is worthy of note that the members of the subcommittee have resisted that natural urge and have equitably distributed the limited amounts available under the first concurrent resolution and the allocation process.

I also want to join my chairman in his warning statement about any floor amendments adding spending authority to the committee bill. When we examine the current figures and the possible later requirements, it is evident that there is no room for additional spending under this appropriations bill.

Another important point is the difference between the House version and this bill. If we follow the normal conference procedure we will inevitably wind up with a bill that exceeds both functional targets and allocation limits. Our conferees must insure that such a situation does not come to pass. The easiest way, of course, is to insist on deletion of the House funds for extension of the Capitol.

BUDGET ACT WAIVER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 319, which has been cleared for action.

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk read as follows:

A resolution (S. Res. 218) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1678.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was considered and agreed to, as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) are waived with respect to S. 1678, a bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Such waiver is necessary to permit consideration of statutory authority to extend and improve the administration of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SENATE RESOLUTION 221—AUTHORIZING APPOINTMENT OF A SPECIAL DELEGATION

Mr. ROBERT C. BYRD. Mr. President, the minority leader and I have joined in the sponsorship of a resolution which I now send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk proceeded to read the resolution.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the resolution be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution is as follows:

Resolved, That the President of the Senate is authorized to appoint a special delegation of not to exceed 12 Members of the Senate upon the recommendation of the Majority and Minority Leaders to visit certain countries in South America and other areas as needed to conduct a study on United States economic and security interests in those areas.

Sec. 2. (a) The expenses of the delegation, including staff members designated by the co-chairmen to assist said delegation, shall not exceed $45,000, and shall be paid from the contingent fund of the Senate upon vouchers approved by the co-chairmen of said delegation.

(b) The expenses of the delegation shall include such special expenses as the co-chairmen may deem appropriate, including reimbursements to any agency of the Government for (1) expenses incurred on behalf of the delegation, (2) compensation (including overtime) of employees officially detailed to the delegation, and (3) expenses incurred in connection with providing appropriate hospitality.

(c) The Secretary of the Senate is authorized to advance funds to the co-chairmen of the delegation in the same number provided for committees of the Senate under the authority of Public Law 118, Eighty First Congress, approved June 22, 1949.

Mr. ROBERT C. BYRD. Mr. President, the purpose of this mission will be to examine U.S. economic and security interests in the Latin American area and to explore ways and means by which we and our southern neighbors in this hemisphere can cooperate more effectively in meeting the regional and global challenges of our time—the challenge of energy; the challenge of nuclear nonproliferation; the challenge of economic development; the challenge of human rights—the whole host of challenges and opportunities that must be addressed in this last quarter of the 20th century.

The study mission proposed by this resolution will examine these challenges in the Latin American context. It will afford Members of the Senate a timely opportunity to discuss these issues with the leaders of Latin America; to exchange views on bilateral and multilateral problems alike; and to explore avenues for increased cooperation and improved understanding.

Mr. President, I am convinced that such a study mission to Latin America is long overdue and that now is the time to do it.

After all—

Latin America encompasses some 8 million square miles or roughly 16 percent of the land surface of the globe, stretching from the Rio Grande to Cape Horn.

Latin America houses 300 million people, whose numbers will double by the end of the century.

Latin America consumes annually close to $20 billion worth of U.S. exports and provides us with about an equal amount of imports.

Latin America, next to Western Europe, attracts more U.S. private investment than any other region in the world. Total U.S. investment in Latin America now extends $20 billion.

Mr. President, these facts and figures make it clear that the Senate owes it to itself and to the country to have a fresh look at an "old friend"—our Western Hemisphere neighbors to the south.

I hope the Senate will give its unanimous support to this resolution and the Latin American study mission proposal contained in it.

Mr. STEVENS. Mr. President, considering the recent visit of our First Lady to South America, I think it most appropriate that this resolution has been introduced on a bipartisan basis. I note that Mrs. Carter will be here on Monday to brief Members of the Senate concerning her visit, and I think it most appropriate that the resolution be adopted at this time.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Republican leader for his supporting statement.

The PRESIDING OFFICER. Without objection, the resolution is considered and agreed to.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REORGANIZATION PLAN OF THE EXECUTIVE OFFICE OF THE PRESIDENT—MESSAGE FROM THE PRESIDENT—PM 95

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

I herewith transmit my plan for the Reorganization of the Executive Office of the President (EOP), Reorganization Plan No. 1 of 1977. This plan is the first of a series I intend to submit under the reorganization authority vested in me by the Reorganization Act of 1977 (P.L. 95–17). It adheres to the purposes set forth in Section 901 (a) of the Act.

This plan in conjunction with the other steps. I am taking will:

—eliminate seven of the seventeen units now within the EOP and modify the rest. There were 19 units when I took office; the President's Foreign Intelligence Advisory Board and the Economic Policy Board have already been abolished. Thus with this plan I will have eliminated nine of 19 EOP units.

—reduce EOP staffing by about 250 which includes the White House staff reduction of 134 or 28% which I have already ordered.

—improve efficiency by centralizing administrative functions; and

—improve the process by which information is provided for Presidential decisionmaking.

These recommendations arise from a careful, systematic study of the EOP. They are based on the premise that the EOP exists to serve the President and should be structured to meet his needs. They will reduce waste and cost while improving the service the President, and the nation, receive from the EOP.

The EOP now consists of the immediate White House Office, the Vice President's Office, the Office of Management and Budget, and fourteen other agencies. The EOP has a budget authority of about $80,000,000 and 1,712 full time employees.

The White House Office concentrates on close personal support including policy and political advice and administrative and operational services. The Office of the Vice President provides similar support to him. OMB's primary mission is to develop and implement the budget; it also carries out a number of management and reorganization activities.

Three EOP units have responsibility for policy development:

—National Security Council

—Domestic Council

—Council on International Economic Policy

The other 11 are more specialized offices that offer analysis and advice, help develop policy in certain areas, or carry out special projects. These are:

—Council of Economic Advisers

—Council on Wage and Price Stability

—Office of the Special Representative for Trade Negotiations

—Council on Environmental Quality

—Office of Science and Technology Policy

—Office of Drug Abuse Policy

—Office of Telecommunications Policy

—Intelligence Oversight Board

—Federal Property Council

—Energy Resources Council

—Economic Opportunity Council

To make the EOP more effective, four steps are necessary:

I. Strengthen management of policy issues.

II. Limit the EOP, wherever possible, to functions directly related to the President's work.

III. Centralize administrative services.

IV. Reduce size of White House and EOP staffs.

I. STRENGTHEN PROCESS MANAGEMENT OF POLICY ISSUES

Perhaps the most important function of the President's staff is to make sure

he has the wide variety of views and facts he needs to make decisions. By building a more orderly system for collecting information and advice, the President can make sure that he will hear all the views he should—and hear them in time. To better insure that this happens, I am taking the following actions to:

—Institute for domestic and economic issues, a system similar to the Presidential Review Memorandum process currently used for National Security issues.

—Create a committee of Presidential advisers, chaired by the Vice President, to set priorities among issues and oversee their staffing.

—Assure that Presidential decision memoranda on policy issues are coordinated with Cabinet and EOP advisers most involved with the issue.

—Consolidate under the Staff Secretary the two current White House paper circulation systems.

—Appoint a group of advisers to review the decisionmaking process periodically.

—Give the Assistant to the President for Domestic Affairs and Policy clear responsibility for managing the way in which domestic and most economic policy issues are prepared for Presidential decision.

—Assign follow-up responsibility for Presidential decisions as follows: immediate follow-up will be handled by the NSC or Domestic Policy Staff most directly involved in the issues; long term follow-up on selected issues will be handled by the Assistant to the President for Intergovernmental Relations.

These actions recognize that the White House and Executive Office staff must use their proximity to the President to insure that the full resources of the government and the public are brought to bear on Presidential decisions in a timely fashion. It is my purpose in instituting these changes to strengthen Cabinet participation in Presidential decisions.

II. RATIONALIZE EOP STRUCTURE BY LIMITING EOP, WHEREVER POSSIBLE, TO FUNCTIONS WHICH BEAR A CLOSE RELATIONSHIP TO THE WORK OF THE PRESIDENT

As the President's principal staff institution, there are several major things the EOP must do:

—Provide day-to-day operational support (e.g. scheduling, appointments) and help the President communicate with the public, the Congress, and the press.

—Manage the budget and coordinate Administration positions on matters before the Congress.

—Manage the Presidential decisionmaking processes efficiently and fairly, and bring the President the widest possible range of opinions.

—Help the President: plan and set priorities; monitor and evaluate progress toward achieving the President's objectives; understand and resolve major conflicts among line subordinates; manage crises, especially in national security matters.

In order to restructure the EOP around these basic functions, the functions of seven units should be discontinued or transferred, and ten units, including the White House Office, should be retained but modified.

Seven units should be discontinued or their functions transferred. These are:

1. Office of Drug Abuse Policy
2. Office of Telecommunications Policy
3. Council on International Economic Policy
4. Federal Property Council
5. Energy Resources Council
6. Economic Opportunity Council
7. Domestic Council

The functions of the *Office of Drug Abuse Policy* (ODAP) can be performed by a smaller staff reporting to a Presidential adviser in the EOP. The Office itself will be discontinued.

Much of the work done by the *Office of Telecommunications Policy* (OTP) can be more effectively performed outside the EOP. It is important that the EOP have the capacity to resolve differences and that the President have immediate advice on telecommunications and information policy, especially on national security, emergency preparedness and privacy issues. This only requires a small staff within EOP. The Office of Management and Budget would take responsibility for federal telecommunications procurement and management policy and arbitration of interagency disputes about frequency allocation. All other functions except developing Presidential policy options would be transferred to a new office within the Department of Commerce, headed by a new Assistant Secretary for Communications and Information, who will perform many of the functions previously performed by the head of the OTP.

I propose that the *Economic Opportunity Council* be discontinued; it is dormant and its only active function (preparation of the Catalogue of Federal Domestic Assistance) is being performed by OMB. Three other units are also inactive and should be discontinued: *Council on International Economic Policy*, the *Federal Property Council*, and the *Energy Resources Council*.

The *Domestic Council* should be abolished. It has rarely functioned as a Council, because it is too large and its membership too diverse to make decisions efficiently. Its functions have been performed entirely by its staff. This *Domestic Policy Staff* should report to the Assistant to the President for Domestic Affairs and Policy. Under the policy process system described earlier, they should manage the process which coordinates the making of domestic and most economic policy. They should work closely with the Cabinet departments and agencies to insure that the views of the Cabinet and agency heads are brought to the President before decisions are made.

The ten EOP units which will continue with some modification are:

1. White House Office.
2. Office of the Vice President.
3. Office of Management and Budget.
4. Council on Environmental Quality.
5. Council of Economic Advisers.
6. Office of Science and Technology Policy.
7. Office of the Special Representative for Trade Negotiations.
8. National Security Council.
9. Intelligence Oversight Board.
10. Council on Wage and Price Stability.

The operations of the *Office of the Vice President* reflect the combination of constitutional, statutory, and Presidentially assigned duties that make it unique among EOP units. Because his interests and assignments cover the same range as the President's, the Vice President requires a staff with expertise in diverse areas. Its basic functions should not be changed. However, I propose that certain support functions—involving accounting, personnel services, and supply—be transferred to a centralized EOP Administrative Unit.

The *Office of Management and Budget* would remain as a separate entity in the EOP, but some functional changes should be made. Four functions should be transferred from OMB to other parts of the government:

—Administration to the new EOP Central Administrative Unit;

—Executive Department/Labor Relations (except for Pay Agent, Executive Level Pools, and Legislative Analysis) to the Civil Service Commission;

—Advisory Committee Management Secretariat to the General Services Administration;

—Statistical Policy (except Forms Clearance) to the Department of Commerce.

I have asked the OMB to reorganize its management arm to emphasize major Presidential initiatives, such as reorganization, program evaluation, paperwork reduction, and regulatory reform.

The *Council on Environmental Quality* (CEQ) should remain in the EOP as an environmental adviser to the President. The CEQ's major purpose is to provide an independent assessment of our policies for improving the environment. Toward this end, it will analyze long term trends and conditions in the environment. It will advise OMB on the reorganization of natural resources functions within the Federal government. The Council will retain the functions it now has under NEPA and Executive Order No. 11514 with the exception of routine review of the adequacy of impact statements and the administrative aspects of their receipt and handling. The EPA will take over CEQ's evaluation responsibility under the Federal Nonnuclear Energy Research Development Act of 1974. The CEQ will continue to review and publish the Annual Report on Environmental Quality.

The strength of the *Council of Economic Advisers* (CEQ) lies in its economic analysis of current policy choices. It also presents objective economic data, makes macroeconomic forecasts, and analyzes economic trends and their impact on the national economy. It will continue with a small reduction in staff.

The Office of Science and Technology Policy (OSTP) should retain those science, engineering, and technology functions which can be so useful in helping

the President and his advisers make decisions about policy and budget issues. Instead of the Intergovernmental Science, Engineering, and Technology Advisory Panels, the President should rely on an intergovernmental relations working group, chaired by the Science Adviser. The Federal Coordinating Council on Science and Technology should operate as a sub-Cabinet working group chaired by the Science Adviser. The reorganization work of the President's Committee on Science and Technology would be part of the overall reorganization effort. The responsibility for preparing certain reports should be transferred to the National Science Foundation.

The proposal places manageable limits on OSTP's broad mandate while emphasizing functions that support the President.

The Office of the Special Representative for Trade Negotiations (STR) is now operating effectively and will be retained essentially as is. With the difficult negotiations now underway in Geneva, the benefits of transferring the STR to another agency are outweighed by the potential reduction in its effectiveness as an international negotiator.

The National Security Council (NSC) will be retained in its present form and its staff slightly reduced.

Intelligence Oversight Board (IOB) should be retained to insure that abuses of the past are not repeated and to emphasize Presidential concerns regarding intelligence issues.

The Council of Wage and Price Stability (COWPS) is a necessary weapon in the continuing fight against inflation and will be retained. To be sure that its work is closely coordinated with the economic analyses performed by the Council of Economic Advisers (CEA), COWPS should be directed by the Chairman of CEA.

III. CENTRALIZE ADMINISTRATIVE FUNCTIONS

About 380 (22%) of the full-time, permanent EOP personnel perform administrative support services in EOP units. Most EOP units besides the White House and OMB are too small to provide a full complement of administrative services. They depend on the White House, OMB, GSA, other federal departments, or several of these sources for many of these services. This appraoach is inefficient; the quality is uneven and the coordination poor. Some services are duplicated, others inconsistently distributed (excess capacity in some units and deficiencies in others), and most too costly.

I propose to combine administrative support operations into a Central Administrative Unit in EOP to provide support in administrative services common to all EOP entities. It should be a separate EOP entity because of the need to assure equal access by all other units.

This consolidation will result in:

—saving of roughly 40 positions and about $1.1 million
—improved and more innovative services
—a focus for monitoring the efficiency and responsibility of administrative services
—a base for an effective EOP budget/planning system through which the President can manage an integrated EOP rather than a collection of disparate units.

The EOP has never before been organized as a single, unified entity serving the President. It is only by viewing it as a whole that we can improve efficiency through steps like the Central Administrative Unit.

IV. REDUCE THE SIZE OF WHITE HOUSE AND EOP STAFFS

I am reducing the White House staff by 28%, from the 485 I inherited from my predecessor to 351. This involves cuts in my policy and administrative staffs as well as transfers to the Central Administrative Unit.

I estimate that this plan and the other steps I am taking will reduce staff levels in the EOP by about 250, from 1,712 full-time permanent positions to about 1,460 and will save the taxpayers at least $6 million.

As in the rest of the government, I will be reluctant to add staff unless necessary to help me do my job better.

* * * * *

I ask that you support me in improving the operations of the Executive Office of the President by approving the attached reorganization plan.

In summary this plan would:

—Abolish the Domestic Council and establish a Domestic Policy Staff.
—Establish within the EOP a Central Administrative Unit.
—Transfer certain functions of the Council on Environmental Quality to the President for redelegation.
—Abolish the Office of Drug Abuse Policy and vest functions in the President for redelegation.
—Abolish the Office of Telecommunications Policy and transfer functions to the Department of Commerce and to the President for redelegation.
—Create an Assistant Secretary of Commerce for Communications and Information.
—Vest some Office of Science and Technology Policy functions in the President for redelegation.
—Abolish the Economic Opportunity Council and vest those functions in the President for redelegation.
—Transfer the Committee Management Secretariat function of the Office of Management and Budget to the President for redelegation.
—Make other incidental transfers attendant to those mentioned above.

Each of the changes set forth in the plan accompanying this message is necessary to accomplish one or more of the purposes set forth in Section 901(a) of Title 5 of the United States Code. I have taken care to determine that all functions abolished by the plan are done so only under statutory authority provided by Section 903(b) of Title 5 of the United States Code. The provisions in the plan for the appointment and pay of any head or officer of any agency have been found by me to be necessary.

As we continue our studies of other parts of the Executive Branch, we will find more ways to improve services in the EOP and elsewhere. This plan is only a beginning, but I am confident that it represents a major step toward a more efficient government that will serve the needs of the people and the President well.

JIMMY CARTER.

THE WHITE HOUSE, *July 15, 1977.*

MESSAGES FROM THE HOUSE

At 10:44 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the bill (S. 1019) to authorize appropriations for fiscal year 1978 for certain maritime programs of the Department of Commerce, and for other purposes, with an amendment in which it requests the concurrence of the Senate.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–1666. A letter from the General Counsel of the Department of Defense transmitting a draft of proposed legislation to authorize appropriations during the fiscal year 1978 for procurement of aircraft and missiles, and research, development, test and evaluation for the Armed Forces, and for other purposes (with accompanying papers); to the Committee on Armed Services.

EC–1667. A letter from the Deputy Attorney General of the United States transmitting, pursuant to law, a report on the study of the antitrust issues and problems relating to the production and transportation of Alaskan natural gas (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–1668. A letter from the Administrator of the Environmental Protection Agency transmitting a draft of proposed legislation to amend the Federal Water Pollution Control Act (with accompanying papers); to the Committee on Environment and Public Works.

EC–1669. A letter from the Administrator of the Environmental Protection Agency transmitting a draft of proposed legislation to amend the Federal Pollution Control Act concerning water quality management control programs (with accompanying papers); to the Committee on Environment and Public Works.

EC–1670. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Rocky Mountain Energy Resource Development: Status, Potential, and Socioeconomic Issues" (EMD–77–23) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1671. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act 2–51, an Act to provide for the monetary payment of rewards to certain persons who provide information relating to violations of the District of Columbia revenue laws, and for other purposes (with accompanying papers); to the Committee on Governmental Affairs.

EC–1672. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act 2–48, an Act to provide for deductions for deed recordation taxes and motor vehicle registration fees and for accelerated payment of taxes on insurance premium

receipts (with accompanying papers); to the Committee on Governmental Affairs.

EC–1673. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act 2–53, an Act to amend existing District of Columbia law with regard to cases of child neglect and abuse, to establish procedures for the termination of parental rights in certain situations, and for other purposes (with accompanying papers); to the Committee on Governmental Affairs.

EC–1674. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act 2–52, an Act to amend the District of Columbia plumbing code to require the installation of water conservation devices or fixtures (with accompanying papers); to the Committee on Governmental Affairs

EC–1675. A letter from the Acting Assistant Administrator for Advocacy and Public Communications for the Small Business Administration transmitting, pursuant to law, four reports entitled: (1) "The Study of Small Business", (2) "The Study of Small Business, Part II—What Is A Small Business?", (3) "The Study of Small Business, Part III—The Impact of Taxation on Small Business: A Proposal for Reform", and (4) "The Report of the St. Louis Task Force on Taxation" (with accompanying reports); to the Select Committee on Small Business.

EC–1676. A letter from the Director of the Selective Service System notifying the Senate of the change in dates in submitting the reports covering the operation of the Selective Service System; to the Committee on Armed Services.

EC–1677. A letter from the Secretary of Transportation transmitting, pursuant to law, a report entitled "The Feasibility, Practicability and Cost of the Soundproofing of Schools, Hospitals, and Public Health Facilities Located Near Airports" (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1678. A letter from the Assistant Secretary of the Interior transmitting, pursuant to law, a determination that Union Oil Company of California, Mobil Oil Corporation, and Gulf Energy and Minerals Company—U.S., are entitled to a refund for overpayment of rentals for leases OCS-P 0168, 0170, and 0172 in the amount of $14,524.52; to the Committee on Energy and Natural Resources.

EC–1679. A letter from the Administrator of the Environmental Protection Agency transmitting a draft of proposed legislation to amend the Federal Water Pollution Control Act adding a 'Non-compliance fee' (with accompanying papers); to the Committee on Environment and Public Works.

EC–1680. A letter from the Secretary of the Interior transmitting, pursuant to law, the 1976 annual report of the Office of Water Research and Technology (with an accompanying report); to the Committee on Environment and Public Works.

EC–1681. A letter from the Secretary of the Treasury transmitting a draft of proposed legislation to provide customs procedural reform, and for other purposes (with accompanying papers); to the Committee on Finance.

EC–1682. A letter, dated July 14, 1977, from the Assistant Legal Adviser for Treaty Affairs, Department of State transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC–1683. A letter from the Deputy Assistant Secretary of the Interior transmitting, pursuant to law, a report of two new personal records systems, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–1684. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Outer Continental Shelf Sale 40—Inadequate Data Used to Select and Evaluate Lands to Lease" (EMD–77–51) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1685. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Procedures Used For Holding Architects and Engineers Responsible for the Quality of Their Design Work" (LCD–76–333) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1686. A letter from the Assistant Secretary for Management and Budget, Department of Health, Education, and Welfare transmitting, pursuant to law, two copies of a report on a new system of records, in accordance with the Privacy Act (with accompanying papers); to the Committee on Governmental Affairs.

EC–1687. A letter from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, a report on a new system of records, in accordance with the Privacy Act (with accompanying papers); to the Committee on Governmental Affairs.

EC–1688. A letter from the Secretary of Health, Education, and Welfare transmitting, pursuant to law, the annual report of activities carried out in fiscal year 1976 under the Rehabilitation Act of 1973 (with an accompanying report); to the Committee on Human Resources.

EC–1689. A letter from the President of the Legal Services Corporation transmitting, pursuant to law, a report on the Delivery Systems Study, a research project on the delivery of legal services to the poor (with an accompanying report); to the Committee on Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. WILLIAMS, from the Committee on Human Resources:

Report of the Committee on Human Resources pursuant to section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 95–350).

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources:

With an amendment:

S. 701. A bill to provide Federal financial assistance to educational institutions in order to assist such institutions to meet the emergency caused by the high costs of fuel and fuel shortages and harsh weather conditions, and for other purposes (Rept. No. 95–351).

By Mr. JACKSON, from the Committee on Energy and Natural Resources:

Without amendment:

S. Res. 220. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 701. Referred to the Committee on the Budget.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

With a reservation:

Ex. J, 94–1. Protocol of amendment to the Inter-American Treaty of Reciprocal Assistance (Rio Treaty) (Exec. Rept. No. 95–8).

Without reservation:

Ex. F, 95–1. Agreement with Canada Concerning Transit Pipelines (Exec. Rept. No. 95–9).

With a declaration:

Ex. D, 95–1. Treaty with Mexico on the Execution of Penal Sentences (together with individual views) (Exec. Rept. No. 95–10).

Ex. H, 95–1. Treaty with Canada on the Execution of Penal Sentences (together with individual views) (Exec. Rept. No. 95–10).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent the second time, and referred as indicated:

By Mr. DOMENICI:

S. 1864. A bill to establish the Salinas National Monument in the State of New Mexico and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BARTLETT (for himself and Mr. BELLMON):

S. 1865. A bill for the relief of Magdalen F. Martin, of Broken Arrow, Oklahoma; to the Committee on Veterans' Affairs.

By Mr. INOUYE:

S. 1866. A bill to amend section 222 of the Communications Act of 1934 in order to include Hawaii in the same category as other States for the purposes of such section; to the Committee on Commerce, Science, and Transportation.

By Mr. BARTLETT:

S. 1867. A bill to amend chapter 81 of title 5 of the United States Code to require an independent physical examination of employees of the Government of the United States seeking compensation for work injuries; to the Committee on Governmental Affairs.

By Mr. MELCHER (for himself, Mr. BURDICK, Mr. HAYAKAWA, Mr. HUMPHREY, Mr. ZORINSKY, Mr. STEVENS, Mr. STEVENSON, Mr. YOUNG, Mr. BAYH, Mr. CHURCH, Mr. WEICKER, Mr. MCGOVERN, Mr. ABOUREZK, Mr. GRAVEL, Mr. METCALF, and Mr. LUGAR):

S. 1868. A bill to expedite issuance of Federal permits and development of a transportation system to move Alaskan crude oil to Northern Tier and other inland States, and for other purposes; jointly, by unanimous consent, to the Committee on Commerce, Science, and Transportation, and the Committee on Energy and Natural Resources.

By Mr. YOUNG:

S. 1869. A bill to amend chapter 23 of title 38, United States Code, to increase the amount which may be paid under such chapter to cover the burial and funeral expenses of certain deceased veterans; to the Committee on Veterans' Affairs.

By Mr. KENNEDY (for himself and Mr. WEICKER):

S. 1870. A bill to revise title 23 of the United States Code, relating to highways, terminate the Highway Trust Fund, and amend the Urban Mass Transportation Act of 1964, in order to improve transportation; to the Committee on Environment and Public Works.

By Mr. WILLIAMS (for himself and Mr. JAVITS):

S. 1871. A bill to amend the Fair Labor Standards Act of 1938 to increase the minimum wage rate under that Act, to provide for an automatic adjustment in such wage rate, and to adjust the credit against the minimum wage which is based on tips received by tipped employees; to the Committee on Human Resources.

By Mr. CHURCH (for himself, Mr. LONG, Mr. HUMPHREY, Mr. ANDERSON, Mr. METCALF, Mr. MELCHER, Mr. BURDICK, Mr. YOUNG, Mr. ZORINSKY, Mr. HASKELL, and Mr. HART):

S. 1872. A bill to provide price support for sugar at not less than 60 per centum of the parity price therefor; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. McINTYRE:

S. 1873. A bill to provide improved consumer deposit services; to promote competitive balance among financial institutions; and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

By Mr. KENNEDY (for himself, Mr. MORGAN, and Mr. DANFORTH):

S. 1874. A bill to restore effective enforcement of the antitrust laws; to the Committee on the Judiciary.

By Mr. THURMOND:

S. 1875. A bill for the relief of Catherine and Robert Fossez; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

(Statements in connection with the above introduced bills and joint resolutions are printed at the conclusion of Senate proceedings today.)

ADDITIONAL COSPONSORS

S. 779

At the request of Mr. BURDICK, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 779, to amend the Internal Revenue Code.

S. 1014

At the request of Mr. DOMENICI, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1014, to amend the Internal Revenue Code.

S. 1264

At the request of Mr. CHILES, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1264, the Federal Acquisition Act of 1977.

S. 1276

At the request of Mr. HEINZ, the Senator from North Carolina (Mr. HELMS) and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 1276, to permit more rapid authorization of pollution control equipment.

S. 1307

At the request of Mr. THURMOND, the Senator from Wyoming (Mr. WALLOP) and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of S. 1307, to amend title 38, United States Code.

S. 1353

At the request of Mr. THURMOND, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 1556, to amend chapter 81 of title 28, United States Code.

S. 1556

At the request of Mr. HANSEN, the Senator from Michigan (Mr. GRIFFIN) was added as a cosponsor, of S. 1556, to provide assistance to States for veterans' cemeteries.

S. 1571

At the request of Mr. McINTYRE, the Senator from New Mexico (Mr. SCHMITT), the Senator from Montana (Mr. MELCHER), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 1571, granting the National Ski Patrol Association a Federal charter.

S. 1728

At the request of Mr. ANDERSON, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 1728, the Domestic Violence Prevention and Treatment Act.

S. 1729

At the request of Mr. CURTIS, the Senator from Kansas (Mr. PEARSON) was added as a cosponsor of S. 1729, to amend the Rural Electrification Act of 1936.

S. 1735

At the request of Mr. WALLOP, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1785, to amend title II of the Social Security Act.

S. 1783

At the request of Mr. ANDERSON, the Senator from Alaska (Mr. GRAVEL) and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of S. 1783, to amend the Internal Revenue Code.

S. 1822

At the request of Mr. SCHWEIKER, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1822, to authoirze the transfer of the Gettysburg Address.

SENATE RESOLUTION 114

At the request of Mr. ANDERSON, the Senator from Wisconsin (Mr. PROXMIRE) was added as a cosponsor of Senate Resolution 114, relating to the telecommunications policies of the Federal Government.

SENATE JOINT RESOLUTION 29

At the request of Mr. BURDICK, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of Senate Joint Resolution 29, to designate National Family Week.

SENATE JOINT RESOLUTION 69

At the request of Mr. NELSON, the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of Senate Joint Resolution 69, requiring each executive department and agency to designate a small business advocate.

AMENDMENT NO. 501

At the request of Mr. STEVENS, the Senator from Texas (Mr. TOWER) was added as a cosponsor of amendment No. 501, intended to be proposed to H.R. 7933, the Defense Department appropriation bill, 1978.

SENATE RESOLUTION 220—ORIGINAL RESOLUTION REPORTED RELATING TO THE CONSIDERATION OF S. 701

(Referred to the Committee on the Budget.)

Mr. JACKSON, from the Committee on Energy and Natural Resources, reported the following original resolution:

S. RES. 220

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 701.

Such waiver is necessary because the Committee on Energy and Natural Resources did not receive re-referral of S. 701 until May 20, 1977. The Human Resources Committee reported S. 701 on May 12, 1977. Re-referral was agreed upon with the understanding that the Committee would report S. 701 by July 15 in order to allow the Energy and Natural Resources Committee to consider S. 701 together with Part C of S. 1469, the National Energy Act.

The authorization of $200,000,000 in fiscal year 1978 for energy conservation measures was contemplated by the Committee in its Report to the Budget Committee on March 15, 1977.

SENATE CONCURRENT RESOLUTION 36—SUBMISSION OF A CONCURRENT RESOLUTION OBJECTING TO A PROPOSED SALE OF WEAPONS

(Referred to the Committee on Foreign Relations.)

Mr. CULVER. Mr. President, I am submitting for myself and Senators EAGLETON, BELLMON, CLARK, CRANSTON, LEAHY, NELSON, PROXMIRE, RIEGLE, ROTH, SCHWEIKER, ABOUREZK, HATHAWAY, MCGOVERN, METZENBAUM, and ZORINSKY a concurrent resolution objecting to the sale to the Government of Iran of seven AWACS airborne and control aircraft. We have serious objections to this proposed sale and we believe that the Congress should act to prevent it.

The sale of AWACS aircraft to Iran would risk compromising advanced military technology which is very important for our own national defense. If AWACS are in Iran, and outside of U.S. control, they will be a very tempting target for Soviet intelligence activities. Sensitive U.S. equipment included in the Iranian AWACS could be compromised by accident, defection, or diversion of technical manuals. Access to AWACS technology could accelerate Soviet development of defenses against low-flying aircraft and missiles, significantly enhance Soviet intelligence capabilities, and facilitate Soviet electronic countermeasures against a U.S. and NATO AWACS force. The Congress should not allow foreign sales to risk compromise of our advanced technolgy.

In addition, the AWACS sale would exacerbate the problems involved in the large-scale presence of Americans in Iran to support advanced U.S. weaponry. Several hundred more Americans will be required to make the AWACS system operational, and continuing contractor support would be needed for the life of the system. Moreover, the Iranian Air Force apparently has a serious shortage of trainable personnel, and it is unlikely that AWACS requirements can be met without affecting other Iranian programs. AWACS is precisely the kind of advanced system that requires substantial American technical support, and it is the time for restraint in this aspect of our arms sales relationship with Iran.

The AWACS sale also goes against the U.S. interest in a stable military balance and arms control in the Middle East and

Indian Ocean regions. AWACS has a potent offensive capability as an airborne command and control center. Secretary Brown has called AWACS a force multiplier for the effectiveness of tactical air forces. The introduction of a less capable airborne command center over North Vietnam multiplied our aircraft kill ratio by a factor of 6. Iran has already received or ordered hundreds of modern tactical aircraft. The AWACS capability to greatly multiply the offensive power of these aircraft can only increase apprehensions over Iran's growing military might and neighboring nations may seek new weapons in response. President Carter has said that the United States will not be the first supplier to introduce into a region a new or significantly higher combat capability. It would be a serious mistake to set a precedent by making this sale to Iran a major exception.

We do not dispute Iran's legitimate air defense needs. There are alternative ways to meet Iranian requirements. The study on improvements in Iranian air defenses which supports this sale did not properly consider alternatives to AWACS. A General Accounting Office report made available to us yesterday concludes that the policy justification presented to the Congress is inadequate.

The Congress by law has an important responsibility to review foreign military sales proposals to determine if they are discriminate and consistent with U.S. interests. President Carter's new policy is that foreign military sales should be permitted only when it can be clearly demonstrated that they contribute to U.S. national security interests. In our judgment, the AWACS sale proposed for Iran is consistent with this basic criterion.

Mr. President, I ask unanimous consent that the text of the concurrent resolution and the General Accounting Office report be printed in the RECORD.

There being no objection, the concurrent resolution and report were ordered to be printed in the RECORD, as follows:

S. CON. RES. 36

Resolved by the Senate (the House of Representatives concurring), That, pursuant to section 36(b) of the Arms Export Control Act, the Congress objects to the sale to the Government of Iran of seven airborne warning and control aircraft, proposed by the President in his message to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate on July 7, 1977 (transmittal number: 77–46).

[Report of the Comptroller General of the United States]

ISSUES CONCERNING THE PROPOSED SALE OF THE AIRBORNE WARNING AND CONTROL SYSTEM E–3 TO IRAN

Hon. JOHN C. CULVER,
U.S. Senate.

DEAR SENATOR CULVER: This is in response to your request of May 27, 1977, for information on the proposed sale to Iran of the E–3 aircraft (the Airborne Warning and Control System (AWACS)) under the Arms Export Control Act (Public Law 94–329, title II). (unclassified)

Specifically, you raised questions about technological security problems, the possibility of the system being used for offensive purposes, and the implications involved in stationing American personnel and dependents in Iran to support this equipment. (unclassified)

We analyzed documents on Iran's air defense requirements, reviewed responses to your questions furnished to us by the Departments of State and Defense (see apps. I and II) and discussed these matters with appropriate officials. The policy justification for the sale was also reviewed and discussed with State and Defense officials. (unclassified)

(Deleted.)

In this report, we point up what appears to be shortcomings in the studies which have been made by the Department of Defense and the Department of State. (See pp. 5 and 6.) We further set forth our reservations with respect to the justification presented to the Congress in the statement of our conclusions and recommend specific matters which we believe need further justification and the attention of the Congress. (See pp. 12 through 14.) (unclassified)

(Deleted.)

We have not attempted to render judgment with respect to the overall foreign policy considerations which may be involved in the proposal. We would like to point out, however, that should these reasons be important in this case a countervailing consideration in that the AWACS is a highly complex system and should it become too complex for Iranian operation and maintenance, it could possibly cause a strain between the two countries and have a counterproductive effect in this regard. (Unclassified)

It should be pointed out that the sale of seven aircraft by the Department of Defense would have the effect of possibly reducing the cost of U.S. Air Force AWACS. This point is mentioned particularly since the Congress has not approved procurement of AWACS in the numbers desired by the Air Force and the potential for substantial sales to the North Atlantic Treaty Organization (NATO) appears to be diminishing because of the system's high cost. Should the additional sales to NATO not materialze, the Iranian sale could offset to some degree the higher U.S. costs which would be otherwise involved and could be a factor in the desire of the Air Force to consummate the Iranian sale. (Unclassified)

Comments on our report were received from the Departments of State and Defense and the Director of Central Intelligence. These comments were included where considered appropriate. (Unclassified)

Following a brief background of the AWACS-Iran issues this letter discusses the air defense study which supports the AWACS sale, the responses to the questions about the sale we received from the Departments of State and Defense and the Director of Central Intelligence, our expanded views, and recommendations to the Congress. (Unclassified)

BACKGROUND

(Deleted.)

One study resulted in a report in October 1974 that advocated development of a ground-based radar system (later designated the "Seek Sentry" program). The report indicated that the mountainous terrain and special environmental conditions in Iran, such as temperature inversion, could justify about 40 ground-based radars to achieve full coverage around the borders and to control air traffic within the country. After further studies contractor proposals were invited in June 1975. Several contractors were designated for further negotiations, best and final offers were submitted in September 1976, but development was canceled by the Iranians in April 1977 shortly after the AWACS sale was approved. We were unable to ascertain the circumstances that led to the decision by Iran to obtain an AWACS and radar system in lieu of a radar only system. (Unclassified)

Interest in AWACS

(Deleted.)

The Iranian Air Defense Improvement Study which was completed in January 1977 was conducted by a combined team from Defense, ARMISH, and MAAG. Eight different options—combinations of airborne and ground radar systems—evolved from this study offering limited to full coverage of the Iranian air space. The study presented the following options and estimated costs which represent rough approximations. (Unclassified)

(Deleted.)

Study shortcomings

Under the ground rules laid down by the Government of Iran, the analysts were not free to examine a range of alternatives. For instance, the "given" airborne system was composed of 7 to 9 AWACS. The study did not consider a greater or lesser number of AWACS. Also by specifying only the AWACS, other less expensive candidate airborne systems, such as the Air Force's EC–121, the Navy's E–2C Hawkeye, and the United Kingdom's Nimrod were barred from consideration: (Unclassified)

In comments to us on our report the State Department provided information previously not available: (Unclassified)

(Deleted.)

State and Defense Departments positions

The responses to specific questions given to the Departments of State and Defense are summarized below and are included in full as appendixes I and II. (Unclassified)

(Deleted.)

Iran could net its land and naval tactical equipments, present and known future ones, into the AWACS command and control center. This would permit AWACS to serve as an airborne command and control center. (Unclassified)

(Deleted.)

Assessment of the Director of Central Intelligence

The assessment of the Director of Central Intelligence is in appendix III. The main points follow: (Unclassified)

(Deleted.)

Implications of additional U.S. personnel in Iran

(Deleted.)

POLICY JUSTIFICATION

The advance notification to the Congress of the sale of AWACS to Iran included a policy justification which in essence stated that: (Unclassified)

High costs and difficult technological and logistical problems were associated with the previous plan for an all ground radar system. (Unclassified)

The all ground system would cost about $2.6 billion plus the costs of opening up sparsely populated areas for access to the radar stations. Such additional costs are estimated by the Iranian Government to be as much as $15 billion. (Unclassified)

About 6,500 technically trained personnel and over 20,000 nontechnical personnel would have been required for a ground-based system. (Unclassified)

The Government of Iran sought a more cost-effective approach to air defense than a ground-based system. The AWACS presented such an approach. (Unclassified)

The U.S. Department of Defense estimated that 7 AWACS together with between 12 and 21 ground radars would provide Iran with optional degrees of air defense and air traffic control coverage. (Unclassified)

The total cost of the AWACS and ground radar system would be less than $3 billion and would reduce manpower requirements to 3,000 specially trained and 6,900 nontechnical personnel. (Unclassified)

The current proposal could be implemented sooner and less expensively than the previously proposed ground-based radar system. (Unclassified)

Iran's security is important to the United States. (Unclassified)

Our discussions with State and Defense Department officials resulted in the following clarifications and/or questions which should be noted: (Unclassified)

The contractor proposals for the ground-based radar system offered technologically acceptable solutions. (Unclassified)

The cost of $2.6 billion for the ground-based system includes complete communications for control facilities. The $3 billion cost cited for the AWACS/radar system does not include all the necessary communications and control facilities. (Unclassified)

The estimated cost of $15 billion for civilian and military infrastructure is purely an estimate of the Government of Iran. In our opinion, the estimate is probably excessive if related only to the radar stations. (Unclassified)

The justification points out that Iran sought a cost-effective approach in lieu of an all ground-based system. No alternatives, other than AWACS, were considered however. (Unclassified)

(Deleted.)

CONCLUSIONS

In our opinion, the justification presented to the Congress in support of the proposed AWACS sale to Iran is inadequate because: (Unclassified)

The previous proposal for an all ground-based system would have provided a higher level of air defense. (Unclassified)

Other possibly more cost-effective alternatives were not considered. (Unclassified)

The current proposal deals with only a portion of the requirements for an air defense system. (Unclassified)

(Deleted.)

AWACS can enhance Iran's ability to conduct offensive military operations. Sales of systems with offensive capabilities are contrary to stated administration policies. (Unclassified)

While the justification offered is, in our opinion, inadequate, it should be recognized there may be other undiscovered reasons underlying the proposed sale. (Unclassified)

RECOMMENDATIONS

We recommend that, during the forthcoming hearings on the proposed AWACS sale to Iran, the committees address the following questions. (Unclassified)

1. Are there valid reasons, other than those presented that would justify the sale? (Unclassified)

2. What would be the effect on U.S.-Iranian relations if AWACS proves to be excessively costly, difficult to maintain, and does not provide for adequate air defense? (Unclassified)

3. Is the security risk involved overcome by the possible advantages of the sale? (Unclassified)

4. When will proposals be given to the Congress for the other needed elements of the air defense system (ground radars and command and control facilities)? Should the entire air defense package be considered at one time instead of in separate segments? (Unclassified)

5. Are additional studies needed to adequately address the mix of systems and alternatives to AWACS to meet Iran's air defense requirements? (Unclassified)

6. Do studies and analyses adequately support the view that 7 AWACS plus 12 to 21 off-the-shelf ground radars are less expensive for equivalent defense capability? Does the Government of Iran agree? Would it be better for Iran and the United States to reconsider a purely defensive, ground radar system to meet round-the-clock Iranian air defense requirements? (Unclassified)

7 Considering the projected shortfall of trained Iranians does this mean that U.S. citizens may be required to both operate and maintain the AWACS force for an extended time? What are the impacts of this involvement? (Unclassified)

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

Mr. RIEGLE. Mr. President, I am among the cosponsors of the resolution submitted by the distinguished Senator from Iowa to disapprove the sale to Iran of seven Airborne Warnings and Control System, AWACS, aircraft. These planes incorporate the very most advanced technology ever developed for the electronic surveillance and analysis of military situations. They have been described as important "force multipliers," and are likely to form one of the key elements of NATO security.

The proposed sale to Iran of AWACS raises serious questions regarding the potential compromise of this critical technology, as well as obvious considerations regarding the impact of this sale upon the stability of the region around Iran and Iran's ability to operate and maintain these complex systems without the support of hundreds of American technicians.

I am sure that these and other issues will be explored in depth when the resolution of disapproval reaches the floor of the Senate. An important part of that debate is certain to be the analysis by the Central Intelligence Agency, the arm of our Government responsible for assessing Soviet intelligence activities outside the United States, of the risks of compromising the technology of AWACS.

The CIA provided, at the request of the General Accounting Office, an opinion in this matter. In its recommendations, the GAO urges that the risk of compromising AWACS should be weighed against any other possible benefits likely to be associated with the sale. In light of what I know about this sale, and in view of the President's own declared policy toward foreign military sales, the GAO's recommendation seems to make very good sense.

It is my understanding that while the CIA's judgment was based upon an objective examination of the situation, there are now, unfortunately, serious pressures coming to bear upon the CIA to change its view. I hope that either the indications of these pressures prove to be false, or that the pressures will not bring into question the reliability of CIA intelligence estimates, so vital to national policymaking. It would be a serious complication in this debate, which already involves critcal questions of national security and foreign policy, if we also have to consider the possibility that the integrity of analysis by the CIA is subject to political pressures.

AMENDMENTS SUBMITTED FOR PRINTING

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1978—H.R. 7933

AMENDMENT NO. 516

(Ordered to be printed and to lie on the table.)

Mr. TOWER submitted an amendment intended to be proposed by him to the bill (H.R. 7933) making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs will hold 3 days of hearings, on September 12, 13, and 14, on S. 1710, a bill to authorize the issuance of charters for carrying on the business of insurance, to provide for the guarantee of the insurance obligations, and for other purposes. This bill was introduced by Senator BROOKE on June 16, 1977.

The hearings will be held in room 5302, Dirksen Senate Office Building and will begin at 9:30 a.m. each day. Requests to testify on this legislation should be submitted in writing before August 20, 1977, to the following address: Committee on Banking, Housing, and Urban Affairs, U.S. Senate, room 5300, Dirksen Senate Office Building, Washington, D.C. 20510, Attention Florence Barr.

SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

Mr. HARRY F. BYRD, JR. Mr. President, a hearing by the Subcommittee on Taxation and Debt Management of the Finance Committee will be held on July 25, 1977, on S. 1514. The bill would amend section 4941 of the Internal Revenue Code of 1954 and section 101(1)(2) of the Tax Reform Act of 1969.

The sponsor of the legislation is Senator JAMES B. ALLEN, and the bill is cosponsored by Senators JOHN SPARKMAN and STROM THURMOND.

The hearings will begin at 2 p.m. in room 2221 Dirksen Senate Office Building.

The intended beneficiaries of the bill are: Public Welfare Foundation Inc., a nonprofit private foundation organized by Charles E. Marsh which is exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code of 1954; the taxable, wholly owned subsidiaries of Public Welfare Foundation, Inc.—the Spartanburg Herald and Journal Inc., the Gadsden Times, Inc., and the Tuscaloosa News, Inc., and three newspaper operators—Newspapers Management-Production, Inc., Gadsden Times Publishing Corp., and Tuscaloosa Newspapers, Inc.—who lease the assets owned by Public Welfare Foundation, Inc.'s wholly-owned subsidiaries.

The principal owners of the three operating companies are, respectively, Phil Buchheit, Frank Helderman, Sr., and James B. Boone, Jr. The newspapers operate in South Carolina and Alabama. No revenue loss or gain is anticipated from the measure.

Witnesses who desire to testify in the hearings should submit a written request to Michael Stern, Staff Director, Committee on Finance, room 2227 Dirksen Senate Office Building, Washington, D.C. 20510 by no later than the close of business on July 21, 1977. Treasury comments on the proposed legislation are requested.

ELECTRIC AND GAS UTILITY RATE REFORM

Mr. JOHNSTON. Mr. President, the Subcommittee on Energy Conservation and Regulation of the Senate Committee on Energy and Natural Resources will hold an initial 2 days of hearings on part E of S. 1469, President Carter's proposal with respect to the reform of rate structures of the Nation's electric and natural gas utility companies. These hearings will commence at 8 a.m. on July 27 and 28 in room 3110 of the Dirksen Senate Office Building. The subcommittee will receive testimony from representatives of the administration, the Federal Power Commission, certain States, and selected private witnesses.

As many of my colleagues are aware, this is a complex issue with potentially far reaching impacts on our economy and on our energy future. I anticipate that the subcommittee will be holding further hearings on this matter after the August recess.

Questions about these hearings should be directed to Ben Cooper or James T. Bruce of the committee staff at 224–9894.

S. 242—FEDERAL RECLAMATION LAWS

Mr. METCALF. Mr. President, I wish to announce for the information of the Senate and the public, the scheduling of a public hearing before the Public Lands and Resources Subcommittee of the Senate Energy and Natural Resources Committee.

The hearing is scheduled for August 11, at the Holiday Inn in Great Falls, Mont. The precise time for the hearing will be announced later. Testimony is invited regarding S. 242, a bill to provide for consideration of the comparative productive potential of irrigable lands in determining nonexcess acreages under Federal reclamation laws.

For further information regarding the hearings, you may wish to communicate with Mr. Russell Brown of the subcommittee staff on extension 224–2366. Those wishing to testify or who wish to submit a written statement for the hearing record, should write to the Public Lands and Resources Subcommittee, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510 or communicate with my field secretary, Mrs. Sally Jordan, room 4435, Federal Office Building, Billings, Mont. 59101, telephone 406–259–5966.

S. 1671—ABSAROKA-BEARTOOTH WILDERNESS

Mr. METCALF. Mr. President, I wish to announce for the information of the Senate and the public, the scheduling of a field hearing before the Parks and Recreation Subcommittee of the Senate Energy and Natural Resources Committee.

The hearing is scheduled for August 10, 1977, in room 148, Library, East Montana College, Billings, Mont. Testimony is invited regarding S. 1671, a bill to designate the Absaroka-Beartooth Wilderness, Custer and Gallatin National Forests, in the State of Montana.

For other information regarding the hearings you may wish to communicate with Mrs. Sally Jordan, Field Secretary to Senator METCALF, room 4435, Federal Building, Billings, Mont. 59101, (406) 259–5966, or in Washington, Mr. Thomas Williams of the subcommittee staff on extension 47145.

NOMINATIONS

Mr. WILLIAMS. Mr. President, I wish to announce that the Committee on Human Resources has scheduled a hearing on Thursday, July 21, 1977, at 9.30 a.m. in room 4232 Dirksen Senate Office Building, on the nominations of:

Patricia Albjerg Graham, of New York, to be Director of the National Institute of Education;

Earl Oliver, of Illinois, to be a member of the Railroad Retirement Board for the remainder of the term expiring August 28, 1978;

Mary Frances Cahill Leyland, of New York, to be an Assistant Director of the ACTION Agency;

John Robert Lewis, of Georgia, to be an Associate Director of the ACTION Agency;

Irene Tinker, of Maryland, to be an Assistant Director of the ACTION Agency;

Sar A. Levitan, of the District of Columbia, to be a member of the National Commission on Employment and Unemployment Statistics;

John B. Gabusi, of Arizona, to be an Assistant Director of the Community Services Administration;

Robert Stern Landmann, of New Mexico, to be an Assistant Director of the Community Services Administration;

Robert Nathaniel Smith, of Michigan, to be an Assistant Director of the Community Services Administration.

Persons wishing to testify or submit statements, please contact: Martin Jensen, room 4230 of the committee staff.

ANTITRUST AND MONOPOLY SUBCOMMITTEE

Mr. KENNEDY. Mr. President, there will be a hearing of the Antitrust and Monopoly Subcommittee of the Committee on the Judiciary on Thursday, July 21, and Friday, July 22, on S. 1874, a bill to restore effective enforcement of the antitrust laws. The hearing will be held in room 2228 Dirksen Senate Office building, beginning at 9 a.m. each day.

ADDITIONAL STATEMENTS

(Additional statements are printed at the conclusion of Senate proceedings today.)

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I am under the impression that I procured an order earlier today to the effect that upon the disposition of the orders for the recognition of Senators on Monday, the Senate proceed to the consideration of the Department of Defense appropriation bill.

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

STATUE OF THE LATE SENATOR GRUENING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 321.

The PRESIDING OFFICER. The concurrent resolution will be stated.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 25) providing for the acceptance of a statue of the late Senator Ernest Gruening presented by the State of Alaska for the National Statuary Hall collection, and for other purposes.

Mr. STEVENS. Mr. President, my colleague (Mr. GRAVEL) is in the chair and this is his bill I have cosponsored. I am pleased that the majority leader has called it up so we can proceed with the acceptance of the statue of our distinguished late colleague, Ernest Gruening, of Alaska. We have already placed in Statuary Hall the statue of my predecessor, the Honorable E. L. Bartlett. This will complete the process of recognition of the two first Senators of Alaska by accepting the statue of Ernest Gruening. I am sure my colleague will have some remarks for himself. I am pleased to cosponsor that resolution.

(Mr. ROBERT C. BYRD assumed the chair.)

Mr. GRAVEL. Mr. President, I thank my colleague for bringing up this matter. I think it is a matter of some honor for both of us to be present on the floor at this time for the passage of this legislation which will permit the State of Alaska to honor one of its most distinguished leaders by putting him in the Hall of Recognition, the Hall of Statues here in the Congress. With that, we join the rest of our colleagues in making this statement of respect to a person who certainly left his mark in this Chamber.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 25) was agreed to, as follows:

S. CON. RES. 25

Providing for the acceptance of a statue of the late Senator Ernest Gruening presented by the State of Alaska for the National Statuary Hall collection, and for other purposes

Resolved by the Senate (the House of Representatives concurring), That the statue of the late Senator Ernest Gruening, presented by the State of Alaska for the National Statuary Hall collection, is accepted in the name of the United States, and the thanks of the Congress are tendered to the State of Alaska for the contribution of the statue of one of its most eminent personages, illustrious for his distinguished civic services.

SEC. 2. The State of Alaska is authorized to place temporarily in the rotunda of the

Capitol the statue of the late Senator Ernest Gruening referred to in the first section of this concurrent resolution, and to hold ceremonies in the rotunda on that occasion. The Architect of the Capitol is authorized to make the necessary arrangements therefor.

SEC. 3. (a) The proceedings in the rotunda of the Capitol at the presentation by the State of Alaska of the statue of the late Senator Ernest Gruening for the National Statuary Hall collection, together with appropriate illustrations and other pertinent matter, shall be printed as a Senate document. The copy for such document shall be prepared under the direction of the Joint Committee on Printing.

(b) There shall be printed five thousand additional copies of such document which shall be bound in such style as the Joint Committee on Printing shall direct, of which one hundred and three copies shall be for the use of the Senate and three thousand copies shall be for the use of the Members of the Senate from the State of Alaska, and four hundred and thirty-nine copies shall be for the use of the House of Representatives, and one thousand four hundred and fifty-eight copies shall be for the use of the Member of the House of Representatives from the State of Alaska.

SEC. 4. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the Governor of Alaska.

Mr. GRAVEL. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. GRAVEL). The Senator from West Virginia.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there is one nomination on the Executive Calendar. I will inquire of the distinguished assistant Republican leader as to whether or not that nomination is cleared.

Mr. STEVENS. Mr. President, we have no objection to the consideration of the nomination.

Mr. ROBERT C. BYRD. I thank the distinguished assistant Republican leader.

Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of D. Lee Rampey, Jr., of Georgia, to be U.S. attorney for the middle district of Georgia.

There being no objection, the Senate proceeded to the consideration of executive business.

DEPARTMENT OF JUSTICE

The assistant legislative clerk read the nomination of D. Lee Rampey, Jr., of Georgia, to be U.S. attorney for the middle district of Georgia.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 10:30 a.m., Monday. After the two leaders or their designees have been recognized under the standing order, Mr. CURTIS and Mr. BAKER will each be recognized for not to exceed 15 minutes, at the conclusion of which the Senate will proceed to the consideration of the DOD appropriation bill, H.R. 7933. Under the order previously entered, no rollcall votes will occur prior to the hour of 4 p.m. Monday, but amendments to the DOD appropriation bill will be called up early during the day and any rollcall votes ordered on such amendments or motions in relation to that bill will follow the votes which will occur on the legislative appropriations bill and amendments thereto and motions in relation to the same which have already been scheduled to begin at 4 p.m. Monday.

There will be several rollcall votes in connection with the legislative appropriations bill on Monday without debate. As I have already stated, such rollcall votes will begin at the hour of 4 p.m.

The DOD appropriations bill is going to be transacted under a time agreement. It is possible that action on the bill may be completed on Monday. If not, the bill will carry over until Tuesday, at which time action would be resumed thereon.

RECESS UNTIL 10:30 A.M., MONDAY, JULY 18, 1977

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 10:30 a.m., Monday.

The motion was agreed to; and at 7:45 p.m. the Senate recessed until Monday, July 18, 1977, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate July 15, 1977:

DEPARTMENT OF STATE

Allard Kenneth Lowenstein, of New York, to be the Alternate Representative of the United States of America for Special Political Affairs in the United Nations, with the rank of Ambassador.

DEPARTMENT OF AGRICULTURE

Sarah Weddington, of Texas, to be General Counsel of the Department of Agricultural, vice James D. Keast, resigned.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Patricia Albjerg Graham, of Massachusetts, to be Director of the National Institute of Education, vice Harold L. Hodgkinson, resigned.

COMMUNITY SERVICES ADMINISTRATION

John B. Gabusi, of Arizona, to be an Assistant Director of the Community Services Administration. (New position.)

Robert Stern Landmann, of New Mexico, to be an Assistant Director of the Community Services Administration. (New position.)

Robert Nathaniel Smith, of Michigan, to be an Assistant Director of the Community Services Administration. (New position.)

CONFIRMATION

Executive nomination confirmed by the Senate July 15, 1977:

DEPARTMENT OF JUSTICE

D. Lee Rampey, Jr., of Georgia, to be U.S. attorney for the Middle District of Georgia for the term of 4 years.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

(Statements in connection with bills and joint resolutions introduced today are as follows:)

By Mr. DOMENICI:

S. 1864. A bill to establish the Salinas National Monument in the State of New Mexico and for other purposes; to the Committee on Energy and Natural Resources.

Mr. DOMENICI: Mr. President, today I am introducing a bill to establish the Salinas National Monument by combining Gran Quivira National Monument and two State monuments, Abo and Quarai in New Mexico.

The National Park Service conducted an investigation to determine the suitability and feasibility of operating Abo, Quarai, and Gran Quivira as a three-unit monument under a single managing agency in 1974. The study indicated that factors were favorable for the establishment of Salinas National Monument and proposed that it be administered and operated as a part of the National Park System.

In 1909, President William H. Taft set aside the Gran Quivira National Monument to protect and preserve the ruins of prehistoric Indian pueblos and associated 17th century Franciscan Spanish mission ruins. This monument consists of 610.94 acres under Federal ownership and there are 21 pueblo mounds, 10 kivas, and 2 church complexes which require preservation and protection.

In 1938, Abo became a State monument under the administration of the Museum of New Mexico. Only the church and convento of Abo have been excavated. The mission has been partially restored and stabilized. Other archeological resources include three large house mounds, one small house mound, numerous pictographs and petroglyps, several field houses and portions of a prehistoric trail. This unit would be accepted from the State by donation and an additional 350 acres of private land would be acquired to restore the integrity of the historical scene and to encompass additional ruins, petroglyphs, and picto-

graphs in the area, as well as provide land for development.

In 1935 the Quarai State Monument was established under the administration of the Museum of New Mexico. There are two mission churches and convento, nine Indian house mounds, pitroglyphs, ruins of an early Spanish corral, and remnants of a historic dam. The present States monument is approximately 15 acres in size.

In 1974 the State legislature passed Senate bill 19, and the act was signed by the Governor enabling the State to cede jurisdiction of Quarai and Abo State Monuments to the National Park Service for inclusion in the Salinas National Monument upon presentation by the Park Service of an approved development plan.

By Mr. BARTLETT:

S. 1867. A bill to amend chapter 81 of title 5 of the United States Code to require an independent physical examination of employees of the Government of the United States seeking compensation for work injuries; to the Committee on Governmental Affairs.

Mr. BARTLETT. Mr. President, the legislation which I introduce today will essentially reverse one of the changes included in the 1974 amendments to the Federal Employees Compensation Act, FECA. The amendment to which I refer now allows Federal employees to choose any private physician to examine and certify a job-related injury or illness. Prior to 1974, title 5 required a claimant to submit to a physical examination by a medical officer of the United States, whenever one was available.

The estimate of the cost of the free choice of physicians amendment in 1974 was far too conservative. This clause, along with the continuation of pay revision, have accounted for an alarming increase in the number of claims filed and accepted under the Federal employees compensation program. This increase is reflected in the number of injuries reported. Between 1972 and 1973 the total number reported under the FECA increased from 109,578 to 112,740—an increase of slightly over 2,000 claims. During the same amount of time from 1975 to 1976, the number of injuries reported grew from 144,897 to 191,172—an increase of over 46,000. This startling increase in the number of reported injuries occurred just 1 year after the 1974 revisions went into effect.

Mr. President, I was not aware that working for the Federal Government had only recently become such a hazardous occupation. I think it is ironic that all of these so-called injuries have occurred at a time when the Occupational Safety and Health Administration, OSHA, has been siphoning off the taxpayers' money at a clip of $117 million per year. I do not believe that Congress can allow this disgraceful situation to continue. Ultimately, it is the American taxpayer who must once again pay the price for more irresponsible Federal spending.

The increases in medical claims under the FECA can be attributed to the loosened eligibility requirements passed by Congress in 1974. Accompanying the increasing number of claims has been a startling increase in the cost of the employees compensation fund. In 1973, the cost of the fund was about $218 million. By 1976, the cost had skyrocketed to over $477 million. By 1978, the Department of Labor estimates that the cost of the Federal employees compensation fund will be over $700 million. In other words, in only a 5-year period, the cost of the claims alone will have increased 322 percent.

Mr. President, I ask unanimous consent that a letter from the U.S. Department of Labor, Office of Workers' Compensation Programs, containing statistical data on the FECA program, be printed in the RECORD at the end of my statement.

Injury compensation claim activity is at an all-time high, and is increasing at an unjustified rate. I believe that this level of activity is unreasonable and should never have occurred.

Because of the liberalization of the program, all types of claims are being submitted under the FECA and virtually every claim submitted is being accepted. The present system actually encourages Federal employees to quit work and apply for disability benefits. Workers are entitled to 75 percent of their salary, tax-free. When a worker can select his own physician to certify his disability, who can blame him for attempting to take advantage of this lucrative arrangement. Heart conditions, high blood pressure, and other stress-related conditions, for example, are being accepted wholesale as occupational diseases, without the necessary medical examinations to determine if these conditions are actually job-related.

Due to the overwhelming caseload, and lenient Federal directives for claims adjudication, the Office of Workers' Compensation is very liberal in ruling in the claimant's favor. The following case decision summary appeared in the Digest of Decisions of Employees' Compensation Appeals Board, Construction of the FECA:

> Compensation acts shall be liberally construed in favor of the injured employee or his dependent family.

While the number of workers' compensation claims has multiplied, the number of full-time employees assigned the job of processing the claims has increased only slightly. Between 1970 and 1976, claims increased by 126 percent. There was an increase in cases on the periodic rolls of 80.7 percent. To handle these increases, FECA program staff resources increased only 36.6 percent, to 478 from 350. The result has been a substantial inventory of unprocessed work, hastily processed claims, and unnecessary costs.

The Office of Workers' Compensation cannot be faulted for these increased costs. The OWCP has worked under enormous pressure to examine and adjudicate claims—pressure from claimants, Congressmen, union officials, and attorneys. Senate staff members, working in the field offices, are aware of the number of constituents inquiring as to the status of their FECA claim. These constituents are usually complaining about the delays they encounter when applying for initial benefits. Many cases have taken several months before a final determination can be made and a Treasury voucher approved. The congressional response to this deplorable state of affairs has been sadly predictable—3,500 congressional inquiries per month to the OWCP on behalf of dissatisfied claimants.

Primary responsibility for the present state of the FECA program lies not with the Office of Workers' Compensation, but with the Congress. The OWCP is required to pay all benefits due to injured Federal Employees under the law. The benefit levels and the standards for eligibility were established by Congress. It was Congress which passed the 1974 amendment which now allows a private physician to determine a worker's degree of disability. I believe the Congress should recognize and correct its mistake.

If a claimant sees enough doctors, he will no doubt find a sympathetic one who will verify a connecting link between the disability—if one even exists—and factors of employment. Generally, only one supporting medical document is sufficient to rule in favor of the claimant.

In many cases, private practitioners are not familiar with the conditions of employment. Or, being all too human, the private physician may give sympathetic treatment to the viewpoint and history communicated to him by his patient. The medical report prepared by the doctor may then contain only the viewpoint and history of the accident as related to him by the claimant. These incomplete or inaccurate medical reports place the Federal claims examiner in a difficult position when trying to verify the job-related illness or injury. Unfortunately, the examiner must rely upon this report because the OWCP is prevented by law from having the employee submit to an independent medical examination.

Mr. John C. Read, former Assistant Secretary of Labor for Employment Standards, alluded to this human discretion problem last year in his statement to the House Government Operations Committee, which was then investigating the Federal workers' compensation program. He stated:

> Because of the difficulty of adjudicating workers' compensation claims, no doubt some have been delayed and others paid where more time and attention may have yielded a different result. Adjudication of these claims requires human judgment based on factual and medical evidence, all of which are often less than conclusive.

Mr. President, the legislation which I introduce today will require a claimant to submit to an examination by a medical officer of the United States, or a physician designated by the Secretary of Labor. The report of the medical officer or designated physician shall include a description of the nature and extent of the injury or illness, but not the degree of disability. The degree of disability shall be determined by the FECA claims examiner, based upon the evidence of the medical report.

These changes will help to eliminate the chances for fraud or human mistake. The precise medical reports will guarantee swifter adjudication by the Office of Workers' Compensation. In the end, Federal employees will benefit by receiving quicker responses to their claims. The OWCP will benefit by increased uniformity and quality control. Finally, the cost of the program will stabilize when the number of claim submissions decreases to realistic level.

Mr. President, many articles have been brought to my attention in the last year which describe the problems in the Federal employees compensation program. One article, in particular, has been sent to me by Oklahomans who are upset with the abuses which the present FECA permits. "Workers' Compensation—A License to Steal?" appeared in Reader's Digest last October. I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

I also ask unanimous consent that a transcript from the CBS News presentation, "Sixty Minutes," be printed in the RECORD. This excellent and fascinating production, entitled, "Beating the System," points out the very real problem of fraud in the Federal workers' compensation program. This transcript is reprinted with the written permission of CBS News and may not be published or reprinted without their consent. Mr. President, I also ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1867

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first sentence of section 8123(a) of title 5, United States Code, is amended to read as follows:

"(a) The Secretary of Labor shall require, and an employee shall submit to, an examination by a medical officer of the United States, or a physician (other than a physician who has treated the employee for any injury with respect to which a claim relates) designated or approved by the Secretary of Labor, after the employee submits a claim under section 8121 of this title and as frequently and at such other times and places as may be reasonably required, to determine the nature and probable extent of the disability.

(b) Section 8124(a) of such title is amended by striking out "and" at the end of paragraph (1), by redesignating paragraph (2) as paragraph (3), and by inserting after paragraph (1) the following new paragraph:

"(2) considering the findings of the medical officer or physician under section 8123 of this title as to the nature and probable extent of the injury; and".

(c) Section 8121(6) of such title is amended by striking out "and the nature and probable extent of the disability".

SEC. 2. The amendments made by the first section of this Act shall apply with respect to any claim for compensation filed after the date of the enactment of this Act.

ATTACHMENT

Response to Questions Posed in March 3, 1977 Letter From The Honorable Dewey F. Bartlett, U.S. Senate (All financial data are expressed in thousands of dollars)

Question 1: The total appropriation to the Department of Labor each year since 1972.

Response: The appropriations for the Division of Federal Employees' Compensation since 1972 are as follows:

[Dollars in thousands]

1972	$6,437
1973	[1] 6,705
1974	8,272
1975	10,529
1976	13,278
1977	[2] 17,785

[1] No appropriation was enacted; the amount shown reflects the continuing resolution amount received in fiscal year 1973.

[2] Includes supplemental request still pending.

Question 2: The appropriation which the Secretary requested each year to be made to the Employees' Compensation Fund, and the actual amount appropriated; also since 1972.

Response: The requests and appropriations for the Employees' Compensation fund during 1972 through 1976 are as follows:

[Dollars in thousands]

1972:	
Requested	$126,880
Appropriated	112,000
1973:	
Required	105,992
Appropriated	105,992
1974:	
Requested	124,610
Appropriated	124,610
1975:	
Requested	155,054
Appropriated	155,054
1976:	
Requested	275,959
Appropriated	275,959
1977:	
Requested	[1] 307,407
Appropriated	288,276

[1] Includes $19,131,000 supplemental request which is still pending in Congress.

Question 3: The cost of the Employees' Compensation Fund each year since 1972.

Response: Cost of Employees' Compensation Fund for 1972 through 1976 are as follows:

[Dollars in thousands]

1972	$190,024
1973	217,770
1974	270,676
1975	367,544
1976	477,387

Question 4: The administrative cost of the Division of Federal Employees' Compensation since 1972.

Response: The administrative cost for the Division of Federal Employees' Compensation during 1972 through 1976 are as follows: [4]

[Dollars in thousands]

1972	$6,412
1973	7,106
1974	9,146
1975	11,004
1976	13,484

Question 5: The number of personnel employed for the administration of the FECA each year since 1972.

[4] Excludes support cost associated with OWCP, ESA.

Response: The number of full-time permanent positions employed by the Division of Federal Employees' Compensation since 1972 are as follows:

1972	422
1973	402
1974	415
1975	453
1976	470

Question 6: The number of claims filed under the FECA program each year since 1972; and the total claims granted.

Response: a. The number of initial claims for compensation filed since 1972 is as follows:

1972	26,774
1973	28,231
1974	31,025
1975	35,615
1976	40,324

In addition, it should be noted that for every injury reported, there is a possibility that a claim for medical expenses will be involved, either by itself or in combination with the claim for compensation. It is estimated that approximately 80% of total injuries reported each year involve a claim for medical expenses. Accordingly, an estimate of the number of medical claims cases can be imputed from the following data showing the total number of injuries reported since 1972:

1972	109,578
1973	112,740
1974	123,009
1975	144,897
1976	191,172

b. Data on total claims granted each year are not available.

Question 7: The total cash amount of the claims granted under FECA since 1972.

Response: Likewise these data are not available in relation to the claims granted. However, the cash amount disbursed on account of all claims granted and paid each fiscal year (many of which would be for continuing claims as opposed to initial claims) are reflected in the response to Question 3.

Near the end of your letter you ask for an estimate of the cost incurred in carrying out the PL 93-416, 1974 FECA Amendments. Based on actual data for FY 1976 and as reflected in the future year caseload projections, there are indications that the continuation-of-pay provisions and other changes created by the 1974 Amendments have acted as an incentive to file claims. The conclusion can be drawn that overall costs to the Federal Government, given claims paid by salary continuation, have increased as a result of the Amendments and if present trends are maintained, will continue to increase. The cost directly associated with the 1974 FECA Amendments are not identifiable.

However, for comparison purposes, actual and estimated figures for the major cost components of the Federal Employees' Compensation Act are listed in the table below:

[Dollars in thousands]

Fiscal year	Permanent disability	Medical	Temporary disability	Death	Extensions [5]	Total costs
1976 actual	$286,784	$63,118	$70,462	$41,669	$14,999	$477,212
1977 estimate	367,425	78,964	83,593	45,056	15,960	590,998
1978 estimate	445,147	92,292	97,945	48,555	16,205	700,144

[5] Refers to certain extensions to the Act (such as Armed Force Reservists, War Claims Acts, and Federal Relief Projects).

WORKERS' COMPENSATION—A LICENSE TO STEAL?

(By KENNETH Y. TOMLINSON)

A 47-year-old Naval shipyard employe who had spent his entire career in a film-engraving room suddenly announced that he had suffered a hearing loss and demanded remuneration under the federal employes' compensation program. The loss, he said, had been caused by "incessant humming of the heating and air-conditioning unit and the constant noise of typewriters." Navy officials challenged his claim. Nevertheless, the Department of Labor's Office of Workers' Compensation Programs (OWCP) awarded the man $12,127, tax free.

A Postal Service clerk who had falsified employment forms to conceal a criminal record was given a 30-day dismissal notice. The day his discharge became final, he claimed he slipped on a rubber band, injuring his back. For 18 months he received taxpayer-financed medical treatment before a doctor concluded there was nothing physically wrong with him. Meanwhile, he collected more than $10,000, tax free, in federal workers' compensation.

After spending 5½ months recuperating from minor rib and back injuries suffered in a fall, a crane operator was told by his doctor that he could return to work. Instead, the worker hired a lawyer and demanded permanent-disability benefits. An impartial medical examiner testified that the worker's ailments stemmed from alcoholism, not his accident. But a Labor Department judge found him to be permanently and totally disabled and granted him $840 a month for life. (In addition, he is entitled to Social Security and other disability benefits.) The judge also awarded his lawyer nearly $7,000.

Behind these and countless similar cases are two federal statutes: the Federal Employes' Compensation Act (FECA), covering three million federal-government employes, and the Longshoremen's and Harbor Workers' Compensation Act, protecting nearly 900,000 people—from dock workers to non-federal employes in the District of Columbia.

FISCAL NIGHTMARE

When Congress rewrote the longshoremen's act in 1972 and the FECA in 1974, the new statutes were acclaimed "model" laws for compensating job-related injuries. Indeed, supporters said the measures constituted a blueprint for revision of compensation laws in the 50 states that cover most of the nation's 98-million work force.

In recent months, however, these "model" laws have come to symbolize an administrative and fiscal nightmare. Women have used taxpayer dollars for "job-related" D and C (dilation and curettage of the uterus) surgery. Men have collected for injuries suffered playing softball. Result: taxpayers are stuck with the tab for a government program that has been exploited by cheats and charlatans.

Runaway costs have marked the federal workers' compensation program. When FECA was revised, Congress and the Administration estimated that the new provisions would add no more than $8.3 million to the program's cost in fiscal 1976. In fact, the cost of the benefits soared from $271 million in 1974 to nearly $475 million this year. To be sure, inflation has contributed to these spiraling expenses, as have salary increases. But in the same period, reported injuries resulting in time loss from work nearly doubled. Government has a solemn obligation to ensure compensation for injuries on the job. This does not mean, however, that benefits should be paid to malingerers and outright extortionists. Here are the major areas of abuse:

DISTORTED STANDARDS

According to a provision in the 1974 act, federal employes can draw full pay for up to 45 consecutive workless days by presenting a doctor's statement confirming a work-related injury. This continuation-of-pay provision was meant to ease the financial burden on employes who could receive no pay until their claims were processed. But it has become an open invitation to loafers. Federal agencies cite case after case—from a painter who missed five days' work because of a small splinter in his thumb to a secretary who sat out seven workdays because of a "nervous condition" brought on by a reprimand from her boss. A shipyard employe recently returned to work only to discover that she had been out just 42 days. She promptly returned home for her remaining three days.

Hearing-loss claims represent another compensation area where safeguards against abuse are sorely lacking. For example, in the late 1960s, workers at a Naval shipyard learned of a private consultant who promised fat hearing-loss settlements from OWCP. In just three years the consultant was responsible for an estimated 2,500 claims at this one shipyard. The news of huge awards spread quickly to shipyards throughout the country, as did the fact that OWCP was approving nearly 90 percent of the claims—including $42,000 to a 75-year-old retired civil servant who had worked at a desk job since 1929. Result: the cost of compensating Naval hearing-loss claims skyrocketed to $17.1 million last year, and it is estimated that pending claims could nick the taxpayers more than $60 million.

Doctor shopping—the practice of going from one physician to another until a claim is approved—often ends up with the claimant under the care of an accommodating psychiatrist. Four physicians who examined an Air Force worker claiming injury from a minor fall could find no evidence of lasting disability. But the worker receives $621 a month in compensation and will continue to do so indefinitely—because a psychiatrist certified a permanent nervous disorder and linked it to the alleged injury.

FALSE CLAIMS

Last year, in New York, a robust longshoreman collected $4400 in compensation while supposedly recovering from a head injury—his fourth successful claim in four years. Under questioning at recent Waterfront Commission hearings, he admitted working in his own ironworks business while drawing compensation. Films shown at the hearings also revealed a dock worker, "plagued" by a bad back, doing strenuous yard work at home; a longshoreman who walked with ease until he approached a claims office—where he developed an exaggerated limp; and a clerk, also "disabled" by a bad back, feverishly hitting golf balls at a driving range in preparation for 18 holes at a nearby country club.

WEAK ENFORCEMENT

Despite voluminous evidence of such widespread fraud, the Department of Labor has sought only a handful of prosecutions in recent years, none of which the Justice Department pursued. Prosecutions would serve as a significant deterrent to bogus claims, but OWCP often fails to complete even basic investigations, according to a study by the General Accounting Office (GAO). Example: In 1972, a federal employe was placed on the temporary total-disability rolls because of a bad back. An OWCP regional office should have quickly determined his potential for other employment. Not until 1975, when he was reported working in a used-car lot and on occasion riding a motorcycle up to 200 miles in a single day, did OWCP direct the claimant to go to a state-employment service for "job evaluation." Seven months later, GAO could find no evidence that he had done so. Meanwhile, the man continued to draw compensation checks of $1239 a month.

Three years ago, a Louisville mail carrier filed a claim for fallen arches. Without making any serious effort to investigate the case, the OWCP blithely awarded him $28,800. Later, the Postal Service ordered the mailman to undergo examination by an orthopedic specialist, who found that he was not only fit for full duty but that his fallen arches were not job-related: the problem had been with him all his life. The new evidence will have no bearing on his case, however. Under the federal employes law, claimants can appeal OWCP rulings. Employers cannot.

Another post-office employe, supposedly unable to perform light clerical duties because of a back injury, managed to carry a full-course load at a local university while drawing compensation. After the student had spent most of a 20-month period on the disability rolls, his physician responded to a request that he visit the post office to see how much exertion was necessary to do his job. The doctor advised the student—by now in law school—that he could go back to work. Almost immediately after his return to duty, the student claimed to have suffered a recurrence of his injury, went to another doctor, and drew compensation for another six months. All told, the student received nearly $12,000 from OWCP.

PRESCRIPTION FOR CHANGE

During recent House Government Operations Subcommittee hearings, the Labor Department's administration of FECA was condemned by federal-agency spokesmen and members of Congress alike. "Who wrote these idiotic regulations?" fumed Rep. Fernand J. St Germain (D., R.I.). OWCP's director, Herbert A. Doyle, Jr., countered that in FECA fraud is "very rare" and examples of abuses are "very small"—a position which is refuted by numerous authorities and those who must deal with the program. Meanwhile, it is estimated that the cost will increase 100 percent during the next four years.

Obviously, both the law and its administration are sorely in need of an overhaul. Strict definitions of what constitutes job-related injuries should be written into law. Agencies must be allowed to appeal questionable awards and empowered to order independent physical examinations. Claimants with minor injuries should be required to wait at least three days before being granted continuation of pay—no hardship since federal employes receive 13 sick-leave days each year. And if the Labor Department (when properly staffed with claims examiners and investigators) will not cooperate in writing and enforcing proper regulations, then these programs should be placed under the jurisdiction of another federal agency that will.

The prospect of Congress instituting meaningful reforms is doubtful. In fact, organized labor is pushing for legislation imposing upon all the states liberal benefit standards which could lead to the same kind of practices that plague the federal program. Clearly, this must not happen. Yet it could, unless concerned citizens let Washington know such a giveaway will not be tolerated. Meanwhile, abuses must be stopped and existing federal-compensation laws reformed. You can start by writing your Senators and Representatives today.

"60 MINUTES," CBS TELEVISION NETWORK,

FEBRUARY 13, 1977

(With CBS News Correspondents Morley Safer, Mike Wallace and Dan Rather)

("Beating the System?"—produced by Norman Gorin)

("Bradley"—produced by John Drimmer)

("Project Seafarer"—produced by Richard Clark)

MIKE WALLACE. After just five years on the job, many of these men and women earn more than twenty-five thousand dollars a year. But recently some of these air traffic controllers have found a way to make money

by not working at all. How do they do it? They get the Federal Government to give them workers' compensation. Uncle Sam will pay you, during the time you're not working, seventy-five percent of your top wage—plus periodic cost-of-living increases, all of it tax-free. And it can go on for your lifetime.

BEATING THE SYSTEM?

MIKE WALLACE. Time was, you worked for Uncle Sam, did your job and kept your nose clean, and at the end of your federal service you'd wind up with a fair-sized pension for the rest of your life. Well, times have changed. Today some folks in the federal establishment have found a way to beat the system, to get Uncle Sam to take care of them, long before old age sets in.

Watch.

[Air traffic controllers radio exchanges]

WALLACE. These men and women try to keep the airlines safe. They try to make sure that airplanes in flight won't collide. And mostly, their record in doing that job is a good one. For many of them this job is fulfilling. It is also very rewarding. You see, eighteen thousand air traffic controllers nationwide may just be the highest-paid group of all federal employees. And they reach that pay scale rather quickly. After just five years on the job, many of these men and women earn more than twenty-five thousand dollars a year. But recently some of these air traffic controllers have found a way to make money by not working at all.

How do they do it? They get the Federal Government to give them workers' compensation. You see, a government employee is entitled to workers comp money if he can show that his disability is work related, no matter how it happened or whose fault it was. At first it was easy to determine if the employee should receive this money, because most job injuries were self-evident, things like broken bones. But as technology advanced, Uncle Sam began paying compensation for a whole new category of injuries called "long term occupational diseases". They could be caused by stress, anxiety, tension. They are tougher for a doctor to pinpoint. but they can pay off.

How much can a government employee make from OWPC? That's government jargon for workers' comp. Uncle Sam will pay you, during the time you're not working, seventy-five percent of your top wage—plus periodic cost-of-living increases, all of it tax-free. And it can go on for your lifetime.

Dr. Richard Butler is regional flight surgeon for the Federal Aviation Administration.

Doctor, what's the chief reason that so many air traffic controllers are leaving the F.A.A. on workmens' compensation?

Dr. BUTLER. At this time, I'd have to say that the majority of them are going out because it is more financially advantageous for them not to work than to work.

WALLACE. You mean they're not sick?

Dr. BUTLER. I have difficulty in answering that, because they are not coming through me, to be made disqualified.

WALLACE. Wait a minute! You're the flight surgeon here; so that when an air traffic controller feels anxiety or tension on the job, doesn't he have to come to you?

Dr. BUTLER. No. They go to a private physician of their choice.

WALLACE. You see, in 1974, when Congress liberalized the Compensation Law and gave the right to any federal employee to choose his own doctor, this meant that it became possible to shop around for a sympathetic private physician.

Don Wood is the chief of that air traffic control center outside Atlanta. In the past two and a half years, he has seen twenty percent of his five-hundred-and-fifty-man work force go out on workers' comp.

There is anxiety, there is tension, in this job here in this room.

WOOD. Certainly, there is! But I'm not sure that there's as much as we've been led to believe by the number of individuals that have gone out, due to anxiety, neurosis or whatever. But the temptation is just too great, for the individual to continue to work.

WALLACE. It's conceivable that a fellow would make more money, tax-free, on workmens' comp, than he would make doing a full-time job here, because he'd have to pay his taxes on it.

WOOD. It's not only conceivable; it's factual. He does make more—probably five to seven thousand dollars in his pocket more—per year.

WALLACE. Veterans employees like Bob Dyson and Dan Bauer worry that the rash of OWCP claims—or *punching out* as it's called, by their colleagues—will spoil it for those who will really need it in the future.

Over the first fifteen years that you worked here, how many went out on workmens' comp?

BAUER. I don't remember the first case of it

DYSON. Nobody that I know of.

WALLACE. Well, what's more, they claim that working conditions for controllers have actually improved over the past few years.

BAUER. It's no harder. In fact, it's much easier than it used to be.

WALLACE. Why?

BAUER. We had—Well, we have much better radar and more people.

WALLACE. So the tension's down. The work's down. The anxiety is down.

DYSON. I think so, definitely.

WALLACE. When a fellow who's been out here five years, six years, says "I want to get seventy-five percent workmens' comp," how does he go about inside his own head, and with you people, building a case?

BAUER. Well, he'll—usually he'll start out, probably takes quite a bit of sick leave. And he'll start talking more about it, than he normally has been. And they may get involved in some situations that we're not real happy about out here in their work. I mean, maybe get some traffic a little too close, or—and this will be documented. And naturally, when they apply for this OWCP, this will show up in their claim also.

WALLACE. There is another telltale sign though, that a controller may be planning to punch out. And that is when he suddenly begins to buy big-ticket items.

BAUER. Well, he may go out and buy a new motor home or a big boat, maybe a couple of automobiles, and talk about it out here. Of course, we don't see all that here, other than the new automobiles.

WALLACE. Not long ago, just before some of the air traffic controllers began punching out, they'd take out loans from the credit union, here at the FAA building in Atlanta, across from the airport—loans for boats or cars or campers. And at the same time, they took out disability insurance on those loans, so that when they were declared disabled, unable to work as air traffic controllers, the insurance companies had to pay off their loans for them. The companies won't tell us how much it cost them, but the scuttlebutt is it cost a half a million dollars. And the companies have stopped writing that kind of insurance.

Is it possible for a man who really wants out, is it possible for him to fake the symptoms, so that he can be certified occupationally disabled?

WOOD. Certainly it is.

WALLACE. Have you ever faced one of your guys and said, "I think you're faking"?

WOOD. No.

WALLACE. Why not?

WOOD. Well, I'm never really perfectly sure. I'm not a doctor. I suspect he is, but there's always a possibility the man is really sick.

WALLACE. But how can a doctor tell that it's the job of the air controller that's the principal cause of the tension and anxiety?

Dr. BUTLER. This gives me a real problem. Because in order to be eligible, to become eligible for workmen's compensation, the air traffic controller's disability must be job-related. Now, there is seldom one single source of anxiety.

WALLACE. The man who lives in this house is a former controller who's been out on OWCP for the past two years. He has been getting $19,000 a year, tax-free. The reason? His doctor certified that his high blood pressure was induced by the tensions of his work. He would not be interviewed.

The man who lives here with his family is thirty-three years old. He was an air traffic controller for seven years. Then he punched out. Today he receives $1443 a month. That is seventy-five percent of his gross salary, tax-free. In addition, he gets a thousand dollars a month from his disability insurance policy. That will go on for two and half more years. He wouldn't let us talk to him; nor would he let us photograph him playing tennis.

One former air traffic controller who would talk to us is Ron Soroko. He was on the job for five years. Then, a year and a half ago, he went out on OWCP because his psychiatrist (the same doctor who treated the others) said that his diabetes condition was aggravated by the stress of his job. Now he gets around $16,000 a year, tax-free.

So, basically, you're—you're in better shape, financially, outside than in?

SOROKO. I'd say that would be—Yes, sir. That's right.

WALLACE. You know that there's a certain amount of hostility on the part of Don Wood, Dr. Butler who feel that too many former air traffic controllers are simply taking advantage of OWCP. You know that there is that feeling, at the center?

SOROKO. I would say that there must be that feeling down there, because when I went down there they were very suspicious of me. Maybe it's because of these few, that they know, went out—and maybe they weren't, maybe, all that sick.

WALLACE. How many do you know who've really tried to get another job?

SOROKO. Very few. However, those same few are now beginning to say, "Hey! There's got to be something more in life."

SID EDWARDS. Maybe it goes back to the old ethic—that everybody's supposed to work. And that's not a bad ethic—that everybody's supposed to work. And maybe their conscience is bothering them that they're not working.

WALLACE. Sid Edwards, a 17-year veteran of air traffic control, has been non OWCP for three years now. Edwards, though, at the age of 47, unlike many of his former colleagues is using his compensation money to train for a new career.

EDWARDS. I really don't want to be on their dole. Now I'm going to accept it until some time as I can support myself, if—if—if they give it to me. And the second incentive is: It is my understanding they can stop that at any time they so decide that you're no longer disabled.

WALLACE. But nobody checks them.

EDWARDS. Well now, I—I must admit, I've never been rechecked.

WALLACE. You see, that job of checking is handled by a small agency called the Office of Workers' Compensation Programs, inside the huge U.S. Department of Labor. That office not only approves claims, but pays out the compensation—half a billion dollars last year. It's also supposed to see whether an employee has recovered from his work-related illness.

Ron, have you ever met anybody from the Department of Labor, face to face? Have they checked up on you?

SOROKO. No.

WALLACE. They call you on the phone occasionally?

SOROKO. One time.

WALLACE. Less than five hundred people nationwide handle all the paper work for OWCP, which last year alone had to take charge of two hundred thousand new cases. This Jacksonville regional office gets over 2,000 new claims a month. And there are 9,000 people on their permanent rolls who receive compensation. William O'Keefe is the man in charge.

Well, how many people work on claims, in workmens' comp, in—out of this office?

O'KEEFE. Thirteen.

WALLACE. Thirteen? And you have 2,000 new cases a month and 9,000 permanent cases?

O'KEEFE. Yes. Thirteen claims examiners.

WALLACE. He examines how many cases a day?

O'KEEFE. Oh! Seventy, seventy-five, I guess. I—I haven't even—even any idea of the figures. It's according to how many are in—in his office.

WALLACE. Okay. That's about ten in an hour—in an eight-hour day.

O'KEEFE. Right. Now, you get a tough anxiety case, heart case; you may put four or five hours of solid work on that before you can move it off your desk.

WALLACE. Well, how in the world can you cover seventy to eighty cases a day, if you have to put four to five hours on one case?

O'KEEFE. You fall behind.

WALLACE. Can a person who's getting workmens' comp work?

O'KEEFE. Yes, he can. In fact, we encourage it very much.

WALLACE. Does he have to report his income?

O'KEEFE. Yes. Sometimes we put him to work But he does have to report his income.

WALLACE. Of course, the reason many don't report it is because it would reduce the amount of their tax-free compensation.

Have you ever heard of a fellow named Glenn Pierce?

O'KEEFE. Yes.

WALLACE. You know him?

O'KEEFE. No.

WALLACE. What do you know about him?

O'KEEFE. I believe he's a bowler.

WALLACE. Glenn Pierce, who lives in Jacksonville, is probably the oldest rookie bowler in the history of the professional tour. In 1976 he earned over $16,000 as a pro. Until July of 1975, though, Pierce had been an air traffic controller for over twenty years. He was able to leave the FAA on workers' compensation when the Department of Labor agreed with his physician that his ulcers were caused by his job.

My understanding is that you have retired on workmens' comp at something like $22,000 a year, and that's tax-free.

O'KEEFE. Yeah.

WALLACE. That's pretty good.

PIERCE. Well, you know, if I'm—I'd rather be well than get that.

WALLACE. And you're now forty years old?

PIERCE. Hm-hmm.

WALLACE. So you could be on workmen's comp at $22,000 a year tax-free for thirty-five years.

PIERCE. Oh, yeah—Well—I hope so, until I die.

WALLACE. Let me ask you something. Isn't bowling very tense? Isn't that very anxiety-making too?

PIERCE. Sure.

WALLACE. That is, bowling for—for pay, the way you do.

PIERCE. Sure. Well yeah, but I can quit. I couldn't quit if I was out there.

WALLACE. At air traffic control.

PIERCE. If I—If I started having a stomach problem, I just quit and go home.

WALLACE. In effect, Glenn Pierce, the—the—the U.S. Government is backing you in a small business enterprise, which is your bowling career. Right?

PIERCE. No. No, I wouldn't say that. I don't feel like they're backing me, really. It's my money. I worked for it.

WALLACE. If I had not brought this to your attention, he could have gone on and on and on, on the pro bowling tour.

O'KEEFE. Well, a person, to go on and on and on, would—would have to submit a false report.

WALLACE. According to Pierce, though, filing false reports on earnings may not be uncommon among his former colleagues who are now reviewing workers' compensation.

PIERCE. After five years, six years, these guys try to bail out and get all this free money and then they go get them a job and make more money, you know.

WALLACE. Without reporting to the Labor Department.

PIERCE. Sure, without—under-the-table stuff, you know. I don't know what they got going. I heard, once, a guy had a jewelry store and—and it's easy—it's easy to get away with it. Just put it in your wife's name.

WALLACE. So if they want to rip the system off, they can.

O'KEEFE. Well, they—they would have to commit a crime.

WALLACE. I understand that. It's not unheard of.

O'KEEFE. That's true, but—Good! Let me put the question to you. What's the alternative? We send out the form letter, asking "Have you're—" Well, what we ask is: "Please list your earnings for the past year." And they write back "None." And the medical report and file says this person is unable to work. In the meantime, he's working as an ironworker, forty stories up in an—at Miami, under another name.

WALLACE. Or his wife has a business, in her name, in which he's working.

O'KEEFE. This could be. But I don't know how—how we can possibly follow it up.

WALLACE. Or a widow has remarried again. Or an air traffic controller is on the bowling circuit. Or—or—or!

O'KEEFE. These situations can happen. But they would have to commit a crime in order to proceed.

WALLACE. But how many have you prosecuted for committing a crime?

O'KEEFE. None in this office, since I took it over on August 1st, 1959.

WALLACE. There's not been one case of fraud out of this office? Prosecute?

O'KEEFE. There's not been one prosecution.

WALLACE. Why?

O'KEEFE. There has not been——

WALLACE. Why?

O'KEEFE. —a prosecution.

WALLACE. Why?

O'KEEFE. We've never found a fraud.

WALLACE. How many investigators do you have checking up on them? Claims?

O'KEEFE. None.

WALLACE. None?

O'KEEFE. None. I used to have investigators.

WALLACE. And what happened?

O'KEEFE. They were eliminated.

WALLACE. Because?

O'KEEFE [laughing]. Because the Secretary of Labor eliminated them.

WALLACE. Two footnotes. Last week, the insurance company that wrote disability policies for at least thirty of the Atlanta air traffic controllers, sued 12 of those controllers, and the psychiatrist who had certified their disability. The insurance company wants half a million dollars back. And about our bowler, Glenn Pierce, shortly after the Labor Department learned about his professional bowling career, they cut him off workers' comp.

By Mr. MELCHER (for himself, Mr. BURDICK, Mr. HAYAKAWA, Mr. HUMPHREY, Mr. ZORINSKY, Mr. STEVENS, Mr. STEVENSON, Mr. YOUNG, Mr. BAYH, Mr. CHURCH, Mr. WEICKER, Mr. MCGOVERN, Mr. ABOUREZK, Mr. GRAVEL, Mr. METCALF, and Mr. LUGAR):

S. 1868. A bill to expedite issuance of Federal permits and development of a transportation system to move Alaskan crude oil to Northern Tier and other inland States, and for other purposes; jointly, by unanimous consent, to the Committee on Commerce, Science, and Transportation, and the Committee on Energy and Natural Resources.

Mr. MELCHER. Mr. President, I ask unanimous consent that S. 1868 be jointly referred to the Committee on Commerce, Science, and Transportation and the Committee on Energy and Natural Resources.

I might say this request has been cleared with both committee chairmen and with the ranking members of both committees.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAYH. Mr. President, I was delighted with the President's recent decision not to export to Japan any of the oil which will soon be flowing through the Alaska pipeline. Along with many of my colleagues, I opposed the Alaska pipeline route because it was obvious to many of us, even years ago, that the Alaskan route would not provide oil to the sections of the country that needed it most, but would likely result in a surplus of oil on the west coast.

That prediction has now come true. The Alyeska pipeline was officially opened late in June and, assuming that there are no further mishaps such as the recent explosion at the Fairbanks pumping station, by this fall or winter we will be experiencing a surplus of 500,000 to 600,000 barrels of oil per day on the west coast.

Mr. President, the proven reserves in Alaska's North Slope have been estimated at 10 billion barrels. In all likelihood, there is probably closer to 30 billion barrels there. At a rate of 1 million barrels per day, that oil supply will last for at least 90 years. We must act immediately to get this oil to sections of the country in deperate need of it, and to reduce our dependence on unstable sources of foreign oil.

The situation is going to get worse, not better. The Canadians are continuing their gradual reduction of exports to the United States. By 1982 we will get no more Canadian oil. The loss of this crude will result in idling greater than half of the capacity of northern tier refineries.

Unfortunately, no transportation system currently exists to easily move Alaskan oil to energy deficient areas of the Nation. However, several initiatives are underway in the private sector to add to existing pipelines and make efficient transportation of Alaskan oil to northern tier refineries possible. We must do all we can to expedite the construction of these additional pipelines.

On February 28, I joined with Senator MELCHER and 14 other colleagues in urging the Federal Energy Administration to recommend a means of expediting the construction of these new pipelines as required by section 18 of the Alaskan Natural Gas Act. Unfortunately, the report issued by the Federal Energy Administration, in response to this requirement, did not recommend strong executive action. This was true despite the fact that the FEA agreed that the pipeline proposals were technically feasible and could be made operational within the next few years.

In light of this earlier response, I was quite pleased last week when the administration, speaking through the President's energy adviser, Mr. Schlesinger, commented favorably on pending proposals by the private sector to develop pipelines to carry surplus Alaskan oil from the west coast to northern tier and Midwestern States. The President's decision to keep Alaskan oil in the United States should come as encouraging news to those involved in these initiatives and step up efforts on their part to move ahead as quickly as possible.

In order to facilitate this process, Mr. President, Senator MELCHER and I, along with several of our colleagues, are introducing legislation today to make sure that proposals will go to the top of the agenda within the Interior Department and other agencies with jurisdiction over this matter. I imagine now that the administration has ruled out Japanese exports as a means of disposing of the anticipated west coast oil surplus, and commented favorably on pipes to carry the surplus oil east, that the Interior Department will do its very best to facilitate the Federal review and permit process, as well as preparation of the necessary environmental impact statements.

However, Senator MELCHER and myself, as well as our other cosponsors, want to make sure that the Department has all the authority it needs to speed the construction of these pipelines and that we iron out any other bottlenecks which the Congress can address. In addition, I think this effort represents a clear expression of congressional interest and concern over the need for a system to deliver Alaskan oil to those places that need it and I am hopeful that our action today will make such a system a top priority for all Federal agencies and departments involved. I am also optimistic about our chances of getting hearings for this legislation sometime late this summer, with Senate floor action to follow as quickly as possible.

Mr. President, the legislation we are introducing today would do the following: first, it would require the Secretary of Interior to review all applications pending on the date of enactment of this bill for issuance of Federal rights of way, permits, leases, and other authorizations necessary for construction and operation of these systems as well as mandating that he establish a timetable for completion of all required environmental impact statements.

Second, it would give the Secretary all the authority he needs to get information from the companies involved as quickly as possible.

Third, it would require that other agencies on which the Interior Department must rely to carry out its responsibilities under this act must submit requested information or provide assistance at the earliest practicable date after receipt of such requests.

Fourth, it would require the Secretary to make a decision on which system or systems to approve no later than February 1, 1978.

Fifth, it sets up specific criteria that the Secretary must take into account in making his decision to assure that the oil distributed by this system will be made available to those areas which need it most, in an equitable manner, and in a way that provides a long-term solution to the west coast crude oil surplus.

Sixth, it avoids endless delays caused by litigation once the Secretary has made a decision by limiting judicial challenges to 60 days after a decision is made and then placing these cases as the highest priority on the court's docket with a deadline for a decision. This provision should prevent delays without denying access to the courts for groups finding themselves in opposition to the Secretary's decision. They would just need to act quickly.

Mr. President, we are only several months away from the winter season. I predict it will not be long before my part of the country will be experiencing shortages of natural gas. We saw last winter the enormous economic and human costs of such shortages—plant shutdowns, unemployed workers, and school and hospital closings.

Right now many people are commenting on the supposed "oil glut". However, Mr. President, mark my words, the day is not far off then we will not have enough oil in this country for our most basic of needs. We must not fool ourselves about this. Until we can convert to other sources, Alaskan oil will be absolutely necessary to prevent massive shutdowns and dislocations across this country. We must get a transportation system in place as fast as is humanly possible to get this oil to the energy starved States of the country. I think this legislation will help bring that about.

I look forward to working with the President, the Department of Interior, and other Federal agencies involved, as well as those active in the private sector, to make these desperately needed transportation systems a reality at the earliest possible date.

By Mr. KENNEDY (for himself and Mr. WEICKER):

S. 1870. A bill to revise title 23 of the United States Code, relating to highways, terminate the Highway Trust Fund, and amend the Urban Mass Transportation Act of 1964, in order to improve transportation; to the Committee on Environment and Public Works.

THE FEDERAL TRANSPORTATION IMPROVEMENT ACT OF 1977

Mr. KENNEDY. Mr. President, I am pleased to introduce today, along with my distinguished colleague, the Senator from Connecticut, the Federal Transportation Improvement Act of 1977.

This legislation continues our attempts over the past several years to end the bias and discrimination toward highways in Federal transportation planning, funding and construction. Our aim is to allow for the development of a balanced transportation policy, where those States and localities which need to build new roads can do so, but those which want to repair older roads and those which want to provide mass transit also have the funds necessary to do so.

By abolishing the highway trust fund and providing for the use of transportaiton funds for locally felt needs, this bill will halt the Federal underwriting of a distorted transportation policy.

Perhaps as the need to conserve energy weighs ever more greatly; perhaps as the soot continues to foul our air we can take the steps required to break the concrete stranglehold on transportation funding.

That unthinking grip has insured a society built around the automobile and its demands for maintenance, storage, and replacement. The car is in brutal competition with people for energy, space and the air we breathe.

Some 40 to 60 percent of our central cities now are given over to streets and parking areas for the automobile. Urban development for the past two decades has been twisted by a transportation system focused on thrusting highways into the very hearts of our cities without much regard for the consequences of that action—and then taking those highways out into the countryside without much regard for the necessity for six lanes.

We are using half of our petroleum and a quarter of all our energy on transportation. We have 217 million people and 132 million vehicles in this country. With all our energy problems, this represents an increase of about one vehicle for each new person in the last couple of years—7 million each.

We are producing over 10 million cars a year but junking another 7 million.

Our railroads are going bankrupt. We carried 19 billion mass transit fares in 1945, but only 5.6 billion in 1975.

When we find these facts, then it is time to redesign our transportation system.

This bill will greatly aid in that task. Transportation planning at all levels of government will be freed from the lure of "easy money" for highways but too little money for mass transit.

Eight years ago, I felt it was time to call a halt to the tilt of Federal spending toward highway construction. I introduced legislation to create a national transportation trust fund, permitting States and localities to have a mass transit option in their use of trust fund dollars.

And in each Congress since, I have introduced legislation with Senator WEICKER to open the trust fund.

We helped push the first wedge in the trust fund door in the Senate in 1972. Although our amendment to provide total flexibility was not adopted, a fallback amendment sponsored by Senators COOPER and MUSKIE was approved. The same process helped defeat the highway lobby in 1973 when, for the first time since its creation in 1956, we secured a portion of the trust fund moneys for mass transit use.

We also succeeded in permitting cities and States to obtain the use of interstate funds for mass transit when they decided not to construct an interstate segment, because of its disruptive effect on the community.

I am pleased that Congress approved significant new urban mass transit administration funding in 1974, and I am proud to have been one of the sponsors of the authorization of new moneys for UMTA by the Senate this year, an action I hope the house will join us in.

However, the steps we have taken thus far are still too meager to meet the problem. Even the approval of significant new urban mass transit administration funding represents only a minimal response to long-stalled transit needs.

The energy crisis also has made it apparent that we have been far too cautious and hesitant in our chipping away at the restrictions of the highway trust fund.

We must abolish it with a single stroke if we are going to respond to the degree of urgency in our current transportation situation and if we are going to build an adequate system in the coming years.

For even today we are directing the vast majority of our transportation money into planting concrete. Federal expenditures for highways in 1975 were $4.8 billion, in 1976 were estimated at $6.6 billion, and in 1977 are estimated at $6.9 billion. The Department of Transportation estimates that the highway trust fund will be accumulating $7.6 billion a year over the next 4 years.

Meanwhile, the Federal Rail Administration spent only $.5 billion in 1975, an estimated $.8 billion in 1976 and an estimated $.6 billion for 1977. UMTA spending was $.8 billion in 1975, an estimated $1.2 billion in 1976 and an estimated $1.6 billion in 1977. The priorities are obviously still not in order.

For that reason, I believe the elements of the legislation we are introducing today are critical for the restructuring and the redesign of our transportation system and the creation of a more balanced and integrated network to move people and goods.

First, the bill would abolish the Highway Trust Fund on September 30, 1978.

Second, all gasoline and other tax revenues that now flow into the trust fund would be channeled into the treasury general fund.

Third. Federal highway funding would be determined through the normal authorization and appropriation process.

Fourth, the proliferation of categorical highway programs would be streamlined with funds available for highway or mass transit systems, except for the Interstate System. Under the interstate transfer provision, under existing law, there is flexibility for using those funds for mass transit where localities and States propose not to build a nonessential interstate segment.

Instead of nine different categorical highway programs, in addition to the interstate, there will only be the urban and the rural systems.

Funds authorized and appropriated for the urban and rural system would be available either for highway construction or maintenance or for construction and operating subsidies for mass transit systems.

Fifth, the Federal share for the urban and rural system funds would be 90 percent, an increase of 20 percent, and the same amount that is contributed to the interstate projects.

Sixth, the Federal share for the Interstate System remains at 90 percent.

Seventh, the Governor would be responsible for development of a comprehensive State plan. Urban area plans would be incorporated into the State plan.

Eighth, a single State agency responsible for all transportation would administer the plan, removing the State highway department control over transportation planning in many States.

Ninth, these comprehensive plans would represent local and State priorities in transportation. The plans would have to meet overall Federal objectives, such as priority to mass rail or other fixed guideway transit in areas with air quality problems, priority to projects which result in energy savings, and priority to reconstruction of highways in the rural system that are unsafe.

Tenth, the Secretary's disapproval of a State plan would be subject to court review.

Eleventh, urban system funds would be appropriated to States on the basis of population. The Governor would be required to pass through funds for urbanized areas over 150,000.

Twelfth, rural system funds would be apportioned to States under existing law.

Thirteenth, the bill returns the weight limit for trucks to the lower level in existence prior to 1974.

These are the major changes in existing law which would be achieved through the legislation we are introducing today.

I believe these measures will help insure more rational transportation decisionmaking in the future. And the Nation cannot afford any delay in achieving that goal.

This bill, Mr. President, is a result of a number of years of work and consultation with many different representatives of different transportation units. We feel, if adopted, it will still insure the best distribution of resources in this country focused upon a transportation system which recognizes the needs of those in rural America and in underpopulated parts of this country as well as those who live in the major urban centers of the Nation.

So I am delighted to join with my friend and colleague, the Senator from Connecticut, in an area of great national importance and consequence. We are going to continue to work closely with the committees, with our colleagues, and with the administration in attempting to see that this legislation is implemented into law.

Mr. President, I send to the desk legislation and ask for its appropriate reference.

Mr. WEICKER. Mr. President, I am pleased to once again join with the distinguished Senator from Massachusetts (Mr. KENNEDY) in offering legislation designed to conserve energy by abolishing the Highway Trust Fund and allowing flexible use of Federal transportation dollars.

This legislation represents a continuation of our 5-year effort to create a balanced transportation system in the United States. In March of 1975, Senator KENNEDY and I introduced similar legislation. Unfortunately, the 94th Congress chose to sidestep the question of transportation funding reform, by passing a simple 2-year extension of the Federal highway programs and the trust fund.

Mr. President, comprehensive proposals to revamp the existing programs have been before the Congress now for over 2 years. We can no longer afford to reply on piece-meal solutions. Fundamental reform is required.

Since the Highway Trust Fund was created 21 years ago, the needs of our society have dramatically changed. In 1956, energy was plentiful and cheap. Air pollution alerts were unheard of. Our road system was deficient. Today, our national security is threatened by a heavy reliance on insecure foreign-sourced oil. According to the National Academy of Science, auto emissions are considered the cause of 4,000 deaths and 4 million illnesses per year within our major urban areas. And, today, 90 percent of our interstate system has been completed.

Despite these changes, our Federal transportation programs continue to provide about $6 for highways for every $1 available for mass transit and rail commuting. Furthermore, our existing Federal transportation programs are written so that States and localities have little say in how they use the money they receive. Broken down into separate categories, the transportation dollar is so earmarked as to actually dictate transportation priorities to the States and cities. Local officials see money in one specific category of the existing highway code and then build a road that fits the Federal guidelines, rather than building what they need.

This unequal and fragmented approach to transportation funding has led to a society dominated by the automobile. More than four out of every five American families own cars today and 90 percent of all urban travel is by car or truck.

Transportation accounts for fully 26 percent of our national energy consumption and one-half of that is used by the automobile. Automobiles consume 5 billion barrels of oil per day—nearly 60 percent of our oil input needs. With energy shortages threatening our security and lifestyle, I believe it is incumbent on this Congress to make our transportation priorities reflect this harsh fact of life.

In order to allow the development of more rational transportation programs,

ones that reflect our current energy, environmental, and community development plans, the legislation we are proposing today would drastically reform the Federal highway programs.

In drafting this legislation, we sought to maintain many of the existing administrative procedures presently utilized for highway programs. These procedures have proved successful in developing an excellent road system in the United States, but the bill, while attempting to build upon an existing apparatus, makes important structural revisions. We have chosen to rewrite title XXIII of the United States Code precisely to establish the new transportation priorities we clearly need.

First, and most significantly, this legislation would abolish the Highway Trust Fund, effective September 30, 1978. Federal gasoline and other user taxes that support the fund would remain in place, but the revenues derived would flow into the general fund of the Treasury. Thus, funding levels for the revised transportation programs, as approved under this act, would be analyzed and set by the Congress through its normal authorization and appropriation process.

The trust fund has in the past served as an automatic pilot for highway construction where expenditures were based on trust fund revenues regardless of demonstrated need. This funding system has given this country the best highways and the worst overall transportation in the modern world.

Second, our proposal would consolidate the existing categorical programs into three major systems: interstate, urban, and rural. Funds would be distributed to these systems in the following manner:

Interstate—the apportionment formula would remain the same as current law.

Urban system—each State would receive urban system funds based on a population factor. Cities over 150,000 in population would receive funds directly from the Federal Government. Thus, local officials will be given greater control over their programs.

Rural system—the rural system funds would continue to be appropriated to a State on the basis of mileage, land area, and population. However, the 1976 Federal Aid Highway Act inserted some urban construction into the rural road system and altered the apportionment formula to reflect this change. Since the new rural system has no urban components, the Kennedy-Weicker bill would revert back to the pre-1976 formula for distributing rural system moneys.

The bill would also equalize the Federal-State funding ratios amongst the various programs. Under existing law, urban and rural systems are funded on a 70–30 basis, while the interstate enjoys a 90–10 split. In order to eliminate any bias that this imposes on local officials, all transportation funding, authorized by this act, would be 90 percent Federal, 10 percent State and local.

Third, this legislation removes any restriction on the use of moneys distributed to the urban and rural systems. Funds authorized for the urban and rural systems would now be available to States and cities for either highway construction and maintenance, or for mass transit construction, maintenance, and operating assistance. Thus, State and local officials would have a wide range of options to choose from in deciding how best to meet their own transportation needs.

It is important to note that until the last Federal Highway Act, no funds could be used for the maintenance of existing highways. Yet, clearly highway maintenance has become a critical priority of many State transportation programs. We have been building highways at an accelerating rate ever since 1956. Our basic roads systems are already in place. Rather than needlessly stimulating even more new construction, we should permit the States to use Federal funds to maintain the improved service on facilities already in place.

Under present law, the interstate system has the principle of flexibility built into the program. Through the use of the interstate transfer mechanism, States and cities may turn back unwanted interstate construction funds and draw an equivalent amount from general revenues for mass transit.

Finally, this bill sets up a statewide transportation planning mechanism to be administered by a single State agency with jurisdiction over all State transportation programs. The governor would be required to develop rural aspects of the plan and incorporate plans formulated by urban areas into his statewide plan. Under the bill, urban areas would retain control of their own planning. These plans would have to reflect Federal and State priorities in energy conservation, urban development, environmental concerns and safety factors. The Secretary of Transportation and the State legislature each exercise approval power over the plans. The secretary's disapproval of any plan may be subjected to court review.

Once the State plan was approved, the Governor would submit for the secretary's approval a program of projects to receive Federal funding. To qualify for that approval, the projects would have to give priority to fixed-guideway and electric-powered projects—mass transit—in areas failing to meet ambient air quality standards. The bill also requires that State plans must emphasize reconstruction of unsafe rural-system highways, development of safety programs, access to public airports and port facilities, and energy-saving projects.

Mr. President, the goal of this legislation is to provide flexibility for State and local officials. They best know their own transportation needs. Federal assistance should be equally available for whatever transportation system they think best for their region. Once this flexibility and improved planning is achieved, the Nation will enjoy better transportation, clearer air to breathe, and less energy wasted.

By Mr. WILLIAMS (for himself and Mr. JAVITS):

S. 1871. A bill to amend the Fair Labor Standards Act of 1938 to increase the minimum wage rate under that act, to provide for an automatic adjustment in such wage rate, and to adjust the credit against the minimum wage which is based on tips received by tipped employees; to the Committee on Human Resources.

Mr. WILLIAMS. Mr. President, today I am, once again, introducing legislation to increase the Federal minimum wage under the Fair Labor Standards Act. The bill I am introducing not only provides a badly needed increase in the minimum wage, but also provides an indexing mechanism which will maintain the minimum at a reasonable level. The bill also provides for a gradual phasing out of the tip credit for employees who receive tips in the course of their employment.

In order to expedite Senate consideration of this proposal, I intend to schedule Labor Subcommittee hearings on this bill to begin on Thursday, July 28, and to be continued on August 1, 2, 3, 4, and 5, thus completing our subcommittee hearing schedule before the August recess.

Mr. President, when the minimum wage paid to our Nation's full-time, yearround workers yields a living standard which is substantially below the poverty level for a nonfarm family of four, that minimum wage is inadequate; and it is our responsibility to provide an increase.

The 1976 minimum wage level of $2.30 yields an annual income of approximately $4,780 to a full-time, yearround worker. However, in 1976, the poverty level for a nonfarm family of four was $5,800 per year. This year, and next year when the wage increase which I propose will take effect, the gap between the poverty level wage and the minimum wage will be even greater unless we take steps to correct the disparity. Assuming only a 5-percent annual increase in poverty level income, the poverty level for a nonfarm family of four in 1977 is estimated to be approximately $6,100 per year. By 1978, this figure will be over $6,300 per year.

The Department of Labor has estimated that, for the head of a family of four to have earned at least the nonfarm poverty income, the minimum wage would have had to have been $2.78 per hour in 1976 and $2.92 per hour in 1977.

By these standards, the legislation which I propose is relatively modest. It would increase the minimum wage to $2.65 per hour, effective January 1, 1978. This would result in an annual income of $5,512 for a full-time, year-round worker, an amount still below the poverty level. I regard this increase to $2.65 per hour, effective next January 1, as the least that we must do to provide some measure of equality for our working poor.

Mr. President, an equally important aspect of this legislation is a provision for automatic annual adjustment of the minimum wage. In past years, minimum wage increases have varied from as little as 5 cents per hour to as much as 40 cents per hour; they have ranged from less than 5 percent of the existing minimum to nearly 90 percent of the existing minimum; and they have been provided at intervals as short as 8 months apart and as long as 6 years apart. This irregularity has not only imposed a tremendous burden on those who must work at below the poverty level, but has also made prediction of minimum wage increases very difficult for employers.

Thus, the indexing concept will eliminate the irregular pattern which has characterized the history of minimum wage adjustments. It will also enable the business community to more accurately anticipate and adjust its wage costs. Most importantly, it will insure that the minimum wage is not continually eroded by inflationary pressures, and will protect the income of minimum wage recipients from the ravages of inflation.

This is not a novel concept. The Federal Government uses the Consumer Price Index to index increases or benefits under a number of programs such as the social security program, the railroad retirement program, the Federal workers' compensation program, and various other Federal retirement programs. In the private sector, approximately 5.9 million of the 9.6 million workers under collective bargaining agreements which cover 1,000 or more workers, are covered by cost-of-living escalator clauses for their compensation. Thus, the concept of indexing has been well accepted in our economy. It is time now to apply it to those who need it the most, our minimum wage, poverty-level workers.

The index which I propose is a relatively modest one. The $2.65 minimum wage rate which will go into effect on January 1, 1978, is approximately 51 percent of the average straight time hourly earnings of production workers in manufacturing. This legislation will provide 52 percent of the average straight time hourly earnings in manufacturing for the year beginning January 1, 1979, based on the 12-month period ending June 30, 1978. Effective January 1, 1980, and each January, thereafter, the minimum will be increased to 53 percent of average straight time hourly earnings for the base period ending the previous June 30.

It is estimated that the 52-percent index will result in a minimum wage rate of $2.89 per hour effective January 1, 1979; and it is estimated that the 53-percent index will result in a minimum wage rate of $3.15 effective on January 1, 1980. In each calendar year affected by this legislation, 1978, 1979, and 1980, the annual wage bill increase as a result of this basic minimum wage increase will be only four-tenths of 1 percent.

Mr. President, this is a most reasonable approach to insuring that the minimum wage performs the important function of providing a living wage to our Nation's workers. An analysis of the historical relationship between the basic minimum wage and straight time hourly earnings in manufacturing reveals that the minimum wage as a percentage of straight time hourly earnings in manufacturing, in the previous year, has fluctuated from a low of 31 percent to a high of 58.8 percent. Thus, the proposed legislation places the minimum wage at a level which is reasonable in historical perspective.

Another important aspect of this bill is the gradual phasing out of the tip credit. Present law permits some employers to credit tips against the minimum wage they must pay their employees. This legislation will reduce the tip credit from its present level of 50 percent of the minimum wage to 45 percent effective January 1, 1978; 40 percent on January 1, 1979; 30 percent on January 1, 1980; 20 percent on January 1, 1981; and 10 percent on January 1, 1982. It also amends the definition of tipped employee to more fairly reflect the realities of tipping practices affecting low wage workers. Effective January 1, 1983, the tip credit will be completely repealed.

Mr. President, this proposal for the gradual elimination of the tip credit will not result in any significant adverse impact on industries which employ tipped employees. The maximum tip credit presently permitted is $1.15 per hour, 50 percent of the applicable minimum wage. The 45 percent tip credit permitted after January 1, 1978, will provide a slight increase in this amount to $1.19 per hour. The 40-percent credit permitted after January 1, 1979, will provide an estimated $1.15 deduction from the minimum wage.

Thus, there will be no immediate reduction of the amount permitted as a tip credit under this legislation. The amount of tip credit permitted will be gradually reduced beginning January 1, 1980. This schedule of reduction recognizes the economic realities in industries which employ tipped workers and also recognizes the basic principle that workers are entitled to receive at least the statutory minimum wage from their employers.

Mr. President, it is predictable that opponents of the minimum wage will, as they have done in the past, raise the specters of inflation and unemployment. This is a familiar argument to those of us who have been in the forefront of fair labor standards amendments. We know that a close examination of the relevant economic data disproves predictions of economic adversity, and shows that there is no discernible increase in unemployment or significant effect on inflation as a result of minimum wage legislation. Every economic effect study by the Department of Labor under both Democratic and Republican administrations, demonstrates this fact.

Employment in our economy has continued upward during every period of significant increase in the minimum wage.

On January 25, 1950, the minimum wage was increased from 40 cents to 75 cents an hour and nonagricultural employment rose from 43,778,000 in 1949 to 45,222,000 in 1950.

On March 1, 1956, the minimum wage was increased from 75 cents to $1 an hour and nonagricultural employment rose from 52,408,000 in 1956 to 52,894,000 in 1957.

On September 3, 1961, the minimum wage was increased from $1 to $1.15 an hour and nonagricultural employment rose from 54,042,000 in 1961 to 55,596,000 in 1962.

On September 3, 1963, the minimum wage was increased from $1.15 to $1.25 an hour and nonagricultural employment rose from 56,702,000 in 1963 to 58,331,000 in 1964.

On February 1, 1967, the minimum wage was increased from $1.25 to $1.40 an hour and nonagricultural employment rose from 65,857,000 in 1967 to 67,915,000 in 1968.

On February 1, 1968, the minimum wage was increased from $1.40 to $1.60 an hour and nonagricultural employment rose from 67,915,000 in 1968 to 70,284,000 in 1969.

These increases in employment have also occurred along with the most recent minimum wage increases. Under the fair labor standards amendments of 1974, wage increases were provided in 1974, 1975, and 1976. In each year total nonagricultural employment rose until, in 1976, it had reached 79,441,000 workers. Thus, it is clear that the minimum wage does not present a significant barrier to expanded employment.

With regard to inflation, previous minimum wage increases have been absorbed easily by our economy, and there is no reason to assume that a different result will be obtained under this bill. Employers of low-wage workers often lack incentive to increase productivity. Thus, the minimum wage has a predictable tendency to encourage employers to seek more efficient methods of production and to contribute to our economy in that way as well.

The fact is that the major determinants of changes in our economy do not include minimum wages paid under the Fair Labor Standards Act. Rather, they are fiscal and monetary policy, long-term capital investment, business cycles, and international trade and foreign military assistance. Attempts to argue that the minimum wage level affects the level of employment or unemployment give insufficient weight to these much more important factors which determine the health of our Nation's economy. Thus, we have many tools which we can use to achieve economic growth and control inflation; and there is no need to sacrifice our working poor in order to obtain our goals in this area.

In short, this legislation is very badly needed. It promises to provide relief to our working poor and to insure that they are not the victims of economic fluctuations in the future. For the first time, we are providing equality in wages for all minimum wage workers covered by the Fair Labor Standards Act. These important principles will serve us well in the years ahead.

I now ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) This Act may be cited as the "Fair Labor Standards Amendments of 1977".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Fair Labor Standards Act of 1938. (29 U.S.C. 201–219).

INCREASE AND AUTOMATIC ADJUSTMENT IN MINIMUM WAGE

SEC. 2. (a) Section 6(a)(1) (29 U.S.C. 206 (a)(1)) is amended to read as follows:

"(1) during the period beginning on the first day of January, 1978 and ending De-

cember 31, 1978, not less than $2.65 an hour; during the period beginning on the first day of January, 1979 and ending December 31, 1979, not less than 52 per centum of the average straight time hourly earnings of production workers on manufacturing payrolls, for the 12 month period beginning July 1, 1977, and ending June 30, 1978; and during the year beginning January 1, 1980, and during each succeeding year not less than 53 per centum of the average straight time hourly earnings for the twelve-month period ending on June 30 next preceding the beginning of such year of production workers on manufacturing payrolls; except as otherwise provided in this section;".

(b) Section 6(a)(5) (29 U.S.C. 206(a)(5)) is amended to read as follows:

"(5) if such employee is employed in agriculture—

during the period beginning on the first day of January 1978, not less than the minimum wage rate in effect under paragraph (1).".

(c) Section 6(b) (29 U.S.C. 206(b)) is amended by striking out "wages of the following rates:" and paragraphs (1) through (4) and inserting in lieu thereof the following: "wages at the following rate: Effective on and after the first day of January, 1978, not less than the minimum wage rate in effect under subsection (a)(1).".

(d) Section 6(a) is amended by adding after and below paragraph (5) the following: "Not later than August 31 of each year, the Secretary shall publish in the Federal Register the average straight-time hourly earnings, during the twelve-month period ending on the next preceding June 30, of production workers on manufacturing payrolls.".

SEC. 3. (a) Effective January 1, 1978, section 3(m) (29 U.S.C. 203(m)) is amended by striking out "50 per centum" and inserting in lieu thereof "45 per centum".

(b) Effective January 1, 1979, such section is amended by striking out "45 per centum" and inserting in lieu thereof "40 per centum".

(c) Effective January 1, 1980, such section is amended by striking out "40 per centum" and inserting in lieu thereof "30 per centum".

(d) Effective January 1, 1981, such section is amended by striking out "30 per centum" and inserting in lieu thereof "20 per centum".

(e) Effective January 1, 1982, such section is amended by striking out "20 per centum" and inserting in lieu thereof "10 per centum".

(f) Effective January 1, 1983, the last two sentences of such section are repealed.

DEFINITION OF TIPPED EMPLOYEE

SEC. 4. Section 3(t) (29 U.S.C. 203(t)) is amended to read as follows:

"(t)(1) 'Tipped employee' means any employee engaged in an occupation in which he customarily and regularly receives in tips in a month more than the average monthly tips published by the Secretary under paragraph (2) and applicable to such month.

"(2) The Secretary shall not later than November 30, 1977, and November 1 of each succeeding year publish in the Federal Register the average monthly tips per employee received in the twelve-month period ending on June 30 of such year by all employees in hotels, motels, restaurants and other food service establishments which shall be computed by determining the product of—

"(A) the average (as determined by the Secretary) hours of employment in each month of such period of such employees, and

"(B) the average maximum amount which under subsection (m) may be credited in such period toward an employer's minimum wage obligation.

The average monthly tips published under this paragraph shall be used in the year following such publication in determining whether an employee is in such year a tipped employee.".

EFFECTIVE DATE

SEC. 5. (a) The amendments made by sections 2 and 3 of this Act shall take effect on the first day of January 1978, except that on and after the date of enactment of this Act the Secretary of Labor shall take such administrative action as may be necessary to enable such amendments to be implemented on and after such day.

(b) The amendment made by section 4 shall take effect on January 1, 1978, except that the Secretary of Labor shall, no later than November 30, 1977, make the publication prescribed by section 3(t)(2) (as amended by section 4 of this Act).

(c) Effective January 1, 1983, section 3(t) is repealed.

Mr. JAVITS. Mr. President, I join today with Senator WILLIAMS, Chairman of the Committee on Human Resources, in introducing legislation to increase the minimum wage rate. I am pleased that the President has indicated his support of the wage and indexing provisions of this bill. This is legislation that is both overdue and vital to low income families and the working poor.

The last minimum wage legislation was enacted in 1974 and did not anticipate the extraordinary rises in wages and living costs that have since taken place. As a result, millions of American workers are being paid minimum wages which will not provide even a poverty level standard of living as defined by the United States Government for an urban family of four. Yet, Congress' declared policy in enacting the Fair Labor Standards Act was to protect "the maintenance of the minimum standard of living necessary for the health, efficiency, and general well-being of workers."

Just to keep up with increases in the cost of living since the 1968 minimum wage level would today require a minimum of $2.74 per hour. More importantly, a wage of $2.95 per hour is necessary today simply to support a family at the poverty level. This bill does not go even that far; rather, it provides an increase on January 1, 1978 to $2.65, and further increases on January 1, 1979 and January 1, 1980, respectively, to the equivalent of 52 and 53 percent of the average straight time hourly earnings of production workers on manufacturing payrolls.

This concept of indexing the minimum wage rate—as we have done already for social security—represents a vital protection against inflation for those workers in our society least able to protect themselves. It is incongruous that Federal employees, also, many union workers under labor contracts and social security recipients receive such protection, while low income families, the working poor are expected to cope with the rising cost of living by themselves, even though they are the least able to do so.

This indexing in the case of the minimum wage also offers the advantage to employers of regular, predictable wage rate adjustments. This approach promises to allow the Congress time to consider such issues as the scope of coverage and the existing exemptions in future sessions without also having to reconsider the basic minimum wage rate. The issue of what particular statistical measure is best used as the index for minimum wage is, however, one that the committee will need to explore thoroughly.

During hearings on this legislation we will again, of course, consider the effects of raising the minimum wage on the Nation's economy. It should be borne in mind, however, that the Fair Labor Standards Act is not premised on economic principles alone. We learned long ago that simply to give full rein to free market concepts without relevant social implications may sometimes operate to the detriment of our society. We have higher values than solely economic efficiency, as we have demonstrated time and time again through legislation enacted for the benefit of our Nation's working men and women. One of the most important of these is the Fair Labor Standards Act in which we declare the dignity of every citizen who works as our preeminent value. As we approach these minimum wage amendments, for the tenth time since the original enactment of the FLSA, I trust that this point will not be lost sight of, while employers, union leaders, economists and others press their views before the Congress.

This bill does not address the scope of coverage of the Fair Labor Standards Act. The committee is awaiting the complete reports of the Labor Department, with regard to the remaining exemptions that were mandated by the 1974 FLSA amendments. I look forward to receipt of the Labor Department's recommendations which will be the basis of our subsequent legislative efforts toward more expansive coverage.

A last and important point the bill also provides for the phased elimination of the "tip credit" and redefines "tipped employee" to make the tip credit inapplicable to employees who do not customarily receive a substantial amount of tip income. The bill defines "tipped employees" as those who receive more than a set figure per month in tips, the amount calculated by multiplying the average hours of employment per month for all tipped employees by the dollar amount of the tip credit allowed to the employer for the applicable period. In effect, this provision next year will raise the present floor from $20 per month to approximately $135 per month in tips received before an employee becomes subject to the tip credit. This amount will increase incrementally in succeeding years. I have serious reservations at this time as to the equity and wisdom of the bill's provision on tip credit. I have not determined as a matter of fact just how many tipped employees have incomes below the poverty level, receive average hourly compensation at or near current minimum wage levels, or require what is, in effect, a doubling of their legislated wage levels in addition to tip income in order to maintain "the minimum standard of living necessary for health, efficiency, and general well-being," which is the stated purpose of the act. The redefinition of "tipped employee" must also be fully evaluated, although I commend its basic intent of targeting wage increases for those whose need is greatest—the tipped employees at the bottom of the wage scale. I expect that the com-

mittee will thoroughly investigate these proposals during its hearings on the bill.

Mr. President, I believe this bill should have a top priority for this Congress and I hope that we can act on it promptly.

By Mr. CHURCH (for himself, Mr. LONG, Mr. HUMPHREY, Mr. ANDERSON, Mr. METCALF, Mr. MELCHER, Mr. BURDICK, Mr. YOUNG, Mr. ZORINSKY, Mr. HASKELL, and Mr. HART):

S. 1872. A bill to provide price support for sugar at not less than 60 per centum of the parity price therefor; to the Committee on Agriculture, Nutrition, and Forestry.

Mr. CHURCH. Mr. President, I am sure that most of my colleagues are aware of the crisis facing the domestic sugar industry. Sugar is about the only agricultural commodity for which there is no domestic program or policy.

As a result, imports of foreign raw sugar are arriving in the United States at 9.5 cents a pound. United States producers cannot compete at that price, but it is not because they are inefficient. That price of 9.5 cents a pound is a "dump" price for excess foreign subsidized sugar.

About 75 percent of the world's sugar is consumed in its country of origin. Another 10 percent is traded under long-standing international agreements, such as the Cuban-Soviet bloc pact. The remaining 15 percent available for world trade from which the United States obtains its imports is a thin, volatile market, susceptable to extreme fluctuations.

The destruction of the domestic sugar industry, besides its harmful effects on farmers, processors, and their employees and the rural communities which depend on the industry, will make American consumers totally dependent on foreign sugar suppliers.

The sugar situation has been thoroughly studied by the U.S. International Trade Commission during a 6-month investigation. In my testimony to the Commission on December 9, 1976, I pointed out that:

As a United States Senator, I hear daily from my constituents. The sugar beet farmers of Idaho tell me that they are not receiving a return on the crop sufficient to cover their expenses. Even the most casual student of economics knows that it is not possible to produce a product for sale below production cost and stay in business for long.

Once a grower is out of business, there is little likelihood that he will get back in for the start-up expenditures required in capital are just too prohibitive. It is unlikely, therefore, that the domestic producers will be able to bounce in and out of production.

Without the needed domestic production, refineries will invariably shut down and thereby cripple the economies of the many small towns that serve as their home. These small towns depend heavily on the sugar industry for their economic well-being. There are some 56 small communities across this nation serving as the sites for sugar beet refineries with capital investments totalling nearly a billion dollars.

The impact of refinery closures will be immediate and severe. Some have estimated that the beet sugar industry contributes nearly three quarters of a billion dollars each year to the economy. The loss of this economic activity can only have a further negative effect on our existing national economic difficulties.

Recently, I had an interesting talk with a sugar beet farmer from Eastern Idaho. He asked me a very pointed question. "Frank," he said, "if imported sugar keeps pouring into this country, I will have to stop growing beets. Then I'll have a bunch of expensive equipment on my hands that's not much good for anything else but beets, my neighbor up the way will be out of a job at the refinery, and, in the end, we'll probably pay more for sugar. It just doesn't make sense."

The USITC agreed that the United States' approach to sugar did not make sense and concluded on March 17, 1977, that the domestic industry was seriously threatened by foreign subsidized sugar imports into the United States. The Commission recommended immediate administrative action to reduce the level of these imports.

Earlier, Secretary of Agriculture Bergland had appointed a sugar and sweetener task force to propose alternatives to aid the ailing domestic sugar industry. The task force recommended that the administration restrict imports and impose a price support program for sugar.

The administration, on May 4, 1977, decided not to restrict imports in light of ongoing negotiations aimed at achieving an international sugar agreement. At the same time, President Carter proposed a 2-cent per pound support payment program for sugar growers in recognition of the fact that "a viable domestic industry is vital to the economic well-being of the American people."

I know that the President is deeply disturbed over the poor health of our Nation's sugar industry. On April 4, I joined with 11 of my Senate colleagues in meeting with the President to discuss the crisis facing sugar farmers and to urge his prompt action. He related to us his very real concern for human problems associated with the economic difficulties facing the industry and I was impressed with his understanding of the issues involved. I think that the sugar farmers have a friend in the White House.

But the administration's proposal, labeled as a "stopgap" measure pending negotiation of the international sugar agreement, did not anticipate events in the world sugar market which saw already depressed prices decline even further. Prices are now around 9.5 cents, well below the level where the 2-cent payment could bring farmers up to the "rockbottom" production costs of 13.5 cents contained in the administration's plan.

As a result, our sugar farmers will be forced to further reduce their acreage. This last year saw a reduction of 30 percent in acreage in some parts of Idaho. If this decline continues, we will witness further plant closings and the displacement of hundreds of workers.

This legislation I am introducing today will provide sugar farmers with the assurance they need so, when they plant beets, they will know they are not committing financial suicide. The proposal is similar to that recommended by the sugar and sweetener task force in the department of Agriculture and would provide the administration with a workable mechanism to aid the domestic sugar industry should an international sugar agreement not be reached.

The support program established in this legislation would, in order to achieve its goal, require that important restrictions be imposed. The support price would be set at no less than 60 percent of parity, or about 15¼ cents a pound and would be administered in the same manner that other support prices are administered; that is, through Federal crop loans or purchases.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD following these remarks preceded by a summary of its provisions.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF S. 1872

The bill would add sugar beets and sugarcane to the list of "designated nonbasic commodities" in Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) with respect to which price support at a minimum specified level is mandatory. The legislation would become part of the permanent authority of the '49 Act. If adopted, it would provide mandatory price supports to sugar beet and sugarcane farmers in the same manner as price support is now provided to milk and honey producers.

Price supports for beets and cane would be only through loans and purchases with respect to the processed products thereof (i.e. refined beet sugar and raw cane sugar). Such loans and purchases would be made through or from processors. However, the amendment would not affect Section 401(e) of the '49 Act (7 U.S.C. 1421(e)) which requires the Secretary in such situations, to the extent practicable, to obtain such assurances as he deems adequate that producers have received or will receive "maximum benefits" from the price support operation.

Authority for price support through "other operations" which has been interpreted to mean direct payments to processors, would not be included in the legislation.

Under 7 U.S.C. 624 imports may be restricted if they interfere with a price support program. It is anticipated that the Administration would have to impose import restrictions if the price support program envisioned in this bill were adopted.

S. 1872

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446), as amended, is further amended by:

(a) striking out, in the first sentence, the word "and" after the word "honey,",

(b) inserting in the first sentence, the words ", sugar beets, and sugar cane" after the word "milk", and

(c) adding a new subsection (d) as follows:

"(d) Effective with the 1977 crop the price of sugar beets and sugarcane, respectively, shall be supported through loans or purchases with respect to the processed products thereof at a level not in excess of 90 per centum nor less than 60 per centum of the parity price therefor."

By Mr. McINTYRE:

S. 1873. A bill to provide improved consumer deposit services; to promote competitive balance among financial institutions; and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

NOW ACCOUNTS

Mr. McINTYRE. Mr. President, on June 9, I introduced a series of bills, S. 1664 through S. 1669, which together comprise the major legislative thrust of

the Subcommittee on Financial Institutions in this session.

Primary among these is S. 1664, a bill forwarded by the Carter administration, whose basic thrust is the nationwide extension of interest-bearing checking accounts for individuals, the so-called NOW accounts, and the payment of interest on reserve balances maintained by banks at the Federal Reserve to stem the decline in bank membership in the Federal Reserve System.

Mr. President, the Subcommittee on Financial Institutions held exhaustive hearings on these bills June 20 through June 23, receiving testimony from over 35 witnesses, including the Secretary of the Treasury and the Chairman of the Federal Reserve Board.

Having studied the record of these hearings, I am today introducing a bill incorporating recommended proposals which are clearly in the interest of the American banking public.

Mr. President, the bill I am introducing today would authorize interest-bearing checking accounts—NOW accounts—nationwide for individuals. NOW accounts may be offered by all types of financial institutions, including commercial banks, savings and loan associations, and mutual savings banks. A similar authority is offered for credit unions in the form of share draft accounts.

The bill provides for a 1-year delay in enactment in order that financial institutions may have time to plan for the advent of NOW accounts and in order that any necessary adjustments may be made in State laws.

NOW accounts would go into effect initially subject to a uniform ceiling rate for all institutions to 5 percent. This is the rate currently available to the citizens of the six New England States which, at the present time, are the only States in which NOW accounts are authorized.

A basic thrust of this bill, therefore, is to confer the same benefits of an interest-bearing checking account on citizens across the country as are presently available to the citizens of New England.

While NOW accounts in New England may also be offered to charitable and nonprofit organizations, for the moment, NOW accounts are being authorized nationwide only to individuals.

In addition to extending NOW accounts nationwide, the bill extends for 3 years, until December 15, 1980, the so-called Regulation Q authority by which deposit rate ceilings for financial institutions are established, and adds the Administrator of the National Credit Union Administration to the list of officials who consult on such ceilings. At the end of this 3-year period and 2 years after NOW accounts go into effect nationwide, the bill provides that the uniform rate on NOW accounts for all institutions would rise to the highest rate then prevailing for passbook accounts in any federally insured financial institution. This will contribute to competitive parity between competing institutions and to an even better break for the consumer on his savings/checking dollar.

The bill also incorporates a revised formula by which the Federal Reserve through a combination of paying interest on reserves and reducing reserve requirements will be able to stem the recent attrition of membership from the Federal Reserve System.

In addition to these provisions, Mr. President, the bill provides for a long overdue Federal chartering option for mutual savings banks, a simplification of section 5(c) of the Home Owners' Loan Act of 1933, the basic statute governing the lending and investment powers of Federal savings and loan associations, and an increase in the deposit insurance levels for IRA and Keogh accounts in federally insured institutions from $40,000 to $100,000.

Mr. President, the Senate Banking Committee is scheduled to mark up this bill August 2 and 3. Many of these proposals, particularly the NOW account proposals, have been the subject of deliberations within the Subcommittee on Financial Institutions for the past 4 years. The bill I am introducing today is a balanced bill which will contribute to increased consumer benefits and the increased competitive viability of our Nation's financial institutions.

Mr. President, there was one very important subject addressed at the hearings which is not addressed in this bill and that is the need of federally chartered savings and loan associations to have greater flexibility in the types of mortgage instruments which they may offer.

It is becoming increasingly clear that the continued reliance on long-term, fixed rate mortgages is making it increasingly difficult for the Federal savings and loan industry to maintain its commitment to housing finance in a cyclical market environment. In my opinion, this issue deserves the immediate attention of the Congress.

Nevertheless, given the fact that this subject is currently under intensive study by the Federal Home Loan Bank Board, the results of which will not be available until fall, this legislation must move forward now. It is my intention, therefore, to give the issue of variable rate mortgages and alternative mortgage instruments the full attention of the Subcommittee on Financial Institutions in the fall.

At the same time, Mr. President, it is my intention to address the entire asset and liability mix of Federal savings and loan associations with a view toward insuring their competitive viability in the years to come.

The competitive environment in which financial institutions must do business varies greatly from that of the 1930's when many of their governing statutes were first enacted.

Mr. President, due to the substantial interest in this bill, I ask unanimous consent that the bill be reprinted in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1873

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—PAYMENT OF INTEREST ON DEPOSITS OR ACCOUNTS

SEC. 101. Section 2 of the Act of August 16, 1973 (Public Law 93–100), as amended (12 U.S.C. 1832), is amended to read as follows:

"SEC. 2. (a) A depository institution may permit depositors or account holders to maintain negotiable order of withdrawal accounts or share draft accounts.

"(b) The term 'depository institution' means—

"(1) any insured bank as defined in section 3 of the Federal Deposit Insurance Act;

"(2) any mutual savings bank as defined in section 3 of the Federal Deposit Insurance Act;

"(3) any savings bank as defined in section 3 of the Federal Deposit Insurance Act;

"(4) any insured credit union as defined in section 101 of the Federal Credit Union Act;

"(5) any member as defined in section 2 of the Federal Home Loan Bank Act; and

"(6) any insured institution as defined in section 401 of the National Housing Act.

"(c) The term 'negotiable order of withdrawal account' means a deposit or account (1) on which payment of interest or dividends may be made, (2) with respect to which the depository institution may require the depositor or account holder to give notice of an intended withdrawal not less than thirty days before the withdrawal is made, and (3) on which the depositor or account holder is allowed to make withdrawals by negotiable or transferable instrument or other similar item for the purpose of making payments to third persons or others. Such deposit or account shall consist solely of funds in which the entire beneficial interest is held by one or more individuals.

"(d) The term 'share draft account' means a share account established at a credit union for an individual who is a credit union member (1) using negotiable or nonnegotiable drafts or other orders which are used to withdraw shares, (2) which earns dividend credit, and (3) with respect to which the credit union may require the account holder to give notice of an intended withdrawal not less than 30 days before the withdrawal is made.".

SEC. 102. (a) The first section of the Federal Reserve Act, as amended (12 U.S.C. 221), is amended by adding at the end thereof the following new paragraphs:

"The term 'depository institution' means—

"(1) any insured bank as defined in section 3 of the Federal Deposit Insurance Act;

"(2) any mutual savings bank as defined in section 3 of the Federal Deposit Insurance Act;

"(3) any savings bank as defined in section 3 of the Federal Deposit Insurance Act;

"(4) any insured credit union as defined in section 101 of the Federal Credit Union Act;

"(5) any member as defined in section 2 of the Federal Home Loan Bank Act; and

"(6) any insured institution as defined in section 401 of the National Housing Act.

"The term 'negotiable order of withdrawal account' means a deposit or account (1) on which payment of interest or dividends may be made, (2) with respect to which the depository institution may require the depositor or account holder to give notice of an intended withdrawal not less than thirty days before the withdrawal is made, and (3) on which the depositor or account holder is allowed to make withdrawals by negotiable or transferable instrument or other similar item for the purpose of making payments to third persons or others. Such deposit or account shall consist solely of funds in which the entire beneficial interest is held by one or more individuals.

"The term 'share draft account' means a share account established at a credit union for an individual who is a credit union member (1) using negotiable or nonnegotiable drafts or other orders which are payable

through a bank and are used to withdraw shares, (2) which earns dividend credit, and (3) with respect to which the credit union may require the account holder to give notice of an intended withdrawal not less than thirty days before the withdrawal is made.".

(b) Section 2(a) of the Act of June 16, 1933 (Public Law 73-66) as amended (12 U.S.C. 221a(a)), is further amended by striking "and" and inserting after the words "reserve bank" the following: ", depository institution, negotiable order of withdrawal account and share draft account".

SEC. 103. Section 2 of the Act of August 16, 1973 (Public Law 93-100), as amended (12 U.S.C. 1832), is amended by adding at the end thereof the following:

"(e) The limitation on the rate of interest which may be paid by depository institutions on negotiable order of withdrawal accounts or on share draft accounts shall be uniform for all despository institutions and shall be equal to the limitation prescribed for savings deposits or accounts under section 19(j) of the Federal Reserve Act. Upon the expiration of 2 years after the effective date of this subsection, such limitation shall be uniform for all depository institutions and shall be equal to the limitation, if any, prescribed for savings deposits or accounts under section 5B(a) of the Federal Home Loan Bank Act.

SEC. 104. The first sentence of section 19(j) of the Federal Reserve Act, as amended (12 U.S.C. 371), is amended by inserting a comma and "the Administrator of the National Credit Union Administration," immediately after "Federal Deposit Insurance Corporation".

SEC. 105. The second sentence of section 18(g) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1828(g)), is amended by inserting a comma and "the Administration of the National Credit Union Administration," immediately after "Board of Governors of the Federal Reserve System".

SEC. 106. The first sentence of section 5B(a) of the Federal Home Loan Bank Act, as amended (12 U.S.C. 1425B(a)), is amended by inserting a comma and "the Administrator of the National Credit Union Administration," immediately after "Board of Governors of the Federal Reserve System".

SEC. 107. Section 117 of the Federal Credit Union Act, as amended (12 U.S.C. 1763), is amended—

(1) by redesignating SEC. 117. as SEC. 117. (a); and

(2) by adding at the end thereof the following new subsection:

"(b) The Administrator may from time to time after consulting with the Board of Governors of the Federal Reserve System, the Federal Home Loan Bank Board, and the Board of Directors of the Federal Deposit Insurance Corporation, prescribe rules governing the payment and advertisement of interest or dividends, including limitations on the rate of interest or dividends which may be paid by credit unions on member accounts.".

SEC. 108. (a) Notwithstanding any other provision of this title, a depository institution which is located in Massachusetts, Connecticut, Rhode Island, Maine, Vermont, or New Hampshire may continue to make negotiable order of withdrawal accounts available to organizations operated primarily for religious, philanthropic, charitable, educational, or other similar purpose and not operated for profit.

(b) Notwithstanding any other provision of this title, a credit union may make a share draft account available to another credit union which is a member of the credit union offering such account.

TITLE II—RESERVE REQUIREMENTS AND EXPANDED DEPOSIT POWERS

SEC. 201. (a) The last sentence of subsection (b) of section 19 of the Federal Reserve Act (12 U.S.C. 461) is designated as paragraph (5) and that part of subsection (b) that precedes that sentence is amended to read as follows:

"(b)(1) Every member bank in a reserve city shall maintain reserves against its demand deposits at such average ratio of not less than 10 per centum nor more than 22 per centum, as shall be determined by the Board. The Board, either in individual cases or by regulation, on such basis as it may deem reasonable and appropriate in view of the character of business transacted by such bank, may make applicable the reserve ratios prescribed for banks not in reserve cities. Every member bank not in a reserve city shall maintain reserves against its demand deposits at such average ratio of not less than 7 per centum nor more than 14 per centum, as shall be determined by the Board: *Provided, however,* That a member bank may maintain reserves against its demand deposits of $15 million or less at a reserve ratio of not less than 4 per centum as may be determined by the Board, except that the average reserves maintained by a member bank in a reserve city against its demand deposits shall in no event be less than 10 per centum.

"(2) Every depository institution shall maintain reserves which shall be at the same level for all depository institutions against its negotiable order to withdraw accounts and its share draft accounts at such average ratio of not less than 3 per centum nor more than 12 per centum, as shall be determined by the Board.

"(3) Every member bank shall maintain reserves against its time deposits and savings deposits (other than negotiable order of withdrawal accounts) at such average ratio of not less than 3 per centum nor more than 10 per centum, as shall be determined by the Board: *Provided, however,* That a member bank may maintain reserves against an amount not exceeding $15,000,000 of the combined total of its time deposits with initial maturities of 180 days or more and savings deposits (other than negotiable order of withdrawal accounts) at a reserve ratio of not less than 1 per centum, as may be determined by the Board.

"(4) Every depository institution that maintains reserves pursuant to this section shall make reports concerning its deposit liabilities and required reserves at such times and in such manner and form as the Board may require.".

(b) With respect to any depository institution that is not a member of the Federal Reserve System on June 1, 1977, the required reserves imposed pursuant to section 201 of this Act against its negotiable order of withdrawal accounts or share draft accounts on the effective date of this Act shall be reduced by 75 per centum during the first year that begins after the effective date, 50 per centum during the second year, and 25 per centum during the third year.

SEC. 202. (a) Section 19(c) of the Federal Reserve Act (as amended (12 U.S.C. 461(c))), is amended by changing "subsection" to "subsections"; by inserting "(1) and (b)(3)" after "(b)"; and adding at the end thereof the following: "Reserves held by any depository institution to meet the requirements against its negotiable order of withdrawal accounts and its share draft accounts imposed pursuant to subsection (b)(2) of this section shall be in the form of—

"(1) balances maintained for such purposes by such depository institution in the Federal Reserve Bank of which it is a member or at which it maintains an account. However, the Board may by regulation permit depository institutions to maintain all or a portion of their reserves against their negotiable order of withdrawal accounts or share draft accounts in the form of vault cash provided that such proportion shall be identical for all depository institutions; and

"(2) balances maintained by a nonmember depository institution in a member bank or in a Federal Home Loan Bank provided that such member bank or Federal Home Loan Bank maintains such funds in the form of balances in a Federal Reserve Bank of which it is a member or at which it maintains an account. Balances received by a member bank from another depository institution that are used to satisfy the reserve requirements imposed on such depository institution by this section shall not be subject to the reserve requirements of this section imposed on such member bank and shall not be subject to assessment imposed on such member bank pursuant to section 2 of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1817).".

(b) Section 19(c) is further amended by adding at the end thereof the following: "Interest may be paid on required reserve balances maintained at Federal Reserve Banks. The Board may establish the manner in which interest may be paid on required reserve balances maintained at Federal Reserve Banks, including limitations on the rates of interest that may be paid. The rate of interest that may be paid on reserve balances required to be maintained against negotiable order of withdrawal accounts and share draft accounts shall not exceed the average rate paid during the preceding calendar quarter on United States Treasury bills with mauturities of three months and interest may also be paid on other required reserve balances maintained at Federal Reserve Banks, provided the aggregate interest that may be paid in any year on all required reserve balances (including reserve balances against negotiable order of withdrawal accounts and share draft accounts) shall not exceed 5 percent of the net earnings in the previous year of the Federal Banks before payment of interest on all such required reserve balances. In establishing the rates of interest that may be paid in required reserve balances, the Board shall give due consideration to such factors as the effect on revenues of the Treasury of the United States, monetary and financial conditions, safety and soundness of depository institutions, competitive balance, benefits and costs of membership in the Federal Reserve System, the likelihood of membership attrition, and other circumstances surrounding depository institutions.".

(c) Section 19(f) of the Federal Reserve Act, as amended (12 U.S.C. 464), is amended by deleting "member bank" and inserting in lieu thereof "depository institution".

SEC. 203. (a) Section 5 of the Home Owners' Loan Act of 1933, as amended (12 U.S.C. 1464), is further amended by deleting "savings" at each place it appears before "account" or "accounts".

(b) Section 5(b)(1) of the Home Owners' Loan Act of 1933, as amended (12 U.S.C. 1464(b)(1)), is amended by deleting the last sentence thereof and substituting the following: "An association may permit withdrawal or transfer of deposits or accounts by negotiable order of withdrawal as defined in section 2 of the Act of August 16, 1973, as amended (12 U.S.C. 1832) and the Board may by regulation provide for withdrawal or transfer of savings accounts upon nontransferable order or authorization.".

(c) Section 5A of the Federal Home Loan Bank Act, as amended (12 U.S.C. 1425a), is amended by redesignating subsection (f) as subsection (g) and by inserting before such subsection, as redesignated, the following new subsection:

"(f) Every institution which is a member or is an insured institution as defined in section 401(a) of title IV of the National Housing Act (12 U.S.C. 1724(a)) shall maintain reserves against its negotiable order or withdrawal accounts as defined in section 1 of the Federal Reserve Act (12 U.S.C. 221a) in accordance with the provisions of section 19 of the Federal Reserve Act (12 U.S.C. 461) in amounts not less than such percentages of its aggregate amounts of such deposits or

accounts as may be prescribed under section 19(b) of the Federal Reserve Act (12 U.S.C. 461) by the Board of Governors of the Federal Reserve System.".

SEC. 204. Section 116 of the Federal Credit Union Act, as amended (12 U.S.C. 1762), is amended by adding at the end thereof the following new subsection:

"(c) Each insured credit union shall maintain reserves against its negotiable order of withdrawal accounts and share draft accounts as defined in section 1 of the Federal Reserve Act (12 U.S.C. 221a) in accordance with the provisions of section 19 of the Federal Reserve Act (12 U.S.C. 461) in amounts not less than such percentages of its aggregate amounts of such deposits or accounts as may be prescribed under section 19(b) of the Federal Reserve Act (12 U.S.C. 461) by the Board of Governors of the Federal Reserve System.".

SEC. 205. (a) The first paragraph of section 13 of the Federal Reserve Act (12 U.S.C. 342 is amended as follows:

(1) by inserting after the words "member banks" the words "or other depository institutions".

(2) by inserting after the words "payable upon presentation" the first and third times they appear, the words "or other items, including negotiable orders of withdrawal or share drafts".

(3) by inserting after the words "payable upon presentation within its district," the words "or other items, including negotiable orders of withdrawal or share drafts".

(4) by inserting after the words "nonmember bank or trust company," wherever they appear the words "or other depository institution".

(5) by striking the words "sufficient to offset the items in transit held for its account by the Federal Reserve bank" and inserting in lieu thereof the words "in such amount as the Board determines taking into account items in transit, services provided by the Federal Reserve bank, and other factors as the Board may deem appropriate".

(6) by inserting after the words "nonmember bank" after the second colon the words "or other depository institution."

(b) The thirteenth paragraph of section 16 of the Federal Reserve Act (12 U.S.C. 360) is amended as follows:

(1) by striking out the words "member banks" wherever they appear and inserting in lieu thereof "depository institutions".

(2) by striking out the words "member bank" wherever they appear and inserting in lieu thereof "depository institution".

(3) by inserting after the word "checks" wherever it appears the words "and other items, including negotiable orders of withdrawal and share drafts".

(c) The fourteenth paragraph of section 16 of the Federal Reserve Act (12 U.S.C. 248(o)) is amended by striking out "its member banks" and inserting in lieu thereof "depository institutions".

SEC. 206. The provisions of this Act (other than title III) shall become effective one year after date of enactment.

TITLE III

EXTENSION OF FLEXIBLE AUTHORITY TO IMPOSE INTEREST RATE CEILINGS ON DEPOSITS

SEC. 301. Section 7 of the Act of September 21, 1966 (Public Law 89-597), is amended by striking out "December 15, 1977" and inserting in lieu thereof "December 15, 1980".

TITLE IV—CHARTERS FOR THRIFT INSTITUTIONS

SEC. 401. Section 2(d) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1462(d)) is amended to read as follows:

"(d) The term 'association' means a Federal savings and loan association or a Federal mutual savings bank chartered by the Board under section 5, and any reference in any other law to a Federal savings and loan association shall be deemed to be also a reference to a Federal mutual savings bank, unless the context indicates otherwise.".

SEC. 402. Section 5(a) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(a)) is amended to read as follows:

"SEC. 5. (a) In order to provide thrift institutions in which people may invest their funds and in order to provide for the financing of homes and family and consumer needs, the Board is authorized to provide for the organization, incorporation, conversion, examination, operation, and regulation, under such rules, regulations (including definitions of terms used in this Act), or orders as it may prescribe, of associations which may be known as 'Federal Savings and Loan Associations' or 'Federal Savings Banks' (but only in the case of associations which, prior to conversion, were State mutual savings banks located in States which authorize the chartering of State mutual savings banks), and in issuing charters therefore, the Board shall give primary consideration to the best practices of thrift institutions and the needs of the families, consumers and communities to be served. An association which was formerly organized as a savings bank under State law may, to the extent authorized by the Board, continue to carry on any activities it was engaged in on December 31, 1976, and to retain or make any investments of a type it held on that date, except that its equity, corporate bond and consumer loan investments may not exceed the average ratio of such investments to total assets which existed immediately prior to its conversion.".

SEC. 403. Section 403(a) of the National Housing Act (12 U.S.C. 1726(a)) is amended by inserting after "Federal savings and loan associations" the following: "and Federal mutual savings banks".

SEC. 404. The first paragraph of section 5 (1) of the Home Owners' Loan Act of 1933, as amended (12 U.S.C. 1464(1)), is amended by inserting "(Including a savings bank)" after "member of a Federal Home Loan Bank".

TITLE V—LENDING AND INVESTMENT POWERS

SEC. 501. Section 5(c) of the Home Owners' Loan Act of 1933, as amended (12 U.S.C. 1464 (c)), is amended to read as follows:

"(c) An association may, to such extent, and subject to such rules, regulations, definitions, and orders, as the Board may prescribe from time to time invest in, sell or otherwise deal with the following loans, or other investments:

"(1) Loans or Investments Without Percentage of Assets Limitation.—Without limitation as a percentage of assets, the following are permitted:

"(A) Savings Account Loans: loans on the security of its savings accounts;

"(B) Single Family and Multifamily Mortgage Loans: loans on the security of first liens upon residential real property within one hundred miles of its home office or within the State in which such home office is located; loans so secured shall not exceed $55,000 in principal amount (except that with respect to [residential real estate] in Alaska, Guam and Hawaii the foregoing limitation may be increased by not to exceed 50%) for each single family dwelling and or exceed such amount per room within the limits allowable (at the time of the loan) in section 207(c)(3) of the National Housing Act for any other dwelling unit covered by such lien;

"(C) United States Government Securities: investments in obligations of, or fully guaranteed as to principal and interest by, the United States;

"(D) Federal Home Loan Bank and Federal National Mortgage Association Securities: investments in the stock or bonds of a Federal Home Loan Bank or in the stock of the Federal National Mortgage Association;

"(E) Federal Home Loan Mortgage Corporation Instruments: investments in mortgages, obligations or other securities which are or ever have been sold by the Federal Home Loan Mortgage Corporation pursuant to section 305 of the Federal Home Loan Mortgage Corporation Act;

"(F) Other Government Securities: investments in obligations, participations, (securities) or other instruments of or issued by, or fully guaranteed as to principal and interest by, the Federal National Mortgage Association, the Student Loan Marketing Association or the Government National Mortgage Association, or any other agency of the United States and an association may issue and sell securities which are guaranteed pursuant to section 306(g) of the National Housing Act;

"(G) Bank Deposits: investments in the time deposits, certificates, or accounts of any bank the deposits of which are insured by the Federal Deposit Insurance Corporation;

"(H) State Securities: investments in general obligations of any State or any political subdivision thereof;

"(I) Purchase of Insured Loans: purchase or make subject to all the provisions of this subparagraph (1), except the area restriction, loans secured by first liens on improved real estate which are insured under provisions of the National Housing Act, or as provided in the Servicemen's Readjustment Act of 1944 or chapter 37 of title 38 of the United States Code;

"(J) Home Improvement and Mobile Home Loans: loans not exceeding $10,000 [15,000] made for the repair, equipping, alteration or improvement of any real property, and loans made for the purpose of mobile home financing;

"(K) Insured Loans to Finance the Purchase of Fee Simple: loans or obligations, as to which the association has the benefit of insurance under section 240 of the National Housing Act, or of a commitment or agreement therefor;

"(L) Loans to Financial Institutions, Brokers and Dealers: loans, to financial institutions with respect to which the United States or an agency or instrumentality thereof has any function of examination or supervision, or to any broker or dealer registered with the Securities and Exchange Commission, secured by loans, obligations or investments in which the association has the statutory authority to invest directly;

"(M) Liquidity Investments: investments which, at the time of making, are assets eligible for inclusion toward the satisfaction of any liquidity requirement imposed by the Board pursuant to section 5A of the Federal Home Loan Bank Act, but only to the extent that the investment is permitted to be so included under regulations of the Board or is otherwise authorized;

"(N) Investment in the National Housing Partnership Corporation Partnerships, and Joint Ventures: investments in shares of stock issued by a corporation authorized to be created pursuant to title IX of the Housing and Urban Development Act of 1968, and investments in any partnership, limited partnership or joint venture formed pursuant to section 907(a) or 907(c) of that Act;

"(O) HUD Guaranteed Investments: loans or obligations as to which the association has the benefit of any guaranty under title IV of the Housing and Urban Development Act of 1968 or under part B of the Urban Growth and New Community Developemnt Act of 1970 or under section 802 of the Housing and Community Development Act of 1974, as now or hereafter in effect, or of a commitment or agreement therefor.

"(2) Loans or Investments Limited to Twenty Percent of Assets.—The following loans or investments are permitted, but authority conferred in the following subparagraphs is limited to not in excess of twenty

percent of the assets of the association for each subparagraph:

"(A) Multifamily Mortgage Loans: subject to the limitations in subparagraph (1)(B) hereof loans secured by property which comprises or includes more than four dwelling units or does not constitute homes, or combinations of homes and business property;

"(B) Improved Real Estate Loans: loans on security of first liens upon improved real estate;

"(C) Participation Loans: without regard to area restriction contained in subparagraph (1)(B) investments for the making or purchase of participation interests in first liens on residential real property;

"(D) Home Improvement Loans: subject to the area requirement contained in subparagraph (1)(B) investments in loans insured under title I of the National Housing Act, in home improvement loans insured under title II of the National Housing Act, in unsecured loans insured or guaranteed under the provisions of the Servicemen's Readjustment Act of 1944, or chapter 37 of title 38 of the United States Code, and in other loans for property alteration, repair, or improvement, including the construction of new structures related to residential use of the property: *Provided*, That no such loan, unless so insured or guaranteed, shall be made in excess of $10,000. Participating interests in loans secured by mortgages which have the benefit of insurance or guaranty (or a commitment therefor) under the National Housing Act, the Servicemen's Readjustment Act of 1944, or chapter 37 of title 38 of the United States Code shall not be taken into account in determining the amount of loans which an association may make within any of the percentage limitations, other than this subparagraph, contained in this subparagraph (2)(D).

"(3) Loans or Investments Limited to Five Percent of Assets.—The following loans or investments are permitted, but the authority conferred in the following subparagraphs is limited to not in excess of five percent of assets of the association for each subparagraph:

"(A) Education Loans: loans, obligations and advances of credit made for the payment of expenses of college, university or vocational education;

"(B) Land Acquisition: an association whose general reserves, surplus, and undivided profits aggregate a sum in excess of 5 per centum of its withdrawable accounts is authorized to invest in, subject to the area restriction contained in subparagraph (1)(B), loans to finance the acquisition and development of land for primarily residential usage;

"(C) Short-Term Non-Amortized Loans: subject to the area and dollar amount restrictions contained in subparagraph (1)(B), an association may invest in non-amortized loans which are made on the security of first liens upon homes or combinations of homes and business property which are (i) repayable within a period of eighteen months, (ii) provide that interest payments be made at least semi-annually, and (iii) do not exceed 80 per centum of the appraised value of the property involved;

"(D) Housing Facilities for the Aging: subject to the area restriction contained in subparagraph (1)(B), amortized loans or participating interests therein which are secured by first liens upon improved real estate used to provide housing facilities for the aging subject to the following limitations:

"(i) each such loan shall be repayable within thirty years;

"(ii) the loan shall not exceed 90 per centum of the appraised value of the improved real estate given as security therefor; and

"(iii) each such loan shall be made upon and secured by real estate which is improved by housing accommodations, individual or multiple, designed for the purpose of providing accommodation for occupancy by aging persons, or of providing rest homes or nursing homes, so constructed or altered as to be suitable primarily for the occupancy of persons over fifty-five years of age and limited principally to the occupancy of such persons;

"(E) Urban Renewal Investments: investments in, real property located within an urban renewal area as defined in subsection (a) of section 110 of the Housing Act of 1949 and obligations secured by first liens on real property so located, but no investment in real property may exceed an aggregate investment of two percent of the assets of the association;

"(F) Nonconforming Loans: loans and advances of credit and interests therein upon the security of or respecting real property or interests therein used for primarily residential purposes that do not comply with the limitations of this section.

"(4) Other Loans and Investments.—The following additional loans and other investments to the extent authorized below:

"(A) Business Development Corporations: an association whose general reserves, surplus and undivided profits aggregate a sum in excess of five percent of its withdrawable accounts is authorized to invest in, lend to, or to commit itself to lend to, any business development corporation incorporated in the State in which the home office of the association is located in the same manner and to the same extent as savings and loan associations chartered by such State are authorized, but the aggregate amount of such investments, loans and commitments of any such association shall not exceed one-half of one percent of the total outstanding loans of the association or $250,000, whichever is less;

"(B) Service Corporations: investments in the capital stock, obligations, or other securities of any corporation organized under the laws of the State in which the home office of the association is located, if the entire capital stock of such corporation is available for purchase only by savings and loan associations of that State and by Federal associations having their home offices therein, but no association may make any investment under this subparagraph if its aggregate outstanding investment under this subparagraph would exceed one percent of the assets of the association;

"(C) Foreign Assistance, Certain Guaranteed Loans: (i) loans and interests in loans secured by mortgages as to which the association has the benefit of insurance under title X of the National Housing Act or of a commitment or agreement for such insurance, or (ii) acquire and hold investments in housing project loans, or interests therein, having the benefit of any guaranty under section 221 of the Foreign Assistance Act of 1961 or loans, or interests therein, having the benefit of any guaranty under section 222 of such Act, or any commitment or agreement with respect to such loans, or interests therein, made pursuant to either of such sections and in the share capital and capital reserve of the Inter-American Savings and Loan Bank. This authority extends to the acquisition, holding, and disposition of loans, or interests therein, having the benefit of any guaranty under either such section or such sections as hereafter amended or extended, or of any commitment or agreement for any such guaranty. Investments under clause (i) of this subparagraph shall not be included in any percentage of assets or other percentage referred to in this section. Investments under clause (ii) of this subparagraph shall not exceed, in the case of any association, 1 per centum of the assets of such association;

"(D) State Housing Corporations: an association whose general reserves, surplus, and undivided profits aggregate a sum in excess of 5 per centum of its withdrawable accounts is authorized to invest in, to lend to, or to commit itself to lend to any State in which the home office of such association is situated, in the same manner and to the same extent as the statutes of such State authorize a savings and loan association organized under the laws of such State to invest in, to lend to, or commit itself to lend to such State housing corporation, but no association may make any investment, other than loans and loan commitments, under this sentence if its aggregate outstanding direct investment under this sentence, would thereupon exceed one-fourth of one percent of the assets of the association;

"(E) Construction Loans, With or Without Security: subject to the area restriction of subparagraph (1)(B), investments not exceeding the greater of (A) the sum of its surplus, undivided profits, and reserves or (B) three percent of the assets of the association, in loans, or in interests therein, the principal purpose of which is to provide financing with respect to what is or is expected to become primarily residential real estate where (i) the association relies substantially for repayment on the borrower's general credit standing and forecast of income, with or without other security, or (ii) the association relies on other assurances for repayment, including but not limited to a guaranty or similar obligation of a third party, and, in either case described in clause (i) or (ii), regardless of whether or not the association takes security; and investments under this sentence shall not be included in any percentage of assets or other percentage referred to in this subsection.

"(5) Converted State Chartered Associations.—Any association which is converted from a State-chartered institution may continue to make loans in the territory in which it made loans while operating under State charter.

"(6) Definitions.—As used in this section—

"(A) the terms 'residential real property' or 'residential real estate' include leaseholds and means homes (including condominiums and cooperatives), combinations of homes and business property, other dwelling units, or combinations of dwelling units including homes and business property involving only incidental business use;

"(B) the term 'loans' includes obligations and extensions or advances of credit; and any reference to a loan or investment includes an interest in such a loan or investment; and

"(C) the term 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Canal Zone, Guam, American Samoa and any territory or possession of the United States."

TITLE VI—DEPOSIT INSURANCE FOR RETIREMENT PLANS

SEC. 601. (a) Section 11(a)(2)(A) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1821(a)(2)(A)) is amended—

(1) by striking out "or" at the end of clause (iii);

(2) by inserting "or" after the semicolon at the end of clause (iv); and

(3) by adding at the end thereof the following:

"(v) a self-employed individual investing or depositing funds in time or savings deposits in an insured bank pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended; or

"(vi) an individual investing or depositing funds in time or savings deposits in an insured bank in the form of an individual retirement account as described in section 408(a) of the Internal Revenue Code of 1954, as amended;".

(b) Section 405(d)(1) of the National Housing Act, as amended (12 U.S.C. 1728(d)(1)) is amended—

(1) by striking out "or" at the end of clause (iii);

(2) by inserting "or" after the semicolon at the end of clause (iv); and

(3) by adding at the end thereof the following:

"(v) a self-employed individual investing or depositing funds in accounts in an insured institution pursuant to a pension or profit-sharing plan described in section 401 (d) of the Internal Revenue Code of 1954, as amended; or

"(vi) an individual investing or depositing funds in accounts in an insured institution in the form of an individual retirement account as described in section 408(a) of the Internal Revenue Code of 1954 as amended;".

(c) Section 207(a)(2)(A) of the Federal Credit Union Act, as amended (12 U.S.C. 1787 (c)(2)(A)) is amended—

(1) by striking out "or" at the end of clause (iii);

(2) by inserting "or" after the semicolon at the end of clause (iv); and

(3) by adding at the end thereof the following:

"(v) a self-employed individual investing or depositing funds in accounts in a credit union insured in accordance with this title pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended; or

"(vi) an individual investing or depositing funds in accounts in a credit union insured in accordance with this title in the form of an individual retirement account as described in section 408(a) of the Internal Revenue Code of 1954, as amended;".

By Mr. KENNEDY (for himself, Mr. MORGAN, and Mr. DANFORTH):

S. 1874. A bill to restore effective enforcement of the antitrust laws; to the Committee on the Judiciary.

Mr. KENNEDY. Mr. President, today, Senator MORGAN, Senator DANFORTH, and I are introducing a bill which will amend section 4 of the Clayton Act to allow consumers and other parties who have not dealt directly with an antitrust violator to recover their damages under the antitrust laws. Identical legislation, entitled "A Bill To Restore Effective Enforcement of the Antitrust Laws," is also being introduced today by Congressman RODINO, chairman of the House Judiciary Committee and Antitrust Subcommittee.

The legislation we are introducing does not increase the liability for an antitrust violation, but simply insures that the damages resulting from a violation are recovered by the parties injured.

This legislation was made necessary by a June 9, 1977, Supreme Court decision entitled "Illinois Brick Co. v. Illinois." In this decision the Supreme Court held that only those parties who dealt directly with the antitrust violator could recover damages. For example, if a group of manufacturers overcharged customers as a result of a price-fixing agreement, only the direct purchasers—usually wholesalers—could recover damages. In reality, however, the wholesaler or other middleman is often able to pass on his increased cost to his customers so it is the customers—usually ultimate consumers—who are really injured.

In an earlier case, Hanover Shoe Inc. against United Shoe Machinery Corp., the Supreme Court had held that the first or "direct" purchaser from an antitrust violator could recover the entire amount of the overcharge even if most or all of the overcharge was passed on to consumers. Therefore, as the law now stands, the direct purchaser can recover the full amount of the price fixing overcharge even though he may have passed on most or all of the overcharge. Likewise, indirect purchasers are wholly barred from any recovery even though they may have in fact suffered most or all of the damage.

The proposed bill would change this result by stating that each person "injured, in fact, directly or indirectly" can recover. Parties dealing directly with antitrust violators would still be able to sue, but can only recover damages they "in fact" sustained. Indirect parties would also be able to sue, but only to the extent of their damages.

This bill will improve the effectiveness of antitrust enforcement in two ways. The bill provides that each type of person injured by antitrust violations will recover what damage he actually suffered—which will, of course, then be trebled. This means, first, that many persons who are actually damaged but are denied recovery under Illinois Brick, because they are "indirect" parties, will have their remedy restored, and second, that the windfall recovery now received by direct parties who recover the full amount of the overcharge, even though they have passed on most or all of the overcharge, will be eliminated.

Although the Illinois Brick decision did not directly involve the parens patriae section of the Hart-Scott-Rodino Antitrust Improvements Act, which we passed last fall, the implications of the decision to these suits are clear. In a footnote in this case the Supreme Court interpreted parens patriae actions as simply a new procedural device to enable State attorneys general to enforce existing rights of consumers under section 4. Thus since most consumers are indirect purchasers, it appears likely that the Supreme Court would totally deny recovery in these cases.

The entire purpose of the parens patriae section of the Hart-Scott-Rodino act, was to enable the States to institute suits for damage to their citizens caused by antitrust violations. The dicta in this decision ignores the clearly expressed intent of the Congress, and we must make that clear.

The Illinois Brick decision has much broader implications than the parens patriae section of the Hart-Scott-Rodino act, however. The ultimate purpose of the antitrust laws is to protect this Nation's citizens from the effects of unfair competitive practices, price-fixing schemes and other violations. This case virtually eliminates the remedies available for the very people the antitrust laws were intended to protect.

The legislation we are introducing will reaffirm the intent of the Congress, and I urge its speedy enactment.

ADDITIONAL STATEMENTS

A $48 BILLION PRESIDENTIAL ERROR

Mr. DOMENICI. Mr. President, the energy crisis demands that all of us, of whatever political persuasion, of whatever group—producer or consumer—in our Nation, of whatever ideological stripe, work together to devise a plan that will work. I stress that phrase, "that will work." We need no plan that merely continues shortage, nor a plan that hostages the future unnecessarily to a doomsday attitude.

On my last trip to my home State of New Mexico, I met with scientists interested in solar energy and saw the incredible project that they have produced for using the Sun for irrigation power near Willard, N. Mex. I met with uranium miners, and went down 600 feet beneath the Earth to watch them produce that precious ore. And, I met with those who drill for the Nation's oil and gas, and talked to the citizens who must use those commodities.

This 6-day visit with the energy community in my State persuades me, Mr. President, that we have seriously underestimated the productive capacity of America's energy sector. We have underestimated the market forces that could bring energy for our children and beyond. We have sold short what high wages for our miners and roughnecks will do, what economic development in cities near mines and wells will do, and what economic incentive for our producers will do.

I came away from my visit to my home State believing that New Mexicans, and other Americans, are ready to do their part for energy development, if given the incentive. And, I see great potential for further exploration for oil and gas, if the motivation is there.

In the past, I have withheld any criticism of a significant nature of the energy package put forth by the President, because I had hoped that consensus and quiet conference could produce a plan that stressed more firmly production and new supply. I still believe that is the best course—I reject partisan criticism in an emergency of this nature. The facts, however, demand that a few notions be surfaced, in the interest of forming a good energy plan for America.

First, we must admit that the day of cheap energy is over—and we must act as though we believed that. We cannot decry increased costs of energy and yet insist that energy will cost more. Let us level with Americans—if you want as much energy as you have had in the past, it will cost more, because it is, at present, based upon nonrenewable resources.

Second, we must recognize that if you pay a man more for a product, he will do his best to produce as much of it for you as he can. That is a basic "law," if you will, of human nature. It is a concept neither profound, nor new, but merely true.

And, we must not adjure those of another belief to refrain from criticism, however legitimate, and then criticize those of another interest or persuasion.

In this respect, I must point out that White House criticism of the oil and gas industry recently, and of the House of Representatives, has been harsh. Producers of natural gas, one of the rarest of commonly used energy commodities, have been the object of severe words, as have those in the House who have voted for deregulation of natural gas. I cannot believe that such criticism, sometimes

amounting to "scapegoatism," is productive, nor can I believe it will lead to a rational discussion of natural gas policy.

The Wall Street Journal editorialized on the subject of natural gas and deregulation of new natural gas yesterday. I commend this editorial to my colleagues. It reasons that deregulation will lead to new supply and help alleviate short- and mid-term shortages. And, it cites studies to back its contention.

Mr. President, a call for deregulation of new natural gas is not partisan, nor producer-oriented, but merely good policy. We know that natural gas is finite, that new kinds of energy—solar, geothermal, nuclear, fusion, and beyond—must take its place. But, for those homes that must be heated now, for those stoves that must be lit now, for those plants that must produce now, natural gas stands paramount. We must have more of it, and we can. Deregulation of new natural gas will cost the consumer less than an artificial price, will give us more jobs, and will lead to a better economic picture. Now that strikes me as some of the elements of a good natural gas, and energy, policy.

Mr. President, I ask unanimous consent that the Wall Street Journal editorial, "A $48 Billion Presidential Error," be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A $48 BILLION PRESIDENTIAL ERROR

When the House Commerce Committee two weeks ago voted 22-to-21 against deregulation of new natural gas, President Carter and his energy people celebrated a victory. The White House had come down to using the argument that deregulation would give producers a "windfall" of more than $71 billion in revenues. This is over and above what they would get from the $1.75 per thousand cubic feet (mcf) price ceiling in the Carter plan. Perish the thought, even though producers would probably invest almost as much in exploration and production as they receive in revenues.

Mr. Carter's energy people have been shamelessly playing with numbers like this all year to support their case for continued regulation, scaring people with the idea that deregulation will cost consumers a lot more money. What they carefully avoid mentioning is that continued regulation will cost even more.

In a careful, conservative study that bends over backward to be fair to the White House, two Republican Congressmen this week estimated that the Carter plan will cost $48 billion more than deregulation between now and 1990. Here is how Rep. David Stockman of Michigan and Rep. Clarence Brown of Ohio came to this conclusion:

They first reject the incredible White House assumption, implicit in its numbers game, that at a price above $1.75 per mcf zero gas will be produced. The study instead reckons that over the 13-year period, an additional 25 trillion cubic feet (tcf) will be produced as a result of deregulation. Current production is about 20 tcf a year, and the estimate of 25 tcf from deregulation is highly conservative. More production, of course, would mean more savings from deregulation.

If American consumers are denied 25 tcf of natural gas, they will have to get the energy instead from oil or liquefied natural gas or synthetic gas from naphtha or coal. All are more expensive than gas is likely to be under deregulation. The cost of these fuels adds $168 billion to the energy bill. And by moving 25 tcf less gas through the pipeline system, the distribution charges rise per unit to the consumer. This comes to another $44 billion cumulatively. The administration simply ignored these hidden costs in making its case.

The 13-year energy costs under deregulation are then calculated by Stockman-Brown at $414.2 billion. The parallel figure under the Carter plan is $461.8 billion with the gap between the two widening every year thereafter.

If there is any error in these numbers, the Carter plan gets the best of it, considering the length to which Reps. Stockman and Brown went to be fair. For example, they hold OPEC pricing constant through the 13 years. But obviously, if the United States must substitute for 25 tcf of domestic natural gas, it most likely will have to import the energy equivalent. This increase in demand would permit OPEC to increase its oil price by at least $1 per barrel for all oil. This adds an average of roughly $33 billion to the U.S. import bill during the 13 years, and adds $100 billion to the import bill of Europe, Japan and the Third World. The Stockman-Brown $48 billion estimate charitably ignores these costs.

Even if the increased demand has zero impact on OPEC pricing, it would still mean the United States would have to increase imports of Arab oil by nearly 500,000 bbls. per day when compared to a deregulated scenario. The Stockman-Brown study figures the Carter plan will mean an extra $26 billion in the U.S. import bill over these years even without a price increase.

The Carter people will no doubt want to quibble with these numbers, if they can't find a way of ignoring them altogether. But there is absolutely no logical way deregulation can cost consumers more than the Carter plan. The only way the President's people can defend their position is by sticking to their assumption that there is no gas to be found above $1.75. It is hard to see how any serious person can accept such an assumption. Even the most pessimistic of the three estimates in the ERDA MOPPS study, for example, found twice as much gas at a price of $3.25 than at $1.75.

Mr. Carter is supposed to be good with numbers and logic, and ought to sit down with his own slide rule, taking the administration's gas deregulation position as seriously as the B1 or the neutron bomb. It's inconceivable that a good engineer would make a $48 billion mistake.

EXPORT-IMPORT BANK FINANCING NOTIFICATION

Mr. PROXMIRE. Mr. President, I call to the attention of my colleagues a communication I have received from the Export-Import Bank pursuant to section 2(b)(3) of the Export-Import Bank Act notifying the Congress of a proposed Eximbank loan to assist construction of three thermal powerplants on the island of Taiwan. Section 2(b)(3) of the act requires the Bank to notify the Congress of any proposed loan, guarantee, or combination thereof in an amount of $60 million or more at least 25 days of continuous session of the Congress prior to the date of final approval. Upon expiration of this period, the Bank may give final approval to the transaction unless the Congress dictates otherwise.

In this case, the Bank proposes to extend a loan in the amount of $116,796,900 to Taiwan Power Co. to assist the purchase of U.S. goods and services to be used in the construction of three 500-megawatt thermal powerplants on Taiwan. The Republic of China will guarantee repayment of the loan. Exim's participation will cover 55 percent of the total cost of U.S. goods and services for the project. The loan will bear interest at the rate of 8 percent per annum and will be repayable over a 10-year period beginning December 15, 1980, for credit used to assist construction of the first plant and December 15, 1981, for credit used in the construction of the other two plants.

I ask unanimous consent that the letter from Exim pertaining to this transaction together with the accompanying materials be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

July 7, 1977.

Hon. ADLAI E. STEVENSON III,
Chairman, Senate Subcommittee on International Finance, Russell Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: In accordance with Section 2(b)(3) of the Export-Import Bank Act of 1945, I have reported to the President of the Senate and the Speaker of the House of Representatives on an application currently pending consideration by the Bank. I respectfully furnish herewith a copy of this statement for your consideration.

Sincerely,

DELIO E. GIANTURCO.

WASHINGTON, D.C.
July 7, 1977.

Hon. WALTER F. MONDALE,
President of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: Pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States Senate with respect to the following transaction involving U.S. exports to the Republic of China.

A. DESCRIPTION OF TRANSACTION

1. Purpose

Eximbank is prepared to extend a direct credit of $116,796,900 to Taiwan Power Company (Taipower) to assist Taipower in the purchase from United States suppliers of three boilers and related equipment and services for use in the construction of a 500 MW thermal power plant located at Hsiehho, Taiwan and two 500 MW thermal power plants located at Anping, Taiwan. All three plants will use fossil fuel. Repayment of the Eximbank credit will be unconditionally guaranteed by the Republic of China.

Babcock & Wilcox Company will supply the boiler for the Hsiehho plant. Foster-Wheeler Energy Corporation will supply the two boilers for the Anping plant and Gibbs & Hill Engineering Corporation will provide engineering services for all three plants.

The total project cost of the three plants is $680,300,000 of which the total cost of the U.S. goods and services is $212,358,000. Financing for procurement from Europe and Japan for this project will be covered by guarantees from the official export credit agencies of those countries. Taipower will obtain local loans for the local cost of the project, and will also provide its own funds for the project.

2. Identity of the parties

Taipower, organized in 1946, is a corporation 95% owned by the Republic of China and its political subdivisions. It has the sole responsibility for the supply of electricity throughout the island of Taiwan. Taipower is one of the largest users of Eximbank's programs for its U.S. purchases and has maintained an excellent credit relationship with Eximbank.

The Ministry of Finance of the Republic of China will issue to Eximbank an unconditional, full faith and credit guarantee for repayment of the Eximbank direct credit.

2. Nature and use of goods and services

The goods to be exported from the United States are three boilers, transformers, auxiliary electric equipment, substation equipment, miscellaneous equipment and spare parts. The U.S. originated services are engineering services and ocean freight on U.S. flag vessels. To date only the boilers from Foster-Wheeler and Babcock & Wilcox and the engineering services from Gibbs and Hill have been ordered, with the remaining U.S. goods and services to be ordered in the next few months.

The U.S. goods and services will be used in three 500 MW thermal power plants, one located on the northern tip of Taiwan which can be fueled by either oil or natural gas, and two located on the southwest coast of Taiwan which can be fueled by either coal, oil or natural gas. The three plants will provide approximately 15% of Taiwan's electricity needs. Oil will be supplied under a long-term contract with the government-owned Chinese Petroleum Company; coal will be imported from Australia; and natural gas may be supplied from offshore wells in the Formosa Strait located between Taiwan and the mainland.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons

The Eximbank direct credit of $116,796,900 will facilitate the export of $212,358,000 of United States goods and services.

Eximbank perceives no adverse impact on the United States economy from the export of these goods and services. This transaction will have a favorable impact on employment for substantial numbers of United States workers, as well as on the United States balance of trade. None of the goods to be exported are in short supply in the United States.

The domestic market for conventional power equipment has been well below the United States productive capacity. Foreign orders, therefore, have become a vital portion of United States thermal power equipment manufacturers' business which enables those manufacturers to retain specialized engineering and technical staffs and production work forces. Foster-Wheeler states that the two boilers, auxiliary equipment and electrostatic precipitators it will be supplying will require 1,200 man years of work at its facilities, principally in Danville, New York where unemployment is near 10%, and also in Mountaintop, Pennsylvania, Panama City, Florida and Dallas, Texas. Babcock & Wilcox states that the equipment it will supply will require 500 man years of work at its facilities in Akron, Ohio, Beaver Falls, Pennsylvania and Paris, Texas. Gibbs and Hill reports that it will take 130 man years of U.S. personnel to perform the engineering services. Since these contracts represent only 40% of the value of the U.S. goods and services, Eximbank estimates that once the procurement is completed nearly every major industrial region in the United States will benefit from this transaction.

Power plants are classic examples of the economic necessity for Eximbank support. Private U.S. export financing sources without an Eximbank guarantee are normally limited to five-year maturities. In this transaction, however, there is a total term of fourteen years consisting of a four-year construction period and a ten-year repayment period. Thus, private financing is inadequate to meet the financial requirements of this project and the Eximbank direct credit is necessary in order to generate sufficient financing for the U.S. sales. Private financing without Eximbank guarantee is available only for the construction period and the earlier years of the repayment period.

The United States suppliers have had a long beneficial relationship with Taipower as a result of their dependable performance and superior technology. However, today manufacturers in nearly all of the industrial countries are fully capable of supplying all or nearly all of the goods and services for the three power plants, and in most instances at prices substantially below the cost of the U.S. goods and services. Eximbank has received information that suppliers in Japan, Switzerland, United Kingdom and West Germany, with the strong support of the official export credit agencies in each of these countries, submitted bids for the procurement of major equipment categories for the three plants. All were lower in price than the comparable U.S. costs. Nonetheless, the U.S. suppliers won the bid for the boilers and related equipment.

In view of the magnitude of the transaction, the necessary repayment term, and the existence of foreign competition, Eximbank's credit is necessary to secure this sale for United States suppliers.

2. The financing plan

The total cost of United States goods and services to be purchase by Taipower is $212,358,000, which will be financed as follows:

	Amount	Percent of U.S. Costs
Cash	$42,471,600	20.0
Eximbank credit	116,796,900	55.0
Private loans not guaranteed by Eximbank	53,089,500	25.0
Total	212,358,000	100.0

(a) Eximbank Charges

The Eximbank credit will bear interest at the rate of 8% per annum, payable semiannually. A commitment fee of 0.5% per annum will also be charged on the undisbursed portion of the Eximbank credit.

(b) Repayment Terms

The Eximbank credit and private loans, which total $169,886,400, will be repaid by the Borrowers in 20 semiannual installments (i) beginning December 15, 1980 on the financing for the U.S. goods and services for the Hsiehho power plant; and (ii) beginning December 15, 1981 on the financing for the U.S. goods and services for the Anping power plant. Under each of these repayment schedules, the first 6 installments and a portion of the 7th installment will be applied to repayment of the private loans and a portion of the 7th and all of the last 13 installments will be applied to repayment of the Eximbank direct credit.

Sincerely,

DELIO E. GIANTURCO,
First Vice President and
Vice Chairman.

SENIOR CITIZEN'S INTERNSHIP PROGRAM

Mr. HEINZ. Mr. President, I am very pleased to add my name as a cosponsor to Senator ROTH's resolution establishing a senior citizens' internship program in the Senate.

This program would provide the necessary funds for each Senator to invite a senior citizen constituent to come to Washington for 2 weeks in May. Through briefings and seminars, the interns would become familiar with the resources of the Federal Government and learn the best way to have an impact on the making of laws and regulations germane to their needs and interests. When they return home, they can communicate this information to senior citizen groups in their State.

The program offers a learning experience for the interns, but we should not forget that we have much to learn from the experience and wisdom senior citizens have gained over a lifetime. There are nearly 23 million Americans over the age of 65, and the population continues to grow each year. It is mutually beneficial for us to insure that they remain active members of society, and are not shunted aside to a life of inactivity and idleness.

My office currently has three senior citizen interns working side by side with college age interns and my full-time staff. As a legislative proposal to keep senior citizens in the mainstream, earlier this year I introduced a bill to extend the protection against employment discrimination to workers who are 65 or older and to make clear the unlawfulness of seniority systems and benefit plans which require retirement based solely on chronological age.

The internship program as proposed by my distinguished colleague will provide more opportunities for senior citizens to become familiar with the Government and remain active citizens. When the interns return home, the knowledge they have gained will enable them to get others involved in their community. This is the real benefit of the program, and I look forward to the adoption of this resolution to provide that opportunity.

WATER PROJECTS, H.R. 7553

Mr. McINTYRE. Mr. President, earlier this week the Senate approved H.R. 7553, the public works appropriations bill. Unfortunately, I was detained on business during the vote and was unable to be present.

Had I been present, I would have voted against final passage of H.R. 7543. Although there were numerous fine sections to this bill, I felt that much of the money contained in H.R. 7553 could have been better spent elsewhere. My colleagues will recall that I offered an amendment earlier that would have eliminated funding for seven of these water projects and would have limited it severely for one other. Although my amendment failed, I was pleased by the strong showing of support for the President's position on these projects that it generated. I am hopeful that it will aid the Senate's position when we go into conference with the House on this legislation and that it will be a clear signal that the Congress is reevaluating its own budget priorities.

As I stated in floor debate on this legislation, my quarrel with these projects lies not in their individual merits—they all have merit or they would not have progressed this far—but in the larger quesion of how we allocate a finite number of dollars among numerous diverse and competing funding priorities. I contend today, as I did earlier, that this

money could be better spent than on a handful of projects which the President, after careful study, has found to be wasteful or unsafe or economically unfeasible or environmentally unsound. The question is whether we should spend millions on projects of marginal benefit or on other more pressing needs—national health insurance; better care for the elderly; more available housing for low- and middle-income families; an improved defense capability; more funds for research into alternate sources of energy, et cetera.

This debate has not ended with the final disposition of this bill. Every day that the Congress is in session, we are going to have to look at these programs and these appropriations requests and ask ourselves "Is this money really needed?" This is the type of question I tried to raise about this particular appropriations bill.

THE STENCH OF OUR WEAKNESS IS IN THE AIR

Mr. GOLDWATER. Mr. President, the smell of American weakness is in the air and it grows stronger with each passing month. It emanates from decisions to withdraw our troops from South Korea, to cancel the B–1 bomber, and to make concessions to countries like Cuba, North Vietnam, and Communist China. It is all well and good for President Carter to talk of human rights and for Andrew Young and Vice President Mondale to talk about America's sense of morality, but this cannot cover the obvious fact that American power is slipping and that it is becoming more obvious with each passing day. Neutral nations are beginning to sense that we lack the will and may soon lack the equipment to confront Soviet aggression throughout the world. They are beginning to position themselves for Soviet dominance.

Mr. President, columnist Michael Novak, writing for a recent edition of the Washington Star, called the shots exactly the way they exist concerning American weakness. He suggests that moral preening is no substitute for slipping power in a world where power speaks more loudly than pious rhetoric. Let me quote one paragraph from Mr. Novak's article entitled, "The stench of our weakness is in the air," which says:

> Power governs world affairs, not moral principles. A truly moral nation must be prepared to accept the dirty hands of military power and secret operations. The grave weakness of the United States once again is that our moralists seem to prefer to shine their moral medals, rather than to challenge the open military power and the secret war of hidden agents for which, in fact, our adversary is prepared.

Mr. President, because of its extreme importance to the life of this Nation, I ask unanimous consent that Mr. Novak's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE STENCH OF OUR WEAKNESS IS IN THE AIR

Thirty-six years ago, in early 1941, the people of the United States and the Congress were anti-war. No one in the public eye was thinking much about impending war in Yugoslavia. No one except Franklin D. Roosevelt, who through a spectacular British success in codebreaking, knew about Hitler's plans to "pacify" the Balkans. Hitler planned to take the Balkans in a week, and then to seize Moscow in a blitzkrieg before the winter.

In utter secrecy, President Roosevelt dispatched his personal envoy "Wild Bill" Donovan to direct secret agents in the Balkans. Their task was to cause dissension in Yugoslavia, so that the Marxist guerrillas under Tito would be drawn into open war with the Nazis. Often in political affairs, power speaks louder than morality. In many nations, Nazi power won collaboration without a struggle. The King of Yugoslavia was ready to submit.

Fortunately, Franklin Roosevelt understood power, and the irresponsibility of mere "morality." He had lived through the terror of Coventry. He knew that Churchill, despite advanced knowledge of Nazi plans, could not warn exposed Coventry without tipping off the Nazis. Thousands of innocents died, in order that Britain might live to fight. Churchill and Roosevelt made that decision, accepting blood upon their hands.

The work of U.S. secret agents in Belgrade turned the Nazi occupation into a bloodbath. A palace revolution occurred. Bill Donovan taunted Hitler on the radio and in the press. Enraged, Hitler bombed Belgrade to smithereens. The guerrillas arose. The German armies were exposed to weeks of fighting. Hitler's triumphant strike into Russia was delayed for more than 38 days—later, it stalled in the snows of winter just short of its objective. One out of nine Yugoslavs perished, unknowing, for that cause.

One hopes, today, that the U.S. president and secret services are ready to do what must be done, in spite of public opinion, in spite of the Congress, should necessity once again arise. The pious moralists of the 1930s—forbidding arms, mocking Churchill, blocking Roosevelt—nearly delivered Great Britain to its doom. Ambassador Joseph P. Kennedy, to Churchill's anguish, kept predicting from London the fall of Britain, and privately urged settlement with Hitler.

Although every prescient person knew from 1936 that World War II was coming, most respected moralists held that Hitler was a man of reason like themselves, and had to be protected from the "hawks" around him. They wished to prove the cooperativeness of the democracies. Our real interests, they held, were not affected by the fall of small nations, underdeveloped, faraway.

Today, once again, Yugoslavia is on the front edge of the next moves which will be made by the greatest conventionally armed power in the history of the world, and by ourselves. Once again, Great Britain has been reduced to weakness, and injured from within more severely than from without. Once again, the southern flank of Europe is a weak spot. Once again, Tito is a key to the future, an old man now, likely to be irreplaceable. As in 1914 and in 1941, control over the Mediterranean will be decided by events in Serbia, Croatia, and Slovenia.

At two dinner parties recently, two very different sorts of Americans confided to me that they felt closer to war today than at any period in their lifetime. I agreed. One can feel it in the air. The smell of weakness is a special smell.

Brave words come from President Carter about challenging Soviet power in Cuba, Korea, and other trouble spots around the world. But the words are curiously matched with troop withdrawals and concessions. A pronounced perception of the creeping weakness of America grips the world. Our volunteer army is a disaster. Hurt in Vietnam, the giant has retreated to fascination with its wounds. Wise spokesmen like Vice President Mondale and Andrew Young speak about "wiping away America's moral shame" and "restoring America's sense of morality"—dead giveaways that as power slides away, this nation will cover nakedness with moral preening.

Assume that the Soviets will not dare to launch atomic weapons. The tests of muscle in the next 20 years, then, are likely to come with tanks, infantry, ships, and planes. Already, cynics in Turkey, the Balkans, and elsewhere are studying Russian. Many neutrals position themselves for Soviet dominance.

Power governs world affairs, not moral principles. A truly moral nation must be prepared to accept the dirty hands of military power and secret operations. The grave weakness of the United States, once again, is that our moralists seem to prefer to shine their moral medals, rather than to challenge the open military power and the secret war of hidden agents for which, in fact, our adversary is prepared.

I would feel better with a Churchill and a Roosevelt. The stench of moral language veils our voluntary weakness.

CCC CREDITS FOR FARM PRODUCTS TO CERTAIN NON-MARKET ECONOMY COUNTRIES

Mr. DOLE. Mr. President, this week the Subcommittee on International Trade of the Senate Committee on Finance explored with Government, industry, and farm representatives witnesses the trade and export problems which are currently contributing to the farm crisis in America.

COMMODITY CREDIT CORPORATION

In the course of the hearings it quickly became apparent that one of the most appropriate means of facilitating farm exports which are lagging badly for commodities such as wheat would be to expand the use of commodity credit corporation credits to help meet the severe competition in world markets. For example, our major competitors in wheat markets are offering credits. Canada recently sold large tonnages of wheat to the People's Republic of China on credit. Without a change in existing legislation, the American wheat farmer does not have an opportunity to meet this competition.

BERGLAND SUPPORTS CCC EXTENSION

I have proposed legislation which would give our farmers an opportunity to compete in nonmarket economy countries such as the People's Republic of China through the use of CCC credits. The legislation, however, excludes the nonmarket countries of Cuba, Laos, Cambodia, North Vietnam, and North Korea. These credits, as affirmed by Secretary Bergland at the hearings, do not cost the taxpayer a dime. In fact, he testified that the commodity credit corporation "makes a profit" since the interest rates are higher than the cost of money to CCC. Secretary Bergland expressed his strong support for CCC extensions.

JACKSON-VANIK AMENDMENT

Granting CCC credits to nonmarket countries would require modification in section 402 and section 409 of the Trade

Act of 1974. I supported the enactment of the Jackson-Vanik amendment. However, the Senator from Kansas believes that the Congress should continue to review its application. Have conditions changed in these countries to warrant extension of agricultural credit? Is it justifiable to keep food from people that may need it?

ADMINISTRATION SHOULD ACT

During the testimony a letter was distributed by the administration from Douglas J. Bennett, Jr., Assistant Secretary for Congressional Relations, in which it was stated that "the Department of State would not object to enactment of S. 1415"; further, that it was cleared by OMB and from the standpoint of the administration's program had no objection to this report. This letter was in response to a request from Chairman LONG for a report on the bill. Julius L. Katz, Assistant Secretary of State for Economic and Business Affairs, testified that the administration does not object to passage of S. 1415 and upon extensive questioning by Finance Committee members expressed unwaiveringly the exact wording of the letter.

Following those hearings, a letter was sent by my colleague, Senator JACKSON, to the Secretary of State, Mr. Vance, which drew an odd response. Mr. Vance, in a letter to Senator JACKSON, states, "it was our intention to state that we neither opposed nor supported S. 1415."

I would like for the administration to quit equivocating. Do they have plans for facilitating exports to all nonmarket economy countries, to certain nonmarket economy countries or to no nonmarket countries?

While the administration vacillates on this matter, the Canadians and Australians move vigorously into these markets with their grain while ours piles up back on the farm further depressing prices.

JOINT COMMITTEE ON DEFENSE PRODUCTION

Mr. PROXMIRE. Mr. President, yesterday the Appropriations Committee agreed to the recommendation of the senior Senator from Kentucky to restore funding for the Joint Committee on Defense Production. As chairman of the joint committee, naturally, I am pleased with this action. I believe it should and will be ratified by the Senate.

Senator HUDDLESTON'S action would not have been necessary, however, had not the House last month taken the unprecedented step of deleting all funding for the committee from the legislative branch appropriations bill. This resulted largely from misinformation and misconceptions about the work of the joint committee. I would like to take this opportunity to dispell the mistaken impressions that have been circulating on this question.

The best measure of effectiveness of an oversight committee is its impact on Federal policies and programs. Here the joint committee scores very well. Its recent oversight activities have led to our pieces of remedial legislation. One established a system of priorities for the manufacture of energy production equipment that that would not compete with a similar system for defense production. Another legislative initiative tightened the rules for granting anti-trust immunity to mutual agreement for marketing and production requested by the Government of firms in the defense and energy industries. These governed the U.S. involvement in the International Energy program until the passage of parallel restrictions in the energy policy and conservation Act.

A third piece of legislation developed by the joint committee would improve the Federal emergency preparedness effort. A year-long committee study showed Federal agencies and programs in this area to be in a deplorable state. A fourth bill offered by members of the joint committee would reduce the possibility of conflicts of interest for Federal procurement officials.

I will cite only a few of the many regulatory reforms which have been a direct result of the joint committee's oversight program. The regulations governing the defense priorities system were rewritten after joint committee hearings on abuses of the system. The standards of ethical conduct of the Department of Defense have been completely revised following a joint committee investigation and hearings. The committee's greatest regulatory impact probably has been on the cost accounting standards that are issued—under the Defense Production Act—for negotiated defense and aerospace contracts.

The work of the joint committee has affected Federal programs in other ways. The very costly new strategic stockpile programs proposed by the Ford administration was wisely withdrawn after critical hearings held by the joint committee last November. Compliance with cost accounting standards improved markedly following a joint committee inquiry. The Air Force revised its progress payments procedure for the F–16 fighter program when a study initiated by the joint committee showed the contractor was being paid above and beyond the work performed. A year ago, changes in the Defense Department's organization for weapons acquisition were forestalled by joint committee intervention. I could cite many other examples but they have already been enumerated in the RECORD by the vice chairman of the joint committee, Representative PARREN MITCHELL.

I grant that the effect of the joint committee's oversight may not be highly visible here on Capitol Hill. But that does not make this effect any less real or substantial. The committee's hearings are only the tip of the iceberg. The real work is reflected in patient investigations and inquiries, in correspondence, and in program and directives changes by the administration. It is important to recall that the specific statutory mandate of the joint committee is to insure that defense industrial preparedness programs are adequate without imposing unnecessary strains on our economy. These programs are not standby measures. They are in operation every day of the week whether or not the Congress or the public is aware of them. These programs cover billions of dollars worth of military procurement. They need a watchdog. And the joint committee is filling that role.

It has been said that other committees or agencies of the Congress could carry out this function. Of course, an oversight function can be assigned anywhere. The important point to remember, though, is that withholding an appropriation from the joint committee does not provide any alternative. It simply leaves these tasks undone.

Moreover, no other committee of Congress has tried to carry out these functions. For example, no other committee has looked at the problem of protecting our industrial and economic base from nuclear attack. No other committee has reviewed Federal materials policy, either in terms of defense or domestic needs. No other committee has examined the adequacy of defense contract auditing. No other committee has analyzed Soviet industrial defense measures. No other committee has done a comprehensive survey of Federal emergency preparedness programs. No other committee has examined the problem of erosion in the defense industrial base.

The joint committee on defense production has done all this and more.

The record of this accomplishment can be verified in the special and annual reports of the joint committee. These are not mere compilations of documents but thoughtful and well-supported evaluations of Federal policies and programs.

I doubt this could have been achieved if these tasks were assigned to other committees with heavy legislative burdens and other oversight priorities.

Yet the cost for effective oversight has been minimal. The budget requested by my predecessor, Leonor Sullivan, and recommended by the legislative subcommittees of both Houses is $225,000. The joint committee's staff is the smallest in the Congress. And no other staff has its expertise in defense industrial production policies and programs. With six specialists and two administrative workers, it has helped us have an impact far beyond what the numbers would suggest.

What makes the recent action of the House seem especially surprising is that the joint committee's substantive program and record of achievement has been provided to the House Appropriations Committee in detail in March of each of the last 3 years. No dissatisfaction was expressed or guidance given on these occasions.

I believe it would be irresponsible for the Congress to terminate this effective oversight unit, without justification and without an alternative, by denying its appropriation. Nor do I think the joint committee should be penalized because it is active in a specialized field.

I am heartened by the attitude taken by Senator HUDDLESTON and his colleagues on the legislative subcommittee. It is a cost-effective course of action.

THE RATE OF INFLATION

Mr. GOLDWATER. Mr. President, there are many ways to define inflation. In fact, defining this economic plague, in some respects, is no easier than controlling it. Of course, one measure is the Government's Consumer Price Index which measures so-called necessities of life, such as food and shelter. But there are other indexes, privately devised, for people who worry about things other than the basic essentials.

In this connection, we are indebted to the investment firm, Hornblower & Weeks-Hemphill Noyes, Inc., for defining some of the other indexes for measuring inflation. For example, in a research report June 20, the firm listed a "Cost of Living It Up Index," which showed that the good things in life for a city resident had gone up more than double the increase shown in the Consumer Price Index over a 2-year period.

Mr. President, I ask unanimous consent that this interesting report on the ravages of inflation in areas of life other than the absolute essentials be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

NIPS—RETURN OF THE PINK PIRANHA

Economists despite short explanations of economic phenomenon, which is why the "Black Art" is profuse with Sesquipedalian Tergiversation—that's long and ponderous evasion. Our short definition of economics "The efficient allocation of scarce resources" brings howls from practitioners of the profession. Defining "unemployment" and "inflation" can lead one into a morass—and like "Tar Baby" the more you grapple with it—the more it envelops you. Calvin Coolidge's classic explanation of unemployment "When more and more people are thrown out of work, unemployment results" had a recent application to rising prices. A union official, with Coolidge-like simplicity mentioned that "When businessmen raise prices—inflation results." Naturally, both are extreme oversimplifications—and the latter a biased subjective opinion.

Defining inflation is no easier than controlling it. We know that the Consumer Price Index has gone up roughly 80% since 1967—but that's only part of the story. The CPI measures the "market basket" purchases of an urban family of four earning around $13,000—which, in this city, is not much above the officially defined poverty level. That family's purchases would not be representative of a suburban household earning the same amount—and certainly not of a family with double or triple those earnings. To demonstrate this the Cost of Living It Up Index (CLIUI) was compiled. It showed that the prices of "The Good Things in Life" for a city resident had gone up more than double the increase in the CPI over a two year period.

The CLIUI is only one of several indices computed in recent years. The Cost Per Bosom Index (CBI) showed French inflation, the appreciation of the franc against the dollar, and a cutback in the number of females onstage meant that in two years the cost of viewing each undraped torso shot up 97%. The index of what a stock market analyst spends had to be shelved since it became embarrassing (Maalox and Martinis were overweighted) and to appear shortly will be the Cost of Loving Index (CLI)—what it cost to seduce a girl 25 years ago and the comparable costs today. However, several recent reminders led us to update one of the better known indices—The Trivia Index.

Peter Benchley has been promoting the movie based on his second novel "The Deep." Several TV sequences have compared it to "Jaws," released two years ago, with the remembrances of the unfortunate Chrissie and Robert Shaw being ingested entire by the shark. A sequel is planned to this in which the mate of the great white returns for revenge. The director has promised more "chomp chomp per minute," including the shark knocking down a pursuing helicopter and chasing a maneuvering, terrified water skier.

But, 25 foot great whites are not necessarily the most dangerous creatures in the water. Our expression "nibbled to death by minnows" refers to the fistfull of small bills that arrive each month. The piranha, generally six to eight inches in length is much larger than a minnow, and is one of the deadliest creatures in the water. Traveling in packs of hundreds they can reduce a grown cow to bare bones in less than an hour. Yet their razor sharp teeth barely bite off more than a portion about the size of the tip of one's fingers. Frequently, the victim is not even aware that he's been bitten—the teeth are that sharp. Similarly price increases in seemingly inconsequential items do not make headlines and consumer protection groups rarely make a fuss over them. Yet, like a piranha each takes a small, seemingly painless bite out of one's take-home pay. Before long the bleached, picked clean carcass of the paycheck is all that remains. At the same time that the steel companies were forced to trim their price increases to about 6% by the Administration, the *New York Daily News* raised its newstand price by 33%—without a murmur of protest.

The other factors that influenced updating the "Trivia Index" were the reappearance of "Summer of '42" on TV, and reading James Jones WWII. In the film there is a sequence that makes every man cringe empathetically. Gary Grimes enters a drugstore to buy prophylactics, but loses his nerve and asks for an ice cream cone. Again almost getting up the courage he cops out and asks for a double dip. Losing his nerve again he asks for sprinkles on the cone. Then comes the part we remember—when the druggist says "That'll be twelve cents." The neighborhood Baskin-Robbins stated that a double dip cone would be eighty cents—with sprinkles (if they had them) another nickel. So, the cost has risen 608% in 25 years—for an average yearly gain of 8.2%. That compares with a 269% increase in the CPI over the same period—or 5.3%. In *WWII* The New York Times of August 15, 1945 is displayed (Japan Surrenders)—with a cost of 3 cents shown. Up to 20 cents now, that's also an 8.2% annual rate of increase. If those rates of gain continue in 14 years that cone will be $2.60 and the Times 60 cents a copy.

Since then we've inquired about the prices of many rather mundane items, and how they compare with some years ago. The items selected are *not* the necessities of life—and many are not included in the CPI. What we tried to do is go over the little-ticket items that one rarely considers as part of a budget. The items are generally under $10 and include what could be referred to as "trivia"—or possibly "minutiae." The prices 3–4 years ago are taken from our February 25, 1975 report entitled "Son of Trivia."

TRIVIA INDEX

	Price 3–4 yr ago	Recently	Percent change
Time Magazine	$0.50	$1.00	+100
Newsweek	.50	1.00	+100
Barron's	.50	.75	+50
Playboy	1.00	1.50	+50

Brooks Bros., standard "gentlemen's" necktie	7.50	10.50	+40

[1] Across the board, 2 increases.
[2] Opinion of manager.

Of the items listed on the previous pages few can be considered in the "necessity of life" category. But newspapers and magazines do have a certain priority, particularly in the business world—and eventually the holes in one's shoes must be repaired and the baggy suit must be pressed. Most of the items do involve a certain amount of discretion—or defer-ability. However they are all part of the accumulation of little ticket items that individually amount to little, but collectively

can take a rather large chunk out of a paycheck.

The arithmetic mean for the seventy two items listed above shows an "average" increase of 56% over roughly four years. However, in dealing with series that include relatively large numbers we prefer to use the median—which eliminates much of the distortion caused by a few large (or small) numbers. Consequently the "average" i.e. median increase of the 72 items over four years comes to 52%. This is probably low, since we tried to be conservative in pricing the items in the index. But that works out to about 13% per year.

Since the end of 1973, the base period for our calculations, the CPI has risen 28%—so that the items selected have increased almost twice as much as the gain in the CPI. This is somewhat better than our original compilation of the Index in 1973. At that time the group rose 21.6% annually over two years—significantly more than double the increase in the CPI for that period. Of course any serious statistician would blanch at a list such as the above—and accuse us of mixing apples and bananas, or some similar hackneyed cliche. No attempt has been made to assign weights according to usage or importance. And whether one uses any of the above, and in what proportions has been ignored. It is presented to demonstrate the price rises of the little things—that can hurt. Actually—about the only things we've discovered that go down in price (besides our stocks) would be hand held calculators (beyond the price range of this index) and what Mr. Grimes of "Summer of '42" was attempting to buy—but that will be covered in the "Cost of Loving Index."

The artifacts and pictures around here are all reminders—usually to try to approach a problem from a different angle or look at things in a different perspective. Some, like the Messerschmitt ME–262 require a bit more of an explanation. But, two of them are related to inflation. The first is a one billion Mark note, printed in 1923, to remind us what can happen when inflation gets out of control. The other is a rather ferocious looking six inch pink/red/gray stuffed animal that regularly draws questions as to why it has been included in our collection. It's not as menacing looking now, since the cleaning woman knocked off part of his tail. But we can attest to the razor sharp teeth—which have drawn blood a number of times when we've touched them. Our stuffed piranha is a constant reminder that it's not always the big things—like the monster of "Jaws" that can do one in. Frequently it is a proliferation of little things; the almost painless unseen nips—like the 72 items above that rose almost twice the increase of the CPI—that do damage to a family's paycheck. As we said, one can be eaten alive by minnows. And, the list compiled for "The Return of the Pink Piranha" would indicate that the Consumer Price Index may be understating the rates of inflation experienced by many consumers.

RAYMOND F. DEVOE, Jr.

STATISTICAL HEDGE

The figures used in this article are taken from personal notes, from our files, as well as from various other sources, including coworkers, cocktail party conversationalists (when sober), and various articles all deemed to be reliable. All have been checked for assurance that they are reasonably accurate. Further information is available upon request.

NRTA–AARP FEDERAL LEGISLATIVE PROGRAM

Mr. CHURCH. Mr. President, members of the National Retired Teachers Association-American Association of Retired Persons legislative council met recently to chart out an action plan for the 95th Congress.

The legislative council's recommendations cover several key subject areas, including income, health, nutrition, transportation, housing, and others.

They also provide a comprehensive checklist for this Congress in developing legislation to respond to the problems and challenges confronting aged and aging Americans.

As chairman of the Senate Committee on Aging, I am also pleased that several of the high priority proposals advanced by the NRTA–AARP legislative counsel are similar or identical to measures I have sponsored, including:

More frequent cost-of-living adjustments for social security beneficiaries, instead of only once a year.

A special index to measure more accurately the impact of inflation upon older Americans for purposes of computing benefit increases.

Removal of the age-65 ceiling for the Age Discrimination in Employment Act.

Coverage of out-of-hospital prescription drugs under medicare.

Quite clearly, NRTA–AARP has a major impact on Federal legislation affecting older Americans. The recommendations of their legislative council should be of concern to all Members of Congress.

For these reasons, Mr. President, I ask unanimous consent that the NRTA–AARP "1977 Federal Legislative Program" be printed in the RECORD.

There being no objection, the program was ordered to be printed in the RECORD, as follows:

THE 1977 FEDERAL LEGISLATIVE PROGRAM

INCOME

According to a recent Congressional Budget Office study, more than half of all elderly family units in this country would have fallen below the subsistence-based, official poverty level in fiscal 1976 had they not received assistance from cash and in-kind benefit public transfer programs such as social security, Medicare, SSI, food stamps, veterans pensions and Medicaid. However, after counting all cash and in-kind benefits and allowing for taxes, only 4 percent of all elderly families remained in the "poor" category. Of significance is the finding that social insurance programs, such as social security, were responsible for lifting an overwhelming 70 percent of the aged poor out of poverty.

These statistics have important implications for public policy. They indicate that our complex structure of income maintenance systems is bringing us closer to the goal of eliminating poverty in America, especially with respect to the elderly. More importantly, however, these statistics illustrate that the elderly are extremely dependent (perhaps too dependent) on public transfer payments.

We cannot afford to feel secure or complacent with these results. We must go forward to develop and perfect our public transfer programs so that they will better accommodate the changing needs of the people they serve now and will serve in the future. If improvements are not made, a combination of factors, one of the most important of which is inflation, could prompt a resurgence of poverty among our older population.

The present structure of programs benefiting the elderly is far from ideal. While it guarantees that most older persons will not be poor, it does not guarantee that during retirement they will be able to maintain an equivalent pre-retirement living standard. The present structure also fosters a high degree of dependency on the public programs. This degree of dependency should not be perpetuated since, in the future, the elderly segment of the population will increase dramatically in proportion to the workers on whom they will be dependent. Furthermore, the present transfer structure has been criticized as being enormously expensive and unnecessarily wasteful, inefficient, complicated and inequitable.

There are measures that can and should be taken. First, the broad range of public transfer programs (both "means tested" and "non-means tested") should be structured and related so as to provide reasonable assurance that the standard of living achieved in the years immediately prior to retirement will be maintained. Second, the system should be structured to encourage revenue-generating employment rather than dependency. Third, inequities should be reduced and changing needs accommodated. Finally, inefficiency and waste should be curtailed and the "means tested" programs such as Medicaid, and Aid to Families with Dependent Children should be administered and policed so as to prevent fraud and abuse.

The most serious limitation on our ability to achieve these goals of responsiveness, restructure and equity is the lack of additional available resources. The public transfer programs account for over one third of the federal budget. Additional resources can only come from: (1) the fiscal dividend that an expanding economy yields; (2) the savings that accrue from the more efficient, less wasteful and less duplicative operation of existing programs; (3) the savings that might accrue from any reduction in existing benefits; and (4) increased taxes.

Significantly increased tax burdens are certain to be resisted. Moreover, the prospect of a fiscal dividend are speculative since it depends on our achieving an optimum and steady rate of economic growth. Even if such a dividend accrues, large portions of it are likely to be allocated among a number of priorities such as the beginnings of a national health insurance program and tax cuts. Additional resources to finance substantial benefit improvements and remedy inequities are thus extremely limited.

I. Social security

Our Associations think it is time for a major restructuring of the social security system. The system provides an adequate earnings replacement base (a minimum of 55 percent) only for some. It is confronted with serious financial problems—problems that result from a combination of economic, demographic, and structural factors. Some of the fundamental assumptions that are reflected in the system's benefit and tax structures are either invalid or substantially less valid than they were in the past. As a result, social security is increasingly perceived as inequitable and is often the object of criticism. The disincentives to gainful employment which the system contains must be replaced by incentives to remain in the labor force. Demographics and the general desire for an adequate income in later life require it. The reasons that led to the use of a single policy instrument—in this case, social security—to accomplish the conflicting objectives of earnings replacement and minimum floor of income protection are no longer valid since a new policy instrument—the Supplemental Security Income Program—now exists. SSI, rather than social security, can and should be used to achieve the floor of protection function. Finally, there is an increasing need to coordinate social security with the underlying welfare programs and with

other primary retirement systems for the purpose of distributing resources more equitably in the future and to avoid inordinately benefiting a few at the expense of many.

While our Associations advocate a restructuring of the cash benefit programs of social security, we have kept in mind three important limitations. First, the reality of the present system imposes substantial restraints on the scope of reform and the rapidity with which it can be achieved. For example, a shift in emphasis away from social adequacy and toward individual equity requires that changes be made among the mix and magnitudes of benefits awarded in the future. However, in making such changes, no one in current benefit status nor those approaching benefit status should be disadvantaged. Second, additional resources to facilitate substantial reform are extremely limited. Finally, because the system is so large, proposed changes must be analyzed in terms of their potential impact upon the domestic economy and in the light of the domestic economy's impact upon the system.

With these goals and limitations in mind, our Associations urge acceptance of the following specific proposals:

1. In order to eliminate the current short-term deficit in the social security cash benefit programs, a limited amount of general revenues should be used on a temporary basis for specific purposes; remaining revenue potential of the payroll/self employment taxes should be used to finance substantive reform including benefit improvements.

2. The cost-indexing of benefits paid to retirees should be decoupled from the cost-indexing of the earnings records of workers in the computation of their future benefits at retirement, death of spouse or disability.

3. The new benefit formula used to compute future benefits under a decoupled system should be much less weighted and much more proportional than the present one and should replace not less than 55 percent of a worker's average monthly indexed earnings amounts.

4. Social security benefits should be adjusted for cost-of-living purposes more frequently and in making such adjustments (as well as those in other benefit systems that are cost-indexed such as civil service retirement and SSI), a separate index should be used that accurately measures the impact of inflation on the typical market basket of goods and services consumed by the elderly.

5. The exempt amount of the retirement test should be liberalized to at least $5,000 as a first step toward abolishing it with respect to primary social security benefits.

6. The delayed retirement increment presently available for Old Age Insurance benefits should be liberalized; ultimately, persons who are otherwise eligible to receive their benefits, but who elect not to receive them because they are still working after age 65, should have them recomputed on an actuarial basis when they do finally apply for them.

7. If social security coverage is to be mandated for public employees, it should be mandated only with respect to such employees hired after a specified future date.

8. With respect to those who are not mandatorily covered under social security, action should be taken to strengthen the disincentives to withdraw on the part of those public employee groups that are voluntarily covered and increase the incentives to enter the system for those groups that have failed to exercise their option to enter.

9. Primary benefits paid to future retirees from non-social security primary retirement systems should reduce any derivative benefits to which such persons may become entitled on the basis of their spouses' social security earnings record.

10. The social security benefit structure should be changed so that the contributions of women will generate as much family protection as the contributions of men.

11. The age 62 computation point should be applied to men who reached age 62 before 1975.

12. The social security benefit structure should be modified so as to provide greater recognition for the contributions made by working wives and to eliminate those situations in which a two-earner family unit receives less in total benefits than a single-earner family unit with the same total earnings/contribution record.

13. The duration of marriage requirement for divorced spouse benefits should be liberalized.

14. An earnings record freeze should be applied to periods during which a woman is raising a family so that this does not adversely affect her earnings record for purposes of insured status and benefit computation.

15. Legislation should be enacted that would provide: (1) separate and increased financing for the disability insurance program; (2) work incentives and improved vocational rehabilitation; (3) a more explicit and objective definition of disability that can be applied uniformly for both social security and SSI disability programs; (4) uniform administration of the program; and (5) improved federal oversight of state vocational rehabilitation agency functions.

II. Other Federal retirement systems

1. Improvements should be made and inequities remedied in the railroad and civil service retirement systems, within the limits of available resources.

2. The disability policy for civil service retirement should be changed to encourage reassignment or retention of potentially productive employees; procedures for determining continuing medical and economic eligibility of disabled annuitants should be strenghtened; and the definition of economic recovery should be revised.

III. Veterans pensions and supplemental security income

1. Veterans' pension and Supplemental Security Income programs should be improved with respect to benefits and amended to prevent an increase in a beneficiary's income (as, for example, from a social security increase) from being fully offset by a reduction in benefits paid by these programs.

2. SSI's resource exclusions should be liberalized and subject to automatic cost-of-living adjustments to reflect economic conditions.

3. SSI's institutional allowance should be raised to a minimum of $100 per month (payable directly to the claimant or designated representative).

IV. Employee pension benefit plans other than those of the Federal Government

1. Portability of vested benefit rights among employee pension benefit plans should be improved.

2. Legislation should be enacted to require state and local public employee retirement systems to meet minimum standards provided that such standards are constitutional and are demonstrated to be necessary to remedy truly national problems and protect benefits of present retirees and benefit rights of future retirees.

TAXATION

Our Associations have consistently adhered to the principle that the cumulative burden of taxes imposed at all levels of government should, to the extent possible, be distributed on the basis of "ability-to-pay." A 1975 study by the Federal Council on the Aging found that the elderly as a group are treated more favorably than the non-elderly by the federal individual income tax. On average, aged households pay 6.2 percent of their incomes in federal income taxes while non-aged households pay 10.5 percent. However, we must point out that this preferential treatment merely offsets other taxes that disproportionately burden the elderly (such as the property tax) at other levels of government. We shall, therefore, continue to press for additional measures of relief through the federal tax mechanism.

In part, our recommendations in this area are the result of certain inequitable ramifications that attended changes made by the 1976 Tax Reform Act in the former Retirement Income Credit (now the Tax Credit for the Elderly) and in the tax treatment of disability retirement income.

1. The computation of the tax credit for the elderly should be simplified and the amount of income allowed to be taken into account for the purposes of computing the credit should be increased (to $4,100 in the case of a single person and to $6,150 in the case of a married couple filing jointly) and cost-indexed.

2. Taxpayers age 65 and over who were adversely affected by the changeover to the Tax Credit for the Elderly should be given the option of using the former provisions of the Retirement Income Credit.

3. The temporary, rebatable earned income credit should be made permanent and available to individual workers and families without children.

4. The "general tax credit" (formerly referred to as the credit for personal exemptions) should be extended and, in computing the total credit available, the taxpayer should be allowed to take into account the total number of exemptions to which he is entitled, including those for age and blindness.

5. The retroactive date of the Tax Reform Act's limitations on the availability of the "sick pay" exclusion for disability retirement income (presently effective for taxable years beginning after December 31, 1975) should be postponed to taxable years beginning after December 31, 1976 in order to avoid imposing unexpected increased tax liabilities and estimated tax underpayment penalities on adversely affected taxpayers.

6. The amount of the "adjusted sales price" used in determining the portion of excludable gain resulting from the sale or exchange of the personal residence of a person age 65 or older should be increased automatically to reflect the general appreciation in property values as a result of continuing inflation.

7. The individual retirement account provisions (IRA) should be expanded to cover persons who participate in private pension plans at levels below the IRA limits on deductible contributions and these IRA limits should be increased.

8. Older taxpayers should be alerted to federal income tax preferences intended for their benefit by clear notification on the federal income tax forms and through other means of communication.

9. The Federal Government should assist older volunteers who participate in federally-endorsed programs of tax preparation assistance for the elderly by reimbursing them for out-of-pocket expenses incurred in connection with their participation.

10. While the concept of revenue sharing between the federal government and state and local governments should be supported, the revenue to be shared should be used: (1) to induce the states to transfer additional revenue to units of local government; and (2) to induce state and local governments to abandon, to the extent possible, their reliance on general sales, real estate and other regressive taxes (as the means of raising additionally needed revenue) in favor of more progressive ones.

OLDER WORKER EMPLOYMENT AND AGE DISCRIMINATION

It is ironic that at a time when America is most in need of wisdom, experience and dedication, 22 million people who possess these qualities are forced to step aside, to sit on the sidelines, to "retire" from participation in the affairs of our nation.

It is tragic that at a time when racial and sexual stereotypes are being wiped out, the false stereotype of older persons as helpless, feeble and impoverished is still deeply ingrained in our society.

As has been the case for minorities and women, the most obvious examples of age discrimination can be found in the employment arena. Through the polite but brutal practice of mandatory retirement, older Americans are being denied the opportunity to work and earn a living.

I. Mandatory retirement

Our Associations are committed to the elimination of mandatory retirement policies and practices in all areas of employment. We feel mandatory retirement is morally and constitutionally wrong; forcing a man or woman to retire solely because he or she has reached an arbitrary age is no different than denying a person a job solely because of race, religion or sex.

Mandatory retirement can be damaging to the physical and mental health of an individual. The American Medical Association's Committee on Aging cites "ample clinical evidence that physical and emotional problems can be precipitated or exacerbated by denial of employment opportunities."

Mandatory retirement policies have resulted in unnecessary expenditures of millions of dollars by the government and private industry, an incalculable loss of national productivity, and an intolerable waste of human resources.

Finally, because of the fact that the combination of present demographic and employment patterns will result—if allowed to continue—in a smaller work force and larger retirement population in the future, continued mandatory retirement practices will result in a substantially increased tax burden on working Americans.

In a recent National Council on the Aging study of attitudes toward aging conducted by pollster Louis Harris, an overwhelming 86 percent of the respondents declared that "no one should be forced to retire because of age if he wants to continue working and is able to do a good job."

These sentiments can and must be translated into an affirmative national policy. We therefore make the following recommendations:

1. The inclusion of a mandatory retirement age in any employment agreement, contract or benefit plan should be prohibited by law.

2. The statutory upper age limit of 65 in the Age Discrimination in Employment Act of 1967 should be abolished.

3. Age should be added as a protected category under Title VII of the Civil Rights Act.

II. Age discrimination in employment

Although the Age Discrimination in Employment Act of 1967 was designed to prohibit discrimination against workers between the ages of 40 and 65, such practices persist throughout industry.

Age discrimination in employment is often difficult to prove. Studies have shown that the rationale for discriminating against older workers on account of age is unsound. A 1971 survey conducted by the New York Commission on Human Rights clearly demonstrated that older workers perform as well as, and in some cases noticeably better than, workers in younger age groups.

Our Associations believe that middle-aged and older workers are entitled to the same governmental "affirmative action" programs as are women and members of minority groups who have been discriminated against in matters of employment. We therefore make the following recommendation:

1. Adequate funding should be provided to promote more vigorous enforcement of the Age Discrimination in Employment Act of 1967.

III. Older worker employment programs

The Comprehensive Employment and Training Act (CETA) requires that state plans give specific consideration to "significant segments" of the labor force. One of these significant segments is the population of older workers. There has been an inadequate effort under CETA to observe or enforce this provision of the Act in distributing funds. As a result, the participation of the older worker in CETA programs has been minimal.

The Older American Community Service Employment Program under Title IX of the Older Americans Act also provides needed support for the older worker. This categorical program is directed specifically to the elderly and provides jobs for low-income unemployed or underemployed persons on a part-time basis. The cost of expanding this program to reach more older workers would be offset by an increase in collected tax revenue and a reduction in public assistance costs.

Our Associations therefore make the following recommendations:

1. Congress should require compliance with the wording and spirit of the Comprehensive Employment and Training Act to foster participation of the older worker in CETA programs.

2. A nationwide, categorical, centrally directed older worker program, as now authorized under Title IX of the Older Americans Act, should be developed and expanded.

3. Any public employment program designed to deal with structural unemployment should take into account the employment needs of the elderly, including training, retraining and education.

HEALTH

In the health area, three factors are of primary importance: demographic trends, the rate of utilization of services by the elderly and the impact of the spiralling cost of health care services upon the elderly family's budget. In demographic terms, the 65 and older group is growing at an unprecedented rate, requiring increasing federal outlays for health protection. The most dramatic increases are occurring among the 75-plus and 85-plus age groups which are growing at rates of two and three times that of the total population. In addition, the elderly need and use health care services much more than the non-elderly do and the rising costs of those services is placing a particularly heavy burden on them. Expenditures for health care now constitute over 10 percent of an older person's budget—about the same percentage they constituted before enactment of Medicare.

While Medicare's financial protection of the elderly's health care expenses has grown slightly, the total health bill for the aged has grown enormously. The Social Security Administration has computed that in 1967 the average bill per aged person was $532, of which 31.8 percent was paid by Medicare. By last year, the average bill had doubled to $1,052 of which 40.3 percent was paid by Medicare. Medicare picked up 9 percent more of the tab, but in the meantime, the health bill had doubled. The aged individual is therefore becoming increasingly responsible for meeting the difference out of his own pocket or through some type of supplementary insurance.

I. Health care costs

Our Associations' immediate aim in the health care area is the establishment of ceilings to contain the excessively rising costs of all significant health care items. Failure to do this in a manner that is both comprehensive and reasonably effective in the short term will mean that the present, highly inflationary trend in the health sector will continue and the cost of health care will consume an ever increasing proportion of our Gross National Product. Our total health care spending has increased at an average rate of twelve percent over the last decade (a rate far higher than those for other economic sectors). Meanwhile, the overall economy has grown at a relatively slow pace. Health spending as a portion of GNP has grown from 7.8 percent in fiscal 1974 to 8.6 percent in fiscal 1976, amounting to a total expense of $139.3 billion. In terms of health status and life expectancy, we have reached the point of diminishing returns over and against huge increases in total spending for health care.

The excessive rate of inflation in the health sector will have increasingly serious consequences. The proportion of the Federal budget allocated to cover the cost of the present level of Medicare and Medicaid benefits will continue to grow and compete against other national priorities such as income maintenance. The financial viability of the Medicare program will be seriously impaired (unless taxes are increased to cover the rising costs) and more elderly persons, even with Medicare protection, will be seriously impaired (unless taxes are increased to cover the rising costs) and more elderly persons, even with Medicare protection, will be priced out of the health care market and denied access to needed care. Prospects for any significant expansion of Medicare/Medicaid protection will diminish and the goal of national health insurance will become increasingly remote if costs are not controlled.

The choice is simple: either we drastically cut the rate of inflation in the health sector and thereby contain the spiraling costs of Medicare/Medicaid (without merely shifting those costs on to beneficiaries) or we face the growing prospect that Medicare/Medicaid benefits will be cut. The only ones who can benefit from a perpetuation of the status quo are the providers of health care services.

While causes of the elevated rate of health care inflation are numerous, prime factors are: (1) the third party payment system (both government and private); (2) the circumstances under which the consumer has little choice in his selection of services and exercises little scrutiny over the costs of such services; and (3) the degree of control over both supply and demand exercised by physicians. The structure that has evolved in the health sector—with its unique relationships between consumers, third party payers, and providers—is an engine of inflation that is apparently insatiable. In this context, our Associations propose the following combination of remedies:

A. Short-Term Remedies

1. Year-to-Year increases in the billings of institutional providers of health care, irrespective of the source of payment, government or private, should be limited to the average rate of increase in the CPI's overall service component (less medical services) plus an additional 4 percent increment; this increment should be reduced by 1 percent per year until the rate of increase allowable is limited to the rate of increase in the CPI's overall service component (less medical services).

2. The rate of increase in the fees of licensed professional practitioners should be limited to the rate of increase in the CPI's overall service component (less medical services).

3. Such ceilings should be applied not only to the billings and charges of institutional providers and to the fees of licensed professional practitioners, but also to the rate of increase in payments for services covered by programs or policies of government and private third-party payers.

4. Such ceilings should be enforced and administered, to the extent possible, through state agencies.

5. Proposals which would merely insulate the federal budget from the consequences of health sector inflation should not be considered, since such proposals do not deal with the causes of the problem and would merely shift an increasing cost burden to Medicare/Medicaid beneficiaries.

B. Mid-Term Remedies

1. The present cost-reimbursement mechanism used by government and private third-party payers should be abandoned and replaced by a demonstrably effective system of prospective budgeting, rate setting and payment with respect to institutional providers and by negotiated fee schedule procedures with respect to licensed professional practitioners.

2. These new payment procedures should be reinforced by additional regulatory instruments such as certificates of need, utilization review, minimum standards of "quality" and health resource planning.

C. Long-Term Remedies

1. A complete restructuring of health care delivery must be effected that will de-emphasize the present heavy reliance on institutionalization.

2. Comprehensive planning for the efficient development and modernization of health care facilities must be implemented to avoid overlap, waste, and excess capacity.

II. Pharmaceuticals

The elderly purchase 25 percent of all prescriptions. Pharmaceuticals are their second largest out-of-pocket health care expenditure. In 1975 the elderly's per capita spending on drugs was $117.68 and of this $102.30 or 87 percent was paid by them directly.

U.S. prescription drug prices are the highest in the world, and these high prices are in large part attributable to anti-competitive practices, patent monopolies and other drug industry practices. Since our Associations recognize that spiraling drug costs must be controlled in order to facilitate the addition of an out-of-institution drug benefit under Medicare, we make the following recommendations:

1. All federally funded drug programs should be consolidated under a single administrative unit, with the power to negotiate drug prices with manufacturers, set reimbursement payments to providers and grant licenses on patented products when necessary.

2. Federal generic substitution and prescription price posting laws should be enacted.

3. A national formulary of prescription drugs should be published that discloses prices for the purpose of guiding good medical practice and establishing the maximum allowable cost which the government will pay providers under the government programs.

4. A national compendium of drugs should be published.

5. Patent holders of excessively priced drugs, after recovery of research and development costs plus reasonable profit, should be required to license other manufacturers to produce the same product at less cost, receiving back adequate compensation in the form of royalties.

6. A national drug testing and evaluation center should be established to test all new drugs before they are placed on the market.

7. Prescription drug advertising, promotion and sampling should be subject to federal limitations.

8. The universal use of established (generic) names of prescription drugs should be required in prescribing, dispensing, labeling, advertising and promotion.

III. Medicare and medicaid

The Medicare and Medicaid programs have been designed to financially assist the elderly in meeting the costs of health care and thereby facilitate their access to it. A flaw in their design, however, is that they focus primarily on the acute care needs of patients.

Because these programs now underwrite about one-fourth of our nation's total personal health care expenditures, and represent more than three-fourths of the HEW health budget, they have a direct impact on our health care system. Efforts aimed at changing the health care delivery system will have to include a major restructuring of the Medicare and Medicaid programs.

A principal health delivery problem is the disorganization of health care resources. The proliferation of some services and the scarcity of others accompanied by geographic and specialty maldistribution have led to inefficiencies in the delivery of health care. Ultimately, cost containment can best be achieved by changing the structure and functions of this delivery system.

Our Associations have consistently supported the enactment of a national health plan which guarantees the availability of comprehensive, quality care to all Americans and which is designed to eliminate present barriers to universal access such as financing inequities and uneven allocation of resources. However, because additional available resources are limited, the goal of national health insurance is not likely to be realized all at once but rather in stages, and only if the escalating costs of the existing programs are successfully controlled.

Pending the enactment of a comprehensive national health plan, our Associations are in favor of restructuring the Medicare and Medicaid programs. Many of the services and benefits provided on an in-patient basis should be available on an ambulatory basis. Provider services should be reoriented to remove regulatory restrictions or benefit imbalances which impede the growth of alternatives to the present delivery system.

As priority items, our Associations make the following recommendations:

1. A catastrophic protection feature should be added to Medicare (perhaps as a part of the incremental development of a national health insurance program).

2. Out-of-institution drugs should be covered under Medicare.

3. A long-term care services program should be developed to provide a complete continuum of coordinated non-institutional and institutional health and health-related social services through a community network for the delivery of long-term care.

4. Conditions of eligibility for home health care under Medicare should be liberalized and clarified.

5. Incentives should be provided to encourage non-institutional licensed practitioners to participate in the Medicare program and accept the Medicare payment as payment in full.

As long-range objectives, our Associations also favor the following:

1. Additional categories of benefits should be covered under the program, including maintenance and preventive services, dental, vision, audiological, and podiatry services, prosthetic devices and patient education services.

2. Present restrictions should be removed with respect to reimbursement for in-patient and out-patient mental health services, home health care, day hospital care, and care provided by physician extenders and other para-professionals in clinics and primary care facilities such as community mental health centers.

3. The duration of covered services should be extended where they are now limited.

4. The Part B premium should be eliminated; Parties A and B should be merged with respect to administration of benefits; all deductibles should be eliminated and a more rational schedule of co-payments with respect to covered services should be substituted.

5. Health benefits and reimbursements should be coordinated under existing health programs, especially Title XVIII (Medicare), Title XIX (Medicaid) and Title XX (Social Services) in order to assure maximum uniformity in coverage.

Action must be taken to strengthen the Medicaid program on which millions of older Americans rely for health care protection. Specifically, we recommend:

1. Federal standards for state plans should be strengthened to include provisions for mandatory eligibility for the medically needy, improved uniformity of benefit packages and eligibility requirements.

2. State plans should be required to contain provisions for fraud and abuse units that are adequately staffed and meet prescribed federal guidelines including provisions for auditing and inspecting providers.

3. The federal government should fully assume the cost of Medicaid inspection and financial auditing activities and should assure compliance with federal guidelines with respect to such activities.

4. Medicaid eligibility standards for institutional care should be revised so as not to require the financial destitution of the non-institutionalized spouse.

IV. Long-term care

With respect to long-term care, our Associations continue to urge development of a national policy embracing the psychosocial and emotional aspects of long-term care, the continuity and range of services in and out of institutional facilities, and the training of qualified staff. Specifically, we recommend:

1. Eligibility for home health care under Medicare and Medicaid should be expanded and clarified to make home health care more readily reimbursable.

2. The scope of the Medicare home health benefits should be expanded by removing the word "skilled" and allowing reimbursement for preventive and medically necessary home health services.

3. The three-day hospital stay requirement should be eliminated for extended care benefits under Part A of Medicare.

4. As an optional substitute for some or all of the authorized home health care visits under Medicare and Medicaid, day care services provided by a Medicare certified provider should be made reimbursable.

5. Federal assistance to the states should be increased to upgrade state enforcement procedures with respect to long-term care facilities.

6. Federal authority to enforce minimum standards for long-term care should be strengthened and periodic, unannounced federal inspections of long-term care facilities should be required to assure compliance with safety, hygienic and operational standards.

V. Medical resources and facilities

Older persons have substantial interest and should therefore have a voice in the planning and development of health resources and facilities and in their operation and delivery. Specifically, we recommend:

1. Elderly consumer representation should be required on the governing and policy-making boards of nursing homes, planning agencies, quality assessment groups, and other health facilities.

2. Legislation is needed to address the need for geriatric training for the various cate-

gories of health personnel that are involved in the provision of long-term care services.

3. Uniform quality controls must be established for intra- and inter-state clinical and state laboratory testing.

4. The development of ambulatory neighborhood-based geriatric clinics should be encouraged by federal assistance; preventive, diagnostic and therapeutic care obtained in such clinics should be reimbursable under Medicare.

5. Federal safety and efficacy standards should be established and pre-market clearance required for potentially hazardous medical and therapeutic devices.

6. The Health Planning and Resource Development Act of 1974 should be extended and strengthened where necessary.

7. Payment should be authorized under existing program for the services of physician extenders and other paraprofessionals in clinics and primary care facilities such as community health centers.

ECONOMIC POLICY

Economic policies to contain unemployment and to stabilize the economy, commonly referred to as fiscal and monetary policies, have become associated both here and abroad with rising levels of price inflation.

The connection between these policies and inflation is imperfectly understood, but both policies result in deficit spending. It has become apparent that ordinary deficit spending does not automatically correct such factors as declining productivity and lack of confidence in the economy. Also, deficit spending does not correct structural and other factors causing inflation and unemployment.

The Associations recognize that deficit spending is an accepted short-term method of dealing with recession. But we object to poorly planned spending which fails to counter unemployment and particularly to counter unemployment among the elderly. We also object to continued deficit spending during the boom period of the business cycle. The budget should be brought into surplus during the boom years. No virtue may be assigned to continuous deficit spending. Federal budgetary policy should operate to balance spending and tax revenues over the longer period of the business cycle.

A special word is needed with respect to the critical nature of monetary policy. For the elderly, money is not just a means for buying goods and services. Money serves as a standard of value and represents security. Persistently high rates of price inflation serve to destroy money as a standard of value. There is little dispute over the definite linkage between excessive expansion of the money supply and price inflation. The Federal Reserve System must be charged with closely adjusting the volume of the money supply to the current needs of the U.S. economy. Monetary policy should be neither inflationary nor deflationary, rather it should parallel the growth of the economy.

Something must also be said with respect to this country's non-policy in energy. A national energy policy should be developed and should be aimed at achieving the efficient and expeditious utilization of our existing energy potential. Such a comprehensive policy is needed in order to assure an adequate short and long run supply of energy at just and reasonable prices and in order to reverse this country's increasing dependence on foreign source fuel.

Any national energy policy that is developed should avoid, to the extent possible, significant acceleration in the rates of inflation and unemployment take into account and attempt to avoid or lessen the impact which rising energy prices have on lower and fixed-income persons, and still provide the incentives necessary to encourage the efficient development of the energy potential of this country. Long run policy should be based on conservation and on extensive public and private efforts to explore for resources and to research new sources of energy such as solar, geothermal and nuclear energy.

With respect to the elderly, there is a tendency on the part of many to assume that they are somehow outside the overall economy or generally insulated from major economic fluctuations. It is argued that because they are "retired", what happens in the labor market has little or no bearing on their incomes or welfare. It is also argued that, because of the automatic cost-of-living provisions of social security and other income maintenance programs, they are now largely protected from the effects of inflation as a challenge to those arguments. We offer the following:

Approximately 5 million persons 65 years of age or older (25 percent of the elderly population) participate in the labor force every year doing some work for pay. Including non-working spouses, approximately 35 percent of the elderly supplement their incomes by participating in the labor force. In 1975, while the overall unemployment rate rose by 50 percent, the rate among the elderly rose by 56 percent and among elderly men by 63 percent. In 1976, while the overall unemployment rate fell by 9.4 percent, the unemployment rate for the elderly fell by only 3.8 percent.

As measured by the Consumer Price Index (CPI), prices increased by 5.4 percent from the third quarter of 1975 through the third quarter of 1976. As measured by a more specific older persons' index, however, prices increased by 5.6 percent. Aside from the apparent understatement of the impact of inflation on the elderly as measured by the CPI, a 1975 Defense Manpower Commission study has concluded that the methodology used to update social security benefits results in a consistent and significant undercompensation for losses incurred from inflation.

In addition to these direct effects on elderly incomes, recent economic fluctuations have placed a great deal of pressure upon the cornerstone of elderly income security, the Social Security System. Although from a fiscal point of view the system is sound, a one-tenth of one percentage point increase in the CPI at today's benefit levels, results in an increase in benefit payments of $60 to $70 million. It is estimated that, if the unemployment rate in 1975 had approximated 5 instead of 8.5 percent, revenue for the system would have exceeded benefit payments by $2 to $3 billion.

The above should help underscore the stake the elderly have in the maintenance of reasonably stable economic growth and the avoidance of the roller coaster economy we have experienced in recent times. We offer the following recommendations on how to achieve these goals:

1. The maximum number of expenditure programs should be placed under zero-based budgeting, requiring periodic Congressional review of the programs.

2. Temporary tax relief measures which are designed to stimulate the economy should be continued, provided that such economic stimulus does not trigger an inflationary surge.

3. As means of restoring competition in concentrated sectors, legislation should be enacted that would expand and streamline antitrust action, where appropriate.

4. Barriers to competition created by federal or state laws and regulatory agencies should be reduced or eliminated.

5. Temporary public employment programs should be a tool to deal with recession-induced unemployment and should take into account the employment needs of the elderly.

6. A federal office should be created or designated to be responsible for collecting and analyzing data with respect to existing energy resources, inventories, costs of production, prices and related information on all sources of energy, both domestically and internationally produced; such data should be made available to Congress and should be disclosed to the public in an understandable form.

CONSUMER ISSUES AND POLICY ON AGING

I. Consumer affairs

Older Americans represent a large and constantly growing segment of our consuming public. We, therefore, believe that more emphasis should be placed on their special consumer needs and the problems they find in adequately meeting those needs. To do so we urge vigorous governmental action, including strengthened enforcement activity, to achieve and maintain the four basic consumer rights of all citizens: the right to safety, the right to be informed, the right to be heard, and the right to choose.

Additionally, vigorous action should be taken to protect older persons against deceptive practices in the sale and dispensing of consumer goods which have high incidence of use among the elderly.

1. Legislation should be enacted to establish an Independent Agency for Consumer Advocacy to represent consumer interests before federal agencies, Congress and the courts.

2. Legislation should be enacted to embody the concept of truth-in-savings by requiring uniform, full and clear disclosure of the method used in computing earnings on savings

3. Essential consumer information should be required to be prominently displayed on all packaged food products.

4. The rapid growth of the insurance industry as a national market requires the enactment of a federal basic insurance certification program. Procedures should be established by which health insurance policies offered by private insurers may be certified by the Secretary of HEW as meeting minimum standards with respect to adequacy of coverage, conditions of service, claims performance and reasonableness of premium charges.

5. Life insurance disclosure legislation should be enacted to provide consumers with information in a way to allow fair price and benefit comparison between policies.

6. Congress should establish certain minimum standards for no-fault automobile insurance to which each state would be required to conform within a given period of time; insurers should be required to offer exclusions for benefits actually received under Medicare.

II. Crime

Fear of crime is a serious problem for many older Americans, often forcing them to adopt new lifestyles. Many crimes against older persons could be avoided if they were educated about effective crime prevention techniques. To that end, we urge increased government sponsorship of crime prevention programs aimed at increasing citizen interest and participation in the effort to reduce crime. In addition, immediate steps should be taken to reassess our criminal justice system so that the fundamental interests of society may be protected and basic constitutional rights preserved.

Further, we believe that law enforcement agencies should devote increased attention to the reduction and prevention of crimes against persons and property. Increased efforts should be made to reduce consumer fraud which impacts disproportionately on the elderly.

1. A new federal criminal code should be enacted that eliminates inconsistencies in the present federal law and strengthens the federal criminal justice system.

2. Legislation should be enacted to re-

quire mandatory prison sentences not subject to suspension or probation upon conviction of a felony in which firearms or other deadly weapons are employed and such sentences should run consecutively with any other term of imprisonment.

3. Legislation should be enacted that would provide adequate indemnification for victims of crime.

4. Legislation should be enacted to control the availability of handguns.

III. Education and training

We are convinced that continuing educational opportunities are vital to the quality of life and the mental and physical well-being of all older persons. Older Americans should be given the opportunity to acquire new skills and knowledge if they are to cope with our rapidly changing society, qualify for reemployment, and offer service to their communities and their nation. Continuing education for all adults, including those in their later years, should be established as a government priority. An essential complement to the development of new programs for the adult learner is the coordination of those programs with existing programs to eliminate overlap and duplication.

We encourage development of training programs in the teaching, guidance, and counseling of older adults. Additionally, vocational programs should be encouraged to train young persons as paraprofessionals to work with the elderly and to train older persons to work as volunteers in our public schools to assist young students in the learning process.

Graduate programs in gerontology should be developed and higher education institutions should be encouraged to offer a major and basic course in gerontology.

1. The Lifelong Learning provisions of the 1976 Higher Education Act Amendments should be adequately funded.

2. Federal loans and scholarships should be made available to the elderly on the same basis as they are made to younger persons.

3. Multipurpose service centers should be established to provide necessary training, counseling and services for displaced homemakers to allow them to lead an independent, economically secure and productive life.

IV. *Housing*

A decent home and a suitable living environment for every American must continue to be a national goal. The federal government must therefore continue to take an active role in ensuring adequate shelter and related services for all persons, including older Americans, and should utilize all existing housing program instruments to achieve this goal.

Any national program addressed to the housing needs of the elderly must be flexible, both in the types of housing made available and in the standards used to determine eligibility. Further, the Department of Housing and Urban Development should continue efforts to expand the role of State Housing Finance and Development Agencies and Local Housing Authorities in order to stimulate construction, rehabilitation and use of new and existing housing for older persons.

Older Americans should retain the option of remaining in their own homes for as long as they are able and so choose. To that end, we encourage HUD and the Administration on Aging to cooperate in developing a continuing data base of the specific needs to older Americans for the purpose of evaluating the impact of government programs in meeting those needs. In addition, greater use of federal programs, such as homemaker/home health aide programs, home maintenance programs, nutrition programs, transportation and other related services would enable them to remain in their own homes.

1. The Section 202 Housing for the Elderly and Handicapped direct-loan program should be expanded so as to keep it as the major mechanism for nonprofit sponsor participation in the production of housing units for older persons.

2. Special attention should be given to the housing needs of the rural elderly.

3. In the case of multi-family housing projects designed primarily for the elderly or handicapped, provisions should be made for special facilities—such as food service facilities, workshops, infirmaries and other essential services.

4. An Office of Security within HUD should be established with funding for planning and implementing security programs to protect persons and property in federally-assisted housing.

V. *Policy on aging*

We urge that a national strategy responsive to the present and future needs of older Americans be developed and continuously updated and that both federal and state governments increase their financial support for ongoing and future programs designed to achieve the objectives of the Older Americans Act. The Administration on Aging and the National Institute on Aging should continue as the federal focal point for aging matters and should expand their efforts to coordinate federal programs affecting older Americans.

Further, the present structure of state and area agencies on aging should continue to be relied upon as a mechanism to encourage and stimulate local resources for the provision of services. Strong administrative linkages should be established between state plans under the Older Americans Act and state plans under Title XX of the Social Security Act. The Congress should vigorously oversee and evaluate the revised Title XX Social Services Program to ensure that services are actually received by those most in need of them.

State and local governments should give greater consideration to the economic and physical needs of the elderly in distributing revenue sharing funds. Opportunities for involvement in the planning process for the allocation of revenue sharing monies at both the state and local levels should be provided for older persons.

1. Legal services under the Older Americans Act should be expanded to provide adequate legal services for low-income elderly at reasonable cost and the Legal Service Corporation should expand the role of legal service backup centers.

2. All federal block grant programs should provide sufficient elements of federal control to assure that the needs of target groups, such as the elderly, are adequately considered.

3. The Retired Senior Volunteers, Foster Grandparents and Senior Companions Programs should be returned to the Administration on Aging from ACTION.

VI. Nutrition

The Title VII Nutrition for the Elderly Program significantly responds to the elderly's nutrition problems; therefore, we support an extension of this program beyond current levels to reach the many older Americans who are unable to receive program benefits. Efforts should continue to coordinate the operation of the Title VII program with Title III of the Older Americans Act and with Title XX of the Social Security Act.

We also support the principle of the Food Stamp Program because it is an important component in the solution of the elderly's nutrition problems. While we believe that these problems could be more adequately met by thorough reform of our nation's welfare programs, we believe that in the meantime the Food Stamp Program's administration should be streamlined and efforts should be made to increase the presently low rate of participation by elderly persons.

1. The Title VII Nutrition for the Elderly Program should be expanded (for fiscal year 1978) beyond the fiscal year 1977 level.

2. The Food Stamp Program should be reformed by: (1) instituting a standard deduction in calculating eligibility (that deduction should be high enough to adequately reflect the special dietary needs of the elderly); (2) eliminating the purchase requirement; (3) removing the automatic eligibility for recipients of Supplemental Security Income and public assistance; and (4) providing for adequate outreach efforts directed at the elderly.

VII. Transportation

The transportation needs of the elderly cannot be separated from the transportation needs of the general population and, for the most part, the needs of the elderly can best be met through integration into a system which adequately serves the needs of the entire community. Therefore, priority should be given to the development and improvement of public transportation systems. To do so will require a careful assessment of the present fragmented provision of services.

Further, it is necessary to examine the role of services in relation to human service programs and, to the extent possible, cut down or eliminate unnecessary duplication of effort. For this purpose, the Department of Transportation should actively work with those agencies providing programs for older Americans to ensure that existing transportation services are utilized where transportation is needed as a major program component.

Finally, since a major concern of the elderly is a lack of mobility caused by inadequate or inaccessible transportation and other physical and environmental barriers, their special needs should be accommodated in the design and operation of transportation subsystems and public buildings.

1. Special transportation subsystems should be developed and/or expanded especially in non-urban areas and existing transportation resources should be more effectively used.

2. Inter- and intra-state providers of all modes of transportation should be permitted and encouraged to offer reduced rate fares to older persons.

3. Expanded use of highway trust fund monies should be required for the operation, development and construction of public transportation systems.

4. Adequate transportation, where necessary, should be required as an integral part of federally-funded programs for the elderly to enable them to obtain program benefits.

UTAH'S WORKFARE PROGRAM

Mr. HATCH. Mr. President, at some point during the 95th Congress, it is probable that the Senate will look at the question of welfare reform. It is a priority of the Carter administration. The issue is a complex one requiring us to rethink many of the difficult policy questions underlying our Federal public assistance programs. It seems to me that one of the issues which should be closely examined pertains to exploring ways to provide jobs in either the public or the private sector to take able-bodied people off the welfare rolls.

In this regard, I call to the attention of my colleagues, Utah's workfare program which is now attracting nationwide recognition. The Utah plan, approved by HEW, requires that able-bodied people earn their welfare grants by being trained for a job in an actual work-experience setting. The State then attempts to find permanent employ-

ment for the trainees. In other words, trainees learn to work by actually working while they draw welfare payments. The program is mandatory and only the ill, aged or disabled or mothers with children under 6 years of age are exempted from the work requirement.

In fact, the program is applicable to those who receive Aid to Families with Dependent Children, AFDC.

While Utah's very favorable "workfare" experience may not be workable in all States and localities, the Senate should study it carefully in the overall consideration of revamping our Federal welfare programs.

For the information of other Senators, I ask unanimous consent that an article appearing in the July 18, 1977, edition of U.S. News & World Report which fully explains the Utah program be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHEN STATES TELL PEOPLE THEY MUST WORK FOR WELFARE

The idea that able-bodied people should be required to work for their welfare money is spreading rapidly across the U.S.

One such "workfare" program attracting nationwide attention is operating smoothly in Utah.

So successful is the Utah plan in moving people off relief rolls that half a dozen other States are taking a look at it as a possible model for programs of their own. Some believe it might even be useful to the Carter Administration in its search for national welfare reforms.

Besides Utah, at least 16 States have stiffened their work requirements or added new work incentives in the last two years. A number of other States and many cities have some kind of program aimed at putting relief recipients to work. And the Federal Government's Work Incentive Program—known as WIN—is steadily stepping up its pace in finding jobs for welfare recipients.

ON THE JOB, ON THE DOLE

The Utah plan is unique in several respects. It is sterner and goes further than most other programs. It is mandatory. And it doesn't just train people for future jobs. It actually puts them to work while they are still drawing welfare payments.

In most places, such work requirements apply only to people on programs financed by State or local funds, such as "general assistance" or "direct relief."

Utah's plan applies to those who receive Aid to Families with Dependent Children (AFDC), a huge, nationwide program that draws heavily upon federal funds. Utah officials say theirs was the first work requirement approved by the Department of Health, Education and Welfare for application to AFDC.

"Utah is the first State where people earn their welfare grants," claims the program's co-ordinator, Usher T. West.

Officially, Utah's method is called a work-experience and training program. But its training is not the usual type done in classrooms. Trainees learn to work by actually working. If private employment cannot be found for them, they are put to work for public agencies, doing jobs that are needed by State or local governments. They serve as teachers' aides in their neighborhood schools or plant trees in public parks, for example. They work three days a week but remain on the welfare rolls until they find regular jobs.

Only ill, aged or disabled persons or mothers with children under 6 years of age are exempted. All others are told to take one of the jobs offered to them or lose all or at least a part of their welfare payments.

Those who participate in the program are helped by the State to find jobs in private industry. Many are doing so.

In one six-month period, from July through December of last year, 782 people were assigned to the work program. Of that total, 311 were removed because they did not perform as required. But 11 people were hired by the sponsors who gave them their training jobs, and 218 found other kinds of employment. In addition, 109 mothers found enough work to reduce the amount of welfare funds needed to support their families.

"FEELING GREAT"

A 32-year-old mother of two children was hired recently as a full-time office worker in Salt Lake City's assistance-payments administration, the same office that handed her welfare checks for 13 years before she took job training for two years. During the instruction period, she says, "even though I was getting welfare I felt I was working for it." And now, she adds, "With my new job I am barely making ends meet. But I feel great because I am making it on my own."

Utah officials point out that communities as well as individuals benefit from the program. Some agencies, such as private nonprofit organizations that are constantly short of funds, report that the services of welfare recruits have been invaluable

One self-self agency in Salt Lake City, for instance, had the funds to buy insulation for the homes of elderly poor people, but lacked money to hire workers to install it. Welfare trainees have been assigned to the job. Another self-help group put trainees to work repairing the homes of elderly Salt Lake City residents.

A QUESTION OF LEGALITY

Some critics charge that Utah's job-training effort is nothing more than a thinly disguised public-works program that uses underpaid welfare recipients in place of regular employes.

Legal-services lawyer Lucy Billings says she is considering filing a court suit against the program on the ground that it violates federal regulations that people cannot be required to work for their welfare payments.

It took Utah three years to get its program approved by the U.S. Department of Health, Education, and Welfare. For 18 months, HEW withheld federal contributions to Utah's program for Aid to Families with Dependent Children. It cost the State almost a million dollars to make the AFDC payments entirely from State funds. But many Utah people feel that it was well worth the cost.

Utah officials concede that their program might not work so well in other parts of the country, especially in big cities where population is denser and welfare rolls are much larger. Of Utah's nearly 1.2 million residents, only 39,000 are getting money grants of aid. Also, it is suggested, labor unions in more-industrialized States might oppose welfare people being given jobs that might be sought by union members.

But in the view of Robert W. Hatch, a field director for the Utah assistance-payments administration, public acceptance of the idea that welfare recipients should work for their money is spreading throughout the nation. Says Hatch: "I think that in time, putting welfare clients to work will become a common practice."

In fact, a trend in that direction is already apparent.

Oklahoma has a 2-year-old work-experience program that was passed by the legislature at the urging of Governor David Boren. It requires that any one 18 or older in a family receiving Aid to Families with Dependent Children must visit the local employment office and sign up for a job that's available.

In 1975, there were 2,300 persons participating in the Oklahoma program. Many worked in State institutions, hospitals or in county offices for $5 a day to offset expenses, plus their regular AFDC checks.

"They are usually placed in jobs where they can easily be trained and hopefully be picked up by the business community," says a State spokesman. Last year, more than 700 persons were placed in permanent positions outside the government.

THE RISK OF REJECTING WORK

The Texas legislature recently passed legislation to supplement the Federal Government's Work Incentive Program. Welfare recipients must register for work, and if they reject a job without a good reason, their benefits may be cut off after an administrative review.

North Carolina's legislature this year passed a law requiring welfare recipients to register for work.

As the law's sponsor, State Senator E. Lawrence Davis of Winston-Salem, explains it: A family head who fails to register is taken off the rolls. But aid to his or her children will continue as "protective payments" made through some other person or perhaps an agency, such as a church. Since the law did not take effect until July 1, it's too soon to tell how effective it will be.

A PART-TIME WORK FORCE

In the State of New York, all employable persons receiving general welfare-assistance payments have, since May 1, been required to work three days a week in a local-government agency if jobs are available.

There are about 60,000 such persons, and State Social Services Commissioner Philip Toia says: "We're hoping to develop jobs within local-government agencies for at least 30,000 of those employables within the next three months. We're hoping that, when faced with working three days a week, many will go out and get a full-time job."

One problem is that four fifths of the employables covered by the program are in New York City, where in the last two years thousands of public employes have been laid off in the city's effort to cope with a financial crisis. "I anticipate some complaints from the municipal workers' unions," says Assistant Welfare Commissioner Irwin Brooks. However, according to a New York Daily News poll published May 23, about 87 percent of residents in the New York metropolitan area approve of the new workfare program.

Work-for-welfare bills similar to New York's are pending in several States, including Connecticut and New Jersey.

Massachusetts is one of the States studying the Utah plan of mandatory work for heads of AFDC families. Since 1975, Massachusetts has barred all employable persons from direct relief or general-assistance rolls. The State of Rhode Island followed suit last September, cutting its relief case load by more than 20 percent.

MILLION-DOLLAR SAVINGS

Bridgeport, Conn., started last year a plan requiring employable people receiving welfare to work one or two days a week, depending on the amount of their aid. About 300 persons out of a case load of 1,330 are now working. If they fail to work for a period of two weeks, their benefits are automatically terminated.

Results: Bridgeport's case load has been cut 45 percent in a year's time, with a million-dollar reduction in the city's welfare budget.

Milwaukee County, Wis., has a locally run pay-for-work program requiring all able-bodied welfare applicants to take specially created jobs in municipal or county departments. They are paid $2 an hour for a 32-hour workweek.

One experiment being watched closely is a "supported work" program run by the Manpower Demonstration Research Corporation, a nonprofit, tax-exempt organization set up with the support of the Ford Foundation and five Federal Government agencies—principally the Department of Labor.

It has 15 projects in 13 States that provide jobs, mostly with public or nonprofit agencies, for more than 2,000 marginally employable people, including AFDC mothers. Instead of welfare checks, they get paychecks at minimum-wage rates.

A mixture of welfare funds and grants is used to finance the program. The workers will be helped to find permanent jobs in private industry once they have developed the necessary skills.

Many towns and some States have found that the administration of work-for-aid programs is too costly to justify the small numbers put to work. But the search for practicable systems goes on—and widens.

In the words of Fritz Kramer, a manpower specialist with the Labor Department: "A number of States are exploring ways to provide jobs in either the public or the private sector to get people off the welfare rolls."

A FEDERAL AGENCY THAT FINDS JOBS

After years of costly failure, the Federal Government's Work Incentive Program (WIN) is improving its performance in finding jobs for people on welfare rolls.

Last year, WIN placed more than 210,000 persons in jobs. That was almost twice the number placed in the entire first four years of its life, from 1968 through 1971.

The upturn began in 1972, after the program's emphasis was shifted from job training to job finding.

WIN's targets are the people in the huge Aid to Families with Dependent Children (AFDC) program. About half of those for whom jobs are found are enabled to get off the AFDC rolls entirely, officials say, with the other half able to get by on reduced benefits.

Despite WIN's efforts, the number receiving AFDC payments has hit a new high of more than 3.6 million families, which contain a total of nearly 11.3 million individuals.

SENATOR HELMS ENDORSES NORTH CAROLINA RESOLUTION ON FEDERAL BUDGET

Mr. HELMS. Mr. President, the North Carolina General Assembly has adopted a resolution calling for a constitutional amendment requiring a balanced Federal budget.

I endorse this proposal. I wish it could be passed by Congress tomorrow and sent to the States for ratification.

Deficit spending is one of the most damaging and underhanded financial acts the Federal Government commits.

It causes inflation and thus transfers resources from those who save to those who go into debt.

Deficit spending is used by some in Government to spend without appearing to tax.

Deficit spending is used by those who think that artificial, fiscal stimulus to the economy actually causes more good than harm. "Stagflation," the ravages of high unemployment in the midst of inflation, has proven them wrong .

I have cosponsored a constitutional amendment which would restore a balanced Federal budget. I have introduced legislation which would amend the Budget Act of 1974 to require that Congress adopt balanced budgets.

I commend the legislators of my State of North Carolina. Our State Constitution prohibits deficit spending. This discipline has preserved fiscal integrity in our State government and it has protected the taxpayers of North Carolina. A similar prohibition against Federal deficits would help the national economy and it would protect the average American against a fiscally irresponsible government.

Mr. President, I ask unanimous consent that the senate joint resolution 858 of the general assembly of North Carolina be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SENATE JOINT RESOLUTION 858

Whereas, with each passing year this Nation becomes more deeply in debt as its expenditures grossly and repeatedly exceed available revenues so that the public debt now amounts to hundreds of billions of dollars; and

Whereas, attempts to limit spending, including impoundment of funds by the President of the United States, have resulted in strenuous assertions that the responsibility for appropriations is the constitutional duty of the Congress; and

Whereas, the annual federal budget repeatedly demonstrates the unwillingness or inability of both the legislative and executive branches of the federal government to curtail spending to conform to available revenues; and

Whereas, the unified budget does not reflect actual spending because of the exclusion of special outlays which are not included in the budget nor subject to the legal public debt limit; and

Whereas, the "U.S. News and World Report" reported on February 25, 1974, that of these nonbudgetary outlays in the amount of fifteen billion six hundred million dollars ($15,600,000,000), the sum of twelve billion nine hundred million dollars ($12,900,000,000) represents funding of essentially private agencies which provide special services to the federal government; and

Whereas, knowledgeable planning and fiscal prudence require that the budget reflect all federal spending and that the budget be in balance; and

Whereas, believing that fiscal irresponsibility at the federal level, with the inflation which results from this policy, is the greatest threat which faces our Nation, we firmly believe that constitutional restraint is necessary to bring the fiscal disciplines needed to reverse this trend; and

Whereas, under Article V of the Constitution of the United States, amendments to the Federal Constitution may be proposed by the Congress whenever two-thirds of both Houses deem it necessary;

Now, therefore, be it resolved by the Senate, the House of Representatives concurring:

Section 1. That procedures be instituted in the Congress to add a new Article XXVII to the Constitution of the United States, and that Congress prepare and submit to the several states an amendment to the Constitution of the United States, requiring in the absence of a national emergency that the total of all federal appropriations made by the Congress for any fiscal year may not exceed the total of the estimated federal revenues, excluding any revenues derived from borrowing, for that fiscal year.

SEC. 2. That the proposed new Article XXVII (or whatever numeral may then be appropriate) read substantially as follows:

"PROPOSED ARTICLE XXVII

"The total of all federal appropriations made by the Congress for any fiscal year may not exceed the total of the estimated federal revenues for that fiscal year, excluding any revenues derived from borrowing; and this prohibition extends to all federal appropriations and all estimated federal revenues, excluding any revenues derived from borrowing. The President in submitting budgetary requests and the Congress in enacting appropriation bills shall comply with this Article. If the President proclaims a national emergency, suspending the requirement that the total of all federal appropriations not exceed the total estimated federal revenues for a fiscal year, excluding any revenues derived from borrowing, and two-thirds of all members elected to each House of the Congress concur by Joint Resolution, the total of all federal appropriations may exceed the total estimated federal revenues for that fiscal year."

SEC. 3. That copies of this resolution be transmitted to the President of the United States, the chairmen of the Judiciary Committees of both the Senate and House of Representatives, the chairman of the Joint Committee on Budget Control of the Congress and to each member of the North Carolina Congressional Delegation.

SEC. 4. That copies of this joint resolution be transmitted to the Secretary of State and to the presiding officers of both houses of the legislature of each of the other states in the union, with the request that it be circulated among leaders in the executive and legislative branches of the several state governments; and with the further request that each of the other states in the union join in requiring the Congress of the United States to initiate a proposal to amend the Constitution of the United States in substantially the form proposed in this joint resolution.

SEC. 5. This resoluion shall become effective upon ratification.

THE EMPTY TRUCK SYNDROME

Mr. JOHNSTON. Mr. President, on June 15, 1977, I introduced the Diesel Fuel and Gasoline Conservation Act of 1977, S. 1699.

The purpose of this measure is to clarify an ambiguity that has arisen with respect to the application of the Robinson-Patman Act to uniform zone delivered pricing markets. This ambiguity is discouraging backhauling in such markets. The result is that trucks are returning empty from their fronthaul assignments when they could otherwise carry cargo on the return trip. Consequently, we are unnecessarily wasting diesel fuel and gasoline. The nature of the ambiguity is that merchants are unsure as to what is the permissible backhaul allowance that can be granted in this type of market. S. 1699 would leave no doubt as to the legality of granting backhaul allowances up to the actual savings in delivery costs saved to the seller because of the buyer's backhauling.

On June 27, I chaired a hearing on this bill in the Subcommittee on Energy Conservation and Regulation of the Committee on Energy and Natural Resources. We are in the process of arranging for a markup of S. 1699 in the near future.

Today an editorial entitled "The Empty Truck Syndrome," appeared in the Wall Street Journal in support of S. 1699. I ask unanimous consent to have the article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE EMPTY TRUCK SYNDROME

We have a proposal to offer that happily conforms with the President's wish to save energy: Let trucks do more work.

It seems that a lot of trucks drive around empty, wasting fuel, all because the Federal Trade Commission is afraid someone will violate the Robinson-Patman Act.

It works this way: Food chains and food wholesalers operate their own trucks to make deliveries from their warehouses to retail stores. Frequently, it would make perfect sense for a truck to go from its last store delivery to a nearby factory and pick up a load of pickles, beans, catsup or corn flakes to be hauled back to the warehouse. That way, the factory's truck would not have to make the delivery and return to the factory empty. And the warehouse truck would not have to return from its store deliveries empty.

The Federal Energy Administration estimates the potential fuel saving from eliminating this waste motion at 100 million gallons in the food industry alone. That's enough to fuel 140,000 automobiles for a year. And there no doubt would be additional savings in other industries.

But processors and manufacturers have been reluctant to knock off freight charges for customers who pick up their own merchandise. A major reason, it seems, is that the FTC has issued advisories saying this might violate the Robinson-Patman Act, which prohibits "discriminatory" discounts. If you have to pay the factory for a delivery, there isn't much incentive to pick up the goods yourself.

Senator J. Bennett Johnston (D., La.) has introduced Senate Bill 1699, asserting, in effect, that it is lawful not to charge someone for hauling their own goods. It would seem to be a bill fuel conservationists could support. In the Washington regulatory wonderland, even the simplest logical propositions sometimes need to be spelled out in terms a child would understand.

VOTER REGISTRATION

Mr. DOMENICI. Mr. President, the Universal Voter Registration Act of 1977 has drawn great criticism from those registrars and county clerks who have to administer the States' election laws. These people stand closest to the electoral process and know best the possibilities of fraud and abuse.

Leah G. Jones, county clerk of Luna County, N. Mex., has expressed her concern about this new proposal for same-day universal registration and has passed on to me a resolution and statement of principles adopted unanimously at the recently concluded sixth annual conference of the International Association of Clerks, Recorders, Election Officials, and Treasurers, held in New Orleans.

Mr. President, coming immediately after a period of great distrust and concern about the central government on the part of the people, I believe that adoption of such a registration system would be most ill advised. We would increase doubts about the honesty and validity of the bedrock of our system—free, open, and honest elections. Therefore, the concern expressed by the very officials of both parties who must administer the election laws is most significant.

I hope that my colleagues take this opposition into account and I ask unanimous consent that both the resolution and statement be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RESOLUTION—UNIVERSAL VOTER REGISTRATION ACT OF 1977

Whereas, the membership of The International Association of Clerks, Recorders, Election Officials and Treasurers is composed of elected and appointed county officials whose goal in the service of their counties, states and this Country, is directed to the lawful, orderly, efficient and fiscally responsible conduct of their offices, and

Whereas, their colleagues, those members charged by law with the registration of voters and the conduct of elections, with them assembled at the Sixth Annual Conference of The Association at New Orleans, Louisiana, have adopted a "Statement of Principles and Concerns" regarding the Universal Voter Registration Act of 1977 now pending in both Chambers of the Congress of The United States, and

Whereas, all of the members of the Association have consistently opposed programs, systems and legislation which would tend to disrupt the orderly, efficient, responsible and lawful administration of, and participation in, the free process of the Governmental functions of these United States, both by those who are, by their free consent, governed and by those who with that consent, govern, and

Whereas, after due consideration of said statement of principles and concern and of this resolution the delegates at said conference, in full general assembly and after discussion and debate, enthusiastically support said statement and resolution and have ratified and endorsed same as a part hereof.

Now, therefore, be it here resolved that we, members of The International Association of Clerks, Recorders, Election Officials and Treasurers, the working professional administrators of local Government do hereby support affirmative steps to improve lawful Government participation by all and thus, fully, unalterably and unequivocably oppose the Universal Voter Registration Act of 1977 as now constituted and as may be amended by proposed amendments now known to be suggested, and

Be it further hereby resolved that copies of this resolution be transmitted to the President and Vice President of the United States, to each member of both Houses of the Congress of the United States, to the Governors and Secretaries of State of each of the fifty United States, and to the presiding officers of each of the Chambers of the Legislatures of each of the fifty United States.

STATEMENT OF PRINCIPLES AND CONCERN—UNIVERSAL VOTER REGISTRATION ACT OF 1977

The membership of the International Association of Clerks, Recorders, Election Officials and Treasurers has, for six years, met annually to further the cause of efficient and lawful government at an annual working conference by engaging in workshops intended to promote knowledge of and solutions to common problems, and by disseminating valuable information to our membership through official publications.

One such problem, a most serious one, is embodied in the Universal Voter Registration Act of 1977. The principle aim of this legislation is the facilitation of easy voter registration and thereby, hopefully increasing voter participation in elections.

The legislation is, thus, conceived in error, nursed by misconception and misinformation, and, in the adulthood of enacted law, would most certainly accomplish the exact opposite of its laudible intentions.

We, the election administrators of the United States know and understand that there is no significant or substantial body of evidence, experiential or statistical, which persuasively demonstrates that increases in the numbers of registered voters tend to increase the percentages of voter participation in elections. On the contrary, recent studies tend to indicate that for every 100 new registered voters only 54 go to the polls to vote. This is well below the averages of voter participation now being viewed with alarm by the proponents of this legislation.

It is error to assume that our citizens can be persuaded to vote when they do not wish to. The American citizen cannot and will not be compelled to do that which is his heritage to freedom, independence and individualism allows him to choose not to do . . . even if that same heritage encourages voter participation. Thus, it is arguable, that although more persons do vote, a negative result is obtained when viewed by participation percentages.

Misconception and misinformation feed and nurture this unfortunate legislation. It is a misconception of fact that assumes that there is anything like foolproof evidence of identity. It is a misconception that stiff criminal penalties and sanctions will dissuade those so disposed from violating the law and voting illegally or that an oath will make all well. The overcrowded prisons of this country stand as grim evidence that this is not the case. Even the death penalty, when it existed, or the threat of life imprisonment, did not deter so many now wasting their lives away.

Yes, fraud, error, confusion, mistake and the sure erosion and eventual destruction of voter confidence in the electoral process are the certain fruits of this legislation. The cry of fraud audibly heard now, before its enactment, will become a deafening roar if this act becomes law.

Its effect will be the exact opposite of its aims. Rather than stimulate participation, it will tend to discourage those who do not wish to see their votes diluted by unlawful or erroneously cast ballots. There is no way to segregate such illegal ballots as would exist if the bill provided for separate polling places for both registration and voting. Then, if error or fraud were discovered, the law would have the means to cope with the situation. Absent such provisions, the proliferation of costly, time consuming and disruptive election contests is assured.

The problem, if there indeed is one, is not addressed by the legislation. The causes of low voter turnout are myriad and complex, not singular and simple. Citizens will register and vote when they are so motivated or, on the other hand, when they are not turned off. The Congress fails to recognize the findings of President John F. Kennedy's Commission of voting which determined that, among other things, too many elections discourage participation in the elective process.

Additionally, use of voter lists for jury rolls and skip tracing for the collection of debts owed were found to significantly adversely affect voter registration. No solution is attempted here in this legislation for these real problems.

Enacting this law would create a climate of confusion and chaos in polling places and in the administrative planning for the conduct of elections. How can fiscally responsible planning be effectuated when there are no guide posts for space and personnel planning or for estimating ballot and other supply requirements? Those who have these laws in their states admit that between 15 to 25%

of those who vote—register on election day. As the practice spreads, will those percentages rise? Of course they will! The confusion engendered by this Act is of paramount concern. Polling places are not arenas where adversary proceedings on proof of identity should be encouraged. But this is exactly what will happen when voters register in one place on election day and then learn that at still another polling place they may only vote for federal officers, with the need to later register again to vote for state and county officers at another election. The disruption may well lead to the disenfranchisement of those already registered due to the loss of time occasioned by the furor. Voter participation in state elections may well decline, because of inability to vote for state officers, the exact reverse of the desired effect.

Does the need for this law really find demonstrable evidence in its support when viewed from a comparison of the three major states (Maine, Minnesota, Wisconsin) when election day registration state statutes and other states? No! Twenty-three states increased their participatory percentages by rates higher than those three major states which are cited as prime examples of this system.

Enactment of this law would be an unwarranted intrusion of the Federal Government into areas of legitimate state interests in the preservation of the integrity of the electoral process, and interest supported by the Supreme Court of the United States. The Court has also supported the states' valid and sufficient interests in providing for some period of time—prior to an election—in order to prepare adequate voter records and protect its electoral process from possible fraud. These reasons and interests for closing registration rolls still exist today.

In summation, the members of this Association are not merely against this law. We have demonstrated support of programs aimed at removing barriers to citizen registration and voting and have done so when, and only when, the side effects are not adverse to the cause of good government. The Universal Voter Registration Act of 1977 attempts to solve a problem which doesn't exist with a solution which creates the means to destroy the confidence of the people in the electoral system. In conscience we cannot and do not support it.

WILL OTHERS FOLLOW U.S. LEAD IN ARMS SALES REDUCTIONS?

Mr. PROXMIRE. Mr. President, a recent National Security Council study casts doubts on whether President Carter's policy of reducing U.S. arms sales overseas will be effective in holding down the international arms trade.

The report says it is unlikely that other countries will voluntarily follow the U.S. lead in reducing sales. Communist suppliers are most likely to resist restraint, the NSC study said, noting that some of the largest purchasers of U.S. arms purchase weapons because they fear the Communist military support of neighboring nations.

U.S. reluctance to sell arms to Africa and Latin America in the past has primarily resulted not in reducing arms sales overall, but in transferring business to other arms suppliers, according to NSC.

The report also said that U.S. arms sales to developing nations have accounted for more than half of all international sales to such nations and more than three times the sales of the Soviet Union and other Communist suppliers.

Mr. President, because of the importance of this study, I ask unanimous consent that the Washington Post article of July 12 summarizing some of the major conclusions of the report be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD as follows:

WHITE HOUSE REPORT DETAILS OBSTACLES IN ARMS RESTRAINT POLICY

(By Don Oberdorfer)

President Carter's policy of reducing U.S. arms sales overseas is not likely to bring down the worldwide traffic in conventional weapons—and may not be politically acceptable at home—unless other nations can be persuaded to adopt similar restraints, according to administration documents released yesterday.

"The prospect that other countries will voluntarily and spontaneously follow our model of restraint is unlikely," said a National Security Council study. The study formed part of the basis for Carter's May 19 announcement of a more restrictive U.S. policy on the sale of conventional arms abroad. A declassified form of it was transmitted to the Senate Foreign Relations Committee, which made it public yesterday.

The NSC report—and Carter's May 19 announcement—called the new U.S. policy a "first step" in limiting the worldwide conventional arms race. The report went on to say, however, that "it will be difficult to sustain unilateral U.S. restraint over the longer term" if other countries do not follow the U.S. example.

The report named France, Britain, Israel, Germany, Italy, Belgium, Sweden and the Soviet Union as countries which might sell weapons to "determined purchasers" whose arms requests are turned down by the United States.

If such countries rush to fill the vacuum caused by U.S. cutbacks, "the pressures in this country to loosen the bonds of restraint could become substantial," the report said.

According to Central Intelligence Agency data published in the report, the United States accounted for more than half of the worldwide arms traffic to developing nations in recent years, calculated on a dollar basis. With 56 per cent of the sales, the U.S. share is more than twice that of other non-Communist suppliers combined (26 per cent) and more than three times the sales of the Soviet Union and other Communist suppliers (18 per cent).

About 52 per cent of U.S. government-to-government sales are to three Middle Eastern countries—Saudi Arabia, Iran and Israel. South Korea, Australia and Jordan are listed as the next largest arms purchasers from the United States.

On the other hand, the Soviet Union is the dominant supplier to Africa and South Asia, a major supplier to the Middle East and ranks ahead of the United States as an arms supplier to Latin America, the report said.

Though the past U.S. reluctance to sell arms to Africa and Latin America may have had "some dampening effect," the report said "the primary result" has probably been to transfer business to other arms suppliers. The United States has only a minor role in providing arms to Africa and is behind Italy and Britain as well as the Soviet Union as an arms merchant to Latin America, according to the study.

Arms purchases by developing countries from all sources have begun to decline since the 1974 peak of $21 billion, the study said. The reduction was 20 per cent in 1975 and another 15 per cent last year. "Unless major political, economic or military developments upset this trend, the CIA projects that worldwide new orders may level off at $10 billion-$15 billion annually by 1980," the study said.

Congress in controversial actions has set arms policy by legislating a ban on U.S. sales to Chile and Uruguay because of human rights violations and by enacting restrictions on sales to Turkey because of misuse of U.S. arms in the Cyprus invasion.

The Ford administration persuaded Congress to permit Turkey to purchase up to $125 million of U.S. arms in fiscal year 1976 and 1977 in order to forestall a further deterioration of relations with that NATO ally.

According to informed sources, the Defense Department recently notified members of Congress that Turkey may have exceeded the 1976 ceiling by purchasing $30 million in U.S. missiles, aircraft engines and helicopters from a NATO maintenance and supply organization located in Luxembourg.

A Pentagon spokesman said yesterday a study is underway of the Turkish purchases from the NATO group. The spokesman would not say, in response to questions, who was responsible for the apparent violation of the limit imposed by Congress.

In an effort to win the cooperation of European weapons suppliers with his drive for worldwide restraint, Carter discussed his new arms export policies with heads of government during the recent London summit meeting. U.S. officials said diplomatic discussions with the European governments are taking place in hopes of obtaining their agreement to cut back sales.

However, overseas arms sales are an important economic prop for some of the countries involved and officials conceded that agreements would not be easy.

The United States and the Soviet Union agreed in March to set up a joint "working group" to study sales of conventional arms. State Department officials said recently that the United States hopes to begin talks on the question with the Russians by September.

The NSC study made public yesterday said "it will be most difficult to achieve the cooperation of the Communist suppliers." It noted that some of the largest purchasers of U.S. arms are motivated by Communist military support of nations on their borders.

While the United States is the largest arms supplier in overall dollar terms, the report said the Soviet Union is the leading worldwide supplier of supersonic combat aircraft, surfact-to-air missiles, self-propelled guns, artillery and guided missile patrol boats.

The Defense Department reported that the Soviet Union has a substantial economic capability to increase its production and sales of military items. The extent to which Russia would seek to move into the gap left by declining U.S. sales is "uncertain," the report said.

MINING SAFETY AND HEALTH

Mr. SCHMITT. Mr. President, underground mining is a dirty, dangerous business. This is true for both coal and noncoal—metal and nonmetal—mining.

(Per million man-hours)

	Coal	*metal/nonmetal*
Fatalities	0.40	0.33
Disabling Injuries	39.31	19.12

About 1 in 1500 miners is killed on the job; that is more than 800% of national average for all workers covered by OSHA and about 235% of the death rate for construction workers.

There are major differences between the means of mining coal and the means of mining metals such as copper and uranium and nonmetals such as potash. For example, rocks are much softer but

the danger of explosion is infinitely greater in coal mining than is the case in other types of mining.

The administration and much of the Congress support the creation of a vastly enlarged bureaucracy within the Department of Labor—the home of OSHA—to regulate matters related to mine safety and health.

How, then does the administration expect this new bureaucracy to meet the needs of safety and health simultaneously with meeting coal, uranium, potash, and other production requirements necessary to our continued energy and economic growth?

Commonsense would suggest that the major emphasis of Federal activity should be in rapidly advancing the technology of underground mining so that miners could work from the surface rather than underground. Research and development in mining, particularly coal mining, has lagged severely for several decades. New technologies are now available to be applied not to make mining safer but to increase rates of production. Let us hope that Congress and the administration will begin to move in this direction.

NOTICE CONCERNING NOMINATION BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary: Donald L. Beckner, of Louisiana, to be U.S. attorney for the middle district of Louisiana for the term of 4 years, vice Douglas M. Gonzales, resigned.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee in writing, on or before Friday, July 22, 1977, any representations or objections they may wish to present concerning the above nomination with a further statement whether it is their intention to appear at any hearing which may be scheduled.

ANOTHER PROVOCATION BY NORTH KOREA

Mr. DOLE. Mr. President, I am appalled at the merciless killing of three unarmed American soldiers by North Korean troops 2 days ago. It was a cruel overreaction to an unintentional incursion of alien air space, and clearly demonstrates the brutal character of the North Korean Army. I wish the President success in gaining the immediate release of the injured crewman, and the bodies of those who were killed.

There can be no question that a dangerous and highly volatile situation still exists on the Korean peninsula. The incident on Wednesday is the latest in a series of provocations committed by North Korean troops which leads me to question the wisdom of the President's American troop withdrawal policy. I believe there are many others who share my apprehensions. None of us likes to see the heavy commitment of American dollars and troops, year after year, in that distant land. But I believe most of us feel it is a reasonable price to pay for the security of the Pacific region, so vital to our own national interests.

A POWER VACUUM

A policy mistake in Korea could be a lethal one for Asians and Americans alike. The President has declared his intention to defend the Pacific against attack, but actions usually speak louder than words. The withdrawal of 33,000 American ground troops from South Korea will create a power vacuum in the region that will be difficult for our adversaries to ignore. Let us hope that a misjudgment on our part never triggers an even greater misjudgment by the Soviet or North Korean Governments.

Cmdr. William J. Roger's recent message in the American Legion's national magazine recalls another era when ambiguous statements and actions relating to our policy in the Pacific resulted in serious misjudgments of our national will. The Korean war, which may have been a product of careless policy decisions, defined the American determination to stand against aggression in the Pacific—but in a very costly manner. I hope our resolve is never again so callously tested as it was in 1950.

Mr. President, I ask unanimous consent that the full text of Commander Rogers' message be printed in the RECORD.

There being no objection, the message was ordered to be printed in the RECORD, as follows:

LET'S HOPE NORTH KOREA KNOWS THIS ISN'T 1950

A few weeks ago some 500 South Koreans gathered in Seoul to sing "Onward Christian Soldiers" and pray that the United States changes its mind and does not withdraw its ground forces from their country.

The American Legion has steadfastly opposed the withdrawal of American forces from the Korean peninsula so long as Kim Il-Sung of North Korea threatens war. This has been American policy since the Korean conflict. Now the President has decided it is time to pull out U.S. ground forces, although he pledges this will not weaken the American commitment to defend South Korea in case of North Korean attack.

The President obviously is convinced that it is not a gamble. We pray he is right. The withdrawal of 1948, the Dean Acheson declaration that left South Korea outside the U.S. Asian defense perimeter and the 1950 invasion by North Korea are history that must not be repeated.

Early in my year as national commander I visited South Korea, toured the demilitarized zone (DMZ) and Panmunjom where the sessions between Allied and Red "peacemakers" go on interminably in a supercharged atmosphere of hate and suspicion. Two American officers were literally hacked to pieces last year by Communist guards at Panmunjom. Border incidents are commonplace. North Korean and South Korean gunboats have fought a series of running battles in the cold, foggy north Pacific.

The 33,000 American troops on guard in South Korea are perhaps the finest honed outfits in the U.S. Army. The 2nd Infantry Division is alert at the DMZ for any surprise attack and deeply aware of the threat from the north.

It was not surprising to hear a major general in Korea express fear that withdrawal of American forces might encourage another Communist invasion. The unfortunate timing of Gen. John K. Singlaub's remarks, just as U.S. negotiators were about to open talks with South Korean officials, probably left the President no option but to transfer the general. Delicate negotiations cannot succeed if one side is in doubt about the other's purpose. Certainly the President is well aware of the risks inherent in the Korean situation. And he has the ultimate responsibility as commander-in-chief.

Gen. Singlaub's case was handled with too much publicity, perhaps, but it was encouraging that the President did not take punitive action. The general is a fine soldier. The Army needs his kind.

What is not so encouraging is the prospect that the Singlaub affair could silence all professional military men. Their views are needed if the public is to understand the complex issues of foreign policy, disarmament and national security.

The *Wall Street Journal* suggests in an editorial that "journalists can forget about interviewing generals. Even if an officer is willing to risk an interview, no candor can be expected. Secretary of Defense Brown (has) declared that once a policy is set, an officer is expected 'to support that policy publicly if he plans to stay in the military,' even if he has advised against it and in fact privately dissents. So the journalists, and for that matter the public and the Congress, will be dealing with officers who may be facing the blunt choice: resign or lie."

I hope the choice is not so stark.

The American Legion stands squarely behind the concept of civilian control of the military. Our entire system of government is based on every citizen's ultimate responsibility to elected authority.

But if citizens are to understand clearly basic changes in our world defense system, especially the withdrawal of American forces from such a critical spot as Korea, they deserve full airing of all points of view. Certainly the professional military's on-the-spot appraisal of Communist capabilities and intentions is one crucial point of view.

At stake in Korea is not only the independence of the Republic of Korea, but protection of major American business holdings and the strategic defense of Japan.

If the Republic of Korea is now able to handle its own defenses, great. The saving to the American taxpayer will be substantial. But let's be satisfied in advance that Communist North Korea understands this isn't a replay of 1948 and 1950.

WILLIAM J. ROGERS.

UNITED NATIONS ASSOCIATION OF THE UNITED STATES AND THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in the last 28 years the Genocide Convention has been subject to more scrutiny than any human rights treaty that has ever been submitted to the Senate for ratification.

In four series of hearings before the Senate Foreign Relations Committee, every line, every phrase, every syllable has been examined in detail. Similarly, the American Bar Association has given this treaty the same type of detailed analysis.

It has been the conclusion of both the Foreign Relations Committee and the American Bar Association that the objections to the treaty have not withstood the test of time.

Nevertheless, a small series of arguments continue to be raised in opposition to ratification. I believe that these arguments are raised in sincerity but

are based on a misunderstanding of the treaty's language and history as well as the current state of international law.

One of the groups that has been most active in the campaign for ratification of the Genocide Convention, the United Nations Association of the United States—UNA-USA—has prepared a very thoughtful background paper regarding the convention and a paper refuting the most common objections.

I think this excellent paper will dispel many of the legitimate concerns of my colleagues and I urge them to review it carefully.

Mr. President, I ask unanimous consent that the two papers prepared by UNA-USA be printed in the RECORD.

There being no objection, the papers were ordered to be printed in the RECORD, as follows:

THE GENOCIDE CONVENTION

BACKGROUND

The Convention on the Prevention and Punishment of the Crime of Genocide, often referred to as the Genocide Convention was the first major international human rights agreement to be approved by the UN General Assembly after World War II. The idea of such an international agreement grew out of the shock expressed by the Allied Nations over the organized efforts to exterminate entire ethnic groups by the Nazi authorities during the 1930's and 1940's.

The UN Economic and Social Council completed two years of work on the Convention in 1948, under the auspices of a special ad hoc Committee on Genocide, chaired by the United States. The Committee's draft was unanimously approved by the General Assembly on December 9, 1948, and signed by the United States two days later. In June 1949, President Truman submitted the Convention to the Senate for its advice and consent, and in 1950, a subcommittee of the Senate Foreign Relations Committee held public hearings. The subcommittee shortly thereafter recommended that the full Foreign Relations Committee approve the Convention, but no further action was taken. The Convention entered into force in January 1951, after twenty nations had become a party to it.

The Convention has been before the U.S. Senate for twenty-eight years, and has been actively supported by Presidents Truman, Kennedy, Johnson, Nixon, and Carter. During that period, the Senate Foreign Relations Committee has held four series of hearings and has recommended the Convention five times. For a variety of reasons, however, the full Senate has never approved the Convention. To date, eighty-two nations have ratified the Genocide Convention, making it among the most widely accepted international human rights agreements in existence.

SUMMARY OF PROVISIONS

Article 1: Genocide is a crime under international law, whether committed in time of peace or war.

Article 2: Genocide consists of "acts committed with intent to destroy, in whole or in part, a national, ethnical, or religious group" including the following actions directed at the group:

(a) Killing members;

(b) Causing serious bodily or mental harm;

(c) Deliberately inflicting living conditions calculated to bring about the group's destruction;

(d) Imposing measures intended to prevent births within the group;

(e) Forcibly transferring children of the group to another group.

Article 3: Punishable acts are:

(a) Genocide;

(b) Conspiracy to commit Genocide;

(c) Direct and public incitement to commit Genocide;

(d) Attempt to commit Genocide;

(e) Complicity in Genocide.

Article 4: Persons found guilty of any of the above crimes shall be subject to punishment whether they are public officials or private individuals

Article 5: States party to the Conventions shall enact legislation which provides effective penalties for those found guilty of the above crimes.

Article 6: Persons charged with Genocide shall be tried by a tribunal created by the State in which the crime occurred, or by an international tribunal accepted by the States involved. (No such international tribunal has been created or is contemplated.)

Article 7: For the purposes of extradition, Genocide shall not be considered a political crime, and extradition shall be granted by the States party in accordance with their own laws and treaties in force.

Article 8: Any State party to the Convention may request the relevant UN organs to take action to assist in carrying out the provisions of this Convention.

Article 9: Disputes relating to "interpretation, application, or fulfillment" of the provisions of this Convention shall be submitted to the International Court of Justice at the request of any party to the dispute.

Article 10: Authentic languages.

Article 11: The Secretary General of the UN shall act as the depository for instruments of ratification.

Article 12: A State party to the Convention may extend its application to its legal territories.

Article 13: The Convention comes into force after twenty States have become a party.

Article 14: The Convention shall remain in force for successive five-year periods.

Article 15: If States party to the Convention denounce it to the point where only sixteen States remain a party, the Convention shall cease to be in force.

Article 16: Any State party to the Convention may request that its terms be revised, and the UN General Assembly may propose changes.

Article 17: The UN Secretary General shall notify all States party to the Convention of new signatories, new ratifications, new denunciations, the termination of the Convention, and new requests for revisions of the Convention's terms.

Article 18: The original Convention shall be deposited in the archives of the UN, although certified copies shall be held by all members of the UN.

Article 19: The UN Secretary General shall register the Convention when it comes into force (January 12, 1951).

ISSUES

In December, 1948, the United Nations General Assembly unanimously approved the Convention on the Prevention and Punishment of the Crime of Genocide, often called the Genocide Convention. Since that time, eighty-three nations have become parties to the Convention; however, the United States has not. In the context of U.S. participation in the Genocide Convention, several presumptions are often made which, when examined closely, are without foundation. This Information Memorandum will briefly explore some of these presumptions.

Presumption 1: Genocide is a domestic matter, and not properly the subject of an international agreement.

Article I; Section 8 of the Constitution empowers the Congress to "punish . . . offences against the Law of Nations;" and in so doing recognizes the importance of international law, and its application to American citizens. For centuries civilized nations have recognized that their conduct, and the conduct of their citizens, may, in some way, be limited by international law. Indeed, the United States has historically actively supported such a proposition, most explicitly in the post-World War II War Crimes Tribunals.

As to whether the declaration that "Genocide is a crime" is itself a part of the Law of Nations, it is important to look to treaties, international custom, and the acts of international organizations. In all three cases, it is clear that the act of Genocide is almost universally recognized as an international crime. The Genocide Convention itself has eighty-two nations party, including Britain, France, Germany, Italy, and most other major nations; it has been unanimously approved by the U.N. General Assembly, and it is generally accepted as international customary law.

Presumption 2: The Genocide Convention would allow Federal Courts to review the actions of State and Local Officials.

In fact, the U.S. Federal Court System would be responsible for interpreting the Genocide Convention and its implementing legislation with the United States. This review would include the activities of public officials as well as private citizens.

Such Federal Judicial authority is not new, however, and is by no means limited to the Genocide Convention. All treaties ratified by the United States become the supreme law of the United States, and violations by public or private persons of any treaty are adjudicated in a Federal Court. Moreover, Federal laws such as the Civil Rights Act authorize Federal Courts to judge the conduct of American citizens on human rights grounds.

Presumption 3: The Genocide Convention would allow U.S. POW's to be charged with Genocide by enemy nations.

An inference such as this overlooks the simple fact that such a charge may be made by the authorities of a state involved in a conflict with the United States with or without the Genocide Convention. The existence of the Genocide Convention, and more importantly the ratification or rejection of the Convention by the United States, would have little effect on the treatment of American POW's. This was clear in the cases of American POW's held by North Viet Nam (where neither party was party to the Convention) and Israeli POW's held by Egypt (where both countries were party to the Convention).

Presumption 4: The Genocide Convention will force Americans charged with Genocide by a foreign country to be extradited to that country, violating American due process, regardless of whether the extraditing state has any due process for the accused.

The Genocide Convention clearly states that extradition may only take place if and when an extradition treaty exists with another nation which includes Genocide as an extraditable offense. The United States has no such extradition treaty with any other nation, and consequently no other nation would be able to extradite an American for Genocide if the Convention were approved.

It is conceivable that at some time the United States might negotiate an extradition treaty with another nation, which treaty includes Genocide as an extraditable offense. But such a treaty could be negotiated with or without the Genocide Convention, and in any event would have to be brought before the Senate for approval.

Presumption 5: The Genocide Convention would make it possible to convict someone of the crime of Genocide if they mentally harmed another person.

This frequently drawn inference is actually based on two presumptions:

1st, that someone may be accused of Genocide for having taken action against another individual; and

2nd, that someone may be accused of Genocide for having caused mental harm to other(s). Each should be examined separately, and then as a whole.

Although often repeated, there does not seem to be any foundation to the suggestion that Genocide could include acts against an individual. The Convention, in Article II, explains that the act of Genocide must include "the intent to destroy in whole or in part a national, ethnical, racial, or religious group." Some have concluded, as a result, that an individual could constitute "a part of a national, ethnical, racial, or religious group."

By stretching the English language, one could conclude, when the U.S. Constitution says the "Congress shall make no law . . . abridging the . . . right of the people to peaceably assemble," that no trespass, or highway laws may be enacted. The "people"—be they several thousand or just one—cannot be prevented from exercising their right to assemble. It goes without saying that such an interpretation—although it could conceivably be made—would be rejected by any rational Federal Court. By the same token, we can expect that any suggestion that Genocide can be committed against an individual will be rejected by our own Federal Courts.

Taking the matter further, in the past the Foreign Relations Committee of the U.S. Senate has found it necessary to include a special "understanding" on this subject. Their language would legally bind the United States to the obvious conclusion that when the Genocide Convention refers to a "part of a group" it specifically means "a substantial part of the group concerned."

The second suggestion, that one may be accused of Genocide for having inflicted simple mental harm on others, is more complex. In drafting the Genocide Convention, its framers sought to include deliberate efforts calculated to psychologically destroy a national, ethnic, racial, or religious group. It is clear that there are several ways in which a group could be destroyed, outside of physical slaughter. In an era of sophisticated technology and mass communications, a large national or ethnic group might be destroyed through carefully calculated psychological techniques. This, of course, is what the framers anticipated.

Consequently, the drafters of the Genocide Convention included in Article II(b) the explanation that Genocide consists, among other things, of "causing serious . . . mental harm to members of the group." Some of the Genocide Convention's severest critics have suggested that the phrase "causing mental harm" leaves the Convention open to incredibly broad interpretations. This is true, of course, only if one assumes that the U.S. Federal Court System is prepared to accept absurd interpretations of this phrase.

In the context of an international treaty on the subject of Genocide, given the lengthy records left by the Convention's framers, it is difficult to understand how one could expect the Federal Courts to misunderstand the intended meaning of "substantial mental harm." Since the Convention, in this subsection, speaks to a means of committing Genocide which is constantly technologically changing, it would be impossible to expect specific treaty language enumerating the components of "causing serious mental harm."

However, to guarantee that the U.S. Federal Courts could not interpret "causing serious mental harm" in such a manner, the Senate Foreign Relations Committee has included an "understanding" which further defines this phrase as including only "permanent impairment of mental facilities."

Hence, we can see that the initial suggestion, taken as a whole, has little meaning.

CONCLUSION

It appears that critics of the Genocide Convention have failed in their analysis of this treaty, to take account of several important factors. These include:

1. The Genocide Convention, like all treaties and Federal statutes, would be interpreted by the U.S. Federal Courts. Wild and exaggerated claims of the meaning of the Genocide Convention can only be made if one assumes that the U.S. Federal Courts—and ultimately the U.S. Supreme Court—are prepared to accept such reckless interpretations; and

2. It is inconceivable, particularly in light of the "understandings" historically supported by the Senate Foreign Relations Committee, that the Genocide Convention could be applied against someone who acts against an individual. Consequently, the list of crimes against an individual—such as homicide, which is often put forward as a possible example of Genocide—is without foundation; and

3. The role of the International Court of Justice, in interpreting the Genocide Convention would not, and could not, reach down directly to the actions of an individual. The Genocide Convention provides that if two states party to the treaty have a dispute over the way in which it should be interpreted, they shall submit the dispute to the International Court. (This provision is similar to the ICJ arbitration provisions of several treaties to which the U.S. is a party.) Only states may be parties to cases before the International Court, and the Court's decisions, while binding, are finally subject to the interpretations of the U.S. Federal Courts. In addition U.S. Federal Courts have complete authority to review treaty provisions—as well as International Court decisions on the meaning of treaties—to insure that both are consistent with our Constitutional guarantees. Consequently, it is inconceivable that an individual American citizen could be brought before the International Court, or that the Court could issue direct instructions to officials of the U.S. Government.

When these, and many other, exaggerations about and distortions of the Genocide Convention are carefully examined, one would probably conclude that it would result in none of the disasters which its worst critics suggest. Instead it would be seen for what it is: A major step forward in the development of international law: one which essentially says that the civilized nations of the world recognize that Genocide is a crime, not only in the state in which it is committed, but in international terms as well.

SCIENCE AND PUBLIC POLICY

Mr. DOMENICI. Mr. President, about 6 years ago, a former physicist named Dr. Dick Scribner submitted a proposal to the American Association for the Advancement of Science. This proposal resulted in a program which has made a major contribution to the Congress. Today I would like to pay a special tribute to Dr. Scribner and to the AAAS.

Dick Scribner's combined interest in science and public policy brought him to an awareness that Congress has been inadequately equipped to deal with the expanding burden of scientific and technical issues with which it is confronted. I am speaking of such issues as energy and natural resources, health and science policy, environmental problems, and the like. Understandably, most congressional staff personnel are trained in law and related fields as are the Members themselves. Few have scientific credentials or expertise to bring to bear on these highly technical issues.

Responding to this need, Scribner developed and instituted what is called the congressional science fellowship program, which is coordinated and partially supported by the AAAS. Scientific, engineering, and professional organizations participating in this program select highly qualified practicing scientists from among their memberships and provide them with financial support for 1 year while they work as staff assistants in Congress. During the past 5 years, more than 50 of these congressional science fellows have served in both Houses, on personal and committee staffs, and in the Office of Technology Assessment. Their contributions have been positive and highly significant.

A noteworthy spin-off of the program has been that many of the former science fellows have elected to become permanent staff members. These individuals, numbering about 15 or so, now form a "network" of scientific staff expertise—expertise which a few years ago was not available to Congress.

During the past year I have had the pleasure of having a congressional science fellow, Dr. Gary Ritchie, on my own staff. He has been very helpful to me in drafting water research legislation, initiating a program to develop new agricultural crops for the Southwest, and numerous other areas. I understand that Senators BUMPERS, MATHIAS, HATFIELD, and BAKER currently have science fellows on their staffs as do several Congressmen and committees. In each case, these relationships have been mutually rewarding and productive.

At this time, I would like to join my colleagues in expressing a profound note of thanks to Dick Scribner and the American Association for the Advancement of Science for the contribution they have made to the Congress and to the United States.

S. 1671—NATIONAL SKI PATROL ASSOCIATION CHARTER

Mr. McINTYRE. Mr. President, I am pleased today to present to the Senate four additional cosponsors supporting legislation which I introduced granting the National Ski Patrol Association a Federal charter. The National Ski Patrol Association has, for many years, been educating the Nation's many skiers in safe skiing techniques. This nonprofit organization not only teaches skiers about safe skiing practices and safe ski equipment, but helps in protecting skiers while they are on the slopes.

Organizations like the Red Cross and the Boy Scouts of America have been granted Federal charters to aid these nonprofit organizations in dealing with the growing paperwork burden mandated by State chartering.

As the number of Americans enjoying this sport grows every year, the job of the National Ski Patrol Association grows

as well. I hope more of my colleagues who come from States which depend on skiing as a revenue source or have constituents who enjoy skiing will join me in supporting this legislation.

HARD ENERGY VERSUS SOFT ENERGY

Mr. GARN. Mr. President, in his article on energy use in the United States, Amory Lovins discusses our options in terms of a single choice, which the Nation, standing as if a person before a fork in the road, could make and the future would roll forward from that point along a smooth path. Actually, that is a false picture of reality, at least in this Nation. The United States consists of millions of free people, each of whom makes choices as best he can. In order for Lovins conception to be reality, the Government would have to acquire enormous powers which it does not now possess. In fact, it has always been the judgment of the nation as a whole, that the Government should not have power of that sort.

Dr. Arnold Safer, a vice president and economist with the Irving Trust Co., has explained this reality very clearly in an essay critical of the Lovins article. Dr. Safer goes on to note that the kind of new technology that Lovins prefers must, in a free society, gradually work its way into the system. It cannot be imposed by fiat. To quote him directly—

Society cannot bet its energy future in a host of unproven technologies, nor radically alter its present social structures to reach some distant utopian future.

I ask unanimous consent that Dr. Safer's critique be printed in the RECORD.

There being no objection, the critique was ordered to be printed in the RECORD. as follows:

[From Electric Perspectives, March 1977]

A CRITICAL REVIEW OF "ENERGY STRATEGY: THE ROAD NOT TAKEN?"

(By Dr. Arnold E. Safer)

The principal point of Mr. Lovins' energy plan is that there are two, mutually exclusive paths leading to a solution of the Energy Crisis: a "hard path," dominated by large-scale technology, centralized energy production, and increasingly pervasive control over our daily lives; and a "soft path," idyllically flowered with small-scale energy facilities and many simple conserving processes, underwritten and undertaken by local communities, and, thereby, preserving the essentials of Jeffersonian democracy. That Lovins' "soft path" will by itself solve the energy problems of the next quarter century and beyond is a vivid example of how sound technical ideas can lead to highly oversimplified socio-economic generalizations.

There is, of course, much to recommend for many of Mr. Lovins' suggestions regarding energy conservation and the more efficient use of existing sources of energy. How these are to be accomplished is, however, the underlying bone of political contention. Mr. Lovins does not address himself to this aspect of the problem, and thereby reveals a major gap in his understanding of how invention becomes transformed into innovation within the context of a market-oriented economy.

ENERGY, EMPLOYMENT AND THE ECONOMY

Energy is an important segment of the increasingly capital intensive U.S. employment structure. And increased energy intensity makes for increased labor productivity, and, thus for gains in real income, which we call prosperity. Postwar economic history bears out this important relationship.

As the first two charts show, while the amount of energy per dollar of real output steadily declined over the period 1947–1966, the number of jobs required to produce a unit of output declined even faster. As a result, it took more and more energy to sustain the same levels of employment and output. This trend accelerated between 1967–1973, with energy use increasing by over 30 percent and employment by only around 15 percent. With the 1974–1975 recession, both the use of energy and the level of employment declined. However, because of the high price of energy relative to other inputs, energy use declined more than employment, so that the energy/labor ratio declined from its peak 1972 level.

In 1976, the upward trend returned: energy grew by 4.8 percent and employment grew by around 3 percent. At the same time, real Gross National Product (GNP) grew by an estimated 6.2 percent. Due to the forces of cyclical recovery from the depressed levels of 1975, employment grew by more than its long-term trend in relation to real GNP growth. Energy, on the other hand, grew by somewhat less than its long-term trend relation to GNP, primarily due to the initial conservation programs brought about by the dramatically higher prices of energy. The outlook for 1977 and beyond, however, suggests that cyclical recovery may be giving way to secular expansion, posing this fundamental question as to the structure of long-term growth in the economy: Can growth in energy consumption be restrained to a rate no greater than the increase in employment?

Both energy and employment are tied to the growth of output. And output must grow faster than employment to generate the increased productivity and real per capita income gains which we call prosperity. But if output grows faster than employment, energy use must also grow faster than employment. Both historical and technological evidence point to this conclusion.

Despite the dramatic shift in employment away from manufacturing and capital-intense industries generally, the consumption of energy per productive job has continually risen. It is an inherent part of the process of capital formation.

As a rule-of-thumb, it takes a 3 percent incremental growth in real output to generate a 1 percent decline in the unemployment rate. As a corollary to that rule, we estimate that energy demand grows at about two-thirds the rate of growth of output thereby generating an increase of around 2 percent in energy use per 1 percent decline in the unemployment rate. Thus, it takes an increasing amount of energy to sustain the same number of jobs in the economy, if these jobs are to generate higher levels of real income to working men and women.

So, if the target of government economic policy is to reduce the unemployment rate to a 4.5–5.0 percent range by 1980, which translates into a 2 percent per annum increase in employment or eight million new jobs, at least a 6 percent per year growth in real GNP will be required. And if these new jobs are to yield the productivity gains necessary for non-inflationary growth, energy use will likely have to grow by around 4 percent per year over the same period. (The productivity gain here would amount to about 4 percent per year, and for the most part that productivity gain is intimately linked with an even more energy-intensive employment structure.)

We expect conservation programs to gradually reduce the energy/GNP ratio, but these efforts will become tougher and more costly as time goes on. We estimate a lower limit of around 0.67 Btu in the incremental amount of energy required to sustain a dollar increase in real GNP.

Although we have idle manpower resources and the need for a greater domestic supply of energy, we have been unable to weld together an effective employment and energy policy. Between now and 1980, it is likely that the U.S. dependence on foreign oil will increase, regardless of what we do in the next few years. The advent of the Alaskan pipeline will only arrest the decline in U.S. oil production, while delays in increased coal production and nuclear power will have to be compensated for through increased oil imports. While we have imposed restrictions on rising domestic energy costs, we must still pay the price internationally.

In 1976, the U.S. spent about $35 billion for imported oil—almost equal to our capital investment in domestic energy supply. Compare that to 1962, when the U.S. invested around $10 billion in domestic energy while paying $1.8 billion for oil imports. This means our cost of importing oil has increased from less than 20 percent of domestic energy investments in 1962 to almost 100 percent today.

A recent study by the Economics Department at the University of California at Los Angeles (UCLA) suggests that replacing oil imports of around 2.0 million barrels per day with an equivalent amount of domestic energy would ultimately generate as many as 800,000 productive new jobs in the U.S., depending upon the particular policies adopted. According to that study, about 25 percent of these new jobs could come from additional domestic energy production and the construction of new plant facilities. The balance of the growth in employment would be derived from non-energy sectors, which would produce more goods and services, both to support the energy-producing industries and to supply what would become a generally faster-growing economy.

To the extent that these energy policies might lead to unacceptably high profits for any one group, these could be taxed away. And to the extent that higher energy prices might cause undue hardships for lower income groups, the tax revenue so generated could be utilized in the form of income supplements (e.g., fuel stamps).

THE COMPATIBILITY OF ENERGY CHOICES

The history of industrial progress portrays an evolution of technological change, rather than a revolutionary uprooting of existing practices. To be sure, the discovery or application of technology is often revolutionary in its intellectual approach and in comparison to what is being done at the time. But the widespread adoption of the new technology always requires a long period of gradual infusion into the economic system. This is the very antithesis of the course suggested by Mr. Lovins, who repeatedly insists upon the mutually exclusive aspects of his "hard" and "soft" paths of energy production and consumption. In his conclusions, he states:

"A hard path can make the attainment of a soft path prohibitively difficult, both by starving its components into garbled and incoherent fragments and by changing social structures and values in a way that makes the innovations of a soft path more painful to envisage and achieve. As a nation, therefore, we must choose one path before they diverge much further."

Since Mr. Lovins is insisting upon an either/or choice, the burden of proof must be upon him. Society cannot bet its energy future on a host of unproven technologies, nor radically alter its present social structure to reach some distant utopian future. For example, there is no reason why centralized power stations, with their advantages of scale but disadvantages of transmission and storage, cannot easily exist side by side with solar or wind devices, with their concomitant costs and benefits.

For government to force radical change, of the kind Mr. Lovins advocates, would require a major uprooting of the socio-economic framework within which the United States has prospered. Although his goals may be

noble, Mr. Lovins' "soft" path sounds like a phony fork in the road, which could lead to serious economic disruption and social instability.

FEDERAL REGULATIONS AND THE USE OF COAL

Mr. SCHMITT. Mr. President, in spite of increased demands for environmental protection, the use of coal has been increasing steadily since the energy crisis of 1973–1974:

1973—598,568,000 tons,
1974—610,023,000 tons,
1975—654,641,000 tons,
1976—671,200,000 tons, and
1977—650,000,000 tons (estimate by the National Coal Association).

The progress up to 1976 has been made possible by a rapid acceleration in the use of new environmental technology and by close cooperation between the coal energy industry and State governments. Strip mined lands are being reclaimed and restored to better agricultural condition than before they were mined. New coal-fired plants cause less and less deterioration of the air we breathe.

How, then, does the administration and the Congress propose to continue this progress in coal utilizations and meet the President's goal of a 66-percent increase by 1985 when all coal permitting and regulation will be handled from Washington? Under the Surface Mining Control and Reclamation Act of 1977, the Federal Government has usurped almost all of the responsibilities of the States and private landowners with respect to coal mining and utilization.

Commonsense would say the President's "coal goals" cannot be met if our experience with other Federal bureaucracies is any indication.

HELIUM CONSERVATION

Mr. DOMENICI. Mr. President, the Senate has been very concerned in the last several days with the mission of the Energy Research and Development Administration. I feel this is an excellent time to again bring to the attention of the Senate the need for helium conservation.

Mr. President, last Congress, I introduced Senate Resolution 253, a simple resolution which expressed the sense of the Senate that the President of the United States should direct the Secretary of the Interior to conserve the helium which is now being extracted from natural gas and wasted into the atmosphere. This resolution was agreed to by the full Senate.

A report issued by the Energy Research and Development Administration on April 11, 1975, pursuant to section 104(e)(3) of the Energy Reorganization Act of 1974, pointed out that the United States has already dissipated to the atmosphere 25 to 50 percent of its originally held helium resources and called for the establishment of a national helium policy.

The report described three helium-dependent energy-related technologies which have been identified as probably technically and economically feasible by the year 2000. These are: super-conducting magnetic energy storage, super-conducting power transmission, and fusion reactors. All will require large amounts of helium.

Several years ago, the U.S. Government decided to implement a program for the storage of helium. The Federal Government, through the Department of the Interior, entered into contracts with several private companies to carry out this work. Plants were constructed and storage facilities to separate the helium from natural gas as it was produced.

In 1973, the Secretary of the Interior terminated these contracts. This action caused the companies to file lawsuits against the Government requiring performance of the Government under the terms and oligations of the contractual agreements. Some of the companies have stopped storing helium pending judicial action.

Mr. President, the committee report accompanying Senate Resolution 253, read as follows:

Although the Committee recognizes that the pending lawsuits have injected an element of uncertainty into the question of how the ERDA recommendations can be implemented, the Committee is nevertheless convinced that ways and means must be found to renegotiate the contracts and to reestablish the conservation program. It is short-sighted in the extreme to foreclose future development of technologies which are bound to determine to a large extent whether or not the United States can meet its future energy requirements. When the risks to national growth and security are assessed, the Committee can only conclude that further delay in removing whatever obstacles stand in the way of helium conservation is totally unjustifiable.

Mr. President, the Panel on Public Affairs of the American Physical Society has developed a statement on the importance of resuming the helium conservation program. I ask unanimous consent that the American Physical Society's statement be printed in the RECORD.

Mr. President, while the Senate expressed its views on this subject by passage of Senate Resolution 253, the administration has taken no action.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

APS (POPA) STATEMENT ON HELIUM CONSERVATION

(By P. J. Price and R. L. Garwin)

This statement is in support of the resumption of the helium conservation program that was instituted by the United States Government in 1960. Helium is an essential material for many present and developing technologies. The latter include magnetic containment for fusion reactors; heat transfer in nuclear reactors; superconducting motors and generators in transportation systems, and superconducting generation and transmission of energy. It is reasonable to expect further developments in the uses of this unique element. Helium is, however, a non-renewable resource which is normally dissipated in the consumption of natural gas, and hence becomes unavailable as the gas fields are exhausted.

Helium concentration varies widely among gas fields. Of the helium used annually (0.7 Bcf—million cubic feet), most is extracted from the helium-rich (on the order of 0.3%) natural gas from Kansas-Oklahoma-Texas region, before the gas is delivered by pipeline to consumers; but about 3.1 Bcf annually of the helium content in this gas is not needed for current helium consumption and is not now recovered. Conservation originated in the anticipation that the gas fields would decline toward exhaustion in a few decades, and their helium would have been dissipated. The Helium Act Amendments of 1960 provided for extraction of some of the helium otherwise wasted in pipeline gas, by private plants selling it to the Bureau of Mines, and storage in the Cliffside cavity near Amarillo. The conservation program was terminated by the government in January 1971 (1), but implementation of this decision was delayed almost three years by action under NEPA and other litigation.

Thereafter helium was extracted but vented instead of being stored. U.S. capacity for helium separation is 3.8 Bcf annually; of this 2–3 Bcf annually is actually separated as crude helium but is vented to the atmosphere rather than being stored privately or delivered to the government for purchase.

A relatively small amount of privately owned helium is now being stored at Cliffside, without commitment to long term conservation. The American Physical Society believes that the reasons for the original 1960 conservation program remain valid, and it concurs with committees of the National Academy of Sciences (8,9) and with the President's Eenergy R&D Advisory Council (10) in supporting the continuation or expansion of this or an equivalent program. A helium conservation program should be reinstated immediately (e.g. for private storage in the government Cliffside field—(see 3, ERDA 13, pp 59–63) and the questions of new legislation and of further increase in the rate of storage considered thereafter.

Explanations of OMB's decision on helium consideration (1,2) suggested that consumption was declining and that discovery of substantial new sources might be expected. Neither of these anticipations has been realized. It was also suggested that helium from air (in which it is present in the amount of 5 ppm) might, at the time "conservation helium" was released, cost less than the interest-augmented value of the stored helium; but even at present energy prices, extraction of helium from the atmosphere would cost some $6,000 per thousand cubic feet (Mcf) as compared with present extraction plant operating costs of some $6 per Mcf.

At 5% per year interest charge on the stored helium, this factor 1,000 in costs would make it preferable to store helium for as long as 140 years to avoid the higher costs of extraction from the atmosphere; at 10% interest rate, storage would be economical for up to 70 years. That humanity must eventually rely on helium from air and that an economically justifiable conservation program delays this necessity by only 10–30 years does not argue against conservation but for timely research, in addition, on techniques for reducing the use of helium when the cost becomes high and for the long-shot search for lower-cost methods for extraction from the atmosphere. Natural gas sources much leaner in helium—supposing those fields were not also exhausted—are not available in sufficient quantity to meet anticipated needs at the level of 1 Bcf or more per year

More broadly, however, the matter should be judged in terms of the evident, but not closely predictable, technological potential of helium in future uses. Cost/benefit analysis reflects a choice of most likely projected values of the significant quantities. The uncertainty in these is such, however, that the true comparison is between the likely social disbenefits of helium stored but not all needed, and helium needed but irreversibly unavailable. As physicists and citizens we believe the present costs of a continuing conservation program are a good investment

for the nation, and we willingly pay our share.

10. Resolution of the President's Energy R&D Advisory Council Regarding the U.S. Conservation Program, 17 September 1974. This says in part: ". . . it is the Council's opinion that failure to store the helium now being vented into the atmosphere constitutes an unjustifiable waste of a nonrenewable natural resource . . . which might be exceedingly costly to extract from lean reserves or the atmosphere in the future . . . there is the danger that the helium requirements of a wide range of advanced technologies needed to augment existing sources of energy will not be met . . .".

GENOCIDE CONVENTION HAS WIDESPREAD SUPPORT

Mr. PROXMIRE. Mr. President, to my knowledge there has been few issues before this body in recent years that have attracted more support than the need to ratify the International Convention on the Prevention and Punishment of the Crime of Genocide. Since President Truman first submitted the treaty to the Senate 28 years ago, numerous organizations from across the country, representing many different interests, have spoken out in support of ratification.

A sampling of these groups includes the American Bar Association, the American Civil Liberties Union, the National Council of Jewish Women, the American Baptist Convention, and the Young Women's Christian Association. Other organizations that support the treaty are the United Methodist Church, the American Jewish Congress, the American Ethical Union, the League of Women Voters, and B'nai B'rith Women. In addition, countless newspapers and journals have called upon us to give our advise and consent to this treaty.

The Convention declares genocide to be a crime under international law. In the treaty, genocide is defined as any act committed with the intent to destroy, in whole or in part, a national ethnical, racial, or religious group. Any individual committing such an act, whether they are constitutionally responsible rules, public officials, or private individuals, shall be punished.

The United Nations demonstrated the universal appeal of the Genocide Convention when it adopted it unanimously in December of 1948. In the following years, nations from all across the world have given it their support. Today more than 80 nations are pledged to uphold its principles.

The entire world now looks to us. We maintain that our commitment to human rights is total. Let us demonstrate that we stand by our word. After almost three decades it is about time that we ratify the Genocide Convention.

ENERGY AND ECONOMIC GROWTH

Mr. SCHMITT. Mr. President, growth in our use of energy and growth in our economy and employment have been closely coupled since World War II. When one goes up the other goes up. When one goes down the other goes down.

Both energy use and the economy have had an averaged growth rate of about 3.5 percent per year since 1945.

How then can the President propose to "decouple" these rates so that energy growth is only 2 percent per year while economic growth goes up to 5.2 percent per year?

Commonsense should tell us that while we decrease energy waste we must increase energy production if we are to sustain our economic growth, avoid recession and employ our 2 million new workers that appear every year.

WE CAN'T BUY DAMS AND A SUBWAY, TOO

Mr. GOLDWATER. Mr. President, many people in the city of Washington have little or no realization of the water problems that afflict our Western States. Consequently, they seem to regard all water projects suggested to Congress as "pork barrel" plans devised solely for the benefit of small areas and individual politicians. They do not seem to understand that most of the water projects would be self-liquidating and would bring enormous benefits to people over a wide area of the country. It is interesting to contrast the benefits that would be derived from water programs such as the central Arizona project with projects such as Washington's Metro system. Unlike the water projects, Metro is not a self-liquidating system. It is costing, and will cost, the American taxpayer many billions of dollars before it is even fully operative. And after that, it will not be self-sufficient but require additional taxpayers' moneys to keep it operating.

Mr. President, recently Leonard Larsen, chief of the Denver Post Washington bureau, wrote an interesting column on this whole problem and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

WE CAN'T BUY DAMS AND A SUBWAY, TOO

(By Leonard Larsen)

WASHINGTON.—The irony may be subtle but it's real in this opinionated town.

While editorialists and other federal city sophisticates were rejoicing over their morning coffee Friday that the Senate the previous night had nailed down the coffin on "pork barrel" water projects, they also were rejoicing in the expansion of this town's favorite toy.

That, of course, is the Washington Metro subway and surface rail system, which on Friday expanded its lines of service from five to 17 miles (an eventual 100-mile network is planned).

In the glowing stories and comments written of the expansion milestone were a few oblique references to financial problems nagging Metro. Nothing serious, you'll understand.

And while it's almost impolite even to discuss the costs of Metro because it might imply faint criticism, the situation is essentially this:

The eventual construction costs were estimated in 1969 at $2.5 billion and they are now estimated to be nearing $6 billion and climbing.

The interest payment on even the modest bonded indebtedness area voters have approved is expected to total more than $3 billion over the 40-year term of the bonds.

Operating losses for Metro so far have been kept down to minor multi-million dollar spillage but when Metro is operating full bore, it's estimated that costs will outrun revenues by up to $100 million a year.

So essentially, Metro costs, as they are estimated right now, are in the neighborhood of $10 billion with a $10 million operating loss laid on each year.

Goodness, who'll pay?

Since Washington—along with the rest of the urban East—seems touched with a divine right to define fairness and equity for the rest of the country, you'll pay.

Living, as you do, in the untutored wilderness beyond the Mississippi, you probably fail to understand the importance of speeding buttoned down federal and civil bureaucrats from their downtown Washington offices up to Capitol Hill or under the Potomac and out to National Airport to catch the shuttle flight to New York.

But in this self-indugent and puffed up community, whose inhabitants are mostly from someplace else but who quickly acquire a reflected importance, it's a part of the Washington scheme of things.

It's a bill that's owed to Washington by the rest of the country and don't insult the intelligence of Washingtonians by trying to compare small change spending on western reclamation projects with the majesty of the $10 billion Metro system.

It's a system, by the way, which will be largely untainted by service stops in the black ghettos since . . . well, you know.

The Carter administration and the Congress, as if unwilling to stir up the ire of local editorialists, have not burdened the Metro with serious criticisms.

In this town you don't fasten Metro down to the kind of benefit-cost analysis which torpedoed water projects in Colorado and elsewhere and you don't link a floodtide of spending for Metro with any stern lecture on budget balancing and fiscal responsibility.

If any of you out there in the arid West are ever back here, take a look at Metro and ride it. You'll probably have fun.

Try not to be upset with the knowledge that Metro's eventual cost will be about double what's been spent in 50 years on western reclamation projects and that you're helping to pay for it.

Your insulting conduct might upset us Washingtonians.

OUR MILITARY RETIREMENT POLICY

Mr. HARRY F. BYRD, JR. Mr. President, most of our retiring two-, three-, and four-star military officers are now being retired in the early to mid-50's.

There has been a steady downward trend in the ages at retirement in recent years and this trend is disturbing. Since 1970 alone, there has been a decrease in the average age of retirement—service-wide—by nearly 3 years—from approximately 57 years of age to 54 years of age.

These officers, for the most part, are individuals of tremendous experience and much ability who would be able to provide many more years of useful service while still remaining under the normal retirement age of 62.

I recognize that a balance must be struck between the need for age and experience and the need for new blood and innovative thought which is essential to the vitality of the services.

At the same time, I question whether the present retirement policy of the Defense Department is in the best interests of our defense needs and our taxpayers. I question whether the system is not unduly costly and wasteful of experienced manpower.

So that information might be available to fully consider this matter, I have requested from the Defense Department the ages at retirement of all two-, three-, and four-star officers who have retired since 1970.

My purpose is not to highlight any one officer or group of officers but rather to highlight the loss to the Government of a pool of tremendous talent and experience.

I have now received such lists from all four of the services.

I ask unanimous consent that several sets of tabulations be printed at this point in the RECORD.

There being no objection, the lists were ordered to be printed in the RECORD, as follows:

AVERAGE AGE OF FLAG RANK, RETIREMENTS

Year	Number of officers	Average age at retirement
U.S. Air Force 1970 to present:		
1970	37	54.75
1971	32	54.68
1972	46	55.41
1973	63	55.07
1974	44	54.34
1975	65	54.09
1976	15	53.53
1977	[1] 11	53.90
U.S. Army 1970 to present:		
1970	49	57.37
1971	47	57.30
1972	37	55.65
1973	58	55.81
1974	49	55.39
1975	60	55.80
1976	31	53.90
1977	[2] 6	56.83
U.S. Marine Corps 1970 to present:		
1970	5	56.60
1971	8	56.62
1972	13	56.15
1973	7	55.86
1974	9	54.55
1975	8	55.50
1976	3	54.67
1977	[3] 1	56.00
U.S. Navy 1970 to present:		
1970	35	57.23
1971	46	57.74
1972	64	56.51
1973	59	55.69
1974	69	55.38
1975	64	54.30
1976	37	54.03
1977	[4] 4	54.50

[1] As of April.
[2] As of May.
[3] As of January.
[4] As of February.

GENERAL OFFICER RETIREMENT (2, 3, AND 4 STAR ONLY)

Age	1970	1971	1972	1973	1974	1975	1976	1977
U.S. Air Force 1970 to present:

ISRAEL AND MUNICH

Mr. HEINZ. Mr. President, Israeli Prime Minister Begin is now on his way to Washington for talks with President Carter. These discussions come at a critical juncture and they can play a critically important role in achieving a lasting peace in the Middle East.

During the course of his meetings with the new Israeli Prime Minister, President Carter's first priority must be to clarify our own intentions with regard to Israel and its Arab neighbors. Up until now, clarity unfortunately has not been the hallmark of the administration's approach to this matter.

Through statements which can most charitably be described as contradictory

and confused, doubts have been created over the depth of our commitment to Israel. But today, in view of the potential for tragedy in the Middle East, there can be no room for doubt. Our commitment to Israel's integrity must remain firm and enduring. In pursuing a settlement and in seeking to nurture new friendships with Arab nations, our activities must clearly take place within the context of strenuous support for the continuing survival of the nation of Israel.

In a recent column, George F. Will made a series of cogent observations about the dangers implicit in the direction that administration policy seems to have taken in this area. Mr. Will's analysis of the risks that some administration initiatives pose to Israel points out why President Carter must reassess his stand and reassure the world that we will not sacrifice Israel's security for a quick settlement. The Carter-Begin meetings will have been a significant success if such assurances can be effectively communicated.

Mr. President, I ask unanimous consent that the text of George Will's commentary be printed in the RECORD.

There being no objection, the commentary was ordered to be printed in the RECORD, as follows:

[From Newsweek, July 11, 1977]

ISRAEL AND MUNICH

(By George F. Will)

Various Jewish religious observances commemorate calamities or narrow deliverance from calamities, and the short history of the Jewish state is replete with such experiences. Today, friction between Israel and the Carter Administration is building up a dangerous charge of static electricity. No Israeli Government casually risks the U.S. Government's displeasure: diminished support for Israel could lead to a calamity from which there would be no deliverance. But the contagious crossness between Washington and Jerusalem that originated in Washington is a compound of Washington impatience and Israeli anxiety. The anxiety is more reasonable than the impatience.

For a decade, since the Six Day War of 1967, U.S. policy has been that Israel should trade territory for peace. As President Ford put it, Israel should "dare the exchange of the tangible for the intangible." The secure are always exhorting Israel to be daring. Similarly, the governments of the world constantly insist that Israel be more forthcoming than those governments ever are.

Theodore Draper, scholar and journalist, notes that of all the millions of square miles of territory conquered in recent decades, only Israel's occupied territories are expected to be returned. Norman Podhoretz, editor of Commentary magazine, notes that of the 35 million refugees created since 1945, only the fraction of a million created by Israel's war of independence are expected to be repatriated.

DARING MORE THAN OTHERS

Saul Bellow notes: "In this disorderly century refugees have fled from many countries. In India, in Africa, in Europe, millions of human beings have been put to flight, transported, enslaved, stampeded over borders, left to starve, but only the case of Palestinians is held to be permanently open. Where Israel is concerned, the world swells with moral consciousness. Moral judgment, a wraith in Europe, becomes a full-bodied giant when Israel and the Palestinians are mentioned . . . What Switzerland is to winter holidays and the Dalmatian coast is to summer tourists, Israel and the Palestinians are to the West's need for justice—a sort of moral resort area."

Today the U.S. Government is anxious to bestow upon Israel the honor of leading a life more daring than other nations choose to live. The U.S. became a mighty continental nation through conquest in the name of "manifest destiny." But the U.S. Government is irritated because Israel is reluctant to commit itself, before negotiations, to return land it conquered from aggressors who still deny its right to exist on the coast of Palestine. U.S. security has always been a function of broad oceans and placid neighbors. But the U.S. Government is irritated because Israel is wary of turning a geographical buffer (the occupied West Bank of Jordan) into a Palestinian "homeland" that probably would be dominated by the Palestine Liberation Organization, terrorists committed to the destruction of Israel.

The U.S. position is that Israel should withdraw to the 1967 borders (perhaps with slight revisions) and the Arab states should take "steps toward" normalization of relations with Israel. But even if Israel were to withdraw in exchange for full peace (recognition of its right to exist, plus free movement of people, ideas and commerce in the region), there still would be an inherent asymmetry of risk in a trade of the physical for the political. Arab political concessions could be repudiated overnight; Israel's physical concessions could not be reclaimed without war.

WESTERN 'CONSCIENCE' NO SHIELD

Nevertheless, Israel has accepted this asymmetrical policy. It has asked two things. One is that the U.S. not intrude itself so much that it spares Arab states the need to negotiate directly with Israel. The second is that the U.S. not propose a specific outcome (such as withdrawal in exchange for "steps toward" normalization). Israel thinks that if Arab states regard withdrawal as a given, they will have no incentive to give anything. After four wars, Israelis are unmoved by the idea that their security depends less on their toughness than on their malleability. And since the fourth war they are especially impatient with assurances that the 'conscience of the West" will be their shield. In the October 1973 war Israel not only suffered debilitating losses comparable to Britain's in the first world war, relative to national strength. Israel also suffered an acute understanding of the "conscience of the West" under oil pressure. Israel was isolated.

Israelis are obsessively interested in U.S. diplomacy, and were fascinated by Jimmy Carter's May meeting in Geneva with Syrian President Assad. Carter praised Assad's helpfulness, constructive attitude and "intimate knowledge." That, Carter said, "has helped me a great deal to understand" the Mideast. Now, diplomacy always involves a lot of solemn nonsense, but Carter went a tad far. In recent years. Assad has called Israel "a basic part of southern Syria," and his controlled press has asserted that Israel "shall be destroyed." Today the U.S is pleased to regard Assad as a "moderate." Has Assad changed, or has the U.S.? Today Assad says "the Palestinian problem has two parts," the first concerning the West Bank and the Gaza Strip. "On this territory a Palestinian state might be established, as is now envisaged. This state could not accommodate all the Palestinians. This leads us to the second part of the Palestinian problem, namely the refugee problem. These refugees . . . have a right to return to the land from which they were driven in 1948."

REMEMBERING AUTUMN 1938

The idea that Assad is a moderate, an idea enjoying currency in the U.S. Government, is part of a way of perceiving Israel, a way that reminds Podhoretz of autumn 1938 on the eve of Munich:

"As Czechoslovakia, a democratic country, was accused of mistreating the German minority in the Sudeten regions, so Israel, also a democratic country, is accused of mistreating the Arab minority within Israel itself and also, of course, in the occupied territories. As the creation of the Czechoslovak state after World War I was called a mistake by Hitler and Neville Chamberlain, so the creation of the Jewish state after World War II is called a crime by contemporary totalitarians and their appeasers. The insistence by the Czechs that surrendering the Sudeten regions to Hitler would leave Czechoslovakia hopelessly vulnerable to military assault was derided, especially on the Left, as a shortsighted reliance on the false security of territory and arms; so a similar insistence by the Israelis within regard to the occupied territories is treated today with lofty disdain by contemporary descendants of these believers in the irrelavance to a nation's security of territorial buffers and arms."

Made malleable by diplomatic pounding, Czechoslovakia, by spring 1939, had no shield except "the conscience of the West," and no deliverance.

DEFENSE AUTHORIZATION CONFERENCE REPORT

Mr. CANNON. Mr. President, I commend the Senate for the adoption of the conference report on the fiscal year 1978 Defense authorization bill. As our conferees have said, there were major differences between the House and Senate versions of the bill and yet I believe that the conferees arrived at an overall bill which is within the budget and at the same time provides funds for the important programs.

I was involved primarily on working on the aircraft procurement and missile procurement programs and also the R. & D. projects in the tactical air power area. In our negotiations with the House conferees we ended up providing full funding ing for the Air Force's F–15 and F–16 programs, and for the Navy we authorized the 12 A–7E's in the Senate bill plus advance procurement for 12 more in fiscal year 1979. On the F–14 program we arrived at a very satisfactory compromise position where we authorized 40 F–14's for the Navy this year, which was half way between the Senate's 36 and House's 44. We also provided advance procurement funding for 36 F–14's in fiscal year 1979, which was the original Senate position. During our discussion on the Navy fighter airplane programs I pointed out that the Senate position of holding F–14 production at not more than 36 a year in upcoming years would have the dual benefits of extending F–14 production out into the 1980's and at the same time would divert near term resources from the F–14 to allow a full go ahead on the F–18 fighter program. When the Tactical Air Subcommittee had reviewed the Navy's 5-year budget plan in our hearing we discovered that F–14 production was planned to accelerate from the present 36 a year rate up to a 60 a year rate in fiscal year 1979, 1980, and 1981, to be followed by a shutdown of the production line. This program, coupled with the Carter defense budget recommendations which now are guiding next years budget formulation, would put the naval aviation budget over available resources and allowed a small group in the Navy who

oppose the F–18 to push for its termination or at least slow down and stretch out. Thus the accelerated F–14 procurement plan would have caused two adverse effects on the Navy fighter program, one being a premature close-out of the F–14 production line and the other being a delay or termination of the F–18 program. The House conferees agreed with our rationale, and our conference report specifically identifies our action on the F–14 production rate as being related to the F–18 program for that reason.

THE SIRCS PROGRAM

Mr. President, on the Navy R. & D. program for a Shipboard Intermediate Range Combat System, or SIRCS for short, the conference agreed to provide $3.9 million to continue the program in fiscal year 1978 and specific restrictive language was added in the bill at the insistence of the House. The $3.9 million is the original budget request for SIRCS. The House had deleted all funds and the Senate had added $13 million above the budget request in the floor amendment sponsored by the distinguished Senator from Florida (Mr. CHILES). The committee accepted the amendment with the understanding that $10 million was added for the basic SIRCS program and $3 million was added for studies of the possible commonality of the SIRCS missile and the AMRAAM air-to-air missile. The discussion on the floor amendment appears starting on page 15035 of the May 17, 1977 RECORD.

In conference we found the House to be dead set against the SIRCS program because of the high potential cost of $650 million for research and development. The House conferees attributed this excessive development cost to the fact that SIRCS is being developed under the guidelines of OMB circular A–109.

Let me explain the argument that the House conferees made regarding the SIRCS program. At this time, the Navy is evaluating three different contractor's proposals for the SIRCS system. These proposals are to develop a new short-range radar and new short-range missile for close-in defense of ships against cruise missiles and also include development of a computer system to integrate the fire control for all of the ship's systems, including not only the new radar and missile but also the existing ship guns, electronic warfare equipment, and other offensive and defensive equipments. The House's argument was that contractor A might have the best proposal for the radar, contractor B the best one for the missile, and contractor C the best one for the fire control integration, and the Navy should be able to select the best features of these proposals to define an optimum system for the SIRCS design. The House conferees contended that this was not possible under the guidelines of A–109 and insisted that the Navy define an optimum or "baseline" design for the next advanced development phase of the program.

We on the Senate side insisted that the Navy had a valid operational requirement for this SIRCS program, and we insisted that at least the original budget level of funding be provided for the SIRCS program in fiscal year 1978. The compromise that we arrived at was to fund the program at the $3.9 million originally budgeted but to direct the Navy to select the optimum features of the contractors' proposals in defining the SIRCS system for an advanced development phase competition.

Now I do not know whether the House committee's misgivings about A–109 were well founded or not, but I do think that it makes commonsense to select the best features from the contractors' proposals for this SIRCS system before beginning hardware development. Therefore, I think that the compromise arrived at is a good one in that we protected the Senate position to keep this important Navy program moving forward and at the same time we accepted the House position that the funded contracts should be used to define for the Navy the best possible SIRCS system. So that is how we arrived at the conference position.

THE MILITARY DRAFT

Mr. LUGAR. Mr. President, no Americans have been drafted for military service in the past 4 years. An overwhelming majority of our citizens approved the adoption of an all-volunteer concept as opposed to military conscription, and renewed discussion about return of the draft has caused considerable uneasiness.

Senator JOHN STENNIS of Mississippi has indicated he is concerned about the high cost of the volunteer programs. Senator SAM NUNN of Georgia is concerned about declining trends in voluntary enlistments. On March 2, he chaired a Senate Armed Services subcommittee meeting which heard testimony that fewer volunteers are high school graduates, an increasing number of volunteers are black, and many young Americans do not feel a sense of obligation to serve in the military.

I have great respect for Senators STENNIS and NUNN, and the overview they have provided is timely. But I am convinced that starting up the military draft again would be a great mistake except in the event that the United States becomes involved in war.

In fact, voluntary enlistments have been meeting the quotas set by each of the service branches for each of the 4 years after an uncertain start in the first year. Some Senators are concerned that increasing prosperity in the country will dry up enthusiasm for the voluntary way, and slight failures to meet quotas in the last quarter have fed these fears. Furthermore, incoming years fewer young men and women will be reaching the age of 18.

But a necessary answer may well be that the armed services will need to employ fewer men and women in uniform and hire more civilians to do jobs which could just as well be done by civilians.

Clearly, the case has not been made that each job requires a man or woman with a high school diploma, and there is no case whatever to be made that a 24 percent enlistment of black men and women poses a dilemma for the military. The armed services have offered substantial new opportunities to black youth who have suffered unemployment rates of up to 40 percent in some urban environments.

The fact is, Mr. President, the quality of our armed forces has improved since the beginning of the volunteer program in 1973. For instance, the young men and women who are joining the Army this year are scoring higher overall on mental tests than ever before.

Based on standardized tests which are given to predict an individual's capacity to successfully receive training, 93.7 percent of the new enlistees tested as average or higher than average. This percentage, scored during the first half of fiscal year 1977, is the highest ever recorded. During the last 10 years of the draft, only 81 percent of the Army enlistees scored in these top categories.

Mental capacity to receive training is measured by standardized tests which are established by guidelines issued by the Congress and the Department of Defense.

These guidelines specify that if the tests were administered to the total American population, every person would test in one of five categories. The 16 percent would test in the top two, above average, categories. The 68 percent would test as average and 16 percent would be in the two below average groups. The Army will not accept anyone who tests in the fifth or lowest group.

The Congress has set a ceiling of 10 percent as the maximum ratio of volunteers who may come from the fourth, or below average, category. This year the Army has accepted only 6.3 percent from this group.

At the heart of the controversy is the problem of the military budget. In the past, draftees were inexpensive. The salaries now offered to young Americans which are competitive enough to offer incentives to volunteer are higher, and personnel costs are now 58 percent of the defense budget as opposed to 47 percent in fiscal 1964. The current 58 percent in fiscal 1977 is down from 61 percent in fiscal 1976.

The fastest growing segment of personel expenses is not the voluntary active duty personnel but the growth of military pensions.

Mr. President, I remain convinced that most Americans of any age are prepared to fight if we are required to defend this country. Many young Americans are now volunteering to serve their country in the armed services during peacetime, and I applaud their constructive patriotism and sense of purpose. The military budget is high because most of us believe that those who are now serving ought to be paid a reasonably competitive wage for that service as opposed to the old system of paying draftees very little so the rest of the defense budget could be subsidized.

In the meantime, the military services will need to think through more carefully their needs for uniformed personnel and to increase the success of recruiting, training and retention efforts. We must continue to attract men and women in public service who are dedicated and able. This is especially important in military service.

Mr. President, we now have a special need to focus on making the voluntary enlistment method work and to stop the suggestion that we should return to the

military draft under any circumstances other than international conflict involving our country.

DEFENSE AUTHORIZATION CONFERENCE REPORT

Mr. HART. Mr. President, I would like to take this opportunity to draw the attention of the Senate once again to the Defense authorization conference report, which was approved yesterday by the Senate. Because of the late hour at which the conference report was called up, many Senators were not able to give it the attention which it merits. Particularly in the area of shipbuilding, the conference took some actions of major significance, which are worthy of the attention of the Senate.

I would first like to express my gratitude to the chairman of the Armed Services Committee, Senator STENNIS, for the excellent work which he did for the Senate in this conference. The Senate did very well in this conference, and the conference report adequately expresses the views of the Senate. It is due primarily to the great efforts and skill of the chairman that this good result was achieved, despite the House being adamant on a large number of issues. The House conferees were particularly adamant on the shipbuilding issues; yet, thanks to the work of the chairman and of the other conferees, the Senate positions were adopted by the conference on almost all shipbuilding matters, In particular, the option approach on the matter of aircraft carriers was adopted by the conference.

The issue of what kind and how many aircraft carriers to build is perhaps the single most important shipbuilding issue. A carrier task force built around a *Nimitz* class aircraft carrier costs upwards of $5 billion in procurement costs alone. Carriers, next to strategic missile submarines, are the most important ships in the fleet. Yet, despite the cost and importance of this type of ship, there is a great deal of confusion in the Navy and in the administration as to what size, type and number of aircraft carriers to build.

The position of the Senate was that we must address the carrier issue in a logical and coherent fashion. To do this, we acted to create a series of options for next year. We took action to insure that the Senate will have all possibilities open to it next year, with adequate information to make a correct decision.

This position was adopted by the conference. The $81.6 million in long-lead items for an additional *Nimitz* class nuclear powered carrier was retained by the conference, with not merely report language, but also bill language clarifying the fact that this money does not in any way precommit the Congress to another carrier of this type. The conference also accepted the Senate addition of $40 million to study alternatives to the *Nimitz* class carrier, including the CVV large conventional carrier, the VSTOL support ship, the air capable 963-class destroyer, and a refit of the *Midway*.

The most important conference action on shipbuilding was the bill language it adopted relative to the carrier issue. This bill language states that, "The Secretary of the Navy shall take such action as are required to insure that such studies are sufficiently advanced with respect to a *Nimitz* class aircraft carrier, a CVV, a VSTOL aviation ship and a DD–963(H) so that any of such ships may be authorized in fiscal year 1979."

Exactly what does this language mean?

First, it means the Navy shall take such action as is needed to make it possible for these ship to be authorized next year. The Navy is compelled by law to insure that the Congress has this information.

It is also clear that the Navy can undertake whatever work is necessary to provide adequate, accurate information to the Congress on these ships, including: First, feasibility studies; second, trade-off analyses; third, conceptual studies; fourth, preliminary design work; fifth, contract design work.

The Navy has the authority to do whatever funding adjustment is necessary to insure that Congress has the information the law requires.

What if action were not taken by the Navy to insure that all carrier alternatives were available in fiscal year 1979?

First, the Navy would be in violation of the law.

Second, it would be clear that the Congress should not fund any carrier of any type unless all three basic options—the CVN, CVV, and VSS—are available. Nor should the Congress approve any carrier of any type of one or more of the options is presented in such a manner as to render it infeasible. While I do not expect this to be the case, there has apparently been some discussion of a VSTOL aviation ship of about 15,000 tons which would carry only six aircraft. Such a proposal from the Navy would in effect constitute sabotage of one of the options mandated by the Congress; were that to occur, the Senate should approve no carrier. Congress should approve no carrier until it can choose among all reasonable options.

There is one issue on which I believe the conference acted in a questionable manner. On the issue of the nuclear cruiser, the Senate receded to the House position and agreed to complete the nuclear cruiser CGN–41 with the Tarter main armament system, and agreed for long-lead money for a new nuclear cruiser, to carry the Aegis system.

This decision has a number of drawbacks. First, the Tarter is an obsolete weapons system. It is an antiaircraft system, designed to shoot down enemy planes, not missiles. Yet today the main threat is missiles. Soviet naval aircraft fire long-range antiship missiles, rather than dropping bombs. Tarter's capability against Soviet antiship missiles is completely inadequate. Therefore, what the conference did by agreeing to the House position is approve the construction of a new, very expensive ship with an obsolete main armament. This makes little sense.

Some questions can also be raised about the Aegis system. The development of this system began in the mid-1960's. Yet the first ship with Aegis will not be in the fleet until the early 1980's, and the Navy will not meet its full requirement for the Aegis ships until after 1990. What capabiltiy will a system designed to shoot down the missiles of the 1960's have against missiles of 1990 and beyond? This raises the question of whether we should build cruisers, destroyers, and frigates at all, or whether the best antimissile, antiaircraft, and antisubmarine protection for a carrier is its own aircraft.

Even if one believes the Aegis system is the right way to go, the decision for long-lead money for a new *Virginia* class cruiser to carry Aegis is unfortunate. We now have four *Virginia* class cruisers and two *California* class cruisers, the oldest of which was commissioned in 1974 and two of which are not yet commissioned. All of these modern, expensive, nuclear powered ships have the obsolete Tarter main armament system. The Navy has a stated requirement for four nuclear powered Aegis ships; obviously, it would be far less expensive in lifecycle costs to convert four existing or building cruisers to Aegis than to build any new nuclear cruisers. There can be no justification for building new cruisers while keeping six new cruisers in the fleet with an obsolete main armament. Accordingly, I believe the Senate should seriously consider denying authorization for the CGN–42 next year.

Despite the decision on the cruiser issue, the conference report is good from the overall shipbuilding standpoint. It sets the basis for an intelligent decision next year on the aircraft carrier issue. I am gratified that my colleagues have accepted the report, and I am confident that the Navy will act to meet the requirements set by law.

CANADIAN NATIVES FEAR ALCAN PIPELINE

Mr. STEVENS. Mr. President, last week the Canadian National Energy Board recommended to the Government of Canada that the Alcan route be selected over the Arctic route for the transportation of Alaskan North Slope natural gas.

Some are jumping to the conclusion that all signals are switching to go for the Alcan project and that this is the route which should be selected by both the Canadian and United States Governments.

But such a hasty conclusion is not warranted.

One item which is being overlooked is the issue of Canadian Native claims along the proposed route of the Alcan pipeline. It is not reasonable to assume that Native claims along the Alcan route are not important, as they are along the Arctic route.

Mr. Justice Thomas R. Berger recommended that no pipeline be built through the Mackenzie Valley, the route promoted by the Arctic Gas consortium, for at least 10 years. This recommendation led to the NEB's rejection of the Arctic Gas route. But Justice Berger said nothing about Native claims along the Alcan route, except to recommend that they be looked into.

An inquiry into these issues relative to the Alcan route is currently underway,

headed by Kenneth Lysyk, dean of law at the University of British Columbia. But one of the problems of Dean Lysyk's investigation, from the beginning, is that he simply does not have enough time to do a good job. Berger had 3 years. Lysyk has only 3 months.

Yet, in spite of the short time allowed, Dean Lysyk is finding that the Native claims issues along the Alcan route are indeed significant. A feature article in the Toronto Globe and Mail last week discusses these points. The article reports:

The Council of Yukon Indians' position is that no pipeline should be built until the land claims are settled and implemented. That could take years—far longer than the rush to judgment that the federal Government is setting for itself with a pipeline decision deadline of Sept. 1.

Native claims will delay the Alcan project as well as the Arctic route.

The only alternative for Alaskan gas, which does not encounter Native claims problems, is the El Paso All-American proposal. That is because Congress settled those claims more than 5½ years ago with the passage of the Alaska Native Claims Settlement Act. We cannot afford any additional delay in bringing our Alaskan gas to markets in the South 48.

Mr. President, I ask unanimous consent that the article from the Globe and Mail for July 5, 1977, entitled "Indians of Yukon Fear Pipeline a Death Warrant to Way of Life" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LYSYK INQUIRY TOURS TERRITORY—INDIANS OF YUKON FEAR PIPELINE A DEATH WARRANT TO WAY OF LIFE

(By Malcolm Gray)

MAYO.—The Yukon woman before the microphone is young, dark, intense. "What about our children?" she is saying, speaking into the bright lights, the videotape cameras, the slowly unwinding spools of tape taking down her words.

"Will they have the opportunity to enjoy the beautiful open northland as we have?"

For the small village of Mayo, 250 miles northwest of Whitehorse—a place of dust, plank sidewalks and a gloriously misnamed stucco hotel, the Chateau Mayo—the future has arrived with a rush.

It takes the form of a travelling inquiry into the building of a pipeline through the Yukon along the Alaska Highway. The outrage in the voice of Louise Profeit will be heard again and again as the three-member commission rides the dusty roads of the Yukon to learn how people feel about a plan to ship gas from Alaska through Canada to the lower 48 states.

Louise Profeit is Indian and it is from the Indians here that most of the fear of what a pipeline will bring is heard.

INDIANS FEAR FOR WAY OF LIFE

For the Indians of the Yukon, 6,000 out of a population of 23,000 and a minority in a land they have lived in for centuries, the pipeline is more than just a narrow, 512.6-mile strip across the territory.

They fear the pipeline will be the first stage in the development of the Yukon which will destroy any hope the Indians had to salvage some of their traditional ways of life.

The 2,300 construction workers needed to build the pipeline will bring with them more drugs, more alcoholism, more prostitution—more, because these things are here already. The Yukon is not a pure northern paradise.

But most important of all, beyond the inflation and crime that the Indians see as inevitable with large development, is the issue of land claims.

It is an important, perhaps the most important issue in this quickie, thrown-together inquiry, which must have its findings before the federal Government by Aug. 1 after a brief three-month existence.

Negotiations between the Government and the Indians are more advanced in the Yukon than in the Northwest Territories because both registered and non-registered Indians are represented in the Council of Yukon Indians. The eventual settlement will be limited to those who have 25 per cent or more Indian blood and can prove they lived in the Yukon before Jan. 1, 1941, or show they are descended from a person with the minimum blood requirement who lived in the Yukon before then.

There were no wars and no treaties signed between whites and Indians in the Yukon. The council, which can only recommend a settlement to the people living in 12 Indian villages in the territory, does not want aboriginal claims extinguished.

COMPENSATION OFFER CONSIDERED TOO LOW

Ottawa has offered 1,200 square miles to be owned outright with another 15,000 square miles that the Indians would be able to use for hunting and fishing. Not enough, the Indians said, not even with the $100-million thrown in with the federal offer.

Even with differences between the two sides, there was slow progress toward an agreement in principle which may come as early as this year.

But then the game changed. It is symbolized here by the inquiry members sitting in the Mayo Revival Hall, a small frame building with the words to hymns like Amazing Grace written with felt-tipped pens on sheets of paper taped to the walls.

The Council of Yukon Indians' position is that no pipeline should be built until the land claims are settled and implemented. That could take years—far longer than the rush to judgment that the federal Government is setting for itself with a pipeline decision deadline of Sept. 1.

To those who argue that a narrow pipeline right-of-way shouldn't affect land claims in a territory of 207,076 square miles, the Indians say otherwise.

"If the pipeline is built before our claims are implemented, we will have little control over what happens to us as a people, over what happens to our villages and over what happens to the land which is the basis of our culture and which we now claim through Government and legal process," the Council's brief to the inquiry said.

"Only if our rights to the land are defined, understood and entrenched and if we have time to develop our own institutions to gain self-determination will we be able to protect ourselves . . .

"To be blunt, promises from Government and industry have lost their honor. We have all seen what happened with native rights in the south after treaties were signed. We are determined that this history shall not be repeated in the Yukon."

These words were spoken to the three people who have been sitting behind trestle tables in halls and gymnasiums listening to the concerns of Yukoners about a pipeline.

They have need of patience, these three. At different times they heard their inquiry denounced as a farce and a whitewash, followed usually by a statement that the anger and frustration was directed not at the board but at the federal Government which has allowed it such little time.

No one is more aware of the shortage of time than Kenneth Lysyk, chairman of the commission and Dean of Law at the University of British Columbia. When the formal hearings end in Whitehorse on July 15 there will be only two weeks before the inquiry's report is due.

VETERAN OF FIGHTS OVER CONSTITUTION

He also knows something about the workings of government. Before coming to UBC he was deputy Attorney-General of Sasketchewan. That involved him in constitutional battles with the federal Government over the province's attempts to control the potash industry.

For a man with only a few weeks to write a report. Mr. Lysyk is relaxed enough to sleep on the long, dusty bus hauls and to spend some time doing more than living pipelines all day. Such as visiting Diamond Tooth Gertie's, Dawson City's gambling casino where he came away with a $4 loss after a night at the blackjack tables.

He is 42, a man with a neatly trimmed greying black beard, who, as someone noted on the bus, could be a stand-in for actor Vincent Price.

At the community hearings he used a low-key approach urging people to ignore the lights, recorders and cameras as much as possible. "We want to keep the inquiry as informal as we can, as if we were sitting in our backyards having a cup of coffee and talking about pipelines," he would say, at least once a day.

The community hearings will give him the emotions on the issue but the real test of the pipeline will come when the formal hearings resume early this month.

Mr. Lysyk sees himself not as presiding over a judiciary inquiry, but listening to the experts then making a report to Ottawa.

This is the first time he has had any direct experience with the Yukon. But on both sides of him sit two board members with long personal experience of the territory.

Edith Bohmer, a short woman with tousled black hair, who wears gold earrings shaped like snowshoes, is the nominee of the Yukon Council of Indians.

The earrings are appropriate, for this woman with years of experience in Indian politics is related to Skookum Jim, one of the three men who found the gold that touched off the Klondike Rush in 1898.

Mrs. Bohmer is in a delicate political position, given the Indian stand on the pipeline. But she says she is not bound to the Council of Yukon Indians' line.

The third board member, Willard Phelps, was nominated by the Yukon Territorial Government. He also has a connection with the gold rush. His great-grandfather arrived in Dawson City in the rush and moved on to become the first lawyer in Whitehorse after he found there were already 17 lawyers in Dawson.

There aren't many lawyers in the territory—only 20, and because of his travels to the small communities in the Yukon, Mr. Phelps seems to know everyone.

So far, he says, the inquiry has been lucky enough to be seen as a unit, not as two Yukoners—one for whites and one for Indians led by an outsider.

There is a fourth presence at the hearings, unseen but felt—the figure of Mr. Justice Thomas Berger.

PLAN IN TROUBLE AFTER BERGER REPORT

Judge Berger's report on a plan to pipe oil and gas down the Mackenzie Valley from the northern Yukon to the south made this second pipeline inquiry inevitable.

When it became apparent that the Arctic Gas Consortium plan was running into problems, the way became open for another proposal to ship Alaskan gas through the Yukon, British Columbia and Alberta to the American Midwest.

Judge Berger made the Alcan route the only pipeline game in town when he said that a Mackenzie Valley line should be de-

layed 10 years until native land claims were settled.

Most important of all for the current hearings, he said that, on the face of it, the Alcan route seemed to have fewer environmental and engineering problems.

The judge's comments on the Alcan route, however, weren't an endorsement of a pipeline, as Mr. Lysyk has to constantly point out.

Judge Berger had three years in which to consider the terms and conditions under which a pipeline could be built and the environmental, social and economic impacts of a line through the North.

Mr. Lysyk has to remind people that his task is that of a preliminary inquiry into the socio-economic effects of a pipeline. It is an effort to find out how Yukoners feel about it.

If the Government approves this route there will be more studies to decide the terms and conditions for building the pipeline.

APPROVAL MEANS FURTHER STUDIES

Another difference is that the environmental impact of a pipeline is being considered separately by a panel headed by a federal civil servant, Dr. Harry Hill.

The application itself was made by a rival to Arctic Gas—Foothills Pipe Lines Ltd.

This company in turn is 70 per cent owned by Alberta Gas Trunk Line Co. with the rest of the shares held by Westcoast Gas Transmission Co. Ltd., which has wide experience in pipelines and would build the B.C. section of the line.

The pipeline would stretch 2,753.7 miles, carrying gas from Prudhoe Bay in Alaska to the United States. The inquiry is dealing only with its impact on the Yukon where the federal Government has jurisdiction.

Curiously, there has been little concern shown by the B.C. Government about a pipeline that will cross 438.7 miles of that province—across country similar to the Yukon.

When the pipeline is built it will be relatively easy for a lateral line to be pushed north to connect with Canadian reserves on the Beaufort Sea. That is one reason for favoring a project that at first will do no more than carry American gas across Canadian territory.

It isn't up to this board to say what Canada should get in return for helping the United States. This is rarely mentioned at the hearings except for occasional comments that the whole project is being rushed through because of U.S. pressure on the federal Government.

NO FIRM PROPOSAL ON LATERAL LINK-UP

The lateral line, which could run along the almost completed Dempster Highway going from Dawson City to Inuvik and Fort McPherson in the far North is one of the more nebulous aspects of the whole pipeline inquiry.

Foothills may build the line, but it is not part of the company's application before the National Energy Board and it would not be built for several years after the Alaska Highway line was finished by 1982.

But both the Lysyk inquiry and Dr. Hill's environmental panel are considering the effects of a pipeline along the highway. Ironically, there have never been any major studies of the Dempster Highway which was started in 1958. It crosses the migration routes of the Porcupine Caribou Herd at two points and conservation groups are worried about its effect on wildlife in the area once it starts being used.

The arguments for both the Alaska and Dempster highway routes are the same—the environmental impact has already been made by building the roads and a pipeline wouldn't greatly add to it.

The Indians are as against a Dempster Highway line as one along the Alaska Highway until the land claims are settled. They are taking a middle position between developing the North and keeping it as it is.

For the line are white businessmen, particularly those along the Alaska Highway. The Yukon has always been known for its booms and busts in gold, furs and mining. Those favoring the pipeline see it bringing benefits beyond a few short-lived construction jobs. They think it can lead to hydroelectric power projects and more mining operations, lifting the Yukon to another level of development.

So the Indians and the white businessmen are on opposite sides of the issue. That's nothing new in the Yukon. It is reflected in the hearings being held in the Indian band halls as well as the community halls or school gyms. That has led to complaints that the inquiry is fostering a split between whites and Indians and that it should only hold hearings where all can participate at once.

"I don't think that's correct," said David Joe, a young lawyer who is following the hearings for the Council of Yukon Indians. "The split, or difference, is there already. This only makes it more clear."

One of the most interesting groups speaking on the pipeline is made up of people who have come to the Yukon because it is one of the world's last great wilderness areas. Generally they are young and articulate, not particularly interested in more development and sympathetic to the Indians' position. They don't carry much weight with established white Yukoners who see them as outsiders playing at homesteading.

"Where does one go after the Dempster Highway to the Arctic is opened?" one of them asked at a hearing in Dawson. "Even if one doesn't go to the wilderness it is necessary to know it is still there."

Between the well thought-out arguments for and against a pipeline, there were signs that the inquiry was too rushed, too short for adequate preparation.

RESIDENTS CONFUSED ABOUT WHAT IS PLANNED

In Mayo, few men testified at the afternoon hearing in the band hall. Many were away fighting a forest fire. Too bad. There won't be any more community hearings in Mayo before a decision is reached.

There was also confusion and uncertainty over what was being planned. At every hearing someone would ask about the dangers of oil spills, unaware that a gas pipeline was being planned.

Sometimes, to the 18 people bouncing around inside an Atlas tour bus, it seemed as if the rest of the country was as well informed. The inquiry has attracted relatively little attention from the press so far. The board members expect that to change now that the National Energy Board has released its report on pipeline applications and has come out in favor of the Alcan route.

MAGNIFICENT JOB

Mr. STEVENS. Mr. President, on the morning of June 20, 1977, the first gallons of crude oil entered the 800-mile trans-Alaska pipeline.

In the following editorial, Robert B. Atwood, long-time Alaskan, editor and publisher of the Anchorage Times, congratulates those who saw our country's desperate need for greater energy independence, and were determined enough to build the trans-Alaska pipeline against many protests and obstacles. Indeed, this battle appears to have been won: oil is now flowing and will soon reach the terminal at Valdez where waiting tankers will transport it directly to refineries in the contiguous United States.

But, I must emphasize my friends, the "war" is not yet over. The difficulties of this past winter are a painfully clear reminder of our country's need for greater dependable supplies of natural gas. Because natural gas will be produced simultaneously with North Slope oil we have a new opportunity to meet the vital energy demands of America. The question is not whether a transportation system for the gas will be built, but when and where.

As you know, I am a strong advocate of the El Paso Gas Co.'s proposed "All-American Trans-Alaska Gas Project." It will increase our energy independence, have substantially greater benefits for the U.S. economy, and fewer environmental problems than alternate plans. It will follow 640 miles of the 800 mile trans-Alaska oil pipeline, utilizing the haul-road, work pads, camps, and equipment already in place.

As Mr. Atwood points out, the trans-Alaska oil pipeline was faced with unique environmental and technical problems. However, Mr. Atwood notes further, these problems were solved and the much needed oil is now flowing. I am confident history will bear out the wisdom of those who had the singular strength of conviction to see the project through, particularly former Secretary of the Interior Walter J. Hickel and Under Secretary of the Interior Pecora.

Furthermore, the trans-Alaska oil pipeline was built with American technical and labor skills and will be controlled by our country and none other. When we chose the route that North Slope natural gas will take to heat American homes and sustain American industry, we must and can insure environmental safety, economic benefits to Americans first and increased energy independence. We have successfully constructed the trans-Alaska oil pipeline which meets just those goals.

Mr. President, I ask unanimous consent that the attached article referred to in my statement be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Anchorage Times, June 19, 1977]

MAGNIFICENT JOB

How long, do you suppose, the time and date of 9 a.m., June 20, 1977, will remain fixed in the minds of Alaskans?

Will that particular moment in history become a milepost along Alaska's trail from territorial pioneer wilderness to the day when the State of Alaska became the modern world's most important energy supplier?

Or will the moment become nothing more than a footnote in history, an item for the lovers of trivia to play with?

No matter, really, the eventual role the memory of this time and date might have in years to come.

What is important is that at 9 o'clock tomorrow morning, if all goes according to plan, oil will begin to flow from the Prudhoe Bay fields on Alaska's Arctic Coast. It will begin an 800-mile journey via pipeline to a tank farm at Valdez, and from there eventually will reach the marketplace. The event and what follows in the years ahead will command attention, historical evaluation and a continued inspection that will insure a place in history for what today is called simply the trans-Alaska pipeline.

The 800-mile-long tube of steel may not forever hold its unique classification as the trans-Alaska pipeline. In the years to come there may be others—certainly a natural gas

pipeline to begin with, and later more lines to tap the great reserves of northern Alaska outside the confines of Prudhoe Bay.

But at long last, without undue fanfare and hoopla, the first trans-Alaska pipeline goes into operation tomorrow. It will be a moment of enormous consequence for Alaska, the nation and the world.

First announced in 1969, delayed for years, the pipeline has become many things. It has been the target of environmental extremists, a concern of many well-intentioned people who have an unknowing fear of development in the northland, the joy of those who seek economic development in frontier regions, a bonanza for thousands of workers, a blessing and a headache for many communities, the hope of an energy-starved nation and, among many other things, a magnificent accomplishment which is testimony to American technical and engineering skills.

It has been enormously expensive, but it holds the promise of rich rewards to the taxpayers of the state, to the energy needs of the United States, in dollars to its investor companies and their millions and millions of stockholders throughout the nation.

Further, its rewards include a whole treasure house of scientific information about the Arctic, of new techniques and requirements of the Arctic and sub-Arctic regions, of knowledge about the wildlife of the vast northern areas of Alaska and it has opened the door to anthropological investigations into Alaska's past that otherwise may well have remained forever closed.

There are many things that could be said to find fault with the way the job was done and the fault-finders are many and will not be stilled for years to come.

On the other hand, there are many more factors about this gigantic construction project that should be praised.

Most of all, on the eve of the start-up of the line, in the hours before the signal is given for "oil in," there is reason to praise the men and women who built the pipeline.

The job was not easy. It was not easy for Ed Patton, Alyeska's president and later chairman, and it was not easy for Peter DeMay, vice president and construction chief. It was not easy in the bitter cold of the Arctic winter for the welders and the pile drivers and the carpenters and the electricians and the truck drivers and the cooks and the guards. Sure, the pay was high. But the hours were long, the toll in human terms was severe.

Those who had a part in this project—no matter how small, no matter how large—can look back in pride at their participation. They can tell their children and their grandchildren what it was like to forge a pipeline through Alaska back in the '70s.

The time and the date when the first gallon of crude flowed into the line may not be memorable in history. But the job these people did has earned a lasting chapter in the history of Alaska.

THE MYTHS OF AIRLINE DEREGULATION

Mr. McGOVERN. Mr. President, perhaps no other group of Americans is so directly involved in the issue of airline deregulation as are those who actually operate the aircraft for the Nation's commercial air carriers.

The Air Line Pilots Association in a briefing package entitled "The Myths of Airline Deregulation," has made a constructive effort to deal factually with the problems they feel would result from adoption of the pending airline deregulation measure.

Mr. President, I ask unanimous consent that the views of the association be printed in the RECORD.

There being no objection, the views were ordered to be printed in the RECORD, as follows:

THE MYTHS OF AIRLINE DEREGULATION

Myth No. 1: There is little competition in the U.S. airline industry under the current regulatory scheme.

The Facts: This claim is difficult to substantiate either on the historical record or in terms of the present operating situation. Actually the U.S. domestic airline industry is more competitive than most other industries, regulated or unregulated. Generally the argument of deregulation advocates on this issue falls into two categories: (1) There is no price competition because airlines charge the same fares. and (2) there is very little new entry into the airline business.

Pricing.—It is true that the airlines charge the same fare for similar service in a given market. For example, the basic one-way coach fare between Washington and Los Angeles on United, American and TWA is $196. If United were to offer a coach fare of $150, American and TWA would almost certainly match it. Similarly, if a fourth carrier were to be certificated to serve this market, and offered a different type of service at a fare of, let's say, $100, the three major transcontinental carriers would undoubtedly match the service and the fare. Unless substantial new traffic were generated to offset the diversion of passengers using the basic coach fare, the economic results would be destructive. Penetration into the market by a new carrier could not be expected to be significant, given a lack of market identity and limited marketing power and fleet capacity, and it would soon be forced to withdraw. Whereupon, the "Big Three" would quickly return to the original fare level. Passengers traveling during this price-war period would get a significant break, but it is certain to be short-lived.

But the availability of different fares for different kinds of service does provide the budget-conscious consumer with price alternatives, such as charter fares, off-peak fares, excursion fares, stand-by fares, etc. The recently-approved "Super Saver" fare, which offers a 45 percent discount in the New York to San Francisco and Los Angeles markets, is a good example. It is true that the passenger traveling on a "Super Saver" ticket flies on the same airplane and sits in the same kind of seat as a full-fare passenger; however, he has bought his ticket at least 30 days in advance, must stay at least 7 days and not more than 45 days, and must travel during midweek. In so doing he sacrifices the convenience enjoyed by the full-fare passenger. If this discount fare generates additional traffic and thus fills up otherwise empty seats without diverting passengers from the regular coach fare, it provides a benefit to both the traveling public and the airline. It may be accurate to claim that there is little price differentiation (different fares for the same service) in the airline business, but this most certainly does not prove that the airlines are not price competitive.

Entry—in 1938 when the Civil Aeronautics Act was signed into law, 22 airlines were operating and were awarded "grandfather" certificates under the new statute. Since that time over 90 new companies have been certificated by the CAB, an through merger or dissolution this number has been reduced to 40. Over 20 of these new companies were local service or regional carriers such as Ozark and Frontier—10 of them are still operating today. Their route systems have expanded tremendously over the past 20 years to include major domestic and international markets such as Houston-Mexico City (Texas International) and Denver-Minneapolis (North Central). Most of them are larger today than their counterparts among the trunklines were 15 or 20 years ago. The fact that no new major trunk airlines have entered the business in the past 20 years is no more relevant to the argument of no competition than is the fact that few large companies have sprung up in any other major capital intensive industry.

This is not to say that competition has not increased in terms of new route awards to existing firms. Today, in markets that produce more than 12 passengers a day, over 60 percent of them have a choice of airlines. In 92 percent of the city-pair markets with reasonably significant traffic density—300 or more passengers a day—there is competitive non-stop service, and in most major markets there are three and even four scheduled airlines.

Market share concentration offers another measure of the competitive nature of an industry. Here the airlines compare favorably with other major industries. For example, United Airlines, the biggest U.S. carrier, has about 20 percent of total industry revenue passenger miles. The top five airlines carry about 70 percent of the total domestic traffic. By comparison, market dominance is greater in the following selected industries:

	Percent
Telephone—AT&T	85
Computers—IBM	68
Interstate Bus—Greyhound	62
Automobiles—General Motors	53
Soft Drinks—Coca Cola	35
Cigarettes—R. J. Reynolds	33
Steel—U.S. Steel	22

Myth No. 2: Deregulation of the airlines will lower fares.

The Facts: The primary goal of the proponents of airline deregulation is to lower the general fare level which exists today. This is an appealing political goal, but in the real world of airline economics it is a highly impractical one. Obviously this claim presumes that air fares are too high, and that in a less regulated environment they will tend to come down.

To put this matter in perspective, compare U.S. scheduled air fares with those in Europe in markets of comparable distance:

*Scheduled airline fares/U.S. vs. Europe**

Route	Non-stop mileage	Economy fare	Percent European fare higher
London-Paris	209	$61.60	
versus			
N.Y.-Washington	214	38.00	62
London-Frankfurt	400	87.12	
versus			
Chicago-Pittsburgh	413	56.00	56
Copenhagen-Rome	955	279.39	
versus			
Los Angeles-Seattle	954	97.00	188

*Source: "Official Airline Guide," June 15, 1977, and international exchange rates in effect on June 21, 1977.

Assuming that the costs of doing business—labor, fuel, capital, aircraft and airport services—will not be reduced, the only way that fares can be held in check, let alone lowered, is for traffic to increase causing load factors to go up. Nothing would produce this more effectively than healthy economic growth, which puts more discretionary income into consumers' pocketbooks.

Of course, the argument is always made that the threat of new entry will force prices down. However, the predictable phenomenon of price-matching in the airline industry militates against the expected result of this theory. Recognizing this phenomenon, it is reasonable to assume that a new airline would think twice before challenging an established, well-known carrier in one of its major markets. However, it is not unlikely that a financially strong existing carrier could muscle into a lucrative market of a weaker airline, cut the fare, and drive the incumbent into financial distress. The result would almost certainly be more market concentration and economic power, and less price competition, than now exists.

A better approach to achieve lower fares would seem to be a selective tailoring of discount fares, which are designed to fill up empty seats with passengers who can be flexible in their travel planning and who are more price sensitive than those who must rely on air transportation for their business and personal needs. These discretionary travelers are now moving by bus or automobile (or recreational vehicles) or are not traveling at all but could be attracted to the airlines by competitive discount fares, such as the "Night Coach," the "Peanut Fares" and the "Super Saver" fare.

It is interesting to note that price deregulation or decontrol in other regulated industries, particularly in the energy field, is expected to cause prices to go up. How then could anyone believe deregulation in the airline industry will produce a different result?

Myth No. 3: Deregulation will not have an adverse effect on air service to small and medium-size communities.

The Facts: Service to small communities has become one of the most controversial issues in the deregulation debate. The deregulators in the Ford administration recognized the vulnerability of their bill on this point. In early 1976 they hastily put together a proposal designed to provide small community service by awarding subsidies to noncertificated commuter airlines on a contract basis. This year the Civil Aeronautics Board presented a similar proposal to protect communities having 40 or fewer enplacements a day from losing needed air service in a less regulated environment. Commendable as these proposals might be, they should not be construed as the complete answer to the problem. In fact, these small communities should, and undoubtedly will, be served by commuter airlines using smaller aircraft thus freeing up the local service carriers to apply their larger jet equipment in larger markets.

But the real question is not the threat to service in markets with fewer than 40 passengers a day. What should most concern the Congress is the potential loss of flights to medium-size cities that now enjoy regular, dependable service from trunk or local service airlines connecting them over relatively long distances (200 miles or more) with major hub cities. These markets, which produce very little revenue, would be likely candidates for reduced service, not necessarily abandonment, as carriers reallocated their resources to areas which offered greater revenue potential. It is highly unlikely that commuter airlines would be able to fill this void, particularly because of the distances involved.

The slightest reduction in service in many of these cities, while causing inconvenience to the traveling and shipping public in these areas, would also place added burdens on the local communities and airport authorities to finance the indebtedness incurred by them for airport improvements. This burden is currently borne largely by the carriers serving these communities through landing fees, space rentals and other airport concession revenues. Loss of this revenue is of major concern to many airport operators and local officials.

Myth No. 4: The Civil Aeronautics Board "coddles" the airlines by protecting them from competition, granting fare increases, and insulating them from the antitrust laws.

The Facts: If CAB has been "coddling" the airlines, the bottom line for the industry during the past 10 years certainly hasn't reflected it. A comparison of the airlines with other major industries in terms of return on investment testifies dramatically to the poor financial performance of the carriers. It should be noted that in the last decade the nation's trunk carriers as a group have not achieved the 12% return on investment which CAB has established as fair and reasonable.

*Comparison of profitability in 13 selected industries**

[In percent]

Industry	Return on total capital: Latest 12 months	Return on total capital: 5-year average
Consumer goods—Personal products	12.2	12.6
Electronics and electrical equipment	11.8	10.6
Industrial equipment	11.6	10.2
Consumer goods—Food and drink	11.4	10.4
Chemicals	10.6	10.8
Energy	10.5	11.5
Automotive	9.8	9.1
Aerospace and defense	9.8	8.9
Construction—Building materials	9.7	8.9
Utilities—Natural gas	7.3	7.6
Transportation—Surface	6.6	5.8
Utilities—Electric and telephone	5.9	6.0
Transportation—Airlines	4.1	3.6
All industry medians	9.8	9.1

*Source: "Forbes 29th Annual Report," *Forbes*, Jan. 1, 1977.

Close observers of the airline industry, particularly the financial community, believe that airline fares have not kept pace with escalating costs, and they have been critical of CAB for failing to be responsive to the carriers' needs on a timely basis. When fuel costs were skyrocketing during the 1973–1975 period, much-needed fare increases to cover these costs were not forthcoming. The airlines do not benefit from automatic fuel surcharges or pass-throughs, which have become standard in the gas and electric utility industry as we all know from our utility bills over the past few years. Ironically, in computing the effect of proposed fare increases on the industry's return on investment, the Board makes certain cost and revenue adjustments relative to discount fare traffic, which have the effect of penalizing the carriers for their efforts to stimulate new traffic.

Throughout most of the history of federal regulation of air transportation, the Civil Aeronautics Board has been active in increasing competition through new route awards. Since 1938, the number of scheduled route miles of certificated carriers has increased from approximately 37,000 to nearly 450,000. The number of cities receiving scheduled service has grown from nearly 200 in 1938 to over 650 today, an increase of more than 225%. The exception to this pattern was the period of the so-called "route moratorium" in the late 1960's and early 1970's. But, under pressure from airline labor unions and most carriers, that misguided policy has since been revoked, and the Board is once again actively engaged in considering new route cases, bringing added competition into the system.

CAB's authority to exempt the airlines from the operations of the federal antitrust laws has been much maligned during the deregulation debate. Most of the criticism has centered around the infamous capacity restraint agreements which flourished in the wake of the fuel crisis. The Air Line Pilots Association, together with other labor organizations and some of the carriers, were vociferous opponents of these agreements, and CAB has since rejected them. Nonetheless, in recent hearings before the Senate Aviation Subcommittee, this issue was squarely addressed. After close scrutiny, most critics have agreed that the majority of inter-carrier agreements, such as interline ticketing and baggage transfer agreements, serve an important public benefit in facilitating passenger travel and should be preserved with appropriate safeguards.

While it certainly can be said that CAB has made some egregious errors in administering the law throughout the years, it is equally clear that these mistakes can be corrected without statutory change. In fact, in recent years the Board has moved substantially toward a more pro-competitive stance, and it would appear that proper administration of the existing law buttressed by more diligent oversight by Congress would guarantee against the kind of abuses that characterized much of the Board's behavior prior to 1975.

Myth No. 5: The experience of the California and Texas intrastate airlines proves that deregulation will result in lower fares.

The Facts: First of all, these popular intrastate airlines do not operate in an unregulated environment. Pacific Southwest Airlines (PSA) is governed by the California Public Utilities Commission (CPUC), and Southwest Airlines is regulated by the Texas Aeronautics Commission. Although these two carriers provide effective low-fare service in their respective states, most observers concur that their experience is not entirely relevant to the operation of an integrated network of regularly scheduled interstate services. In fact, an official of PSA testified during the Senate Aviation Subcommittee hearings in March as follows:

"Let me try to set the record straight by summarizing in a few words what PSA's experience does prove. It proves that an airline like PSA can compete and earn profits at fares well below the domestic standard fare level if it does certain things well.

"The most important factor is the highest possible productivity from its aircraft and its employees. This means high density seating in large aircraft, no luxury first class service, no fancy meal service or other frills, and concentration on serving relatively few

markets with highly motivated employees willing to work hard for good pay.

"Other factors are the scheduling of flights tailored carefully to the local markets and fares based on costs of serving those particular markets. . . .

"Having bragged a bit about PSA, let me admit what our experience does not necessarily prove. It does not prove that total deregulation with wide open free entry is feasible or desirable. It does not prove that PSA's kind of operation can be duplicated all across this country by any new airline that comes along."

Several important factors should be noted about the intrastate operations which distinguished them from the type of operations of the interstate CAB-regulated carriers. For example, most of their operations are in dense traffic markets without an obligation to provide continuing service to smaller markets; their operations are confined to a relatively limited geographical area resulting in little, if any, aircraft positioning and crew layovers; the nature of their operations (turn-around commuter service) lends itself to high equipment utilization and employee productivity, dense seating configurations, minimal ground handling and on-board amenities and service, and standardization of aircraft. Additionally, in Texas, Southwest Airlines has a decided advantage in the dense Dallas-Houston market because it operates without competition into and out of close-in Dallas Love Field and Houston Hobby Airport while the interstate airlines are committed to use the Dallas/Fort Worth Regional Airport and Houston intercontinental Airport situated at greater distances from their respective cities.

The history of intrastate airlines in California prior to regulation by the CPUC is an illustrative case study of the vagaries of air transportation in an unregulated environment. During the 20-year period prior to the advent of route protection by the CPUC, no fewer than 14 airlines went bankrupt leaving PSA and Air California as the lone survivors of the competitive bloodbath. The public outcry for a stable and dependable system of air transportation, and the pleas of PSA for route security to enable the carrier to attract the necessary financing for new equipment led to the regulation of entry by the CPUC in 1965.

Myth No. 6: A recent study by the General Accounting Office proves that airlines could save consumers over a billion dollars in a deregulated environment.

The Facts: Many critics of airline regulation, including the Carter administration, cite the report of a recent General Accounting Office (GAO) study to support their case for deregulation. Close analysis of this report reveals that it is faulty and inaccurate in many respects, and proves little, if anything, when applied to the real world of scheduled air transportation. The report, dated February 18, 1977, was requested by Senator Edward Kennedy (D-Mass.) who asked the GAO to review a study published in 1972 by Dr. Theodore E. Keeler, Professor of Economics at the University of California (Berkeley). The Keeler study purported to compare airline fares regulated by CAB in 1969 with estimates of fares the airline industry might have charged had it not been regulated.

The report's conclusions and recommendations are as follows:

"Based on this report, we believe that markets now served by the trunk airlines could be profitably served at a lower total cost per passenger, and that passenger fares could be lower as a result. The arguments for greater reliance on a more competitive market to determine services and prices are persuasive, but this report does not answer a number of questions about what might happen if the form of airline regulation were changed or if regulation were abandoned completely.

"We recommend that CAB continue to work toward improving airline efficiency under its existing legislation by emphasizing higher load factors, higher seating densities, and the other factors identified in this report and by increasing its reliance on competition to determine service and prices.

"We also recommend that the Congress, as part of its current reexaminaton of the need for economic regulation of the airline industry, provide to CAB legislative guidance defining current national objectives for air transportation, and the extent to which increased competition should be used to achieve those objectives.

"Both CAB and the Congress should allow for reasonable transition periods to avoid undue disruption of the air transportation system."

The major criticism of the GAO report is its assumption of a fare elasticity of demand factor of -1.3. This simply means that if fares are decreased by, let's say, 20%, air travel would increase by 26% ($1.3 \times 20\%$). This factor was arrived at arbitrarily after reviewing the estimates of a number of studies. Comparatively, CAB, in its Domestic Passenger Fare Investigation, arrived at a fare elasticity of demand factor of -0.7, or about one-half of the GAO factor. This figure comports more accurately with actual airline experience, and though the GAO recognized this, it nevertheless stuck with its more inflated assumption.

Additionally, the GAO report is based on airline cost experience derived by Professor Keeler in the period 1967 to 1969. This data is outmoded for several reasons and, consequently, has resulted in unrealistic conclusions when compared to the facts in today's operating environment.

First, the 1960's were boom years for the airlines in which traffic growth outpassed available capacity, causing load factors to be unusually high. This was followed by an unexpected economic recession accompanied by depressed traffic and aggravated by the deliveries in the early 1970's of new wide-bodied aircraft. This produced an excess of capacity and correspondingly low load factors.

Second, during the latter half of the 1960's CAB awarded a substantial number of routes, causing significant differences in the service patterns and operating results of the carriers, none of which was considered in the earlier data complied by Professor Keeler and relied upon by GAO.

Third, the Domestic Passenger Fare Investigation (DPFI) came some time after the Keeler study, and the standards which have been implemented by CAB as a result of the DPFI have had considerable effects on airline pricing. These effects have not been taken into account in the GAO study.

Finally, significant cost increases, particularly in jet fuel, have profoundly affected airline operations, but again, have not been incorporated in the calculations by Professor Keeler or GAO.

In summary, although the theories of the GAO report appear to be dispositive on the surface, they simply cannot withstand the scrutiny of an analysis based on the operating characteristics in today's real world. About all that can be said for the report is that it presents, in the form of an "authoritative" government study, a familiar theory of air transport economics; namely, that if you put more seats in an airplane, and you put more passengers in those seats, you can spread the costs over a broader base and thereby reduce the unit price. "The problem with this theoretical study is that it does not square with the economic facts of life in the operation of a competitive interstate airline network, regulated or unregulated.

Myth No. 7: Airline employees will not be adversely affected by deregulation.

The facts: This contention is difficult to rebut for two basic reasons. First, nobody really knows for sure what requirements will be imposed on airline managements by the final legislation, or how they will respond in terms of total size and make-up of their work forces. Second, nobody knows positively what the state of our national economy will be, particularly during the transition phase to a more deregulated environment; and economic health coupled with the airlines' response relative to it are the principal factors which impact on employment.

What we do know for sure is how managements have reacted in the past to unusual economic factors and major operational adjustments in terms of the treatment of employees. For those who question the concerns of airline employees about deregulation, we suggest they talk to any one of the more than 10,000 employees who were furloughed during the period immediately following the government's allocation of jet fuel in early 1974. Many of these workers are still without their jobs in the industry and have little hope of returning to them. If that is not enough, we suggest they talk to any one of the more than 6,000 Pan Am employees who in a three-year period from 1973 to 1976 were handed their walking papers as that airline restructured its system in order to survive the intense international competition which forced Pan Am to abandon numerous markets throughout its vast overseas network.

We also know, as does every observer of the airline industry, that several major carriers are in shaky financial straits for a number of reasons unrelated to the regulatory policies and practices of CAB. These companies could be faced with bankruptcy if some of their healthier competitors are permitted to pirate the traffic on some of their more profitable routes. As a mater of fact, the employees of a number of carriers have agreed to defer wage increases and other benefits in a concerted effort to help their companies through the difficulties caused by high inflation and runaway fuel prices. And, to those who believe that the members of the "airline fraternity" will have sympathy for their weaker brothers, we say: "You simply don't fully appreciate the intensity of competition in this industry."

Some, including "responsible" public officials, have stated that it is conceivable that a few weaker airlines will not make it through the transition to a more competitive environment. They have attempted to soften their statements by assertions that such carriers will more than likely fail even under the current regulatory system. The latter belief may make sense if the national economy never regains normal good health; but, given reasonable economic vitality, even the weakest airlines have proved they can operate profitably.

One should deduce from this that airlines and their employees and the traveling and shipping public would all be much better off if our national economic problems were solved—a job which rests squarely in the hands of the executive and legislative branches of the federal government.

Myth No. 8: Air safety is not an issue in the deregulation debate; only economic regulation of the airlines is being argued.

The Facts: The proponents of deregulation continually point out that the proposed legislation only addresses the economic regulation of the airlines; the safety regulations of the Federal Aviation Administration will not be changed. We do not disagree with this assertion, but we do take issue with the conclusion that safety, therefore, will not be affected. To take comfort in the regulations and enforcement responsibility of FAA is to avoid the safety question. Airline crews and mechanics, whose work is totally safety oriented, understand and appreciate the close correlation between airline economics and

safety regardless of FAA regulations and enforcement powers.

The primary factor in airline safety is cost. Maintenance of high safety standards is extremely expensive, whether measured in terms of equipment, facilities, maintenance reliability or by operating procedures and conditions. This fact is often taken for granted because it is rarely visible to the consumer of airline services. Nonetheless, airline companies have invested millions of dollars in on-board safety systems, personnel training facilities and programs, and aircraft maintenance and overhaul buses, which for the most part cannot be translated into economic efficiency. It is simply the price which must be paid to achieve the highest possible degree of safety in airline operations.

The relationship of deregulation to safety can be addressed in at least three areas: commuter replacement, new entry and "the cost squeeze."

COMMUTER REPLACEMENT

The substitution of computer airlines for trunk and local service carriers in small markets has been heralded as a major reform which would reduce costs to consumers. The principal reason for this cost savings is that small two-engine piston aircraft are cheaper to purchase and operate than larger jet turbine planes. However, a significant component in the cost differential is related to the disparities in FAA's Federal Aviation Regulations (FAR's) governing commuters and CAB-certificated airlines. Commuter airlines, which operate small aircraft, are governed by less stringent airworthiness standards and general operating and flight rules than those which apply to the CAB carriers. These standards and rules are contained in FAR Part 135 for commuters and in FAR Part 121 for the certificated airlines.

The disparities between FAR Part 121 and FAR Part 135 cover the entire spectrum of air transport operations. For example, Part 135, unlike Part 121, allows flight operations under certain conditions without a copilot provided the aircraft is equipped with an operative autopilot. Part 121 aircraft must have airborne weather radar equipment, and all two-engine aircraft must be able to operate safety on only one engine. Neither requirement is contained in Part 135. Part 121 requires all operators to have FAA-approved maintenance and inspection programs, and initial and recurrent training programs for maintenance and inspection personnel. Part 135 operators are not required to have either. Part 121 standards for pilot qualification, initial and recurrent training and medical examinations are significantly more rigorous than those for Part 135 pilots.

Finally, Part 121 requires flight dispatchers and other ground personnel to perform preflight preparation and inspection duties, while under Part 135 such duties and responsibilities are left to the pilot. And the list goes on and on. It should be abundantly clear to even the casual observer that the less stringent regulations for commuter operators represent substantial cost savings and have obvious safety implications.

The cost impact of upgrading from Part 135 to Part 121 is substantial as evidenced by the recent experience of Air New England, which was certificated by CAB as a local service carrier in January of 1975. In his testimony before the Senate Aviation Subcommittee in March 1977, the president of Air New England testified as follows on this point:

"The major factor which increased the magnitude of the loss after certification was the costs associated with the introduction of new 'large' aircraft, and the operation of those aircraft under the much more stringent and detailed Part 121 of FAA's Federal Aviation Regulations. We have testified in other proceedings that the initial cost of certification was approximately one million dollars, with annual recurring costs of around $700,000. The costs of statistical analyses and reporting requirements occasioned by CAB regulation are only a small fraction of the costs connected with the operation of large aircraft.

"If there is at least one lesson to be learned from our experience, it is that the 'freedom' to operate large aircraft is the single most important factor which inflated our costs. We were required to acquire and operate such aircraft. We must forewarn the subcommittee that any proposed legislation which provides permissive large aircraft authority for commuters will, in our judgment, have an unforeseen and major impact on the cost structure of carriers currently operating under Part 135. Under FAA, Part 121 is a whole new ball game in terms of training, manuals, safety/maintenance regulations and surveillance.

"FAA is now proposing substantial upgrading of Part 135. Having experienced regulation under both of these FAR's, we firmly believe that the public is much better served by having a closer alignment of the two safety and technical regulatory programs."

FAA is currently reviewing Part 135 standards with an eye toward bringing them more in line with those in Part 121. Needless to say, this review is encountering considerable opposition from some small aircraft operators because of the financial burdens which they would be forced to bear. What do the commuter airlines want. Very simply, a number of them want the benefits of federal certification, including eligibility for subsidy, without the burden of the increased costs associated with higher safety standards.

New Entry—Relaxed entry provisions being proposed in the deregulation legislation are designed to provide more opportunity for new companies to get into the airline business. It is not difficult to identify some of those who are certain to be encouraged to apply. Representatives of a number of them testified in support of deregulation in hearings before the Senate Small Business Committee last year. There is no question that these entrepreneurs are anxious to get started, and they are looking to deregulation to provide the ignition which will set off a spate of applications for certification. It is equally certain that they will not bring with them into the business the enormous investments in safety facilities and programs, and experienced personnel which have been a major part of the overhead of established airlines for years.

Naturally, their costs of doing business will be substantially less, and this will undoubtedly be reflected in their fares. Is it reasonable for the public to perceive the basis for this competitive advantage? Probably not. For obvious reasons, the airlines have not traditionally competed openly on the matter of safety, and we would not expect them to do so in the future. Nonetheless, because of their "lower fares," "more efficient operations" and assumedly "innovative services," CAB would be hard-pressed to deny these new applicants the opportunity to enter the air transportation marketplace. Who can argue in good faith that this eventuality, made possible by the reform of economic regulation, has no relationship to safety? But, you say, these applicants would have to prove to CAB that they are "fit, willing and able"—that they have the financial resources to conduct viable, safe operations. Furthermore, they would be required to meet the same FAA safety standards that govern existing carriers.

First of all, this presumes that existing airlines operate at the minimum level of FAA standards. Nothing could be further from the truth. Most certificated airlines today operate according to standards which far exceed the minimums required by FAA.

Second, it presumes that FAA has the ability, financially and administratively, to monitor air carrier operations sufficiently to protect the public from all manner of unsafe practices. Again, nothing could be further from the truth. As a matter of fact, under the present system, the airlines and their employees monitor themselves under a delegation of responsibility from FAA. Even with this delegation, the resources of FAA are stretched to the limit.

Routinely, airline employees call attention to deficiencies in airline operations and the ATC system only to find that FAA lacks the manpower or the time to follow up with an investigation and appropriate remedial recommendations. Employees or their representatives are often left to bargain with their employers and FAA to achieve improvements in the interest of safety. It would be unconscionable if new companies with little or no air transport experience were permitted to conduct their operations without close surveillance by FAA. To our knowledge, the cost to the taxpayer of this additional responsibility has not been calculated or programed into FAA budget projections. It would be the height of folly not to begin planning for this demand.

Third, the "fit, willing and able" test, which is expected to screen out potentially unsafe new entrants, presumes that the financial requirements to start up an airline operation between two points are so enormous as to discourage at the outset all those who do not have ready access to huge pools of capital. This is wishful thinking. The procurement of equipment, personnel and working capital sufficient to conduct a spartan point-to-point service would be relatively easy in today's economy. Modern widebody aircraft, such as the DC-10, are available for leasing for relatively modest amounts. Pilots with air transport rating are plentiful considering the furloughs in the industry and the veterans of the Vietnam war. Jet fuel is once again plentiful, albeit at higher prices. And capital for potentially successful new enterprises can be obtained in the money markets without extraordinary difficulty.

Given these facts, what evidence could CAB require to deny a new applicant's entry into the airline business, especially if the Board could defer to FAA to guarantee that the new carrier performed according to its minimum safety requirements. Any other requirements would give the applicant the right to cry "Foul," because the reforms which he has sought for so long, once enacted, will have raised his expectations of a new day in airline regulation.

"The Cost Squeeze"—Finally, we must be concerned about the effects on safety which can be expected when carriers, both new and existing, are faced with extreme cost pressures related to their struggle to survive in an intensely competitive environment. This phenomenon is difficult to quantify, but past experience and common sense tells us it does exist. New companies cannot be expected to invest huge sums of money to enhance the margin of safety when their principal objectives are to establish themselves in the marketplace and to maximize the efficiency of their operations to recover their basic costs. There simply is no competitive advantage to be gained by investing in safety, and expenditures in this area would not contribute significantly to operating efficiency. Conversely, if a carrier is confronted with severe financial difficulties, where completion of every flight really counts, the temptations to cut corners in safety could be overwhelming.

Extraordinary vigilance by FAA would be mandatory in a deregulated environment to guard against a relaxation of safety practices and procedures, particularly in that segment of the industry which lacks experience in air transportation and a long-standing commitment to safety.

UNITED WAY FORESEES EROSION OF FUNDS

Mr. WALLOP. Mr. President, for the past 20 years Natrona County, one of the largest counties in the State of Wyoming, has had quality community services and funds provided by the United Way. The counties of Wyoming do not have large populations but the residents do get involved. This year's drive and services will involve some 30,000 people of a net population of 63,000. It troubles me when I receive a letter from the Natrona County United Way expressing their concern that inflation will erode the funds that are expressly designated to help people.

It is my contention that the Members of Congress must take note of the injustice which we create. Can we never begin to critically examine all legislation that comes before us to measure the effect it will have on our economy? At the present time about half of the Federal budget is "indexed" to inflation. If the Congress keeps on planning for inflation to be part of our economy we will never rid ourselves of it.

I, therefore, feel that the Senate should have the opportunity to read both the letter and resolution passed by the Natrona County United Way asking for relief of the erosion of their funds. I ask unanimous consent that the text of the letter and resolution be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNITED WAY OF NATRONA COUNTY,
Casper, Wyo., June 21, 1977.

Senator MALCOLM WALLOP,
U.S. Senate,
Washington, D.C.

DEAR MALCOLM: At its June 21, 1977, Board Meeting the United Way of Natrona County reviewed with alarm the devastating effect of inflation on its 18 agencies and passed the attached resolution prepared by the Admissions and Allocations Committee.

In Natrona County we estimate that 30,000 persons—those being helped by the United Way programs and our marvelous volunteers—are directly involved. We believe that the insidious, erosive effect of inflation will gradually deteriorate United Way programs as well as other charitable efforts in the Nation.

We place our trust in you as a spokesman against waste to do your best to speak and act as our Senator to eradicate inflation. We are confident that you are responsive to this problem because, by coincidence, today's paper carried the news release of your plan to achieve fiscal balance for the Nation.

Best personal regards,

FRANK B. ODASZ, P.E.,
Chairman, Admissions and Allocations Committee.

RESOLUTION

Whereas, the United Way of Natrona County has just finished its 1977–8 Allocations and Admissions hearings, and

Whereas, 30,000 persons in Natrona County are directly involved in its 18 agencies, and

Whereas, Natrona County, in general, and Casper, in particular, are feeling the impact of expanded economic activity, and

Whereas, the Allocations and Admissions Committee has observed that just increases due to inflation alone have lead to a budget recommendation in excess of the Goal Committee's safe and reasonable target, and

Whereas, inflation is also eroding the real contribution to the United Way by many charitable retired individuals who find the value of their fixed incomes to be diminishing, and

Whereas, the long-term result of these dual adverse effects of inflation could destroy the beneficial value of the United Way concept of "People Helping People."

Now, therefore, let it be resolved that the United Way of Natrona County respectfully request the Wyoming Congressional delegation and the Wyoming Legislature to do its best to examine critically each bill, program, and activity with the objective of eliminating inflation.

STATEMENT ON THE SENIOR CITIZEN INTERNSHIP PROGRAM

Mr. WILLIAMS. Mr. President, I am pleased to add my name as a cosponsor to Senate Resolution 219, a resolution establishing a senior citizen internship program in the Senate.

As former chairman of the Senate Committee on Aging, I have long recognized the immense talents and experience that older Americans can contribute to Government. It was my privilege to have had four distinguished senior citizens working on my staff while I was chairman. They proved to be of invaluable assistance to me and to the other members of my staff, especially in relaying the concerns and interests of my elderly constituents. They showed beyond a doubt that the special abilities and insights of older citizens do not disappear upon retirement; rather, that the years after retirement can often be the most productive.

It is the wish and need of many older Americans to remain active after their working years are over. It was Congress' recognition of this need that led to the creation of such programs as the retired senior volunteers program in the Older Americans Comprehensive Service Act Amendments of 1969, of which I was honored to be a principal sponsor. To illustrate the remarkable success of this program, in fiscal year 1976 170,000 senior citizens volunteered their time and energies in 700 local projects. Indeed, the RSVP program has proven to be so popular that the funding level for fiscal year 1978 has been increased to provide for 250,000 volunteers in 679 projects.

It is therefore with the greatest enthusiasm that I look forward to the establishment of a senior citizen internship program in the Senate. The program will give Senate offices which may have been restrained by budgetary considerations from hiring senior citizens in the past the opportunity to sponsor an intern for 2 weeks. One hundred of our most active and politically aware senior citizens will have the chance to take part in discussions and seminars with spokespersons from national senior citizens organizations and Government agencies, and gain perspectives on how to translate this experience into action in their communities. In return, I know that we cannot help but benefit from the considerable abilities and energies these citizens are sure to possess. I therefore urge quick passage of this most worthwhile resolution.

SAFEGUARD AGAINST CRIME

Mr. ROTH. Mr. President, I would like to bring to the attention of my colleagues a most praiseworthy community project undertaken by the Kiwanis Club of Wilmington, Del., as part of the major emphasis program of Kiwanis International this year called "Safeguard Against Crime."

The Kiwanis Club of Wilmington has prepared an excellent brochure entitled "How To Hold a Family Council Against Crime Resistance." Some 40,000 copies of this brochure are being distributed in Wilmington through urban churches, Boy Scout groups and other community organizations. The booklet has been endorsed by the Federal Bureau of Investigation and has been a joint venture of the club and the Wilmington Bureau of Police. Local radio stations are cooperating in the dissemination by playing tapes announcing the brochure's availability and where it can be obtained.

The brochure lists specific actions families can take to prevent crime against themselves and their neighbors. The booklet says that a proven way to cut the risk of becoming a victim of crime rests in a family following three logical steps: discussing in detail the potential dangers to each member of the family; adopting a course of action for each family member to best avoid circumstances which create opportunities for criminals; and assigning specific responsibilities to each family member to insure that their residence and property are safe from criminals.

Specific actions to avoid becoming a crime victim are listed for women, children, the elderly and house and apartment dwellers. The brochure also prominently displays the police emergency telephone number and lists the services offered by the Wilmington Police Community Crime Prevention Division.

Mr. President, as you and many of my colleagues may recall, last year I offered an amendment to the Law Enforcement Assistance Administration authorization bill which would set up an office within LEAA to coordinate and manage community anticrime programs. The amendment which was, I am happy to say, enacted into law, also provides for that office to give technical assistance to community and citizen groups to help them apply for Federal grants to encourage community and citizen participation in crime prevention.

Although thus far the Wilmington Kiwanis Club project has not been a recipient of such a grant, it is, in my view, an excellent example of a prototype community anticrime program that could be duplicated across the Nation at little cost and with great effectiveness.

Mr. President, I firmly believe that the family unit is the place to begin in making our communities, our States, and our Nation less vulnerable to criminals. I want to commend the Wilmington Kiwanis Club and the director of its Family Council on Crime Resistance program,

Mr. Albert A. Poppiti, for their most important efforts in this regard.

A BEACON OF LIGHT ACROSS THE RIVER

Mr. WILLIAMS. Mr. President, those of us accustomed to the plop of The New York Times on our doorstep were badly in need of a quick fix yesterday morning when the Old Grey Lady failed to appear for her A.M. rendezvous.

Lights were out, electricity off, and for those of us in Washington—the cruel fate of no Times. A bad way to launch a Thursday.

Yet, my colleagues may be interested to know that many in the New York area suffered no such indignity. Through a journalistic helping hand rendered by The Record of Bergen County, N.J. most of the Times' patrons were able to read a distilled version of "almost all the news fit to print."

New Jersey gave the Statue of Liberty enough juice to shine bright through the crisis, and The Record gave The Times to the world. New Jersey is proud.

Regular Record readers know that this is not the first time it has led the way for its better known rival across the river. By preparing 40 pages of The Times' Thursday edition, The Record made publishing history and earned a vote of thanks from us all.

Mac Borg, The Record's publisher, and his talented staff deserve credit for producing two excellent papers on a muggy and eventful Thursday in July.

SUPPORT OF DEFENSE AUTHORIZATION ACT

Mr. McINTYRE. Mr. President, I wish to make a statement in support of the conference report on H.R. 5970, the Department of Defense Authorization Act of 1978. I was not able to address my colleagues at the time this measure was approved yesterday. However, as chairman of the Armed Services Subcommittee on Research and Development, I would like to take this opportunity to highlight some points of interest in action taken by the conference in the research and development area.

The conference bill authorizes $11.29 billion for research, development, test and evaluation. This is a reduction of $430 million from the Department of Defense request, and a reduction of $180 million from the Senate bill, but in my judgment will provide for the orderly development of new weapons and sustain our vital technology base.

There was the normal amount of give and take in the conference and I would like to highlight a few of the areas where the House and Senate bills differed and explain their resolution.

First, in the area of NATO weapons standardization, the House made severe cuts in programs which in my judgment are important to improving standardization, whereas the Senate supported these programs. In general the House receded to the Senate and the work toward greater standardization will go on. These programs include:

Foreign weapons evaluation;
Roland air defense missile system;
NATO airborne warning and control;
An Army artillery battery level computer; and
NATO IFF—identification friend and foe—standardization.

A second area of difference was the extremely low frequency (ELF) system for communicating with our submarines. The Senate bill contained funds for development of this system, the House bill did not. I recognize the controversy that has surrounded this program for years, but I also recognize the importance of it to the continued survivability of our submarines. Therefore, I am pleased to report that the House accepted the compromise solution proposed by the Senate. Our compromise will continue development of the technical components while the Navy seeks to design a system that will meet its minimum operational needs, which in turn will reduce the size and scope of the ELF transmitter site.

A third area of difference has to do with the role of the Department of Defense laboratories. The House bill contained a provision that would have prevented increasing the portion of research and exploratory development funds which go to private companies and universities. I personally oppose such a restriction because I feel the strength of this country has been and must continue to be our free enterprise system. However, in the spirit of compromise, the Senate accepted a temporary freeze of the status quo, lasting no later than March 1978, while the new team at the Pentagon studies the utilization of the in-house laboratories. The services must have a reservoir of technical talent to insure they are smart technical buyers. On the other hand, the in-house laboratories tend not to have the flexibility and diversity available in private industry and in the universities. This will be a matter of concern next year and one we will pursue very carefully.

Another program of concern is the Navy request for funds to continue the deep submergence technology work. This program is to build a test vehicle to develop specifications, design guidelines and fabrication procedures for construction of submarines with an improved steel. The committee feels there are less expensive alternatives for achieving this objective and in its report accompanying the Senate bill asked the Navy to reconsider the available options. However, it is not the intent of the committee to terminate or to unduly delay this program. Therefore, after the Navy has completed its review and advised the committee of the results, it may be in the best interest of this program to consider reprogramming funds in fiscal year 1978.

Mr. President, the distinguished chairman of the Committee on Armed Services has already discussed the importance of improving our airlift force and of the programs included in this bill for that purpose. The Research and Development Subcommittee conducted hearings on the airlift programs this year and in my capacity as chairman of that subcommittee I would like to comment on one program in particular, the Civil Reserve Air Fleet (CRAF) modification program.

The intent of this program is to modify commercial wide-body 747 and DC–10 passenger aircraft so they can carry military equipment in times of national emergencies. Department of Defense and Air Force witnesses have testified that this is the most cost-effective way to increase our airlift, since the Department of Defense does not have to bear the burden of the annual operating costs during the long periods between times of national emergencies.

The major impediment to progress on the CRAF program has been the inability to work out satisfactory contractual arrangements to carry out the intent of the program. The report accompanying the Senate version of the authorization bill stated that no funds would be authorized until the Department of Defense presented a satisfactory plan for achieving the original intent.

Between passage of the Senate bill and the conference, Department of Defense and Air Force representatives presented an approach which supported the original intent of the program and which led to the compromise in conference. The major feature would be a lump sum payment to cover the modification costs, downtime costs and the operating differential that results from the modification. By making one payment, the extent of the government obligation is clearly defined and not an open-ended obligation that must be reevaluated each year.

In return the airline would guarantee the aircraft would be available in national emergencies for 14 years. If the airplane did not remain in active passenger service, the airlines would be required to reimburse the Government for the modification and operating costs. The rate of reimbursement has not been worked out but it would be related to how long the aircraft was in the CRAF program. The longer it is included, the smaller the payments.

This approach meets the original intent of the program, that is, increasing total airlift capacity that can move Army equipment. If satisfactory contractual arrangements and costs can be worked out along the principles I have discussed. then the CRAF program may indeed make an even greater contribution to our national defense.

The conferees agreed to authorize $15 million, enough for one major modification to a 747 and one mini-mod. This should serve as a thorough test of the concept and serve as a basis for evaluating the program next year.

Finally, I want to correct for the record a printing error in the statement of managers accompanying the conference report. The error is on page 31, in item 273 of the table showing the summary of conference action for Navy R.D.T. & E. The correct amount agreed upon by the conferees for R.D.T. & E. ship and aircraft support is $52.462 million instead of $56.462 million.

I think these examples clearly illustrate the sense of importance attached to this bill and the seriousness of the debate by myself and my colleagues on the Commit-

tee on Armed Services. I am pleased with the Senate's approval of this report yesterday.

PRELIMINARY NOTIFICATION OF PROPOSED ARMS SALES

Mr. HUMPHREY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in this act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that five such notifications were received on July 8, 1977.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room S-116 in the Capitol.

DEPARTMENT OF DEFENSE ANNUAL REPORT ON INDEPENDENT RESEARCH AND DEVELOPMENT

Mr. McINTYRE. Mr. President, section 203, paragraph (c) of Public Law 91-441 requires the Department of Defense to submit an annual report to the Congress on independent research and development, I.R. & D.; and bid and propose, B. & P., costs. The report for 1976 has been received and I ask unanimous consent to have the report entered into the RECORD at the conclusion of my remarks. In the interest of brevity, I shall refer to the categories of cost as I.R. & D.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. McINTYRE. Mr. President, I would like to summarize the financial data and comment on its significance. Last year it was estimated that the payments to contractors by the Department of Defense for I.R. & D. in 1975 would be $811 million. The actual data provided this year shows that indeed $811 million was paid by the Department of Defense. But let me point out that the total DOD share of I.R. & D. costs was greater than expected, but this was offset by an equal increase in the amount absorbed by sales to foreign governments.

The estimate for I.R. & D. costs to DOD for 1976 is $845.2 million, an increase of $34.2 million or about 4 percent over 1975. Considering the impact of inflation, this must be viewed as a real decrease. However, this estimate assumes that $112.8 million will be recovered from sales to foreign governments and it is not clear at this time that that amount will be realized.

Mr. President, the costs for I.R. & D. are high but I believe that the present system strikes a good balance between controlling these costs and giving our defense industry sufficient flexibility to maintain a strong technological base. The purpose of I.R. & D. funds is to make sure there are qualified bidders to propose on DOD programs. It is the price we pay to make sure we have companies that are on the forefront of technology and prepared to bid on new projects.

There have been concerns expressed in the past that the Congress does not have adequate control of I. R. & D. funds. I do not share that view.

It is clear that the process now used by DOD to control the amount spent for I. R. & D. is not allowing wild increases, in fact, there is probably a decline in real value. If Congress were to become more involved in allocating these funds, it would mean that Congress would soon have to deal with choices as to which company should be proficient in which technology. Clearly, those decisions must be left to the individual companies. In my judgment the present system strikes a good balance between control and flexibility.

Mr. President, in summary, I am convinced that the investment we make in independent research and development is not only prudent but essential. It is one part of the total investment to preserve our technological leadership and is one that has paid rich dividends.

EXHIBIT 1

ASSISTANT SECRETARY OF DEFENSE,
Washington, D.C., March 15, 1977.

HON. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: The Secretary of Defense has requested that I prepare and submit to you the report of Independent Research and Development and Bid and Proposal costs required under Section 203, paragraph (c) of the 1971 Department of Defense Appropriation Authorization Act (PL 91-441). This section requires the submittal of an annual report to the Congress on or before March 15th each year setting forth—

"(1) those companies with which negotiations were held pursuant to subsection (a) (1) of this Section prior to or during the preceding fiscal year of the Federal Government, together with the results of those negotiations;

"(2) the latest available Defense Contract Audit Agency statistics, estimated to the extent necessary, on the independent research and development or bid and proposal payments made to major defense contractors, whether or not covered by subsection (a) (1) of this section during the preceding calendar year; and

"(3) the manner of his compliance with the provisions of this Section, and any major policy changes proposed to be made by the Department of Defense in the administration of its contractors' independent research and development and bid and proposal programs."

The report is in three parts corresponding to the three items quoted above. Parts I and II were compiled from detailed data pertaining to individual companies. This detailed company information is very sensitive and is not included in the report; however, it will be made available for review.

Sincerely,

———— ————,
Acting Assistant Secretary of Defense,
(Installations and Logistics).

Enclosures.

REPORT TO THE CONGRESS ON INDEPENDENT RESEARCH AND DEVELOPMENT COSTS AND BID AND PROPOSAL COSTS

This report covers the fiscal year ended 30 June 1976 and transition quarter ended 30 September 1976.

Furnished in compliance with Section 203, paragraph (c) of the Department of Defense Appropriation Authorization Act of 1971 (PL 91-441), March 1977.

PART I

Companies with which negotiations were held pursuant to Section 203 prior to or during the preceding fiscal year of the Federal Government and the results of those negotiations.

In accordance with the above requirement the attached Schedule A provides data pertaining to the negotiations conducted in the Government's fiscal year 1976 and Schedule B provides data pertaining to the negotiations conducted in the Government's fiscal year 1976.

SCHEDULE A

I.R. & D./B. & P. REPORT, PT. 1—NEGOTIATIONS COMPLETED IN FISCAL YEAR 1976 AND RESULTS OF THOSE NEGOTIATIONS

[Dollar amounts in thousands]

	Number of companies	Total program dollars proposed by contractors			Total advance agreement ceiling dollars negotiated by DOD			Estimated DOD share of ceiling dollars negotiated		
		I.R. & D.	B. & P.	Total	I.R. & D.	B. & P.	Total	I.R. & D.	B. & P.	Total
Contractors' fiscal year:										
1975	15	$247,481	$93,849	[1] $340,361	$184,434	$74,338	$258,772	$87,200	$46,807	[1] $134,008
1976	46	703,306	316,739	1,020,045	555,632	264,482	820,114	310,392	182,905	493,297
1977	14	335,613	173,346	508,959	252,160	151,610	403,770	147,063	101,734	248,797
1978	3	251,209	61,890	313,099	198,300	51,070	249,370	35,010	28,972	63,982

[1] Discrepancies in totals represent rounding off of DCAS submissions.

SCHEDULE B

I.R. & D./B. & P. REPORT, PT. 1—NEGOTIATIONS COMPLETED IN FISCAL YEAR 197T AND RESULTS OF THOSE NEGOTIATIONS

[Dollar amounts in thousands]

	Number of companies	Total program dollars proposed by contractors			Total advance agreement ceiling dollars negotiated by DOD			Estimated DOD share of ceiling dollars negotiated		
		I.R. & D.	B. & P.	Total	I.R. & D.	B. & P.	Total	I.R. & D.	B. & P.	Total
Contractors' fiscal year:										
1976	2	$4,588	$3,029	$7,617	$4,421	$2,079	$6,500	$4,421	$2,079	$6,500
1977	3	4,865	5,465	10,330	4,400	4,960	9,360	2,866	3,402	6,268
1978	1	2,450	3,900	6,350	2,350	3,590	5,940	1,669	2,549	4,218

PART II

Latest available Defense Contract Audit Agency statistics, estimated to the extent necessary, on the Independent Research and Development (IR&D) or Bid and Proposal (B&P) payments made to major defense contractors, whether or not covered by Subsection (a)(1) of this Section [203, PL 91-441] during the preceding calendar years.

The statistics required are provided in the attached DCAA report. The report shows total IR&D and total B&P costs incurred by the contractors reviewed, the amount accepted or recognized by the Department of Defense and the DoD share. In addition, total sales of the contractors are shown along with the portion representing DoD sales.

The amount listed on Page 1 under the column heading "Amount Accepted by Government" represents the sum of the ceilings negotiated with individual contractors as well as the sum of amounts recognized for other contractors who had no advance agreements. These accepted amounts are not the costs reimbursed by the DoD but are the amounts that the DoD recognizes for allocation to all the contractors' business. The DoD portion is shown under the column headed "DoD share."

On pages 2 and 3 of the report the totals shown on page 1 are broken down to show, respectively, the portions applicable to contractors for which advance agreements were required, and the portion applicable to contractors for which advance agreements were not required. The foreword appearing in the DCAA report explains the basis for the cost data reported, but we would like to call particular attention to note A on page 1 regarding foreign military sales. These sales and IR&D/B&P costs should be subtracted from the amounts shown in the report to determine the amounts applicable to the Department of Defense. This adjustment is as follows (all figures are in millions):

	1975	1976
Sales to DOD per report	$24,751.0	$27,181.0
Less foreign military sales	2,158.7	3,364.6
Net sales to the DOD	22,592.3	23,816.4
DOD share of I.R. & D./B. & P. per report	882.0	958.0
Less amount absorbed by sales to foreign governments	71.0	112.8
Net costs charged to DOD	811.0	845.2

It will be noted that data for both 1975 and 1976 are furnished. It has been the practice to update data previously furnished because latest year figures include significant amounts of estimated information. The 1975 figures presented here have had most of the estimated data replaced with actual data. The report furnished next year will similarly update the 1976 data furnished herewith.

PART III

The manner of his compliance with the provisions of this section, and any major policy changes proposed to be made by the Department of Defense in the administration of its contractors' Independent Research and Development and Bid and Proposal Programs.

During the past year, we believe our implementation of Section 203, PL 91-441, has been in full compliance with that section. We have not revised any of our major policies for administration of contractors' Independent Research and Development and Bid and Proposal programs.

SUMMARY OF INDEPENDENT RESEARCH AND DEVELOPMENT AND BID AND PROPOSAL COSTS INCURRED BY MAJOR DEFENSE CONTRACTORS IN THE YEARS 1975 AND 1976

(Prepared by Defense Contract Audit Agency, March 1977)

FOREWORD

This summary report presents the latest available Defense Contract Audit Agency (DCAA) statistics on the independent research and development (IR&D) and bid and proposal (B&P) payments to defense contractors. The statistical data are to be included in the Secretary of Defense's annual report to the Congress on or before 15 March 1977, in acordance with paragraph (c), Section 203, Public Law 91-441. The data in this summary report are similar to that previously furnished to the Office of the Assistant Secretary of Defense (Installations and Logistics) (OASD) (I&L)), for contractor fiscal years 1974 and 1975.
